The word בשר is explained by the Talmudists as composed of the initials ב = בושה, "shame"; ש = שחת or שאול, "corruption" or "Sheol"; ר = רמה, "worm" (Soṭah 5a), an opinion which reflects a certain theological leaning toward the Pauline view of the sinfulness of the flesh (Rom. viii. 1; Col. ii. 11). Judaism knows nothing of the "mortification of the flesh" (see ABSTINENCE; ASCETICISM; BODY); the vows of castigation are called "nidre 'innui ha-nefesh," not "ha-basar" (Yer. Ned. xi. 42c). The "mortifications" on Yom ha-Kippurim consist in

abstaining from eating and drinking, washing, ointments, shoes, and cohabitation (Yoma 76a). "Flesh and fish" represents substantial food as against a vegetable diet (Shab. 140b; compare the English expression "neither flesh, fowl, nor fish," or the German "weder Fisch noch Fleisch").

E. G. H.

FLEXNER, SIMON: American physician and pathologist; born at Louisville, Kentucky, March 25, 1863. He received the degree of doctor of medicine at the University of Louisville, and continued his studies at Johns Hopkins University and the universities of Strasburg and Prague. Flexner was formerly assistant professor of pathology at Johns Hopkins University, and is now (1903) professor of pathology at the University of Pennsylvania. He has recently been appointed head of the Rockefeller Institute of Preventive Medicine, New York. In 1900 he served as a member of the Johns Hopkins University Medical Commission to the Philippine Islands, and in 1901 as a member of the National Plague Commission. Flexner is a member of numerous learned societies, among them being the Association of American Physicians, the American Philosophical Society of Philadelphia, the Washington Academy of Sciences, and the Medico-Chirurgical Society of Bologna. He has published numerous papers on medical subjects, principally original researches in pathology and bacteriology.

A.

FLISFEDER, D. I.: Russian physician and scholar; born about 1850; died in 1885 at Kishinev, where he had settled a few years previously. Flisfeder was best known for his writings in Russian on the Jewish question. When only twenty years old he wrote for the "Novorosiski Telegraf" (1870, p. 1) an article on the Jews of Kiev under the title "Yevreï v Kievye." Under the same title he wrote also for the "Kievski Telegraf" (1872, pp. 120–130) and for the "Kievlyanin" (1880, p. 206). His two important works on the Jewish question are "Yevreï i ikh Uchenie ob Inovyertzakh," St. Petersburg, 1874, an essay on the Jewish teaching concerning people of other religions; and "Yevreiski Vopros pred Sudom Istorii," *ib.* 1882, which bears on the Jewish question.

FLOGGING. See FINES AND FORFEITURE.

FLOOD, THE (Hebr. מבול; LXX. *κατακλυσμός*). —**Biblical Data** (Gen. vi. 9–ix. 17): When God on account of man's wickedness resolved to destroy by a flood all mankind and all the animal world, only Noah and his family and two (or seven) pairs of every living species were excepted. To save them Noah was bidden by God to build a huge chest or ark, in which they were hidden during the Flood. When the waters abated and the ark rested on one of the mountains of Ararat, Noah sent forth a raven and doves, and when the second dove returned with an olive-leaf in her mouth, while the third dove did not return, it was proof that the ground was dry. On leaving the ark, Noah built an altar and offered sacrifice, which God accepted, promising to curse the earth no more. He blessed Noah and made a covenant with him and his descendants, signified by the rainbow. In later literature this event is alluded to in Ezek. xiv. 14, 20; Isa. xxiv. 5, 18; liv. 9; Ps. xxix. 10; Job xxii. 15 *et seq.*

E. G. H. W. M.-A.

——**In Rabbinical Literature:** When Noah was four hundred and eighty years old all the righteous sons of men were dead, except Methuselah and Noah himself. At God's command they both announced that one hundred and twenty years would be given to men for repentance; if in that time they had not mended their evil ways, the earth would be destroyed. But their plea was in vain; even while Noah was engaged in building the ark the wicked made sport of him and his work, saying: "If the Flood should come, it could not harm us. We are too tall; and, moreover, we could close up with our feet [which were of monstrous size] the springs from below." (Being descendants of the "sons of God," they were of immense stature; see FALL OF ANGELS; GIANTS). In fact, they resorted to these tactics; but God heated the water, and their feet and the flesh of their bodies were scalded (Pirḳe R. El. xxii, end).

According to another version (Midrash ha-Gadol, ed. Schechter, p. 145), Noah was asked what kind of flood was to come upon the wicked: if a flood of fire, they had a fire-animal, 'alitha, the name of which would act as a spell against fire; if of water, they had sheets of iron wherewith to cover the earth so that no water could come through from below; but in case the waters descended from above, they had another contrivance by which to escape — the "'aḳob" or "'aḳosh" (sponge; Sanh. 108a, b). The sins of the "men of the generation of the Flood" (Sanh. 88b *et passim*) are variously given. They were proud and therefore shameless, parading the earth in a state of absolute nudity (Tanna debe Eliyahu, xxxi.). They were licentious and lascivious (Sanh. 108; Midrash ha-Gadol, pp. 142–146), so that even the animals followed their example (*ib.* p. 153; Tan., Noah, ed. Buber, p. 5). They were robbers; in daytime they marked the houses of the rich with balsam, to find them by means of the odor in the dark (Midrash ha-Gadol, p. 142; Gen. R. xxi., xxvii.). They denied God (Midrash ha-Gadol, pp. 144, 145). A respite of 120 years was granted that Methuselah might complete his allotted life (*ib.* p. 144; "Sefer ha-Yashar," ii.); after his death seven more days were allowed as days of mourning ("shib'ah"). During these seven days God changed the natural order of things, converting day into night and vice versa, to remind the wicked of their perversion (Midrash ha-Gadol, p. 155; Sanh. 108b).

Causes of Flood.

Noah himself had not much faith; he did not enter the ark until the water had reached his knees (Gen. R. xxxii.). God covenanted with him that the fruit he took with him would not spoil or mildew, or lose color; also that none of the giants would stop up the abyss. The lion came to him tamed and with teeth dulled (Gen. R. xxxi.). As the waters rose the true character of Noah's contemporaries became evident; with extreme cruelty they hurled their own children into the abyss in an endeavor to stay the

rising flood (Tan., Noaḥ, 10). To convince these robbers and murderers that they could not destroy the ark, Noah had to enter it in full daylight (Midrash ha-Gadol, p. 158; Gen. R. xxxii. 8; Sifre, p. 141a). Water was chosen as the instrument of destruction because man was made of dust, and water is the exact opposite of dust; because it was the first element to sing God's praises; because it enters into the composition of all that has life; because it recalled the haughty eye of the sinners (Midrash ha-Gadol, p. 152; Mek., Beshallaḥ, 37b; Gen. R. xxxii.; Sanh. 108). The waters from above met those from beneath as though the former were male and the latter female, their union producing new floods (Pirḳe R. El. xxiii.).

By displacing two stars in the constellation of Kimah (see CONSTELLATIONS) God brought on the Deluge (Midrash ha-Gadol, p. 156; comp. Ber. 58b, 59a). The land of Israel was exempt from the Flood (Pirḳe R. El. xxiii.). Noah was in the ark one whole year, during which time he did not sleep; hence his anxiety to be released (Tan., Noaḥ, 14). He sent out a raven, which, alighting upon a dead body on a high mountain, forgot its errand in the feast. The dove brought back a twig of the olive-tree, which, though bitter, she preferred, as coming from God, to any sweet thing at the hand of man; hence the proverb, "A fool employs an unclean messenger" (Pirḳe R. El. xxiii.). Noah was exceedingly annoyed by the odor of the beasts of prey (*ib.*). For the reasons for the forty days and forty nights of the flood see FORTY.

The Ark.

The year of the Flood is not included in Noah's years (Gen. R. xxxii.). The number of those coming out of the ark was exactly that of those who entered it, none having been born in the meantime (Gen. R. xxxi.). Twelve months was the duration of the punishment of the generation of the Flood. The rain lasted during the months of Ḥeshwan and Kislew; the waters increased in Ṭebet, Shebaṭ, Adar, Nisan, and Iyyar; the ark rested in Siwan on Mount Kartunja (see Midrash ha-Gadol, p. 161; 'Eduy. ii. 10; Seder 'Olam R. iv.). The confusing notation, according to both solar and lunar years, in the Biblical account is noticed by the Rabbis (Gen. R. xxxiii.). The generation of the Flood has no share in the world to come (Sanh. 108a). According to the "Sefer ha-Yashar," severe storms frequently occurred during Noah's voyage, frightening the beasts as well as Noah and his family.

E. G. H.

——**Critical View:** This story has been shown, by a careful study of the Hebrew text by scholars throughout the last century (see Cheyne, "Founders of Old Testament Criticism: Biographical, Descriptive, and Critical Studies," New York, 1893), to be a compilation by a late redactor from two (or even three) different sources, which, while agreeing in general outlines, differ considerably in details, style, and character of language. The collection or codification, in writing, of the oral traditions concerning these legends was not done by one hand nor at one period, but in the course of a very long process and by several or many hands. Many collections must have been made from time to time. Among these several have survived. Two stages are still noticeable (J^1 and J^2), to the earlier of which are referred the collections of the Jahvist (J) document and the Elohist (E) narrative; while the later is a thorough revision known as the "priestly writing" or "priests' code" (P), whose common theme was "the choice of Israel to be the people of YHWH" (Wildeboer). The oldest strata of J did not know the story of the Flood: it is preserved in the later strata (J^2, about 650 B.C.).

The Sources of the Old Testament Account.

The sections of the narrative of the Flood (see Budde, "Die Biblische Urgeschichte," pp. 248 *et seq.*; Jülicher; Holzinger; Driver, "Introduction to the Literature of the Old Testament," 7th ed., pp. 14 *et seq.*; W. E. Addis, "Documents of the Hexateuch," London; Carpenter and Harford-Battersby, "The Hexateuch. According to Revised Version," etc., New York) ascribed to J^2 are: vi. 5–8 (after which a considerable portion of the story is missing, as, for example, God's first appearance and command to build an ark, thereby testing Noah's trust and obedience); vii. 1–2b (God's second appearance to Noah), [3a], 3b, 4, 5, 10, 7 [8, 9], 16b, 12, 17b, 23ad, 22, 23b; viii. 6a, 2b, 3a (after which a sentence is missing), 6b, 8–12, 13b, 20–22. To P are assigned: vi. 9–22 (14–16 and 17–22 correspond to J^2's account in vi. 8 and vii. 1; comp. Budde, "Die Biblische Urgeschichte"; Cheyne and Black, "Encyc. Bibl." *s.v.* "Deluge"); vii. 6, 11, 13–16a, 17a, 18–21, 24; viii. 1–2a, 3b–5, 13a, 14–19; ix. 1–17, 28, 29.

The story of the Flood and similar stories show that in J^2 are contained separate legends and legend cycles; delicate and coarse elements exist side by side; they do not bear the stamp of a single definite period or time, and still less of a single personality. There is a decided anthropomorphic flavor in the account of J which is not found in P; and yet it is much purer and more spiritual than the cuneiform account of the Deluge. P preserves the more detailed account, aiming at legal clearness and minuteness, having always the same expressions and formulas, and observing a tone of prosaic pedantry, dry and monotonous; giving the early stories, and few of them at best, only as a sort of preamble to the genealogies, the chief aim of this collection. In his account P manifests a wide contrast with the vivid colors of the older narratives, lacking all the concrete elements of a story. He attaches to the legends a detailed chronology which is absolutely out of keeping with the simplicity of the old legends. Noticeable, also, are the precise form of God's promises and the sign of the covenant made with Noah. Only the objective element is considered as the important feature of his religion, which to him consists in the prescription of ceremonies, etc. He does not, in the account of the Deluge, distinguish between clean and unclean. The theophanies are not of a character usually found in the Old Testament; God appears, speaks, and then ascends; and everything characteristic of other stories is omitted (see PRIESTLY CODE). P was written from its own definite point of view after the catastrophe of the people and the kingdom of Judah, when, overwhelmed by the tremendous impression of their

General Characteristics.

measureless misfortune, they recognized that their fathers had sinned and that a great religious reformation was necessary.

It is clear, then, that J² contains the early popular legends, while P represents the later learned redaction, preserving at the same time some very old traditions. To an entirely different collection may have originally belonged viii. 7, which was inserted when the two collections J (J²) and E were later on combined by an editor, the Jahvist (Wellhausen), prior to the addition of the still later priests' code. To the final redactor (R) who united J, E, and P may be ascribed some of the brief additions and glosses.

The accounts as found now may be grouped under four headings:

I. The Cause of the Flood (vi. 5–8: J²).

II. The Preparation of Noah (vi. 9–vii. 5): Here there is a first and a second account.

(1) The first account (vi. 9–22: P) is incorporated in the text entire, including the minute instructions concerning the building of an ark, or chest (see also Ex. ii. 3), that would float on the water. The Hebrew word תבה is of disputed origin; it is translated by κιβωτός in the Septuagint and "arca" in the Vulgate (see Gesenius, "Th." 13th ed.; Jensen, in "Zeit. für Assyr." iv. 272 *et seq.*, explains the word as of Babylonian origin). The Babylonian Noah, Pêr-napishtim, builds a ship. "It is most probable that the narrator of P wishes to indicate that in the time of the Patriarchs ships were unknown" (Mitchell). Lenormant ("Beginnings of History," ch. viii.) and others maintain that the Biblical narrative bears the stamp of an inland nation ignorant of things appertaining to navigation. The ark is to be made of wood, perhaps cypress (Lagarde, "Symmicta," ii. 93; *idem*, "Mittheilungen," i. 227; *idem*, "Nominalübersicht," pp. 213, 218 *et seq.*; Cheyne, in Stade's "Zeitschrift," 1898, pp. 163 *et seq.*); it is to be built in three stories and divided wholly into cells (Lagarde, "Onomastica Sacra," 2d ed., p. 367; comp. the Babylonian account of the building of the ship). The seams are to be stopped by smearing outside and in with bitumen or asphalt. Its length is to be 300 (comp. Ezek. xl. 5) cubits = 487.2 feet; its breadth 50 cubits = 81.2 feet; its height 30 cubits = 48.72 feet; contents, 1,927,394.38 cubic feet. A roof is to be constructed, capable of being turned from above on a hinge, in order to admit of opening and closing (see viii. 13b); a door is to be at the side of the Ark. The making of the ark was God's test of Noah's confidence and obedience. Noah did as he was commanded, and brought his family into the ark, and two of every kind of living creature, male and female, as well as food for himself and for them. Notice the making of the first covenant (v. 18).

The Accounts of J² and P Combined.

(2) The second account (vii. 1–5: J) is a mere fragment. The story of the ark and its construction, no doubt originally also in J, connecting it with vi. 8, is omitted by the redactor as a mere repetition. Preserved is the command to enter into the ark with the whole family and with representatives of the whole animal kingdom, of clean animals by sevens (or seven pairs ?) suitable for sacrifices and for food (viii. 20), and of unclean by twos. The Hebrew text says "two," perhaps indicating only one pair, which would favor the interpretation of "by sevens" as "three pairs and one [male ?]." All this is to be done in seven days.

III. The Waters of the Flood (vii. 6–viii. 14): (1) Here is to be noticed the duration of the Flood (vii. 6–24; P and J² combined). The two narratives separated stand as follows: With P the Flood begins (vii. 11) in the six hundredth year of Noah, the second month and the twenty-seventh day (so with LXX.; Haupt, in Ball, "Genesis," p. 118). "This gives exactly a lunar year for the duration of the Flood (see viii. 14) instead of a year and eleven days, for which there seems no reason. Such errors in numerals are common enough" (Haupt). The waters rose for 150 days, and at the end of these 150 days they began to subside. When the Flood began Noah had lived for 600 years, *i.e.*, a Babylonian "neru." To go further into details, Noah had reached in his life the six hundredth year, the second month, and the twenty-seventh day, when the Flood began; the six hundredth year, the seventh month, and the twenty-seventh day (LXX.), when the Flood was at its height; the six hundredth year, the tenth month, and the first day, when the highest mountain-peaks began to reappear; the six hundred and first year, the first month, and the first day, when the waters had disappeared [This number is important inasmuch as P therewith indicates that the old world has ceased to be; the new will now begin. This, and not the beginning of the Flood, is the new *terminus a quo*. This beginning of the year is not the old Israelitish New-Year's Day in the autumn, when the rainy season sets in, but the beginning of the Babylonian year, the first of Nisan, when the wet season ends. P usually reckons after the Babylonian system.]; the six hundred and first year, the second month, and the twenty-seventh day, when the earth was dry, and he was able to leave the ark (see B. W. Bacon, "The Chronology of the Account of the Flood in P," in "Hebraica," 1892, viii. 79–88).

The Hebrew year originally began in the fall (see Dillmann's "Ueber das Kalenderwesen der Israeliten vor dem Babylonischen Exil," in "Monatsberichte der Berliner Akademie," Oct. 27, 1881; Muss-Arnolt, "The Names of the Assyro-Babylonian Months and Their Regents," in "Journal of Biblical Literature," xi. 72 *et seq.*); and since P elsewhere (Ex. xii. 2) distinctly attributes to Moses the change in the method of reckoning time, he would naturally reckon from Tishri in the period preceding the advent of the Lawgiver. The second month would be "Bûl" (I Kings vi. 38), later Marheshwan, beginning about the middle of October; so that the twenty-seventh of the month would correspond to the first half of November, the period when the rainy season in Palestine and the neighboring countries usually sets in. With J² the Flood begins seven days after the announcement by God. It lasts forty days and forty nights (vi. 4, 12). The rain then ceases, and after seven days, during which the waters begin to decrease (viii. 3a), Noah sends out the first dove (vii. 6b); after another seven days, another dove (vii. 10); after a third seven days, a third dove (vii. 12),

Date of the Flood.

which returns no more. He then uncovers the ark, and lo! the face of the earth is dry. Then he disembarks and offers a sacrifice, which in its description recalls very vividly the Babylonian account. This account mentions seven days of preparation, six (seven?) days of storm, and seven days of waiting after the flood-storm.

(2) The gradual subsidence is described in viii. 1-14, and belongs mostly to J². The waters had risen fifteen cubits above the highest mountain-peaks. As soon as they began to subside the ark grounded on one of the mountains of the land of Ararat (the "Urartu" of the Assyrians; see Belck, in "Zeit. für Assyr." ix. 351; Jensen, in *ib.* pp. 306 *et seq.*; Belck and Lehmann, *ib.* xii. 1-3 *et seq.*; Streck, *ib.* xiv. 103 *et seq.*; Billerbeck, "Das Sandschack Suleimania und dessen Persische Nachbarlandschaften zur Babylonischen und Assyrischen Zeit," Leipsic, 1898; Lehmann, "Armenien und Nordmesopotamien in Altertum und Gegenwart," Berlin, 1900; Nöldeke, "Untersuchungen zur Kritik des Alten Testaments"; Hastings, "Dict. Bible," i.; Cheyne and Black, "Encyc. Bibl." i. 288-290; Jew. Encyc. ii. 173, 174), precisely as in the Babylonian account the ship rests on a mountain in the land of Nisir (see Muss-Arnolt, "Concise Dict. of the Assyrian Language," pp. 716, 717; "Zeit. für Assyr." xv. 272). Mount Mas(s)is (see Friedrich Murad, "Ararat und Masis, Studien zur Armenischen Altertumskunde und Litteratur," Heidelberg, 1900; F. C. Conybeare, in "American Journal of Theology," 1901, pp. 335-337) is commonly identified with the one on which the ark rested; it is 17,000 feet high (so Targum, Syriac version; Berosus; see Cory, "Ancient Fragments," p. 63). Others identify it with Mount Judi in Kurdistan, southwest of Lake Van. The fact that the ark grounded on the very day the waters began to subside proves that the narrator assumes that of the 30 cubits of the ark's height, 15 were under water. In this he differs from the Babylonian account.

(3) Birds are sent out as messengers (viii. 6-12: J). After viii. 3a there must originally have followed an account of the settling of the ark on a mountain, perhaps in the East (Babylonia? comp. xi. 2: Wellhausen). The sending out of the three doves is a proof of the sagacity of Noah, who thereby shows himself as the Old Testament equivalent of the Babylonian Hasis-adra. The first dove returns at once; the second, with a fresh olive-leaf, at eventide, when birds return to their nests; the third does not return.

Ch. viii. 7 does not belong to the account of J (Wellhausen, "Composition des Hexateuch," p. 15; Gunkel, p. 59; Mitchell, pp. 213, 214). It is imported from another source, perhaps by the redactor of J and E (from the Babylonian story?). Ball ("Genesis," in "S. B. O. T.") would retain the verse, but change the order of sentences, placing verse 7 after 8 and 9. "This arrangement has the additional advantage of agreement with the cuneiform account, in which version the dove comes first." But it is evident that Ball's suggestion does not solve the difficulties as well as does Wellhausen's rejection of viii. 7. The two accounts, J and the cuneiform story, agree in the main—for instance, in the sending out of the bird—but they differ in details. Winckler ("Altorientalische Forschungen," 3d series, vol. i., part 1) holds that in the present J there is the combination of an older and shorter E account, according to which there were seven days of preparation, forty days of the Flood (the number of the Pleiades, the rain-constellation), and seven days preceding the sending out of the dove which returned no more. This would make fifty-four days altogether, about two lunar months. The other and longer account speaks of the threefold sending out of birds, which will have to be identified, in accordance with the cuneiform account, as swallow, dove, and raven.

IV. The Future of the Survivors (viii. 15-ix. 17): This includes: Noah's offering, composed of the account by P of the exit from the ark (15-19), serving as an introduction to the extract from J²; the sacrifice in which Noah expressed his gratitude for deliverance (20-22); instructions given to Noah on the sacredness of life, of men as well as of beasts, stating emphatically that "whoso sheddeth man's blood, by man shall his blood be shed" (ix. 1-7: P); the making and proclaiming of a covenant, the sign of which was to be God's bow, the rainbow (ix. 8-17: P). The Babylonian account does not have this last feature. It suggests the Hindu myth in which the bow used by Indra in shooting bolts of lightning at his enemies, when the storm is over becomes the rainbow, a promise of peace to mankind. It is also found among the Arabians. P preserved this old mythological account simply because he desired for the construction of his world-scheme three covenant signs for the three covenants made with Noah, Abraham, and Moses—the rainbow, circumcision, and the Sabbath. Wellhausen ("Prolegomena zur Geschichte Israels," 4th ed., p. 317), Keil, and others stoutly defend the statement of the author, which implies that hitherto there had been no such thing as a rainbow; others, again, maintain that P is here explaining the origin, not of the rainbow, but of its adoption as a sign (see J. G. Murphy, "Genesis").

After the Subsidence.

In proof of the separate origin of the two documents J² and P, attention may be called to: (1) the many repetitions; (2) the contradictions, such as vi. 19 *et seq.* and vii. 14-16 as against vii. 2 *et seq.*; vii. 11 (a poetic and mythological description) as against vii. 12 (a prosaic narrative); vii. 12 as against vii. 24 (the duration of the Flood); (3) the many linguistic differences. On the other hand, there are also points of agreement, such as (1) the cause of the Deluge, (2) the persons saved, (3) the new relationship between God and man, (4) the words for "flood" and "ark." "Mabbul" is perhaps from the same root as Assyrian "nabâlu" = "destroy," and corresponds to the Assyro-Babylonian "abûbu," whence perhaps its vocalization (see Gesenius, "Th." p. 550, and the literature cited in Muss-Arnolt, *l.c.* p. 636, col. 2, note). On "tebah" see above. But Budde ("Die Biblische Urgeschichte," pp. 417 *et seq.*, 467 *et seq.*) is incorrect in maintaining that J² has been the only source for P, nor is Cheyne right in making P dependent on J². P, as it now stands, is fuller than J² in (1) the announcement to Noah of the impending Deluge, and the command to build an ark, whose measurements are given in detail; (2) the notice of

the place where the ark grounded; and (3) the appointment of the rainbow as the sign of the covenant between God and man.

Of the account in J^2 it may in general be said that the tradition of the Flood was known very early in Israel, but that, on the other hand, the present form of the tradition is of a more recent date. The traces of great antiquity are: (1) the closing of the ark by YHWH Himself (vii. 16); (2) the sacrifice offered by Noah after the Flood, and especially the expression "And YHWH smelled the pleasant odor"; (3) the sending out of the birds; (4) the terms for "flood" and "ark." In the mixture of Noah the pious and Noah the wise and prudent there is the combination of a later and an earlier tradition, the latter, perhaps, originally of a more secular, worldly character, the remnant of an old hero-song.

Of the account in P it may in general be said that there are now and then traces of very old traditions. Thus, vii. 11 (and viii. 2a), the origin of the Flood, which in the minute and on the whole prosaic account of P is all the more remarkable because of its highly poetical coloring: (for example, the conception of the primeval man, just as in the Babylonian tradition [see Creation account, Rawlinson, iv., lines 139, 140], of the waters above the heavenly expanse held back by bars and sluices [comp. Gen. xlix. 25; Ps. xxiv. 2]); the proverb or saying in ix. 6; the very old story of the rainbow; the tradition concerning the termination of the period of peace and the new order of things; the account of the covenant, including also the animal creation, alluded to in Deutero-Isaiah liv. 9 (Kraetzschmar). Further, the sources used by P also mentioned Mount Ararat, and perhaps also the "150 days." These and some minor points indicate for P a source very similar to that of J; but the considerations just given weigh against the assumption that P was directly dependent on J^2 (Wellhausen, *l.c.*, 4th ed., p. 399; Budde, *l.c.* pp. 467 *et seq.*; Holzinger, "Genesis," pp. 85 *et seq.*; Cheyne and Black, "Encyc. Bibl." *s.v.* "Deluge," § 10). Nor can it be maintained with Kosters ("Theol. Tijdschrift," xix. 335 *et seq.*) that P is remarkably similar to the account in Berosus, a view which would assume the later Babylonian tradition as a source (see Dillmann, "Genesis," p. 136). The tradition as found in P must have been known in Israel in early times.

Many other nations have traditions of an early flood. These have been carefully collected and sifted by Richard Andree ("Die Flutsagen, Ethnographisch Betrachtet," Brunswick, 1891), Hermann Usener ("Die Sintfluthsagen Untersucht," Bonn, 1899), Franz von Schwarz ("Sintflut und Völkerwanderungen," Stuttgart, 1894), and Winternitz ("Die Flutsagen des Altertums und der Naturvölker," in "Mitteilungen der Anthropologischen Gesellschaft in Wien," xxxi., No. 6). Winternitz believes that the widely spread legends are the outgrowth of local traditions based on actual local occurrences. The fact that many peoples have flood-legends can not justify the assumption that they all go back to one great prehistoric event, for there are many other nations and groups of nations without such legends.

Other Flood-Legends.

Of greatest interest and importance for the study of the Old Testament account, among all these legends, is the cuneiform account of the Deluge. This was mentioned and epitomized by Berosus and Abydenus, preserved by Eusebius, "Chronicon," i. 19, edited by Schoene in "Fragmenta Historicorum Græcorum," ii. 50 *et seq.*, iv. 281 (translated by Usener, "Flutsagen," pp. 13–15), and is fully known since George Smith's discovery, in 1872, of the cuneiform text, on editions and translations of which see Muss-Arnolt, "Assyrian and Babylonian Literature," pp. 350, 351, New York, 1902.

Pêr-napishtim, the ancestor of Gilgamesh and the favorite of the gods, relates to Gilgamesh the story of the Flood, in which he and his family and his belongings were alone saved. Owing to the corruption of the citizens of Shurippak, the gods decided to bring about a deluge, destroying all mankind. In a dream the god Ea revealed their intention to a man of the city named "Pêr-napishtim" (Scheil in Maspero's "Recueil des Travaux," 1898, xx. 55 *et seq.*), who, in accordance with Ea's instructions, saved himself, and his family, and every kind of beast, by building a ship in which they escaped from the Flood. The ship was built in seven days. Its sides were 120 cubits high; its beam was 120 cubits also (see Haupt in "Am. Jour. Philology," ix. 419 *et seq.*). After Pêr-napishtim had stowed away his family and belongings, and living creatures of every kind, the storm, called "abûbu," broke loose so fearfully that even the gods became affrighted. Everything was destroyed. The storm ceased after the sixth day, and after twelve (double) hours there rose out of the water a strip of land. To Mount Niṣir the ship drifted and stuck fast. And when the seventh day drew nigh Pêr-napishtim sent forth a dove. The dove flew hither and thither, but as there was no resting-place for her, she returned. Then he sent forth a swallow. The swallow flew hither and thither, but as there was no resting-place for her, she also returned. Then he sent forth a raven. The raven flew away, saw the land emerging, alighted upon it, waded about, croaking, and returned no more (comp. with this the account of J^2). Pêr-napishtim then disembarked, and offered to the gods a sacrifice, whose savor the gods smelled, gathering like flies around the sacrificer. The anger of Bêl, the god who was the prime mover of the Flood, and who was displeased at the salvation of Pêr-napishtim, is assuaged; he goes up into the ship, takes Pêr-napishtim and his wife, blesses them, and makes them dwell far away at the mouth of the rivers. The character and actions of Bêl and of Ea, as described here, appear united in YHWH by J^2, whose account, of course, is strictly monotheistic, purer, and loftier.

The Deluge fragment discovered by Scheil is dated in the reign of Ammizadugga, one of the last kings of the first dynasty of Babylon, and may be ascribed to about 2100 B.C. It was found at Sippar—where the Deluge is placed by Berosus—and represents the local form of the legend current in that city during this early period. Tablet seven of this fragment mentions Pêr-napishtim, and tablet eight speaks of Atrakhasis; both occur in the account which was found by Smith. Atrakhasis (Ḥasisatra) is the "Xisuthrus" of Berosus (the "Sisithros" of

Abydenus). The conjectures on the relationship between the two names are given in Muss-Arnolt, "Assyrian and Babylonian Literature," p. 358. On the etymology of the two names see *idem*, "A Concise Dictionary of the Assyrian Language," pp. 134, 712. See also Zimmern in "Zeitschrift für Assyriologie," xiv. 277 *et seq.* The story of the Deluge had originally no connection with the story of Gilgamesh.

Here in general there is a similarity between J^2 and the Babylonian account, but as a vehicle of moral and religious instruction the superiority of the Old Testament account is at once apparent. The Babylonian account is polytheistic, its gods capricious, jealous, quarrelsome; the hero a favorite of only one of these gods. The Old Testament tradition, even in its earliest known form, is thoroughly monotheistic; its God commands instant and unreserved reverence; its hero is saved on account of his righteousness.

Source of the Hebrew Tradition.

It is maintained by many that the Hebrew tradition, especially as preserved in J^2, was directly borrowed from the Babylonian at the time of the ascendency of Assyria, that is, about 700 B.C., when Judah was a vassal kingdom of Assyria (see Haupt, "Sintflut Bericht," 1881, p. 20; Usener, *l.c.* p. 256; Stade's "Zeitschrift," 1895, p. 160; Budde, *l.c.* p. 457; "Am. Jour. of Theology," Oct., 1902, pp. 706, 707). It is, however, more correct to assume with Zimmern ("Biblische und Babylonische Urgesch." p. 40) that these Babylonian legends were first made known about the Tell el-Amarna period among the original Canaanite inhabitants of Palestine, from whom they passed to the Israelites when the latter settled in the land. Others assume later Aramean or Phenician mediation (see Gunkel, "Genesis," pp. 67, 68; Winckler, "Altorientalische Forschungen," ii. 140 *et seq.*, 160 *et seq.*).

In the Babylonian, and especially in the Hebrew, tradition there is the blending of two still earlier legends, the one of the destruction of mankind, wholly or in part, by the punitive judgment of the divine powers, owing to man's wickedness—a legend of a character similar to that of the destruction of Sodom and Gomorrah, or the story of Philemon and Baucis in classic lore; the other, that of a flood as such, either local or universal. The Flood was not in the tradition's view universal, as "universal" would be understood at present, simply because the world of the early writers was a totally different world from that of to-day. This latter legend again undoubtedly goes back ultimately to a nature-myth representing the phenomena of winter, which in Babylonia especially is a time of rain. The hero rescued in the ship must originally have been the sun-god. Thus the Deluge and the deliverance of Pêr-napishtim are ultimately but a variant of the Babylonian Creation-myth (Zimmern; see also Cheyne, *s.v.* "Deluge," § 18).

E. G. H. W. M.-A.

—In Mohammedan Literature: In the Koran Noah is mentioned not less than eleven times. The Koranic term for "flood" ("ṭufan") betrays an Aramaic origin, and leads one to infer that Mohammed had heard the story from Jews or Christians in Syria, probably from both. The most concise and accurate account is given in sura xxix. 13-14: "We sent heretofore Noah to his people; he remained with them one thousand years save fifty years. Then the Flood seized them while they were acting wickedly. But we rescued him and those who were in the ark, and we made it a sign unto all creatures." This quotation shows that Mohammed had not read the account of the Flood in the Bible, but had heard it in the form of the Jewish Haggadah. According to the latter, Noah was bidden to spend one hundred and twenty years in building the ark, so that people might take warning.

Moslem tradition renders the story in a more elaborate form. Noah planted an ebony-tree brought to him by Gabriel. After it had grown for many years he cut it down and prepared the planks. When he commenced to build the ark, the people taunted him in the following words: "At first thou wert a prophet; now thou hast turned carpenter." As soon as the ark was finished, Noah dug up Adam's body and placed it therein. Then the rain poured down for forty days and forty nights. All mankind and all animals perished save those in the ark. Two luminous disks in the walls of the ark marked day and night, as well as the hours of prayer. For forty days (according to other reports, seven times) the ark floated round the Kaaba in Mecca; and after six months it settled on the top of a mountain in Mesopotamia. Noah sent out a dove, which re-

turned with an olive-leaf in its beak. When the water had disappeared he saw the rainbow, and then he knew that it was time to leave the ark. The accounts in the Koran (suras xi. 42, xxiii. 27) end with the words: "Then our decree came [true] and the oven boiled." This is evidently a reproduction of the Talmudical saying, "The generation of the Flood was judged with boiling water" (Sanh. 108).

See ARK OF NOAH IN MOHAMMEDAN LITERATURE.

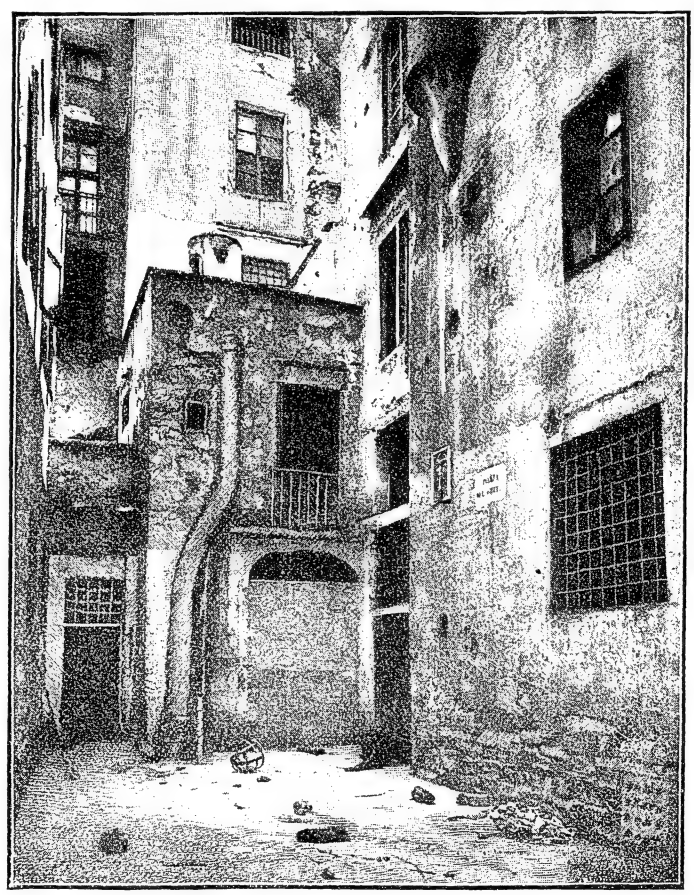
FLORA. See BOTANY.

FLORENCE (פירינצי; פלורינצייא; [א]פיורינצה =**Fiorenza**; **Florentia**; **Firenze**): Capital of Tuscany, Italy. Jews settled here probably before 1400. They were not needed in this flourishing commercial city, the scene of factional strife between the Guelfs and Ghibellines; there was an abundance of capital, the Florentines being the greatest speculators and the most rapacious usurers of the Middle Ages. But having admitted the Jews, the Florentines granted them at once many rights and privileges. In 1414 the republic sent a Jewish banker, "Valori" by name, to represent it at Milan before the Duke of Visconti. As the latter refused to receive a Jewish ambassador, Florence declared war against him. This friendly attitude of the Florentines, however, was as subject to change as their government; the Jews were expelled and readmitted at the pleasure of the Senate. That Jews were in the city in 1441 is indicated by the fact that a "maḥzor" according to the Italian ritual was written there and sold in that year (Zunz, "Ritus," p. 84).



A Nook in the Florence Ghetto.
(From a photograph.)

One of the first Jews of Florence known by name was Emanuel b. Uzziel da Camerino, for whom Codex Montefiore No. 219 was written (1458). A Jewish physician by the name of "Abramo" was called in to amputate a leg of Giovanni delle Bande Nere, the ancestor of the house of Medici. The favorable attitude toward the Jews seems to have changed in 1472, for during the plague raging in that year all the Jews were expelled. Shemariah b. Abraham Jehiel wrote an elegy in commemoration of the event (Codex Merzbacher, Munich, No. 90). When the plague subsided in 1473 the populace demanded that the Jews be recalled as money-lenders, and for some years thereafter they lived in peace in the city, protected by the Senate. When Bernardin of Feltre was preaching in Florence in 1487, the young men attempted to sack the houses of the Jews and slay the inmates; the authorities, however, expelled the preacher, who thereupon pretended that they had accepted large bribes from the Jews.

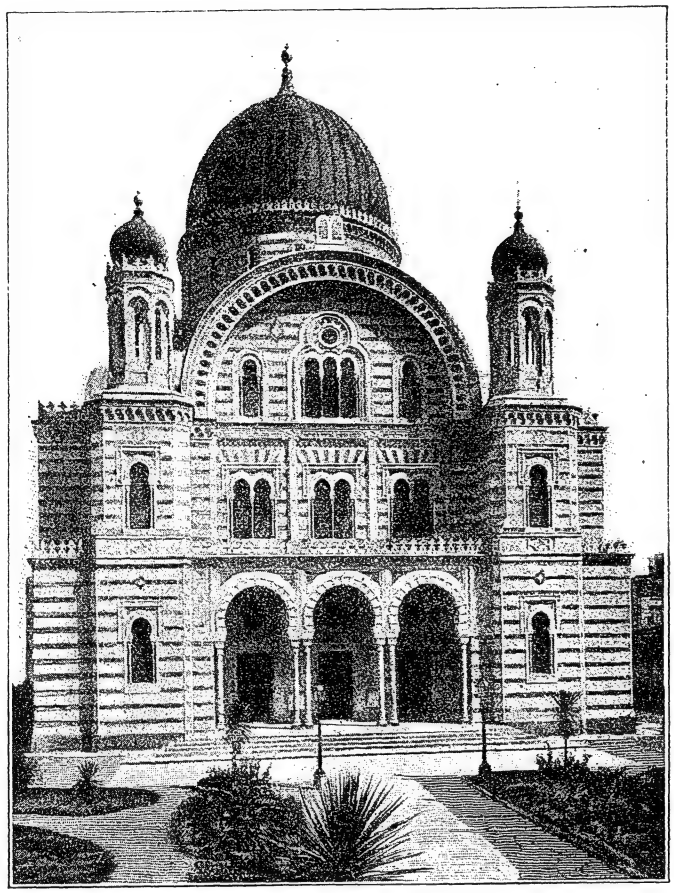
Expelled During the Plague.

In the meantime the house of Medici had risen to power, and under Lorenzo the Magnificent Florence became the center of art and science. The Jews also took part in this splendid life of the Renaissance. Lorenzo called Jewish physicians and scholars to his court, among them Abraham Farissol. Elijah Delmedigo took part in a religious disputation in his presence. The philosophers Marsilio Ficino and Giovanni Pico della Mirandola studied the Hebrew language and the Cabala, and called a number of learned Jews to Florence; among these Elijah Delmedigo was especially noted as an expounder of the Aristotelian philosophy. Johanan Allemanno, a close observer of Florentine life, gives a good description of it in "Ḥeshek Shelomoh," his commentary to Canticles.

As foreign traffic had widened the horizon of the Florentines, they hospitably received the Spanish refugees who, noted for their business experience,

scholarship, and wealth, sought shelter in Italy. The first comers were followed by many other Jews and Maranos who had been driven by the Inquisition from Portugal. The community of Florence now became an important one, and the city also derived great benefit from the immigrants, who were in close intercourse with their coreligionists in Brabant, Lyons, Marseilles, Naples, Venice, in Portugal and especially in the East, and carried on commerce in colonial products, silk and wool. All opposition to them was silenced in face of the services they rendered to the city. Expelled in 1490 (according to Ibn Verga, "Shebeṭ Yehudah"), they were recalled in 1492; expelled again, they were once more recalled in 1498, being found indispensable to the commerce of the city. Among the Portuguese immigrants was the aged Don Joseph ibn Yaḥyah, who arrived at Florence with his sons in 1494.

Settlement of Spanish Refugees.



The Large Synagogue at Florence.
(From a photograph.)

The condition of the Jews was a favorable one under the first princes of the house of Medici; the Maranos were allowed even the free exercise of their religion, and were not attacked during the plague of 1539. Cosimo II. favored the Jews; his wife, Leonora of Naples, had as teacher Donna Benveniste Abravanel, to whom she was a lifelong friend. It was due to her influence that Cosimo granted extensive privileges to the Jews in 1551. They numbered at that time about 500, the majority living in the Via dei Giudei, beyond the Arno: the street still bears that name. The political differences between the Medici and the pope were a direct advantage to the Jews, as the Medici paid no attention to the cruel papal decrees issued against them. The continual attacks, however, bore fruit in the end; in 1570 the Jews were enclosed in a ghetto. Some streets not far from the Duomo, in the lowest and dampest part of the city, the Via della Nave, were assigned to them, and enclosed by gates; in 1571 an insulting inscription was affixed to the gate of the ghetto. The communities of the outlying towns of Montalcino, Torricella, San Miniato, Monte Pulciano, and Prato were obliged to move into the ghetto of Florence. However, the anti-Jewish laws were never as strictly enforced in Florence as elsewhere. The wealthy Jews were permitted to live outside the ghetto, the inhabitants of which were not treated harshly.

Under the Medici.

Toward the end of the seventeenth century the city threatened to force all the Jews to live in the ghetto, probably because many houses there were vacant at the expense of their Christian owners. The community therefore was obliged in 1690 to pay the entire rent of the ghetto. It was the underlying principle of Florentine legislation to treat the Jews as mildly as was consistent with the prejudices of the seventeenth and eighteenth centuries. The clergy combated Judaism by making converts rather than by physical coercion; the baptism of children under thirteen years of age was regulated by law. Riots against the Jews occurred but seldom, and were repressed by the government and the clergy; the attacks which were made at the time of the French Revolution in 1790 were quelled by the bishop. During the Napoleonic régime the community shared the varying fortunes of the city, freedom alternating with oppression, until its autonomy was recognized in 1814. The gates of the ghetto were opened, never to be closed again, and the Jews were permitted to live outside its limits. Although no civic rights

In the Seventeenth and Eighteenth Centuries.

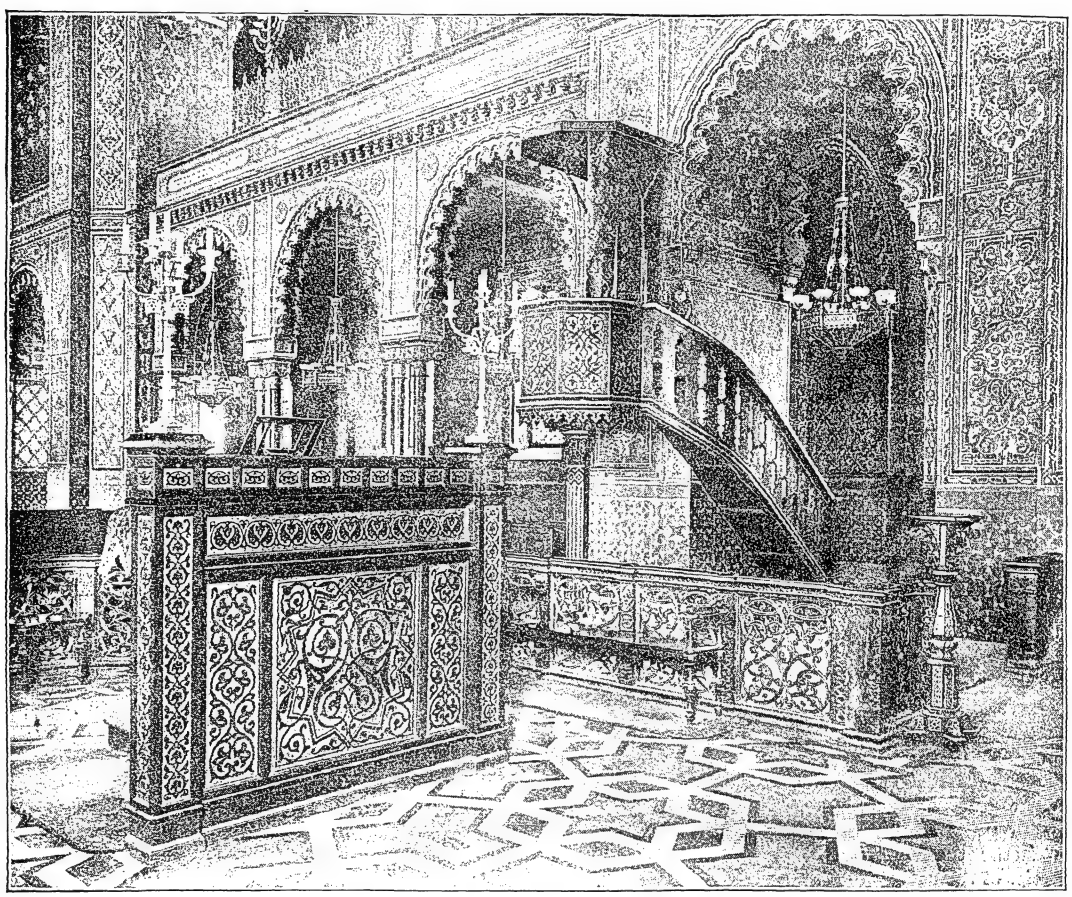
were granted to them, the Jews of Tuscany were treated so justly that they did not demand emancipation, which came to them, however, in 1859, when the grand duke was expelled and the provisional government instituted; on this occasion Sansone d'Ancona was appointed minister of finance. When Tuscany was annexed to the kingdom of Italy in 1861, the Jews received full citizenship in conformity with the constitution of 1848. None of the rights then conceded has since been abrogated, and since then the Jews have always had a share in the government of the city.

In the fifteenth century the community had only one synagogue, with the Italian ritual; but with the advent of the Portuguese Jews the Sephardic ritual also was introduced. The bitter struggle ensuing between the two nationalities was finally adjusted when both were recognized as of equal standing.

Synagogues and Rabbis.

Two synagogues were organized, with two rabbis, one for each ritual. The growth of the community of Leghorn strengthened the Sephardic party in Florence, which finally became dominant, with the result that at present (1903) the majority of the community follows that ritual. The Sephardim have used the Portuguese language in their documents and their service down to very recent times. Other internal dissensions arose at the time of the movement started by Shabbethai Ẓebi; in spite of their rabbi, Johanan Ghiron, the community did not believe in the pretender, siding with Ẓebi's two chief opponents, Jacob and Immanuel Frances, who were staying at that time in Florence. Emanuel wrote in 1660 a duet for the Society of the Anelanti ("Ḥebrat ha-Sho'afim"), which was sung in both synagogues.

The earliest known scholars of Florence, given in chronological order, are: R. Moses, preacher and commentator (*c.* 1472), whose works are included in Codex Montefiore, No. 17, and his brother Abigdor; Shemariah b. Abraham b. Jehiel and Raphael of Florence (*c.* 1480), whose works are included in Codex Merzbacher, No. 90; Jacob b. Jekuthiel da Corinaldo (1510); Eliezer b. Solomon b. Zur (1512); Isaac b. Joseph Monselice (1540); Moses b. Abraham Coen; Azriel b. Jehiel Trabotti (1567); Jehiel b. Abraham Finzi; Solomon b. Samuel Montedelolmo; Judah b. Joseph Uzziel; Moses b. Bassa da Blanes (seventeenth century); Isaac and Raphael Calò; Samuel and David Piazza; Zechariah b. Ephraim Porto; Jo-



Pulpit and Reading-Desk of the Florence Synagogue.
(From a photograph in the possession of Maurice Herrmann, New York.)

hanan Ghiron; Isaac b. Samuel Baruch; Jacob de Alba; Hananiah b. Menahem Cases; Raphael b. Samuel Corcos (eighteenth century); Abraham Jedidiah Shalit; Judah Raphael b. Menahem Baruch Jaghel di Monselice (1737); Raphael Lonsano (—1773); Menahem Azariah b. Judah Mazliah Padova; Abraham Fonseca; Aaron Ashkenazi; Moses Ḥayyim b. Samuel Rimini; Daniel Terni; Moses Ḥayyim Soschino; Mattithiah Nissim b. Jacob Israel Terni; Hananiah Hai Coen (nineteenth century); Castelnuovo; Samuel Olper; Jacob David Maroni; S. H. Margulies, occupying the position of rabbi since 1890.

For a time there was a Hebrew printing-press in Florence. In 1700 the first part of Aaron ha-Kohen's (?) "Orḥot Ḥayyim" was published there, and various works appeared about 1800.

Present Status.

In 1903 the community of Florence numbered about 3,000 souls. It is governed by a council ("consiglio") composed of sixteen members, who elect a committee of five from among themselves. There are two synagogues—the large new Sephardic synagogue, the "most beautiful synagogue of Europe," built through the munificence of the director David Levi (d. 1869), and completed in 1882 (see JEW. ENCYC. i. 430, illustration), and a small synagogue (Italian ritual) in the Via dell' Oche. The ritual in both is Orthodox; in the larger synagogue there are a choir and an organ, and the sermon is preached in Italian. There are two cemeteries, an old one dating from the eighteenth century, and a new one dating from about 1875. There is a common school for boys and girls, in which much attention is given to Hebrew, in addition to the elementary studies prescribed by law. A Hebrew school prepares for entrance to the rabbinical seminary. The following philanthropic institutions are under the direction of the community: the Jewish hospital on the Arno; the *Jewish orphan* asylum, Achille Leone Athias; the Asili Infantili; Ospizio di Marina; Malbish Arumim; the society Arti e Mestieri. The societies Oavè Torà (with a large library), Ez Hajjim, and the more recent Meḳize Nirdamim are devoted to the study of the Torah. The Mattir Asurim Society, founded for the purpose of securing the release of Jews imprisoned for debt, supports a second synagogue with Sephardic ritual in a house in the Via dell' Oche. There are a ḥebra ḳaddisha, societies for nursing the sick, "misericordia," etc. Since 1899 the Collegio Rabbinico Italiano is at Florence; it was completely reorganized under the direction of Rabbi Margulies. See SEMINARIES.

FLORENTIN, ḤAYYIM SAMUEL: Rabbi of Salonica; lived in the seventeenth century. He was the author of a work entitled "Me'il Shemuel" (Salonica, 1725), containing forty-five responsa and ninety-one analecta on the Talmud. At the end are some notes by his brother, **Isaac Florentin,** on Maimonides. Ḥayyim wrote also some notes on the Shulḥan 'Aruk, Ḥoshen Mishpaṭ, which are found in the collection "Morch Ẓedeḳ" by Michael b. Moses ha-Kohen (*ib.* 1655).

FLORIDA: The most southern of the United States of America, forming a peninsula washed on the east by the Atlantic Ocean and on the west by the Gulf of Mexico. Little is known of the early history of the Jews in Florida. In 1825 a plan was projected in London for the purpose of sending a number of Jews to Florida as colonists, but it proved abortive. However, that Jews settled in the state somewhat later is known, for two of them took part in the Civil war: Gus Cohen enlisted in the Milton Artillery, and M. Daniel was a member of Company A, 1st Regiment Florida Infantry; the latter was captured. Daniel died at Elmira, N. Y., and was buried in Woodlawn Cemetery in that city.

In 1874 a congregation, named "Beth El," was founded at Pensacola, and one named "Ahavath Chesed" was founded in 1882 at Jacksonville, where a Hebrew Benevolent Society had been formed in 1874. At Ocala in 1885 a similar society was established. Religious organizations were founded at Tampa and Key West. Morris Dzialinsky was twice elected mayor of Jacksonville, and Jacob A. Huff held the office of city treasurer many years. Among the names of the directors of the National Bank of the State of Florida is found that of Bernhard M. Baer. Philip Walter, who for many years held the office of clerk of the United States court, was elected a member of the state constitutional convention in 1885. Florida has a Jewish population of about 3,000, the total population in 1890 being 391,422.

A.

FLORUS, GESIUS (or, incorrectly, **Cestius**): Last procurator of Judea (64–66). Florus was notorious for his cruelty and rapacity, and was so much detested by the Jews that in comparison

with him Albinus was considered a just man. Florus, indeed, hastened the outbreak of the revolution by rendering the condition of the Jews unbearable. He protected the Sicarii in return for a share of their plunder, and during his administration many towns were sacked. When the Jews of Cæsarea opposed the obstruction of the entrance to their synagogue by the Greeks, they bribed Florus not to interfere. Florus accordingly went to Samaria. Finding themselves overpowered, the Jews sent to him an embassy of twelve, imploring his protection against the Greeks; but Florus, instead, threw the ambassadors into prison. Later he sent to Jerusalem, demanding from the warden of the Temple treasury seventeen talents of gold. His demand being refused and even ridiculed, he went to Jerusalem and ordered his soldiers to attack the upper market-place.

The Jews were killed, regardless of sex or age, and the houses plundered. On that day (16th of Iyyar, 66) more than 3,600 were slaughtered; many were scourged and crucified. Queen Berenice in vain implored him on her knees to stop the carnage. Florus even demanded a friendly reception for the troops appointed to seize the Temple. But the people opposed him with so much vigor and determination that he left Jerusalem with the larger number of his troops. When the insurrection had broken out, Florus gave full liberty to the Greeks of Cæsarea to attack the Jews. The majority of the latter were killed; the remainder, by the command of Florus, were sent to the galleys.

G. M. Sel.

FLOUR: The finely ground substance of any cereal. The earliest and most simple way of crushing grain consisted in pounding it in a mortar, producing a coarse flour, or rather different grades of grits (comp. the preparation of the manna, Num. xi. 8). In order to obtain fine flour the grain, it seems, was pulverized between two stones (see illustration in Erman, "Aegypten und Aegyptisches Leben im Altertum," p. 268; Bliss, "A Mound of Many Cities," p. 85). But as far back as can be traced the Israelites used a mill for preparing fine flour. A small hand-mill was used down to a late date, but in the Gospels mills worked by asses are mentioned (*μύλος ὀνικός*, Matt. xviii. 6, R. V., margin). Each household prepared its own flour—hence the prohibition to take a hand-mill in pledge from the poor (Deut. xxiv. 6); the heavy work of grinding was the task of the women and the female slaves (Ex. xi. 5; Isa. xlvii. 2; Matt. xxiv. 41), or of captives (Judges xvi. 21; Lam. v. 13).

The ancient mill could hardly have differed from that now used in Palestine, which consists of two circular stones ("pelaḥ"); hence the designation "rehayim" (lit. "the two millstones"; comp. Deut. xxiv. 6; Isa. xlvii. 2). The mill is also known as "ṭaḥanah" (Eccl. xii. 4; "ṭeḥon," Lam. v. 15). At present these stones, generally made of basalt, are about 40–48 cm. in diameter and about 10 cm. thick. The nether stone ("pelaḥ taḥtit") is fixed and is especially hard (Job xli. 16). It is somewhat convex, with a small plug of hard wood in the center. The upper stone is correspondingly concaved on the nether side, with a funnel-shaped hole in the center, into which the plug of the nether stone is fitted. On the edge is a peg ("yad") used as a handle. The upper stone is turned by the grinder around the plug of the nether stone; hence its name "pelaḥ

Modern Palestinian Hand-Mill.
(From a photograph by the American Colony, Jerusalem.)

rekeb," or merely "rekeb" ("the wagon"; Judges ix. 53; II Sam. xi. 21; Deut. xxiv. 6). The grain is poured by hand through the funnel-shaped hole of the upper stone, and the flour, dropping from the edge of the nether stone, is collected on a cloth spread beneath.

The grain commonly made into bread was barley and wheat, especially the latter, spelt ("kussemet") being evidently used in special cases only (Ezek. iv. 9). Wheat bread was the superior article, barley bread being the food of the poor. In the ritual, barley flour was used for the offering of jealousy (Num. v. 15). Wheat flour was prepared in two different grades. The flour that was generally used for baking was called "ḳemaḥ," being fine or coarse as it fell from the mill; and from this a finer flour (which is probably the meaning of the term "solet" = *σεμίδαλις*) was separated by means of a hair-sieve. This fine flour, the "fat of the wheat" (Deut. xxxii. 14; Ps. lxxxi. 17, cxlvii. 14), was worth twice as much as barley (II Kings vii. 1, 16, 18; comp. Erman, *l.c.* p. 266, as to the two kinds of flour imported from Syria into Egypt). With the one exception mentioned above, the use of fine flour ("solet") is prescribed throughout in the ritual; the conclusion is not warranted, however, that the ordinary flour used for daily consumption was not employed for sacrifices in ancient times.

FLOWERS OF THE BIBLE. See Botany and Plants.

FLOWERS IN THE HOME AND THE SYNAGOGUE: As an agricultural people the Jews in their own land appreciated flowers as a means of natural decoration. The first crop of

fruits offered at the altar in Jerusalem on the Feast of Harvest (Ex. xxiii. 16) was crowned with the choicest flowers (Bik. ii. 3). Among all the flowers native to Palestine the rose was preeminent. Solomon compared his Shulamite heroine to the "rose of Sharon." The Mishnah calls this the "king's rose" (Kil. v. 8).

The festival day of the harvest (Shabu'ot) is designated as the judgment day of trees (R. H. i. 2). This is supposed to be the origin of the custom of decorating the house and the synagogue with flowers on Shabu'ot. Jacob b. Moses Molin (d. 1427), in his "Meharil," first mentions the custom of scattering on the floor of the synagogue roses and other odorous blossoms as an expression of joy in the festival (see Shulḥan 'Aruk, Oraḥ Ḥayyim, § 494). The "Magen Abraham" says it is customary to place trees in the synagogue. Elijah Wilna, however, prohibited this innovation, since it would be aping the Christian custom on Pentecost (Danziger, "Ḥayye Adam," § 131, 13). In Palestinian synagogues flowers are distributed to the worshipers as they leave the services on Passover eve.

Isaiah Hurwitz, in his "Shelah" (p. 180a, Amsterdam, 1698), relates a custom prevailing in Safed, where the sexton distributed fragrant weeds to every person during the morning service on Shabu'ot, while the cantor recited "Ha-El be-Ta'azumot."

That flowers were highly valued by the Jews is further shown by the fact that nearly all their works of art are distinguished by floral representations, as the candelabra of the Tabernacle (Ex. xxv. 33), the pillars of the Temple, and the molten sea with its brim wrought with "flowers of lilies" (I Kings vii. 19–26). The Talmud states that Solomon's Temple contained representations in gold of various aromatic trees in full fruit, from which fragrant perfumes exhaled with the movement of the air (Yoma 39b).

FLUTE. See Music and Musical Instruments.

FLY (Hebr. זְבוּב): A two-winged insect, especially the common house-fly (*Musca domestica*). It is referred to in Eccl. x. 1: "Dead flies cause the ointment of the apothecary to send forth a stinking savor." Since a fly in food is offensive, its presence there is a ground for divorce; according to some, however, its presence is accidental, and is not the fault of the housewife (Giṭ. 6b). In general, if a fly falls into a cup of wine and is removed, the wine is still fit to drink; fastidious people, however, do not drink it, though the vulgar even eat of a dish into which a fly has fallen (Tosef., Soṭah, v. 9, Yer. 17a; Bab. Giṭ. 90a; Num. R. ix. 12; Midrash in Kohut Memorial Volume, p. 176). The Jews were censured because, while they were willing to drink wine into which a fly had fallen, they would not drink such as the king had merely touched (Meg. 13b).

The fly is extremely annoying when one is eating, and since it persistently returns even after being driven away it is the emblem of evil desires (Ber. 10b, 61a; Targ. Eccl. x. 1). The Egyptian fly (Isa. vii. 18) is so dangerous that it may be killed even on the Sabbath (Shab. 121b). It is used as a symbol for the Egyptian king Shishak (Seder 'Olam R. xx.), and for Sennacherib (Ex. R. xxx. 5). It is supposed to be the species *Culex molestus* (Forskal, "Descriptiones Animalium," p. 85, Copenhagen, 1775). The Mishnah (Parah ii. 3) mentions a kind of gadfly (probably the *Chrysops cæcutiens*) against which cattle are protected by a covering; another kind, the "baḳa," the animals drive away with their tails (Shab. 77b). There were other kinds, especially the gray fly, which the Talmudic writers regarded, apparently, not as flies, but as worms (larvæ). Curtains as a protection against flies were hung over the beds (Yer. Suk. 53b; Bab. 26a; Rashi on M. Ḳ. 27a). There is a species of fly that lives only one day, while the common house-fly lives longer, although not for an entire year. This fact is the subject of a pretty legend in the Talmud (Ḥul. 58b).

The fly occasionally became such a scourge in Palestine that public prayers were ordered (Ta'an. 14a). Hence it is easy to understand that the Philistines at Ekron worshiped a special god of flies, Baal-zebub (II Kings i. 2); but there is no reason to assume that the Aramaic word for "enmity" was derived from it (Geiger, "Urschrift," p. 53). The fly alights on gonorrheal persons and then infects healthy people (Ket. 77b); it also alights on wounds (Pesiḳ. 26b). Strange as it may seem, there were no flies in the abattoir of the sanctuary at Jerusalem (Abot v. 5; Ab. R. N. i., xxxv.); Maimonides believes they were driven away by the smoke of the incense; Rashi, however, attributes their absence to the fact that the tables were of marble (see also Maḥzor Vitry, p. 538). According to another tradition, the "sons of Moses" are in a miraculous manner kept from being troubled by gnats or flies (Gaster, "The Chronicles of Jerahmeel," p. 196). The sons of Eli were blamed for leaving the juicy part of the offering to the flies (Yalḳ., Sam. 86).

The Haggadah often emphasizes the fact that the fly serves a purpose in the world (Gen. R. x. 7; Ex. R. x. 1, etc.); it is also said that a crushed fly is good for a hornet's sting (Shab. 77b). The third plague of the Egyptians, "kinnim" (Ex. viii. 12), is commonly translated "lice." Modern investigation, however, favors the view of the Septuagint that the word means σκνῖφες, which Philo ("De Vita Moysis," ed. Mangey, p. 97) and Origen ("Homilia in Exodum," iv. 6) interpret as a species of gnat, an insect, under the name "yittosh" or "yattush" (יתוש), often mentioned in connection with "zebub" in rabbinic sources. It is much more certain that the Biblical "'arob" (Ex. viii. 17–20; Ps. lxxviii. 45) is a species of fly, though even the Tannaim disputed as to its exact meaning (Bacher, "Ag. Tan." ii. 252); according to the Septuagint and Symmachus, who translate it κυνόμυια, it is the dog-fly or stinging-fly, described by travelers as a great scourge in Egypt. According to the critical view, the plague of dog-flies is merely a variant of that of the gnats.

Gnats are referred to in the simile in Matt. xxiii. 24. A fly dipping into the sea is the symbol for the inexhaustibility of the divine doctrine (Soferim, xvi. 8). Titus was plagued by a gnat (Giṭ. 56b; comp. Neubauer, "Méd. Jew. Chron." i. 170), and so also was the usurper Paḥda (Seder 'Olam Zuṭa), after whose removal the Jewish princes of the Exile bore a fly in their escutcheon. Abraham ibn Ezra wrote a poem on the fly (ed. Rosin, i. 99).

An earlier expression, "ḳarzit," found in the Talmud (Giṭ. 86b), is explained as a species of fly living among stones; the word recalls "ḳerez" (Jer xlvi. 20), translated "gadfly" by modern scholars. The Rabbis take the expression "creeping things among birds" to mean flies (Rashi on Gen. i. 20; Targ. Yer. Lev. xi. 20; Deut. xiv. 19), but this interpretation is contradicted by the addition of "going upon all four," since insects have at least six feet.

FOA (FOI or FOY): French family; migrated from Italy in the eighteenth century. One branch of the family has been authorized to assume the name of "Margfoy." **Solomon Foa,** the first member of the family to settle at Bordeaux, was the father of **David Ḥayyim Foy,** a privileged mercer, who received a permit from the parliament of Navarre, Aug. 27, 1787, to establish himself at Pau. His son, **Israel Foy,** bought for the community of that city the Jewish cemetery, which was laid out April 24, 1822. At Bayonne and Bordeaux the name is spelled "Foy," while at Marseilles the form "Foa" has been preserved. To the latter branch belong the explorer **Edmond Foa,** Captain **Crémieu-Foa,** Commander **Léon Franchetti,** and the engineer **J. Sciama.**

FOA, ELIEZER NAḤMAN: Italian rabbi and author; died in Reggio after 1641. He was a pupil of R. Moses Isserles, and possessed an extensive knowledge in Talmud and Cabala. He founded at Reggio a society under the title "Ḥebrat ha-'Alubim" (Association of the Modest Ones). Foa wrote "Midrash Haggadah," a commentary on the Haggadah of Passover, to which were added a preface by the members of the above-mentioned society, and some verses by a certain R. Moses Shalit. The book was published by them during the lifetime of the author (Venice, 1641). A corrected edition, with the addition of many novellæ and a commentary on Hallel, appeared in Leghorn in 1809. Foa also left in manuscript a work named "Goren Arnon," containing five collections of sermons on the Pentateuch, which were seen by Azulai and are mentioned by him in his "Shem ha-Gedolim."

FOA, ESTHER-EUGÉNIE (*née* **Rodrigues**): French authoress; born at Bordeaux 1795; died in Paris 1853. She was famous for her beauty. Under the nom de plume "Maria Fitz Clarence" she contributed to many Parisian periodicals. The following among her numerous novels may be mentioned: "Kiddushim, ou L'Anneau Nuptial des Hébreux," 4 vols., Paris, 1830; "La Juive," 2 vols., 1835; "Contes Historiques," 1840, with notes by G. A. Neven, London, 1868.

FOÀ, PIO: Italian pathologist; born at Sabbionetta Jan. 26, 1848. He attended the lyceum at Milan; studied medicine at Pavia, and took post-graduate courses at the universities of Turin and Heidelberg. As Rizzozero's pupil in pathologic anatomy, he was appointed in succession privat-docent (1876), assistant professor (1878), and professor (1881) at Modena, and professor (1884) of pathological anatomy and bacteriology at Turin. In 1868 he took part as a volunteer in Garibaldi's campaign against the Southern Tyrol. He is a member of the Accademia di Medicina (1886), of the Lincei of Rome (1892), and of the Reale Accademia delle Scienze, Lettere e Arsi, of Turin (1895). Among his numerous works the following may be mentioned: "Sull' Anatomia Patologica del Midollo e delle Ossa," 1873; "Sull' Anatomia Patologica dell Gran Simpatico," 1874; "L'Anatomia Patologica e le Altre Scienze Mediche," 1876; "Sulla Dottrina della Tubercolosi," 1876; "Sull' Origine dei Globuli Rossi del Sangue," 1879; "Sulla Fisipatologia del Sangue," 1881; "Sulla Fisipatologia della Milza," 1883; "Sulle Conquiste della Scienza Moderna," Modena, 1883. He has also contributed papers on pathology and biology to the medical journals of many countries and to the reports of the Accademia delle Scienze, Turin. In 1900 he was elected president of the Università Popolare Ditorino.

FOCHS, ANTON: Hungarian philanthropist; died in Budapest May 31, 1874. A few years before his death he sent an anonymous letter to the administration of the Jewish community in Budapest, donating 43,000 florins for the founding of an orphan asylum. Suspected of being the donor, he denied the fact in the press; it was established only when his will was found to contain a request that the asylum be named after his parents. His large fortune (over 1,000,000 florins) he left to be distributed for the most part among humanitarian institutions without distinction of religious belief. A fund of about 60,000 florins was set aside to pay for the education of any among the orphans of his institute showing aptitude for letters or science. The considerable sum of 300,000 florins went to establish a deaf-and-dumb institute for Hungary and Transylvania, open to both sexes. His was an eccentric character: he was unmarried, incommunicative, penurious, and a recluse.

FOIA ISRAELITA. See PERIODICALS.

FOIX (Hebr. פויש or פויים): Capital of the department of Ariège, France. In the Middle Ages there were Jews here as well as in other towns in the county of Foix, especially at Saverdun and Pamiers. The largest Jewish community in the district was at Pamiers, which, toward the end of the thirteenth century, through Gaston de Foix and the Abbot of St. Antonin, enjoyed special exemptions in the matter of taxation. The community at Foix seems to have been less important, for only two of its members are known, Cresques and David Solomon, both of whom lived at Perpignan about 1413.

G. S. K.

FOLIGNO, HANANEL DI: Jewish convert to Christianity; lived at Rome in the sixteenth century. He made himself notorious by his slanderous attacks upon his former coreligionists. With Vittorio Eliano and Joseph Moro, two other converts, he appeared, in 1553, before Pope Julius III. as an accuser of the Talmud, the result of which was that many copies were publicly burned (Aug. 12, 1553). A far graver accusation, and one which imperiled the very lives of all the Roman Jews, was made by him before Pope Marcellus II. in 1555. A Mohammedan apostate had crucified his own ward for the sake of getting possession of some property, and had deposited the body near the Jewish cemetery. Thereupon Foligno formally charged the Jews with having committed a murder for ritual purposes. Fortunately for the Jews, Cardinal Alexander Farnese, being convinced of the falsity of the accusation, instituted an inquiry, and succeeded in bringing the real murderer to justice.

D. I. BR.

FOLK-LORE: The science dealing with those institutions, customs, literature, and beliefs of the folk or uncultured people that can not be traced to government origination or individual authorship. In its larger sense it could claim as its province the whole of institutional archeology, but in actual practise it deals only with the "survivals" of primitive institutions. Its special field deals with those survivals known as superstitions (from "superstes" = "surviving"), that is, those customs carried out for no other reason than because persons respected by the doer also perform them. The modern method is to attempt an explanation of such seemingly irrational actions by tracing them back to ideas, which in themselves often absurd, are current among savages, and to which the customs are natural corollaries. Thus, for instance, the objection to horseflesh as a diet in some parts of Europe has been traced back to the pre-Christian worship of Odin, to whom the horse was sacred or taboo.

Folk-lore thus deals with the irrational element in life, though often including some of its most imaginative aspects. The chief influences that have prevented the further spread of folk-lore elements among the people have been the Greek sense of reason and the Jewish sense of right. It is consequently difficult to deal with the subject from a Jewish point of view, since in essence there is no Jewish folk-lore; yet practically, for reasons which will be indicated, there have been survivals of folk-lore among the Jewish people in all stages of its development. The human nature in Jews has often led them to those manifestations of human fear, hope, and joy with which folk-lore deals.

In Bible Times.

The Jewish people in Bible times undoubtedly had beliefs and superstitions analogous to those found among their contemporaries, and even among modern uncivilized peoples. Professor Robertson-Smith in his "Religion of the Semites" (see analysis by C. G. Montefiore in "J. Q. R." ii. 179), attempted indeed to derive many of the fundamental institutions of early Israel from two folk-lore conceptions, taboo and totem. Similarly, Gunkel in his "Schöpfung und Chaos" attempts to prove that the Hebraic views about the beginning of things and of mankind are derived from those current in Babylonia, and his views have been repeated in exaggerated form by Professor Delitzsch in his "Bibel und Babel." In both cases, however, the evidence adduced is so hypothetical that the conclusions derived from it can not be regarded as proved. Parallels found between Biblical and uncivilized views can throw light on the former only when the connection of the latter with some wider view is established. Thus, when the Biblical principle that blood is life is found among the Yorubas of the west coast of Africa (A. B. Ellis, "Ewe Speaking Tribes," p. 68) the parallel is interesting, but has no further instruction in it. When, however, the custom that the younger sister must not marry before the elder, found in the case of Leah and Rachel, is found also among the Nias (Rosenberg, "Malayische Archipel." p. 155), among the Hahmaheras (Riedel, in "Zeitschrift für Ethnologie," xvii. 76), in Java (Winter, in "Tijdschrift Voor Nederl. Indie," i. 566), and China (Gray, "China," i. 190), it becomes probable that such a practise has natural roots in polygamous societies. Again, the fact that the Iroquois Indians had an annual ceremony for the expulsion of all evil which was combined with a general confession of sins (Frazer, "Golden Bough," iii. 72), throws no light upon the Day of Atonement except in so far as it serves to show that such an institution is natural to humanity. Maimonides went so far as to grant that many of the practises commanded in the Bible were really pagan in character, though permitted to the Jews as a sort of concession to their human weakness ("Moreh," iii. 32, transl. by Munk, p. 252).

It is somewhat different with practises mentioned in the Old Testament for purposes of condemnation. The very condemnation is presumptive evidence that the practises complained of partook of

the character which is ascribed to folk-lore. The custom of tattooing is probably repudiated in Lev. xix. 28, and the fact of this repudiation renders it highly probable that in several cases the tattoo was a sign of allegiance to some local deity. Similarly, the "soul-hunting" referred to and reprobated in Ezek. xiii. 17 *et seq.* was probably analogous to the practise observed among the Canadian Indians by the Jesuits ("Relations des Jésuites," 1637, p. 60, quoted by Frazer, *l.c.* i. 139). The Canadian wizards sent out familiar spirits to seek the souls of their enemies, which they brought back in the shape of stones, and the wizards then broke these with swords or axes, and by this means destroyed their enemies. Thus folk-lore by comparative research may throw light upon certain Biblical practises, but they are just those practises that are opposed by the Hebrew prophets.

Similarly, the legendary stories of the Old Testament may at times be illustrated or paralleled by the folk-lore of savages and uncivilized peoples. The strong men of David live again in the paladins of Charlemagne. It has been suggested by so prominent an authority as De Goeje that the story of Esther is found once again in the framework story of the ARABIAN NIGHTS. At times it would seem as if some of the legends of the Bible were explanations of folk-lore customs, the object of which had fallen into oblivion. Thus the story of the wrestling of Jacob with the angel is obviously intended to explain the practise of avoiding the sciatic nerve as food; the original object was possibly based on some fantastic folk-lore analogy. See FOLK-TALES.

The natural tendency to folk-lore, expelled as it had been by the Prophets, returned with all the greater force during the Talmudic period, probably under the influence of Babylonian and Persian environment. The "shedim" or demons became as ubiquitous to the folk-mind of the ordinary Jew in Talmudic times (see DEMONOLOGY) as microbes, to which they present remarkable analogies. Even the Rabbis themselves were at times not free from sharing in the popular beliefs. Yet there are found instances of exceptional freedom from folk-lore influences. Thus, while there is a whole catalogue of prognostications by means of DREAMS in Ber. 55 *et seq.*, and Rabbi Johanan claimed that those dreams are true which come in the morning or are dreamed about us by others, or are repeated (Ber. 56b), Rabbi Meïr declares that dreams help not and injure not (Giṭ. 52a, and parallels). The authorities of the Talmud seem to be particularly influenced by popular conception in the direction of FOLK-MEDICINE. A belief in the EVIL EYE was also prevalent in Talmudic times, and occasionally omens are taken seriously, though in some cases recognized as being merely popular beliefs. Thus, while it is declared to be unlucky to do things twice, as eating, drinking, or washing (Pes. 109b), Rabbi Dunai recognized that this was an old tradition (*ib.* 110b). Perhaps the most remarkable custom mentioned in the Talmud is that of planting trees when children are born and intertwining them to form the ḥuppah when they marry (Giṭ. 57a). Yet this is probably Persian, and is found also in India (W. Crookes, in "Folk-Lore," vii.)

In the Talmud.

A custom like that of walking on the sidewalks when the plague was in the town, and in the middle of the street when the town was healthful, might have been founded upon some particular experience, but the reason given, that the Angel of Death walks about openly in time of plague, and sneaks near the houses at other times, is little more than a metaphorical repetition of the experience (B. Ḳ. 60b). On the whole, the list of folk-lore beliefs and customs given in such a book as Brecher's "Das Transcendentale, die Magie und Heilarten im Talmud," is comparatively meager.

In the direction of popular custom the Talmud offers a field for wider investigation. It is possible that several of the customs mentioned there could be traced back to Bible times, as is indeed often claimed for them. The importance attributed to the burning of the "ḥallah" in the home of every Jewess is possibly traceable to some early form of hearth-worship, as parallels exist elsewhere (Coulange, "La Cité Antique"). The extension of the principle of not seething a kid in its mother's milk to all kinds of meat is probably another instance of Palestinian custom, only slightly represented in the Bible. When the history of the Halakah has been more systematically and critically carried out, it may be possible to recover some of the folk-customs of Bible times from this source.

Similarly it may be possible to distinguish in the haggadic legends of Biblical character those portions that probably formed part of the original accounts from those that have been developed by the exegetic principles of the haggadists. In the later Haggadah there are some elements probably derived from Indian and Greek fables (see FABLE), while others resemble the quaint plays of fancy found in modern drolls in the so-called "Lügenmärchen" of German folk-lore. In one particular direction the Talmud is of extreme interest for folk-lore investigation, namely, the transition from maxim to proverb, which can be clearly observed. While there is a considerable number of anonymous PROVERBS, there is a still larger number of wise sayings, which, owing to the Talmudic principle, "say a thing in the name of the man who says it," can be traced to their authors, and are therefore maxims; for example, the saying "Descend a step to choose a wife; ascend a step to choose a friend" would be considered a proverb if it did not happen that one is able to trace it to its original author, Rabbi Meïr.

In Post-Talmudic Times.

After the dispersion of the Jews it becomes increasingly difficult to speak of specifically Jewish folk-lore. Spread among all the peoples of the earth, the Jews appear to have borrowed customs from each of them, and when found among them to-day it is most difficult to determine: first, whether the custom is at all Jewish; and, secondly, if non-Jewish, whether it belongs to the country where the particular folk-lore item is found, or has been brought thither from some other country. Thus among the Jews of Lithuania and Austria is found the German remedy against toothache, to look at the hole of a mouse and pronounce the

German formula commencing "Mausele, Mausele!" As the Lithuanian Jews still use this formula, the custom has clearly been brought by them from Germany. Or, again, as early as the twelfth century, the Teutonic test of murder was to bring the suspected murderer into the presence of his victim, when, if guilty, the wounds of the murdered man bled anew. This is found in the Sefer Ḥasidim, No. 1149, and, five hundred years later in Manasseh ben Israel's "Nishmat Ḥayyim," iii. 3. A variation in custom is sometimes found between one set of Jews and another which enables the inquirer to determine the origin of them. Thus, English Jews sometimes show a disinclination to sit down with thirteen at a table, probably copied from their Christian neighbors who connect the superstition with the Last Supper of Jesus; whereas Russian Jews consider thirteen as a particularly lucky number, as it is the gematria of אחד, the last and most important word of the Shema'.

It is never safe to assume that a modern Jewish custom is necessarily Jewish. Such a widespread one as that of the "shaitel," or habit of shaving the hair of women after they are married and replacing it by a wig, is found among the ancients (see Pausanias, ed. Frazer, iii. 279–281) and among the Fiji-Islanders and the Kafirs (Crawley, "Mystic Rose," p. 366), and might seem to be a survival from Bible times, yet it is not followed at all in Palestine (M. Reischer, "Shaare Yerushalayim"). When, therefore, the custom of covering mirrors after death, usual among the Jews, is found also in Oldenburg (Wuttke, "Der Deutsche Aberglaube," § 728), it may be safely assumed that the Jewish custom was derived from the German, and not vice versa. Again, the custom of "sin-buying" observed among the Jews of Brody ("Urquell," iii. 19) has its analogue in the "sin-eater" of Wales ("Folk-Lore," iv.). In the Jewish practise a ne'er-do-well would take upon himself the sins of a rich man for a definite sum. Cases have been known where a person who has taken another's sins upon himself has felt compunction upon the death of the original sinner, and has visited his tomb and in the presence of witnesses deposited upon the tomb the sum originally paid for the sin, begging the dead man to take back his sins. Though found among Jews, there is little probability of this practise being originally Jewish.

On the other hand, there are customs among Jews which can be explained only from specifically Jewish notions, and are rightly included in Jewish folk-lore. Thus, in Minsk there is a belief that if for thirty days you are not "called up" to the Law you are ritually dead, and a Cohen must not approach you, just as he must not approach a corpse. To ascertain whether you are really dead or not, when you are called up after the thirty days, look at the letters of the scroll of the Law, and if you can discern one letter from another there is some mistake and you are not dead, for the dead when called up at night in the synagogue can not read. Here the whole conception is a development of Jewish ideas, and so far it may be regarded as a genuine item of Jewish folk-lore. Or, again, the curious belief that the resurrection of the dead will take place in the valley of Jehoshaphat, and that, therefore, the corpse must have a three-pronged fork to tunnel his way to Jerusalem if buried out of the Holy Land, is a specifically Jewish corollary to the veneration of Jerusalem. Or, again, the belief that any piece of iron will turn rusty if exposed on the four "tekufot," or seasonal changes of the year, appears to be specifically Jewish, yet later than Talmudic times.

When Jewish customs find their analogues in savage practises, the problem of determining the source of the custom becomes more complicated. Thus, the Banks-Islanders, like the modern Jews, bury their nail-parings ("Jour. Anthrop. Ins." x. 283). It is obvious that the Jews could not have borrowed the custom from the Banks-Islanders, yet they may have borrowed it from races that had passed through stages as savage as the Banks-Islanders. The practise is found referred to in the Talmud (M. Ḳ. 18a), and even there may be a borrowing from the Babylonians.

For this reason it might seem likely that the Jews would be favorable media for transplanting folk-tales and customs from one nation to another, owing to their continuous migrations; their social isolation, however, has prevented much of this kind of intermediation, and no decisive evidence has been adduced in regard to it. On the other hand, in the literary transmission of Indian folk-tales from East to West, Jews have played an important part. The Bidpai literature was transferred from the Orient to western Europe entirely by Jewish means (see Kalilah wa-Dimnah), and the same applies to the Sindbad, Barlaam, and other sets of Oriental tales. For the medieval legends which relate to Jews see Folk-Tales.

The mutual relations between Jews and Christians, mostly antithetic, have given rise to a certain amount of folk-lore, in which may be included the myths of the blood accusation, and of host-piercing, besides such tales as that of the "Three Rings" and of "Shylock." The Jews themselves have very little folk-lore connected with Christians or Christianity, the Jewish legends about Jesus in the "Toledot Yeshu" being, as proved by Krauss ("Das Leben Jesu nach Jüdischen Quellen," 1903), mainly derived from Christian sources. Among the Russian Jews it is considered unlucky to meet a priest, but a very natural interpretation could be given to this belief. To prevent the ill luck the remedy is to throw some straw over the back.

Altogether there is considerable material for Jewish folk-lore, but it must be used with extreme caution, owing to the amount of "lateral tradition," *i.e.*, customs derived not by descent but by borrowing. Under the influence of Dr. M. Grunwald a society has been founded at Hamburg for the pursuit of the study, under the name of "Gesellschaft der Jüdischen Volkskunde."

The following list of some of the folk-lore topics in the Jewish Encyclopedia will indicate the extent of the subject:

Æsop's Fables
Afikomen
Amram
Amulet
Ancestor Worship
Andreas
Angelology
Arthur Legend
Asmodeus
Asusa
Baba Buch
Ba'al Shem

Barlaam and Josaphat
Bat Ḳol
Beard
Berechiah ha-Nakdan
Betrothal
Bibliomancy
Blood Accusation
Burial
Cabala
Cat
Caucasus
Childbirth
Cochin
Cookery (cakes)
Cradle Songs
Death, Angel of
Demonology
Dibbuḳim
Dog
Door and Door-Post
Dragon
Dreams and Dream-Books
Elijah's Chair

FOLK-MEDICINE: The ideas and remedies common among uncultured people with regard to the prevention and cure of diseases. They are found among the Jews of all ages. Even in the Old Testament the use of the mandrake to produce fertility is referred to as being efficacious (Gen. xxx. 14). In Tobit vi. 78 the smoked liver, heart, and gall of a fish are recommended for casting out a demon or evil spirit.

In the Talmud there is ample evidence of the spread of folk-medicine in Babylonia. Probably as a protest against this, it is stated that Hezekiah had hidden away a book of medical remedies (Ber. 10b). The tertian fever was to be cured by an amulet consisting of seven sets of seven things hung around the neck (Shab. 67a). Amulets were used also against epilepsy (Shab. 61a). The idea of transferring a disease to animals, found so frequently in folk-medicine (see Frazer, "Golden Bough," iii. 13–15), is found also in the Talmud. In fever the patient was recommended to go to a cross-road and seize the first ant with a burden that he saw crawling along. He was to seize it and place it in a copper tube, which was to be covered with lead and then sealed. Then he was to shake the tube and say: "What thou carriest on me, that I carry on thee" (Shab. 66b; see MEDICINE IN RABBINICAL LITERATURE).

In the Middle Ages there is evidence of a much wider spread of folk-medicine among Jews. Güdemann ("Geschichte," i. 316 *et seq.*) gives a number of folk-recipes that occur in the "Book of the Pious" of the thirteenth century. Grunwald also gives a long collection from manuscripts of the sixteenth to the eighteenth century in "Mitteilungen der Gesellschaft für Jüdische Volkskunde," v. 44–65. A number of these recipes were derived by the Jews from their Christian neighbors. Thus, against premature birth the wife was recommended to carry a portion of her husband's stockings or girdle, a method which is recommended by German folk-medicine also. (Wuttke, "Deutsche Aberglaube," p. 195).

When it is declared that a remedy against toothache is to carry an amulet with the word ὠφελε on it ("Mitteilungen," v. 47), it is clear that this is not of Jewish origin, though found among Jews. Against epilepsy, which, owing to its mysterious character, seems to have attracted the attention of the folk-doctors, the following is one of many remedies. Put several crabs in a pot, pour some good wine over them, and bury them for three days and three nights; then give some of the sauce thus made to the patient morning and night for nine days. ("Mitteilungen," v. 52). In modern times the following recommendations have been given against this disease: Let the patient carry a golden peacock's feather under his shirt ("Urquell," v. 290); or let him drink the blood of a black cat (Kovno); or let his shirt, after having been pulled over his head and taken out through the chimney, be buried at two cross-roads (Minsk).

Epilepsy and Fever.

Fever is also a favorite subject of modern Jewish folk-medicine. The remedies are sometimes simple; as, to spill a can of water suddenly on the patient ("Urquell," v. 223), or to let him eat something he does not like, or to lay a kreuzer on the bank of a stream at sunset; whoever finds it will take the fever away with him. Curiously enough, the Christian peasants of Galicia seem to trust for the removal of fever to water in which a mezuzah which has been stolen from a Jewish house has been placed ("Urquell," v. 226). Similarly, the Polish peasants believe that the hand of a dead Jew is effective against typhus, and a case occurred in which some peasants exhumed a Jewish corpse for this purpose near Cracow in 1892 ("Urquell," iii. 126–128). Dust from the grave of a saint is also recommended, and may have some Talmudic authority (Perles, in "Monatsschrift," x. 389).

Jaundice is another disease with regard to which many remedies, probably derived from their neighbors, are current among the Jewish folk. Drinking water in which something yellow has been cooked is an obvious method, on the principle of sympathetic magic; another remedy is to swing a dove around the patient's head twice, saying at the same time: "Dove, take this illness from N. ben N.," and then letting the dove fly ("Urquell," v. 290).

Strangely enough, blood, which is so frequently used in general folk-medicine, is rarely, if ever, used among Jews (compare Strack, "Das Blut," p. 127), except in cases of nose-bleeding, when the actual

blood thus lost is sometimes used, baked into a cake, and, on the well-known sympathetic principle, given to a pig ("Sefer Refu'ot," 14b).

Of Jewish popular views as to the cause of disease it is difficult to speak. There are three current views among the folk in general (W. G. Black "Folk Medicine," p. 4, London, 1883): the anger of an evil spirit, the supernatural powers of an enemy, and the ill will of the dead, of which only the first can be definitely traced in Jewish folk-thought, and then only through the power attributed to spells and exorcisms. See AMULET; BA'AL SHEM; BIBLIOMANCY; EXORCISM; MEDICINE; SPELLS.

J.

FOLK-SONGS: Songs or ballads originating and current among the common people, and illustrating the common life. Jewish folk-songs exist in languages and dialects other than Hebrew and Judæo-German; in Ladino, for instance. Traces of Hebrew folk-songs may be found in the Talmud. In Ta'an. 26b it is related that on the 15th of Ab and on the Day of Atonement the daughters of Jerusalem assembled in the vineyards to dance before young men, and sang:

> "O young man, lift up thine eyes
> And look before you choose;
> Look not for beauty,
> But seek for good breeding.
> False is grace, and beauty is vain;
> A God-fearing woman is alone worthy of praise."

A fragment of a bridal song is recorded in Ket. 17a, where Rab Dimi says: "Thus they sing before a bride in the West":

> "Her eye without kohl,
> Her face without paint,
> Her hair without curl,
> Yet a form full of grace."

A ballad of the narrative kind is the tale of the "Pious Man" (איש חסיד) included in the hymns for the termination of the Sabbath, universally sung by Ashkenazic Jews. The balladic narrative is the composition of an author whose name is acrostically indicated in the last verses as ישי בר מרדכי ("Jesse, the son of Mordecai"). It relates, in verse, the story of a destitute pious man who became rich by the favor of the prophet Elijah. Judæo-German folk-songs are those formerly current among the Jews in Germany and those living in the mouths of Yiddish-speaking Jews in Russia, Poland, and other countries. The former have been preserved in collections of Jewish folk-songs published in Germany, particularly in that issued at Worms about 1595–1605. One of the ballads contained in that collection is given as an example by Dr. A. Berliner in his "Aus dem Inneren Leben der Deutschen Juden im Mittelalter" (Berlin, 1900). It was sung as an accompaniment to a particular dance, and it reads in part:

> "O young lady, will you not dance with me?
> I pray you will not take it amiss;
> Joyful I must be
> As long as I can.
> Your body, tender and young,
> Has wounded me in love,
> So have your eye serene
> And your crimson mouth;
> Close, then, your arms,
> Dear love, in mine
> And my heart will recover."

But this is more an adaptation than a ballad of Jewish origin.

The Judæo-German ballads current in the Slavonic countries lack no originality, though they may be adaptations from German folk-songs or translations and imitations of Slavonic compositions. Their spirit, however, is Jewish. For instance, the idea of remaining an old maid is a very sad one for a Russo-Jewish girl, and she sings:

> "I sit upon a stone
> And I am seized with weeping;
> All girls do marry,
> But I remain alone."

Another begins:

> "When the pleasant summer comes
> We are playing with sand;
> Where our dwelling is
> There is our land.
> Black cherries we are plucking,
> Red ones we let stand;
> Handsome lads we are taking,
> The ugly we let go!"

A ballad sung by children in some parts of Lithuania runs:

> "Little boys and little girls
> Took one another;
> Ninth of Ab was wedding-day
> And no one came,
> Except Uncle Elijah
> With his long cloak,
> On his gray little horse,
> With his long beard."

BIBLIOGRAPHY: No less than 375 Yiddish folk-songs are contained in a collection by S. M. Ginzburg and P. S. Marek, *Jüdische Volkslieder in Russland*, St. Petersburg, 1901; others are given in Wiener's *Popular Poetry of the Russian Jews*, in *Americana Germanica*, vol. ii., No. 2, and in his *History of Yiddish Literature*, pp. 53 *et seq.*, New York, 1899. A number of folk-songs in Ladino are given by Danon in *R. E. J.* xxxii. and xxxiii.; others are contained in *Urquell*, i. 206; vi. 28, 97, 153; *Neue Folge*, i. 45, 195; ii. 27. See CRADLE SONGS. See also Grunwald in *Mitteilungen der Gesellschaft für Jüdischen Volkskunde*, i. 50–67, ii. 37–49, iii. 9–22, iv. 124–130, viii. 154–157.

J. A. HA.

FOLK-TALES: Stories usually containing incidents of a superhuman character, and spread among the folk either by traditions from their elders or by communication from strangers. They are characterized by the presence of unusual personages (dwarfs, giants, fairies, ghosts, etc.), by the sudden transformation of men into beasts and vice versa, or by other unnatural incidents (flying horses, a hundred years' sleep, and the like). Of a similar kind are the drolls of the nursery, generally consisting of a number of simple "sells."

There is evidence of the existence of folk-tales among the Jews at all stages of their history. Even in the Bible there are Jotham's fable (see FABLE), the story of Lot's wife, and the combat between David and Goliath, certain elements of which have all the characteristics of folk-tales.

A number of haggadic stories bear folk-tale characteristics, especially those relating to OG, King of Bashan, which have the same exaggerations as have the "Lügenmärchen" of modern German folk-tales.

There are signs that a certain number of fables

were adopted by the Rabbis either from Greek or, indirectly, from Indian sources (see FABLE).

Though there is little evidence of Jews having had folk-tales of their own, there is considerable evidence of their helping the spread of Eastern folk-tales in Europe. Petrus Alfonsi's "Disciplina Clericalis" (about 1110) contained the earliest specimens of Eastern folk-tales in literature; and they were very widely used to give piquancy to sermons. But for Jews the very large collection of stories connected with the names KALILAH WA-DIMNAH and SINDBAD would probably not have reached Europe at all. As late as the sixteenth century the "Schimpf und Ernst" of a Jewish convert named Pauli became the source for comic stories throughout northern Europe. It has been calculated that nearly one-tenth of the folk-tales of modern Europe have been derived from these sources. For the part taken by Jews in compiling the "One Thousand and One Nights" see ARABIAN NIGHTS.

In the Middle Ages.

Besides these tales from foreign sources, Jews either collected or composed others which were told throughout the European ghettos, and were collected in Yiddish in the "Maasebücher." Numbers of the folk-tales contained in these collections were also published separately (see the earlier ones given by Steinschneider in "Cat. Bodl." Nos. 3869–3942). It is, however, difficult to call many of them folk-tales in the sense given above, since nothing fairylike or supernormal occurs in them.

There are, however, a few definitely Jewish legends of the Middle Ages which partake of the character of folk-tales, such as those of the Jewish pope (see ANDREAS) and of the golem (homunculus) of the "Hohe Rabbi Löw," or that relating to the wall of the Rashi chapel, which moved backward in order to save the life of a poor woman who was in danger of being crushed by a passing car in the narrow way. Several of these legends were collected by Tendlau ("Sagen und Legenden der Jüdischen Vorzeit").

Legends.

Of recent years a certain number of folk-tales have been gathered among Jews or published from Hebrew manuscripts by Israel Lévi in "Revue des Etudes Juives," in "Revue des Traditions Populaires," and in "Melusine"; by M. Gaster in "Folk-Lore" and in the reports of Montefiore College; and by M. Grunwald in "Mitteilungen der Gesellschaft für Jüdische Volkskunde" (see Index to part vi., *s.v.* "Erzählungen"); by L. Wiener in the same periodical; and by F. S. Krauss in "Urquell," both series. Altogether some sixty or seventy folk-tales have been found among Jews of the present day; but in scarcely a single case is there anything specifically Jewish about the stories, while in most cases they can be traced back to folk-tales current among the surrounding peoples. Thus the story of "Kunz and His Shepherd" (Grunwald, "Mitteilungen," ii. 1) occurs in English as "King John and the Abbot of Canterbury"; and "The Magician's Pupil" (No. 4 of Wiener, in "Mitteilungen," x. 103) is also found widely spread. The well-known story of the "Language of Birds," which has been studied by Frazer ("Archeological Review," iii., iv.; comp. "Urquell," v. 266), is given in "Mitteilungen," i. 77. No. 4 in the collection of Wiener is the wide-spread folk-tale of "The Giant's Daughter," which some have traced back to the legend of Medea. Two of the stories collected by Grunwald, No. 13, "The Birds of Ibycus," and No. 14, "The Ring of Polycrates," appear to be traceable to classical sources; while his No. 4 gives the well-known episode of the "Thankful Beasts," which Benfey traced across Europe through India ("Kleine Schriften," i.). Even in the tales having a comic termination and known to the folk-lorists as drolls, there are no signs of Jewish originality. The first of the stories collected by Wiener is the well-known "Man in the Sack," who gets out of his difficulties by telling passers-by that he has been unwillingly condemned to marry a princess (see Jacobs, "Indian Fairy Tales").

As in other branches of folk-lore, modern Jews give strong evidence of having borrowed from their neighbors, and show little originality of invention. A few folk-tales of the European peasantry deal with the Jews, such as the wide-spread one explaining why Jews do not eat pork ("Revue des Traditions Populaires," iv.–vii.).

J.

FOLLY AND FOOL (in Biblical Hebrew, "kesil," "kislut," or "ewil," "iwwelet"; Neo-Hebraic "shoṭeh," "sheṭut" ["nabal," "nebalah," however, do not signify "fool," "folly," as in A. V. (Ps. xiv. 1, liii. 1, lxxiv. 18; Isa. xxxii. 6; Gen. xxxiv. 7; Deut. xxii. 21, xxxii. 6; Judges xx. 6; Jer. xxix. 23), but "a vile man," "villainy"]): According to the Jewish conception, folly is the antithesis of morality and piety (Prov. xiii. 19; Job xxviii. 28), as well as of wisdom and prudence (Prov. xiii. 16, 20); and the fool is an offender against religion and ethics, and a hater of knowledge (Prov. i. 7, 22). In fact, the fool is the subject of such frequent rebuke in the Wisdom literature chiefly because his folly leads to an untimely end (Prov. x. 14; Eccl. vii. 17), brings unhappiness to others (Prov. x. 1, xvii. 25), creates evil habits (Prov. x. 23) and bad traits (Prov. xv. 5, xvii. 10), and causes sin (Ps. lxix. 6; Prov. xxiv. 9; Jer. v. 21) and a misconception of divine providence (Ps. xcii. 7, 8). Folly promotes insolence (Prov. xiv. 16), conceit (Prov. xii. 15), irreverence (Prov. xv. 20), contentiousness (Prov. xviii. 6), anger (Prov. xxvii. 3), extravagance (Prov. xxi. 20), and sensuality (Prov. x. 23).

To prevent folly and to correct it, the use of the rod was recommended (Prov. xxii. 15, xxvi. 3). The Rabbis also emphasized the ethical side of folly. R. Joshua sees danger for society when piety is linked to folly (Soṭah iii. 4), and Resh Lakish maintains that "a man sins only when the spirit of folly enters into him" (Soṭah 3a; compare Maimonides, "Moreh," iii. 11). In rabbinical parables reference is frequently made to the fool. R. Johanan b. Zakkai likens those who are unprepared for death to fools who are not ready for the banquet when suddenly summoned by the king (Shab. 153a; compare Matt. xxv. 1–14).

K. J. STO.

FOLZ, HANS: German playwright and physician of the fifteenth century; said to have been born

in Worms. He is mentioned as "Hans Falz zu Nurmberk balbirer." Folz wrote numerous farces and "Fastnachtspiele" (Shrove Tuesday dramas), and introduced here and there Jewish characters, generally for comic purposes. The parts they play are usually ridiculous and contemptible. In his "Die Alt und die Neu Ee," where the religion of the Talmudim and Midrashim is contrasted with Christianity, to the latter's advantage, Folz has certain of his characters sing a corrupted version of the "Adon 'Olam," which the rabbi of the play then interprets. This fifteenth-century version is the oldest German translation of the prayer in rime.

Folz's farce, "Der Juden Messias," introduces a student who seduces a Jewish maiden and then mocks at the parents and at the Jewish religion. The cynic is made to appear as a student because Rabbi Isserlein of Wiener-Neustadt, of whom Folz had probably heard, always opposed the scholarly and priestly classes to honest and God-fearing men (Güdemann, "Geschichte des Erziehungswesens und der Cultur der Juden in Deutschland," p. 206, note 3).

Folz wrote also on Biblical subjects, *e.g.*, "Busse Adams und Evas" (1480). A disputation in rime (1479) between a Jew and a Christian glorifies Christianity at the expense of Judaism. Folz was a predecessor and master of Hans Sachs.

BIBLIOGRAPHY: Karl Bartsch, in *Allg. Deutsche Biographie*, vii. 151; Goedeke, *Grundriss zur Gesch. der Deutschen Dichtung*, p. 99; *Zeitschrift für Deutsches Altertum*, viii. 507, 537. Folz's plays are given in Keller, *Fastnachtspiele*, v. 3, Stuttgart, 1853; idem, *Nachlese*, ib. 1858.

G. A. M. F.

FONSECA (FONSEQUA), DE or DA: Jewish-Portuguese family of Amsterdam, Hamburg, London, southern France, and America.

Abraham de Fonseca: Died at Hamburg July 27, 1671 (according to other authorities May, 1651); ḥakam of the Portuguese community at Glückstadt, and later at Hamburg. He was buried at Altona. Abraham was the author of "'Ene Abraham," Amsterdam, 1627, an index of all the Biblical passages explained in the Midrash Rabbah.

Abraham de Fonseca: Author of "Orthographia Castellana," Amsterdam, 1663, dedicated to J. Nuñes da Costa.

Abraham de Fonseca: Lived at Amsterdam in the seventeenth century. He was one of the founders of the philanthropic institution, Maskil el Dal, in that city. In 1682 he organized a school in connection with the institution (D. L. de Barrios, "Maskil el Dal").

Abraham de Fonseca: Son of Joseph b. Joshua de Fonseca; born at Hamburg; died Jan. 21, 1727. He was graduated in medicine from Leyden University, his thesis being "De Peste," Leyden, 1712.

Abraham de Fonseca de Mattos: Graduated in medicine from Leyden University July 4, 1753, his thesis being "De Fractura," Leyden, 1753. He practised in Hamburg, where he died 1809.

Abraham Ḥayyim Lopez de Fonseca: Buried at Curaçao in 1671 (Corcos, "Jews of Curaçao," p. 10; "Publications Am. Jew. Hist. Soc." No. 7, p. 57).

Antonio (Rodrigo) de Fonseca: Physician; born at Lisbon. He taught for many years at the universities of Pisa and Padua, and practised medicine in Flanders and the Palatinate after 1620. He was the author of "Tractatus de Epidemia Febris Grassante in Exercitu in Inferiori Palatinatu Ao. 1620, 1621," etc., Mechlin, 1623.

Daniel de Fonseca: The first person to have a Hebrew printing-press at Amsterdam. He printed in 1627 at his own expense the "'Ene Abraham" of his relative Abraham de Fonseca (Ersch and Gruber, "Encyc." section ii., part 28, p. 64).

D. M. K.

Daniel de Fonseca: Marano physician and diplomat; born in Portugal in the second half of the seventeenth century; died in Paris. His grandfather had been burned as a Marano, and his father escaped only by flight. Daniel, then eight years old, was baptized with his brothers: he entered the priesthood, but returned secretly to Judaism as soon as he had reached the age of manhood, continuing, nevertheless, to perform his sacerdotal functions. The Inquisition, suspecting him, endeavored to seize him, but he escaped to France, where he probably studied medicine. He then went to Constantinople, where he returned publicly to Judaism. A learned and talented man, the only philosopher, perhaps, among the Jews of his time (Voltaire, "Histoire de Charles XII." book v.), Fonseca succeeded in creating for himself a prominent position in the Turkish capital among the statesmen of the Ottoman empire. Thanks to his profession, he obtained the confidence of viziers and pashas, and rendered important services to the French ambassadors in Constantinople.

After the battle of Poltava, Fonseca adroitly aided Charles XII. of Sweden in his intrigues at the Porte against Russia and Poland. He was appointed physician to the French embassy at Constantinople under De Fériol, and kept this office until 1719. In March of that year he left for Bucharest as physician and adviser to the reigning prince, Nicholas Mavrocordato, with whom he seems to have associated in Constantinople when the prince was first dragoman at the Porte. The office of physician to the prince was only a pretext. Fonseca had accepted the post with the express permission of the French embassy, in whose service he still continued, and probably also with the consent of the Turkish government, to aid Turkey against Austria. Thus the representative of Austria at Constantinople, Count de Virmont, expressed apprehension when Fonseca took possession of his post: "He is a shrewd intriguer, whom I distrust very much" (Hurmuzaki, "Documente Privitoare la Istoria Românilor," vi. 279).

After spending some years at Bucharest, Fonseca returned to Constantinople, where he was appointed physician to Sultan Aḥmad III. He continued at the same time in the service of France, receiving a salary of 2,000 francs per annum. After the deposition of Aḥmad III. (1730), Fonseca went to live in Paris, where he associated with Voltaire, with the Countess of Caylus, and with other distinguished people of the period. He died at an advanced age.

muzaki, *Documente Privitoare la Istoria Românilor*, v., part ii., 293; Supplement i., part i., 444, 459; Hammer-Purgstall, *Histoire de l'Empire Ottoman*, xiv. 24, 159.

D. E. Sd.

Diego Lopez de Fonseca: Burned at Lima Jan. 23, 1639, as an adherent of Judaism ("Publications Am. Jew. Hist. Soc." No. 4, p. 115).

Francisco de Fonseca Henriques: Physician; author of "Medicina Lusitana, Socorro Delphico," Amsterdam, 1731.

Isaac (Miguel) Henriquez de Fonseca: Lawyer; lived at Avios, Portugal, in the seventeenth century; was burned at Lisbon May 10, 1682, as an adherent of Judaism.

Isaac Hezekiah Lopez de Fonseca: Ḥakam or ḥazzan at Curaçao about 1770; related to Jacob Lopez de Fonseca.

Jacob Ḥayyim de Fonseca: German physician; born at Hamburg; died there Jan. 13, 1754. He received the degree of M.D. from Leyden University, his thesis being "De Chilificatione," Leyden, 1719. He was a son of Joseph de Fonseca, and practised medicine in Hamburg.

Jacob Lopez de Fonseca: Ḥakam at Amsterdam; died after 1780. Several of his sermons were published at Amsterdam in 1763 and 1780.

Joseph Ḥayyim de Fonseca: Son of Joshua de Fonseca; born at Hamburg; died Feb. 14, 1737; received his doctor's degree from Leyden University for his thesis, "De Dysenteria," Leyden, 1683.

Joshua de Fonseca: Practised as a physician in Hamburg; died Dec. 7, 1701; son of Ḥakam Abraham de Fonseca.

Manoel de Fonseca: Spanish interpreter in Jamaica; lived in London in 1661, in the house of the Spanish ambassador, in order to learn English.

Moses Lopez de Fonseca: Ḥazzan of Congregation Shearith Israel, New York, in 1728 and later ("Publications Am. Jew. Hist. Soc." iv. 194, vi. 126).

D. M. K.

FONTAINEBLEAU: French town in the department of Seine-et-Marne. The nucleus of the community was formed about 1787. The oldest document relating to it in the archives is dated "Germinal 11, year 7" (March 31, 1799). At first the devout families met in a house owned by one of their number. In 1819 the community purchased for 1,200 francs a part of a house. This was found inadequate, and on May 12, 1853, the community acquired a site for the erection of a synagogue at the point of entrance to the palace gardens, the park, and the forest. Adjoining was a house used as a parsonage. Nathan Salomon, the inspecting architect of the castle and a member of the government, made the plans of the synagogue and directed the work without accepting any remuneration. The land cost 5,700 francs, the building 15,000. The emperor sent 1,000 francs personally, the state and the town together contributed 3,200; the community paid the rest, and in 1861 the congregation was free from debt. The foundation-stone having been laid by the subprefect in May, 1856, the inauguration ceremony occurred on Aug. 23, 1857. The ceremonies were presided over by the chief rabbi of France, Isidor, taking place in the presence of the subprefect and the authorities. Beyond the synagogue is the cemetery, in the forest at the foot of Mont Ussy.

The community, composed of merchants, day-laborers, and small fund-holders, totals twenty-nine families; to these must be added seven families from Melun, which belongs to the same district. In addition there are a certain number of Jews who take no part in the affairs of the community. It is only at the time of the grand festivals that the presence of visitors, who spend the summer there, lends any animation to the religious life. The community is frequently called upon to aid unfortunate coreligionists to reach Paris or Havre on their way to America. At the time of the expulsion of the Russian Jews, and later of the Rumanian Jews, it had to meet many such appeals.

D. M. Lev.

FONTANELLA, DAVID. See Finzi.

FONTANELLA, ISRAEL BERECHIAH BEN JOSEPH JEKUTHIEL: Italian rabbi and cabalist; lived at Reggio Emilia, later at Rovigo, at the end of the seventeenth century and in the first half of the eighteenth. He was also an eminent Talmudist (see Lampronti, "Paḥad Yiẓḥaḳ," *s.v.* טומאת אהל). An adept in the Cabala, he edited the "Maftehot ha-Zohar," Venice, 1744, a twofold index to the Zohar, attributed to a certain Samuel. The first volume contains an index of subjects; the second an index of the Biblical passages quoted.

Bibliography: *Educatore Israelitico*, xxviii. 248; Mortara, *Indice*, p. 24; Fuenn, *Keneset Yisrael*, p. 700.

FOOD.—Biblical Data: There are two main divisions of food, vegetable and animal.

I. Vegetable Food: As among all the Oriental peoples, and as is the case even to-day among the fellaheen of Syria, vegetable food, and chiefly grain ("dagan"), occupied the first place in the diet of the Israelites.

Cereals: The most important of the cereals was wheat ("ḥiṭṭah" or "ḥittim"). (For the earliest mode of preparing this, see Baking; Bread; Cookery; and comp. "Z. D. P. V." ix. 3.) The grains were at times reduced to grits ("geres"); hence the prescription that "'abib ḳalui" and "geres karmel"—probably "geres" of garden grains, which are palatable and mature especially early—should be offered as "minḥat bikkurim." The grain was generally ground into flour ("ḳemaḥ"), the fine flour ("solet") being distinguished from the ordinary kind. The flour was made into bread, either without leaven ("maẓẓah") or with it ("leḥem"; Lev. vii. 13). Barley ("se'orim") was used like wheat (comp. II Sam. xvii. 28), being generally made into bread (comp. Judges vii. 13; II Kings iv. 42; Ezek. iv. 9, 12). Spelt ("kussemet") was apparently used much less than wheat or barley. It appears, however, from Ezek. iv. 9 that, besides millet, spelt also was made into bread.

Vegetables ("yaraḳ," because raised in the "gan ha-

yaraḳ" or garden; also "'eseb"; "orah," I Kings iv. 39; or "zer'onim," Dan. i. 16): Lentils ("'adashim") were the principal vegetable, which many considered especially toothsome (comp. Gen. xxv. 29 *et seq.*). There were several kinds of beans ("pol"); two kinds are known at present in Syria, the Egyptian and the South-European (comp. "Z. D. P. V." ix. 4). Beans were occasionally made into bread.

Cucumbers were manifestly also much used; even to-day the poorer inhabitants in the large cities of the East, as Damascus and Cairo, live largely on bread and cucumbers or melons. Cucumbers ("ḳishshu'im"; Num. xi. 25) are generally eaten raw, and made into a salad with vinegar. The popular watermelon ("abaṭṭiaḥ"; Num. xi. 5; to-day called "baṭṭikh") also belongs to the cucumber species.

Num. xi. 5 mentions leeks ("ḥaẓir," which were especially esteemed in Egypt), onions ("beẓalim"), and garlic ("shumim"), all belonging to the *Allium* genus. They were generally eaten raw with bread. To-day in Syria ripe onion-bulbs are pickled like cucumbers and eaten as a relish with meat (comp. "Z. D. P. V." ix. 14). From Job xxx. 4 it is clear that the poor also used orach ("malluaḥ"), the young leaves being either boiled or eaten raw.

Fruit: There was an early fig ("bikkurah") and a late fig ("te'enim"), the latter being generally dried and pressed into round or square cakes ("debelah"). Grapes ("'anabim," "eshkol anabim") were eaten either fresh, or dried as raisins ("ẓimmuḳim"); they were also pressed into cakes (I Sam. xxv. 18). It is doubtful whether the Israelites knew grape-sirup, though the fact that the Arabic "dibs," corresponding to the Hebrew "debash," is used to designate both the natural and this artificial honey or sirup, shows that they probably knew the latter (Gen. xliii. 11; Ezek. xxvii. 17). Olives ("zayit") were probably eaten, as to-day, both raw and prepared. Mention may also be made of the pomegranate ("rimmon"; Deut. viii. 8; Song of Songs iv. 3); the fruit of the mulberry fig-tree ("shiḳmah"), eaten by the poor, and of the date-palm ("tamar"), which is treated like figs and grapes; and, finally, pistachio-nuts ("boṭnim"), almonds ("sheḳedim"), and walnuts ("egoz"). The fruit of the carob (κεράτιον) was used, while not quite ripe, for flavoring water, though it was not a food proper. The Israelites may have known apples, although the word "tappuaḥ" is of doubtful signification (see Apple).

Spices: The spices used by the Israelites include cumin ("kammon"), dill ("ḳezaḥ"), mint (ἡδυοσμόν), and mustard (σίναπι). Salt ("melaḥ"), of course, was very important even in early times. To "eat the salt" of a person was equivalent to eating his bread (comp. Ezra iv. 14); a covenant of salt was inviolable (comp. Num. xviii. 19; II Chron. xiii. 5).

II. Animal Food: In ancient times, as to-day, much less meat was eaten in the East than among Western peoples. It was served daily only at the king's table (I Kings v. 3), and there because sacrifices were offered every day. Otherwise, animals were probably slaughtered only for the great festivals ("ḥaggim"), at the yearly sacrificial feasts of families and tribes, at family festivals (such as circumcisions and weddings), for guests, etc. (comp. Gen. xviii. 7; II Sam. xii. 4). Furthermore, only certain kinds of animals were permissible as food, the restrictions dating back to very early times. For details see Dietary Laws.

Animals: The most important animals for food were cattle, sheep, and goats, sheep ranking first (comp. I Sam. xxv. 11, 18; II Sam. xii. 4; Amos vi. 4; Isa. liii. 7). In addition to lambs ("karim"; Amos vi. 4), fatted calves ("meri'im") are often mentioned (Isa. i. 11; Amos v. 22; I Kings i. 19, 25), especially those that were fatted in the stall, as distinguished from cattle in the pasture ("'egel marbeḳ"; Amos vi. 4; Jer. xlvi. 1; Mal. iv. 2). From early times the eating of meat was allowed on condition that the blood of the slaughtered animal be taken to the altar, the meat not being eaten with the blood (comp. I Sam. xiv. 33 *et seq.*); thus every slaughtering became in a certain sense a sacrifice, this being changed only when the worship was centralized by the Deuteronomic legislation. Meat was generally boiled (Ex. xxiii. 19; Judges vi. 19; I Sam. ii. 13; Ezek. xxiv. 3, xlvi. 20), though sometimes it was roasted, usually, perhaps, on the spit (I Sam. ii. 15; Ex. xii. 8). Game was considered as a delicacy (Gen. xxvii. 7).

Milk, Cheese, and Honey: Milk, of large as well as of small animals, especially goat's milk, was a staple food (Deut. xxxii. 14; Prov. xxvii. 27). It was kept in skins (Judges iv. 19). "Ḥem'ah," designating cream as well as bonnyclabber and cheese, is often mentioned (Prov. xxx. 33). Cream is generally called "shefot" (II Sam. xvii. 29), though this reading is uncertain. It was frequently offered as a present, carried in cylindrical wooden vessels; and, sprinkled with sugar, it was eaten out of little dishes with wooden spoons (comp. Riehm, "Handwörterb." pp. 1715 *et seq.*). Cheese made of sweet milk was probably also used ("ḥarize he-ḥalab"; I Sam. xvii. 18, this passage in any case showing that "ḥalab" designated curdled as well as ordinary milk). The proper designation for cheese is "gebinah" (Job x. 10).

Honey ("debash") is frequently mentioned in connection with milk, and is probably the ordinary bee's honey; that flowing of itself out of the honeycomb ("nofet ha-ẓufim") was especially relished (Ps. xix. 11; Prov. xvi. 24). According to Isa. vii. 15, honey seems to have been a favorite food of children.

Fish: Little is known of fish as food (Num. xi. 15), it being mentioned but rarely (Jer. xvi. 16; Ezek. xlvii. 10; Eccl. ix. 12). Yet there can be no doubt that it was a favorite diet. Fish were fried, and prepared with honeycomb. They were probably more generally eaten in post-exilic times. The fish-market, where fish, salted or dried in the sun, were sold, was probably near the fish-gate (compare Zeph. i. 10; Neh. iii. 3, xii. 39; II Chron. xxxiii. 14). According to Neh. xiii. 16, fish were imported by Syrian merchants, some fish coming from Egypt, where pickled roe was an export article. In later times fish were salted even in Palestine (comp. the name "Tarichea," lit. "pickling").

Hardly anything is known of the price of food in ancient times. At the period of the composition of II Kings vii. 1, 16, the worth of one seah of fine

flour or two seahs of barley was one shekel. In Men. xiii. 8 the price of an ox, a calf, a ram, and a lamb is given as 100, 20, 8, and 4 denarii respectively (comp. Matt. x. 29).

E. G. H. W. N.

——**In Talmudical Times:** Merely a few of the many data in the Talmud that throw a clear light on the private life of the Jews can be mentioned here. Bread was the principal food; and as in the Bible the meal is designated by the simple term "to eat bread," so the rabbinical law ordains that the blessing pronounced upon bread covers everything else except wine and dessert. Bread was made not only from wheat, but also from rice, millet, and lentils ('Er. 81a). Bread with milk was greatly relished. The inhabitants of Maḥuza in Babylon ate warm bread every day (compare Shab. 109a). Morning bread that was eaten with salt is mentioned (B. M. 107b; compare Ab. vi. 4). Wheat bread makes a clear head, ready for study (Hor. 13b). The same result is obtained, according to another reading, from bread baked over coals (*ib.*). Breadbakers are often mentioned, rabbis also following that trade.

Meat was eaten only on special occasions, on Sabbaths and at feasts. The pious kept fine cattle for the Sabbath (Beẓah 16a); but various other kinds of dishes, relishes, and spices were also on the table (Shab. 119a). A three-year-old calf with its kidneys was considered excellent (*ib.* 119b). Nor were the tongues of animals despised (Yalḳ. Makiri to Prov. xviii. 21). Deer, also, furnished meat (Bek. iv. 29b; Ḥul. 59a), as did pheasants (Tosef., Kil. i. 8), chickens (Shab. 145b), and pigeons (Pes. 119b). Fish was eaten on Friday evening in honor of the Sabbath (compare Grünbaum, "Gesammelte Aufsätze zur Sprach- und Sagenkunde," p. 232); sometimes it was prepared in milk (Ḥul. 111b). Pickled fish was an important article of commerce, being called "garum" among the Jews, as among the Greeks and Romans. Pliny ("Hist. Naturalis," xxxi. 95) says expressly of a "garum castimoniale" (*i.e.*, kasher garum) that it was prepared according to Jewish law. Locusts were eaten, though without blessing, as they signified a curse. Eggs were so commonly eaten that the quantity of an egg was used halakicly as a measure. The egg was broken (T. Y. iii. 2) and occasionally dipped in wine (Ḥul. 6a). The unsalted yolk of an egg eaten on ten successive days causes death ("Alphabeta di-Ben Sira," ed. Steinschneider, p. 22b). A regular meal consisted of chicken stuffed with meal, fine bread, fat meat, and old wine (*ib.* 17b). The Talmudic axiom, "Without meat there is no pleasure; hence meat is indispensable on feast-days," is well known.

Meat.

As regards other dishes, the Jews were acquainted with most of those known in antiquity. The first dish was an entrée—something pickled, to stimulate the appetite (Ber. vi. 7); this was followed by the meal proper, which was ended with a dessert, called in Greek *θάργημα*. AFIḲOMEN is used in the same sense. Titbits ("parperet") were eaten before as well as after the meal (Ber. vi. 6). Wine was an important item. It was flavored with myrrh (compare Mark xv. 23) or with honey and pepper, the mixture being called "conditum." There were vinegar wine ('Ab. Zarah 30a), wine from Amanus, and Cilicia (Tosef., Sheb. v. 223), red wine from Saron, Ethiopian wine (B. Ḳ. 97b), and black wine (Abba Gorion i. 9). Wine in ice came from Lebanon. Certain wines are good for the stomach; others are not (Yer. Sheḳ. 48d; see WINE). There was Median beer as well as a beer from Egypt called "zythos" (Pes. iii. 1), and beer made from a thorn (*Spina regia*; Löw, "Aramäische Pflanzennamen," p. 231; Ket. 77b). To eat without drinking means suicide (Shab. 41a).

Dinners.

Fruit was always relished, and many kinds, Biblical as well as non-Biblical, are often mentioned. A certain kind of hard nut even the wealthy could not procure (Pesiḳ. 59b). The custom of eating apples on the Feast of Weeks (Targ. Sheni to Esth. iii. 8) belongs to those minute observances that are so numerous in Jewish life. In the same way fruit and herbs were eaten on New-Year's eve as a good omen (Hor. 12a). Children received especially on the evening of Passover nuts and roasted ears of corn (B. M. iv. 12; Pes. 119b). Olives were so common that they were used as a measure ("zayit"). "While olives produce forgetfulness of what one has learned, olive-oil makes a clear head" (Hor. 13b). "Bread for young men, oil for old people, and honey for children" (Yoma 75b).

Fruits and Vegetables.

Herbs occupied a chief place on the evening of Passover, and they were also a favorite dish on the Sabbath (Ta'an. 20b), being eaten either dry or soaked (Tosef., Sheb. iv. 6). Many vegetables were included in the comprehensive name "ḳiṭniyyot" (Beẓah 12b; compare 'Uḳ. i. 5), especially beans. Other vegetables were cucumbers, melons, cabbages, turnips, lettuces, radishes, onions, and garlic. The smell of garlic, frequently mentioned in later times in association with the Jews, is referred to in the Talmud (Sanh. 11a).

Talmudic as well as Biblical times give evidence of a healthy, happy view of life. Sweets eaten during meals are frequently mentioned (B. M. vii. 1; Esth. R. i. 9). There is a saying of Rab (Abba Arika) that a time will come when one will have to render an account for all that one has seen and not eaten (Yer. Ḳid. 66d). It is said, however, of Abba Arika that, after having had all the precious things of life, he finally ate earth. Eliezer b. Hyrcanus is also reported to have eaten earth (compare the "geophagi" [earth-eaters] of the ancient authors). There is hardly any difference in food between Palestine and Babylon; only some details referring to the ritual are mentioned (Müller, "Ḥilluf Minhagim," Nos. 19, 67).

——**In the Middle Ages:** The Jews were so widely scattered in the Middle Ages that it is difficult to give a connected account of their mode of living as regards food. In Arabic countries the author of the Halakot Gedolot knew some dishes that appear to have been peculiar to the Jews, *e.g.*, "paspag" (p. 60, ed. Hildesheimer), which was, perhaps, biscuit; according to the Siddur Amram (i. 38), the well-known "ḥaroset" is made in those countries from a mixture of herbs, flour, and honey (Arabic,

"ḥalikah"). Maimonides, in his "Sefer Refu'ot" (ed. Goldberg, London, 1900), mentions dishes that are good for health. He recommends bread baked from wheat that is not too new, nor too old, nor too fine (p. 8); further, the meat of the kid, sheep, and chicken, and the yolks of eggs. Goats' and cows' milk is good, nor are cheese and butter harmful. Honey is good for old people; fish with white, hard meat is wholesome; so also are wine and dried fruits. Fresh fruits, however, are unwholesome; and he does not recommend garlic or onions (p. 9).

There is detailed information about Italian cookery in the amusing little book "Masseket Purim." It discusses (according to Abrahams, "Jewish Life in the Middle Ages," p. 151) pies, chestnuts, turtle-doves, pancakes, small tarts, gingerbread, ragouts, venison, roast goose, chicken, stuffed pigeons, ducks, pheasants, partridges, quails, macaroons, and salad. These are dishes of luxurious living. The oppressed medieval Jews fared poorly rather than sumptuously, indulging in joyous feasts only on Sabbaths, festivals, circumcisions, and weddings. For example, the Jews of Rhodes, according to a letter of Obadiah Bertinoro, 1488, lived on herbs and vegetables only, never tasting meat or wine ("Jahrb. für die Gesch. der Juden," iii. 201). In Egypt, however, meat, fish, and cheese were procurable (*ib.* 208); in Gaza, grapes, fruit, and wine (*ib.* 211). Cold dishes are still relished in the East. Generally, only one dish was eaten, with fresh bread daily (Jacob Safir, in "Eben Sappir," p. 58a, Lyck, 1866).

Some characteristically Jewish dishes are frequently mentioned in the Judæo-German dialect: from the twelfth century onward, "brätzel" (Glassberg, "Zikron Berit," p. 122, Berlin, 1892); "lokshen" (Abrahams, *l.c.* p. 152); "pasteten" (*ib.* p. 151; compare Yoreh De'ah, Bet Yosef, § 97); "fladen" (Yoreh De'ah, *ib.*); "beleg" (*i.e.*, goose sandwich), still used (Yoreh De'ah, Ṭure Zahab, § 101, 11). The favorite "barscht" or "borshtsh" soup is a Polish dish (*ib.* § 96); best known are the "berkes" or "barches" eaten on the Sabbath (Grünbaum, *l.c.* p. 229), and "shalet" (Abrahams, *l.c.* p. 151), which Heine commemorates ("Werke," i. 436), and which the Spanish Jews called Ani. The Sabbath pudding ("kigl" or "kugel" in Yiddish) is also well known. For more detailed information on several of these dishes see Cookery.

S. S. S. Kr.

FORBIDDEN DEGREES. See Marriage Laws.

FORBIDDEN FOOD. See Dietary Laws.

FOREIGN ATTACHMENT: In modern law, the seizure of a debtor's property in a jurisdiction within which the debtor himself can not be found, he having absconded, or residing elsewhere. Such a proceeding has grown up in most countries under the necessities of trade, in spite of the principle that no one should be condemned unheard. The Talmud (Ket. 88a) records different opinions as to whether exceptions should be made against this principle; but the later authorities—Alfasi, Rambam, the Ṭurim, and the Shulḥan 'Aruk—deemed such exceptions necessary for the security of trade. The mode of procedure in such cases is as follows: The holder of an authenticated bond ("sheṭar meḳuyyam") may seek payment in the absence of the debtor if the messenger of the court can reach the latter with a notification and return within thirty days, his wages, which are to be taxed as costs, being paid by the plaintiff. But if it is impossible to go and return within thirty days, the debt may be levied at once from either lands or movables, the creditor taking the proper oath, unless this is waived by a clause in the bond. In such cases the following facts must be proved: (1) that the bond is authentic; (2) that the debtor abides at a place too far for service and return within thirty days; (3) that the property to be levied upon belongs to the debtor (Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 106; Maimonides, "Yad," Malweh, xiii.).

S. S. L. N. D.

FOREST: In the English versions the word "forest" is employed for the rendering of four different Hebrew words: (1) "ya'ar," which occurs more than forty times; (2) "ḥoresh," five times; (3) "ḥoreshah," once; and (4) "pardes," once. The sense of "ya'ar" (LXX. δρυμός; Vulg. "silva," "saltus") is now generally explained, from the Arabic "wa'ar," to be "rough" (as of a road or of a tract of land).

From the conditions now prevailing in Palestine no conclusion can be drawn as to forest-growth in the Biblical period. The following are the forests mentioned or alluded to in the Bible:

1. The "forest of Ephraim" ("ya'ar Efrayim"), where Absalom perished (II Sam. xviii. 6, R. V.). It was east of the Jordan, in the neighborhood of the city of Mahanaim in Gilead. The name "Ephraim" is certainly surprising for the location.

2. The "forest of Hareth" ("ya'ar Ḥaret"), in the land of Judah, where David sought refuge on his return from Moab (I Sam. xxii. 5).

3. The forest ("ya'ar") on the road from Jericho to Beth-el, whence the bears came out that avenged Elisha (II Kings ii. 24). It was probably situated along the present Wadi al-Ḳelt.

4. The forest ("ya'ar") where, in their pursuit of the Philistines, the Israelites found the honey (I Sam. xiv. 25). See, however, Wellhausen, and also Klostermann, Driver, and Budde, in their commentaries *ad loc.*

Principal Forests of the Bible:

5. The forest ("ḥoresh") in which Jotham built forts and towers (II Chron. xxvii. 4) must have been in the mountains of Judah, in high places suitable for observation, very likely, as well as for defense, and consequently can not have been more than a copse of low growth.

6. The forest ("ḥoreshah") in "the wilderness of Ziph," where David took refuge (I Sam. xxiii. 15, 18, 19). This was probably a crest of the mountain (Gesenius, "Handwörterbuch," 11th ed.) or a copse (Klostermann, Commentary *ad loc.*); and "Ḥoreshah" seems to have been its proper name.

7. The "forest of the south" ("ya'ar ha-negeb"; Ezek. xx. 46), which is probably nothing more than a figure of rhetoric.

8. The "king's forest" (Neh. ii. 8); this was a reservation or park rather than a forest proper; such, at least, is the interpretation suggested by the word "pardes" (see Gesenius, "Thesaurus"). It might have originated from the plantation of cedars which Solomon made "to be as the sycamore trees that are in the lowland" (II Chron. ix. 27, R. V.).

The passage just quoted shows that the forests or groves of sycamores from which the city of Sycaminum (the modern Haifa) was named were in existence when the Book of Chronicles was written.

The name "Kirjath-jearim" (Josh. ix. 17 and often elsewhere) means "the city of forests"; but this is hardly sufficient to justify the supposition that it was so named from the presence of forests around or about it, or, at any rate, that such forests were still in existence during the occupation of the land by the Hebrews. In Isa. lxv. 10 the Septuagint translates "Sharon" by Δρυμός; but this is also too weak a basis for assuming the presence of forests in that plain, except, however, in post-Biblical times (comp. Strabo, xvii. 758).

Existing Forests in Palestine: There are now two important centers of forests in Palestine, one in Galilee and one in Gilead. By "Galilee" is understood the region between the Mediterranean Sea and the Jordan from a line running through Janin in the south to another line running through Tibnin in the north. Over 13 per cent of that area is wooded, this percentage being almost equally divided between open and dense forests (7 per cent and 6 per cent respectively). Of the latter one-fourth consists of high wood, and three-fourths of low. For details as to the precise location of the forests (Mount Carmel and the hills east and north of Nazareth), or the species therein occurring (*Quercus coccifera, Q. Ægilops, Arbutus unedo, A. Andrachne, Pistacia Lentiscus, Ceratonia Siliqua, Pistacia Terebinthus, Phillyrea Media*, etc.), see Anderlind in "Z. D. P. V." 1885. In Gilead, from the Shari'at al-Manaḍirah (ancient Yarmuk) to the Wadi Sarka (ancient Jabbok), especially in the northern portion of that region, there is an abundant growth of oak forests. The trees belong to the same species as those of Galilee, but they are of a much finer growth. South of the Wadi Sarka the upper range of Gilead is oak and arbutus; the central, arbutus and fir; the lower, valonia-oak (*Q. Ægilops*). The ilex occurs throughout (see Stanley, "Sinai and Palestine," p. 390). Outside of these two great centers there are no forests proper of any extent. Trees are fast disappearing from the Jaulan (anc. Gaulanitis), once densely wooded (see Schumacher, "The Jaulan," p. 15). In the vast territory of Bashan the oaks, for which it was famous in Biblical times, though still plentiful, are too much scattered to constitute forests. Ammon, in the south, is outside of the range of forests.

Two Main Centers of Forest.

North of Jerusalem as far as Mount Carmel, and east and southeast to the valley of the Jordan and to the Dead Sea, the country is entirely destitute of trees of natural growth. West of Jerusalem there are two small forests (3½ and 12 acres respectively) of pines (*Pinus Halepensis*; see Anderlind, *l.c.*). Southwest of Jerusalem there is still a fair proportion of thickets or copses consisting mainly of the species *Quercus coccifera, Arbutus*, and *Pistacia Lentiscus*. All along the valley of the Jordan, on a terrace above the bed of the river, runs a thick jungle, once the haunt of lions (Jer. xlix. 19, l. 44-46). It consists chiefly of tamarisks and willows. Finally, in the plain of Sharon straggling coppices of Turkey oaks (*Quercus Cerris*) mark the site of the forest mentioned by Strabo (see above), and which, under the name of "forest of Arsuf," or "Arsur," became famous, during the Crusades, for the victory of Kings Richard I. of England and Guy of Jerusalem over Saladin (1191).

Smaller Areas.

FORFEITURE. See Confiscation and Forfeiture.

FORGERY: The act of falsely making or materially altering, with intent to defraud, any writing which, if genuine, might be of legal efficacy or the foundation of legal liability. The Mosaic law, intended mainly for an agricultural people, in general makes little mention of the legal status of documents. While it provides punishments for deceit in selling (Lev. xxv. 14), for false weights and measures (Lev. xix. 35, 36; Deut. xxv. 13-16), it makes no provision against forgery. The Rabbis, however, found it necessary to institute laws and regulations for the preparation and execution of legal documents, so as to make forgery impossible. But even they did not attempt to set any definite punishment for it.

A legal document, whether a promissory note, a deed of sale or of gift, a will, or a marriage contract, had to be written on material upon which any erasure could be instantly recognized; and if it was not written upon such material, the document was invalid, even if it was to go into effect immediately (Giṭ. 22b; compare Jer. xxxii. 14). A space of two lines, left between the body of the document and the signatures of the witnesses, invalidated the document; for it was apprehended that some addition might be made in such space which might change the character of the document. Since, however, the witnesses could not always sign so close to the body of the document that not even the space of one line would be left, the Rabbis laid down the law that anything written in the last line had no binding force, and that it should be reserved for a summary or enumeration of the contents of the document (B. B. 161b; "Yad," Malweh, xxvii. 3, 4; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 44, 1; 45, 6).

If, at the writing of the document, some mistake occurred which necessitated erasure or crossing out, the mistake had to be noted and explained at the end of the document, above the signatures of the witnesses. A word expressing a number from three to nine should not be placed at the end of a line, where, by an addition of a letter or two, the sum

might be increased, as the number שלש ("shalosh" = 3), which could easily be made into שלשים ("sheloshim" = 30) by the addition of יִם. The sum should never be expressed by letters of the alphabet, (each of which has its numerical value), but should be written out in words (B. B. 167a; Maimonides, *l.c.* p. 13; Ḥoshen Mishpaṭ, 42, 4; 44, 5).

In spite of all these precautions, the apprehension of forgery still existed; and the debtor could easily free himself from payment through the plea that the document was forged. In such a case the court entirely disregarded the existence of the document, considering it merely as an oral claim ("milwah 'al peh"), when only the rabbinic oath ("hesset") was imposed. The Rabbis, therefore, established a new institution with regard to promissory notes, namely, the confirmation of the signatures of the witnesses by a competent court ("ḳiyyum sheṭarot"), through which the document assumed the character of a judicial decision, and after which no plea of forgery was admitted (see EVIDENCE).

The Rabbis provided no special punishment for the forger. Some authorities would disqualify him from being a witness or from being believed on his oath; but this opinion is not generally accepted (see Ḥatam Sofer, Ḥoshen Mishpaṭ, 39, quoted in Pithe Teshubah to Ḥoshen Mishpaṭ, 34, 17). Still he fell under suspicion, and the court was warned to examine with greater care any document he might produce. If two witnesses testified that a person asked them to forge a document, any document produced by such person was considered forged, and he could henceforth establish his claim only through the testimony of witnesses (Ḥoshen Mishpaṭ, 67, 2, Isserles' gloss). The court was permitted to employ violent means, even public chastisement, to compel the forger to confess his guilt (B. B. 167a; comp. Ḥoshen Mishpaṭ, 42, 3; see also CLERICAL ERRORS).

FORGIVENESS (כפר: Deut. xxi. 8; Jer. xviii. 23; Ps. lxxviii. 38; סלח: I Kings viii. 30 *et seq.*; Lev. iv. 20 *et seq.*; Dan. ix. 9; נשא: Gen. l. 17; Ex. x. 17; I Sam. xv. 25, xxv. 28): Forgiveness is one of the attributes ascribed to YHWH: "to the Lord our God belong mercies and forgiveness" (Dan. ix. 9; comp. Ex. xxxiv. 6–7; Num. xiv. 18 *et seq.*; Ps. lxxxvi. 5; Jonah iv. 2). The condition essential to God's forgiveness of iniquity is, as the contexts of the passages indicated show, repentance on the part of the sinner for the offense committed. A further essential condition is the intention to avoid repetition of the offense. The fulfilment of these conditions restores the sinner to his right relation toward YHWH. "Let the wicked forsake his way, and the unrighteous man his thoughts: and let him return unto the Lord, and he will have mercy upon him; and to our God, for he will abundantly pardon" (Isa. lv. 7; comp. Amos v. 14; Jer. iii. 14 *et seq.*; Ezek. xviii. 21 *et seq.*, xxxiii. 11–21; Hosea xiv. 1–4); "For thou, Lord, art good, and ready to forgive; and plenteous in mercy unto all them that call upon thee" (Ps. lxxxvi. 5; comp. lxxviii. 38).

Under the sacrificial system as found in Leviticus repentance and atonement are represented by the animal sacrifice which a priest offers for the sinner But the forgiveness to be attained through the sacrifice is only for sins committed unintentionally, and for ignorance that has caused ritual defilement. No sacrifice could atone for wilful offenses. "But he that sins knowingly . . . blasphemes YHWH; he shall be cut off from among his people" (Num. xv. 30, Hebr.). The main passage referring to sin-offerings is found in Lev. iv.–v. 13 (comp. Num. xv. 22 *et seq.*). In the Prophets and Psalms repentance is wholly based upon change of heart. Forgiveness is a free act of God's mercy and grace (Micah vii. 18, 19; Ps. ciii. 3; comp. Jer. xxxi. 34; Ezek. xxxvi. 25 *et seq.*; Ecclus. [Sirach] xvii. 20 *et seq.*, xviii. 11).

The Bible, which regards all men as created in the image of God (Gen. i. 27) and makes holiness the corner-stone of its ethical teachings, warns against all manner of hatred and vengeance (Lev. xix. 2, 17, 18). This idea is also the basis of the Talmudic dictum, "For certain sins repentance gives a respite, and the Day of Atonement atones; but he who sins against his neighbor must first be reconciled to him" (Yoma 85b).

Not only should one not harbor hatred and vengeance in his heart, but it is his duty to help his enemy, which certainly presupposes forgiveness of him (Ex. xxiii. 4, 5).

In the Wisdom literature and the Talmud especially are found many beautiful teachings concerning the treatment of one's enemies (see Prov. xxv. 21; xxiv. 17, 29; Deut. xxxii. 35; Prov. xx. 22; Ecclus. [Sirach] xxviii. 1).

"Be of the persecuted and not of the persecutors" (B. Ḳ. 93b). "Who is strong? He who turns an enemy into a friend" (Ab. R. N. xxiii.). "If a friend be in need of your aid to unload a burden, and an enemy to help him load, assist first the enemy, that the desire for hatred may be stifled in you" (B. M. 32).

There are many passages in Biblical and post-Biblical literature that promise special favor from God to him who is merciful and forgiving to his fellow men (see II Sam. xxii. 26; Ps. xviii. 25; see also COMPASSION). "He who has pity for men to him God will be merciful" ('Er. xvii. 72; comp. Yoma 23). "He who has mercy for his fellow men belongs to the descendants of Abraham" (Beẓah 32; comp. Ecclus. [Sirach] xxviii. 2).

FORLI (פורלי, פורלין): City in the Romagna, Italy. It is mentioned for the first time in connection with Jewish history by Hillel of Verona, who lived at Forli for some time about 1290, and there wrote his circular letter to Maestro Gaio and his work "Tagmule ha-Nefesh." The community then seems to have been a small one; for Hillel felt like an exile, rarely receiving news of the outside world. The community continued to exist, however, and in 1373 a Mishneh Torah was sold there to R. Jekuthiel b. Abigdor of Forli (Cod. Oxford, No. 601). Forli became noted through the congress of representatives from the communities of Rome, Padua, Ferrara, Bologna, Romagna, and Tuscany, held there May 18, 1418. In conformity with the resolutions formulated at Bologna in Dec., 1415, it was decided to send a deputation to Pope Martin V. at Rome to obtain

from him new privileges and confirmation of the old ones. A tax of 1½ ducats on every 1,000 ducats in money and real estate was levied upon the communities in order to pay the heavy expenses of this embassy and other expenses necessary for the common good; the individual members, with the exception of those receiving alms, were also taxed ½ to 1½ ducats, according to their means. Provisions were likewise made for regulating the collection of the taxes and the organization of the communities.

The same congress issued several decrees pertaining to the internal affairs of the communities, which were evidently intended, on the one hand, to elevate their moral tone, and, on the other hand, to avoid everything that might attract the attention or the envy of the Christian population. The people were forbidden to play cards or dice or to permit the same to be played in their houses; men and women alike were forbidden to wear luxurious garments or ornaments, or to go through the streets together in large numbers; display at banquets and family festivals and the pompous escort of brides were greatly restricted; sexual immorality in particular was severely condemned. These decrees were to remain in force till the end of 5186 (= 1426); all violations were to be punished by fines or by excommunication; and the men were held responsible for the women. The decrees were signed by the Jews of Forli as well as by the foreign delegates.

Nothing is known of the subsequent history of the community of Forli. It doubtless shared the varied fortunes of the other Jews in the Pontifical States in the sixteenth century (compare Bologna), and was dissolved when the Jews were expelled. Nor did any Jews return to the city.

The following rabbis and scholars of Forli are known: Elijah b. Menahem Alatrini; Moses b. Jekuthiel Ḥefeẓ, a member of the Zifroni family, who in 1383 copied for David b. Solomon Rofe the Codex Almanzi No. 79; Elijah b. Moses Alatrini, who copied (1389) MS. de Rossi No. 286 for Moses b. Daniel of Forli; Aaron Strassburg, 1486; Elias b. Isaac da Mestre, who wrote a mathematical work in 1497 (Codex Michael, No. 185); Solomon b. Eliakim Finzi, rabbi at Forli in 1536; Eliezer b. Benjamin Finzi of Arezzo, rabbi in 1537; and about the same time Abraham b. Daniel da Modena and Asher b. Isaiah da Montagna occupied the rabbinate.

FORMON, ẒADDIḲ BEN JOSEPH: Turkish Talmudist and translator of the middle of the sixteenth century. He translated Baḥya's "Ḥobot ha-Lebabot" into Judæo-Spanish (Ladino) under the title "Obligacion de los Coraçones." It was published the first time in Roman characters by David Pardo (Amsterdam, 1610), who represented that he was himself the translator. Fürst ("Bibl. Jud." i. 78, iii. 67) attributes the translation to Joseph Pardo, rabbi of Amsterdam. There also exists an edition in Hebrew characters (Venice, 1713). Formon is quoted in the responsa of his contemporary Solomon Cohen (ii., No. 118).

FORMSTECHER, SOLOMON: German rabbi; born at Offenbach July 28, 1808; died there April 24, 1889. After graduating (Ph.D. 1831) from the Giessen University, he settled in his native city as preacher, succeeding Rabbi Metz in 1842; he filled this office until his death. During his long ministry he strove to harmonize the religious and social life of the Jews with the requirements of modern civilization. His aims were expressed at Brunswick, Frankfort-on-the-Main, Breslau, and Cassel in the conferences of the German rabbis. The most important of his works is "Religion des Geistes" (Frankfort-on-the-Main, 1841). It contains a systematic analysis of the principles of Judaism. The author endeavors to demonstrate that Judaism was a necessary manifestation, and that its evolution tends in the direction of a universal religion for civilized mankind. Judaism, in contrast with paganism, considers the Divinity to be a Being separate from nature, and allows no doubt of God's existence. Consequently any theogony, any emanation, any dualism must be rejected. Formstecher concludes his work with a history of Judaism which is a valuable contribution to Jewish religious philosophy.

Formstecher's other works are: "Zwölf Predigten," Würzburg, 1833; "Israelitisches Andachtsbüchlein zur Erweiterung und Ausbildung der Ersten Religiösen Gefühle und Begriffe," Offenbach, 1836; "Mosaische Religionslehre," Giessen, 1860; "Buchenstein und Cohnberg," a novel, Frankfort-on-the-Main, 1863; "Israel's Klage und Israel's Trost," Offenbach, 1835; "Ueber das Wesen und über den Fortgang der Israelitischen Gottesverehrung." Formstecher contributed to many periodicals, and edited in 1859, in collaboration with L. Stein, the periodical "Der Freitagabend," and in 1861, with K. Klein, the "Israelitische Wochenschrift."

FORNARAKI AFFAIR: Accusation of ritual murder which was made in Egypt in 1881, and which agitated the European press for nine months. On May 18, 1881, Evangeli Fornaraki, a Greek child, disappeared in Alexandria, and after some time the body was found on the seashore. An international commission consisting of thirty-four doctors and the delegates of all the consuls examined the case, and, with the exception of two Greeks, agreed that the child had met with an accidental death. This was substantiated by the fact that the grains of sand were found in the lungs, showing conclusively that the child was living at the moment it fell into the sea. Nevertheless, a Jewish family named Baruch, of Greek nationality, was accused by the Greeks of a ritual crime, and despite the declarations of the commission, the publication of a letter of protest by Joachim III., Patriarch of Constantinople, on May 13, and a medical refutation by the Paris University, the members of the Baruch family were transported to Corfu, imprisoned, and ill-treated. On Jan. 4, 1882, however, they were freed by the Corfu tribunal.

FORNICATION: Cohabitation between a man, married or unmarried, and an unmarried woman. While the common law speaks of intercourse between a married man and an unmarried woman as adultery, followed herein by many American statutes which grant a divorce for the "adultery of the husband," the Authorized Version of the Old Testament uses the word "fornication" four times, always in a figurative sense. In the New Testament it stands for the Greek πόρνεια; and as a husband is bidden not to divorce his wife except for this offense, the word is there evidently an equivalent for "adultery."

Fornication is the same in Jewish as in the common law. It is a much lighter offense than ADULTERY or INCEST, in which both participants are punished with death.

As to the gravity of this offense there is difference of opinion. Deuteronomy xxiii. 18 (A. V. 17) says: "There shall be no harlot ["ḳedeshah"] of the daughters of Israel." A ḳedeshah is, according to rabbinic commentators, a woman who sells herself to every comer, and stands far apart from the virgin who is "enticed" or seduced (Ex. xxii. 16). The former is liable to flagellation, as breaking a negative law; the latter is treated as the injured party, to whom the seducer must make amends; and the seducer is not liable to stripes, for his penalty is named: he must marry the girl if her father will consent.

The standard edition of the Sifre on Deuteronomy xxiii. 18 throws no light on the text; but an old manuscript of this work, referred to in Maggid Mishneh in a gloss on Maimonides' "Yad," Ishut, i. 4, says that the text intends to forbid any sexual intercourse between a man and a woman not his wife. Maimonides himself (*ib.*) holds that as a matter of Mosaic law both parties are liable to stripes. Abraham ben David dissents, taking the ground that a woman who gives herself over to only one man is not a ḳedeshah, but a concubine ("pillegesh"), according to the Bible (see II Sam. v. 13)—a wife without the ceremony of betrothal and without jointure (see KETUBAH)—and that neither she nor her lover is guilty of any Scriptural offense. The Shulḥan 'Aruk (Eben ha-'Ezer, 26, 1) takes a middle ground, admitting that the case in question does not fall under the heading of "ḳedeshah," but asserting that, in the interest of modesty, both are forbidden by custom and rabbinical law, and should be repressed, if need be, by the infliction of stripes ("makkat mardut"). It is even forbidden to be alone with a woman in a room (*ib.* 22, 2).

Intercourse of a son or daughter of Israel with a Gentile, or with a foreign slave, with whom there can be no valid betrothal, is discussed by the authorities in a twofold aspect: (1) If the relation is permanent, making them in fact husband and wife, it comes under the head of fornication only in so far as Jewish law does not recognize such a relation as a true marriage; the main objection, however, arises in the religious interest of the children (see Ex. xxxiv. 16). (2) Casual cohabitation, which stands on different ground. The Mishnah (Sanh. ix. 6) names him "who cohabits with a Syrian woman" (with a Gentile, an idol-worshiper) among those whom the zealots may strike down; and while this rule, based on the example of Zimri and Phinehas (Num. xxv. 7), was rendered harmless by impossible conditions, the rabbinical courts under an institution of the Hasmoneans, attested in the Babylonian Talmud by two of the later sages (Sanh. 82a), would consider such an offender as deserving punishment upon four distinct grounds, one of them being that of implied idol-worship. This is based on the words of the prophet Malachi (ii. 11, Hebr.): "For Judah has profaned the sanctuary of the Lord which he loved, and has cohabited with ["ba'al"] the daughter of a strange god."

FORTI (CHASCHETTO, חזקיטו), BARUCH UZZIEL BEN BARUCH: Italian rabbi and editor; lived at Ferrara and Mantua in the sixteenth century. "Forti" is the Italian translation of "Ḥazaḳ," the name of a Hebrew family to which Baruch Uzziel belonged; the Italian diminutive "Chaschetto" was formed afterward. On May 22, 1564, Forti was named chief rabbi of Mantua. He is quoted as an authority by several prominent rabbis, as Moses Isserles (Responsa, No. 36) and Meïr of Padua (Responsa, No. 9). Forti edited Isaac Abravanel's "Ma'yene ha-Yeshu'ah," to which he added a preface consisting of Abravanel's biography (Ferrara, 1551) and Moses Alashkar's strictures on Shem-Ṭob's "Sefer ha-Emunot" (*ib.* 1556). He also supplied an alphabetical index to the Mishneh Torah (Venice, 1586).

FORTIS, LEONE: Italian critic, journalist, and dramatist; born at Triest Oct. 5, 1828; died at Milan 1895. He was baptized while a child, and

educated at Padua. In his early youth he wrote poems and a story entitled "Luigia." In 1848 he was exiled to Triest for having written the drama "La Duchessa di Praslin." He subsequently went to Venice, and then to Milan, where he founded the papers "Il Vero Operaio" and "Il Pungolo"; the latter, however, was suppressed. In 1859, again exiled to Triest, he went to Switzerland, and later to Turin. In 1866 he founded "Il Corriere della Venezia"; in 1870, "La Nuova Roma." His dramas include: "Camoens," "Cuore ed Arte," "Industria e Speculazione."

S. U. C.

FORTRESS: A permanent fort or fortified place. The Israelites, when advancing into the country west of the Jordan, found a considerable number of walled cities and fortresses which they could not conquer (Num. xiii. 28; Deut. i. 28; Josh. xiv. 12). They were compelled, therefore, to settle in open places; and when attacked they retired into forests and caves (I Sam. xiii. 6). Becoming more proficient in the art of war, they succeeded—especially in the time of the Kings—in conquering the fortresses of the Canaanites, among them Jerusalem. David fortified the captured city anew, *i.e.*, the so-called "city of David," on the steep eastern hill (II Sam. v. 9; I Kings iii. 1, ix. 15, xi. 27). According to II Chron. xxxii. 5, xxxiii. 14, Hezekiah and Manasseh were the first to surround with a wall the rest of the city also. Later the Maccabeans and Herodians built a third wall around it on the north and northwest.

Principal Fortresses.

The Israelites built new fortresses ("mibẓar," "ḳiryah beẓurah," "ḳiryat 'oz") after the pattern of the Canaanite fortresses, especially for the protection of the frontiers and the approaches to the country. Thus Solomon erected Hazor and Megiddo as a protection against enemies from the northeast; Gezer, Beth-horon, and Baalath against those from the coast on the west; and Tadmor (Tamar) against those from Idumea (I Kings ix. 15, 17 *et seq.*). Asa fortified Geba and Mizpah against the northern kingdom (I Kings xv. 21 *et seq.*). According to II Chron. xi. 5 *et seq.*, Rehoboam fortified fifteen cities to the south and west of Jerusalem as a protection against Egypt. In the northern kingdom Jeroboam fortified Shechem and Penuel (I Kings xii. 25). Baasha tried to fortify Ramah as a point of attack on the southern kingdom; but Asa pulled down the half-finished fortification-walls and used the material for fortifying Geba and Mizpah (I Kings xv. 16 *et seq.*). The strongest fortress of the northern kingdom was undoubtedly Samaria, which had been built by Omri on top of a mountain, and which the Assyrians were able to capture only after a three years' siege (II Kings xvii. 5). In later times the Maccabeans especially built a number of fortresses, some of which, as Beth-zur, played an important part in the wars of the Maccabees; and others, as Jotapata, Masada, and Machærus, in the great Jewish war (66–73).

All these fortresses were surrounded by walls ("ḥomah") composed of large blocks of rock, often without any cement. These walls were generally so wide that not only the guards could stand upon them, but also large numbers of people (Isa. xxxvi. 11; Neh. xii. 31 *et seq.*; I Macc. xiii. 45). Frequently they had battlements ("pinnot," II Chron. xxvi. 15; "shemashot," Isa. liv. 12), behind which the archers could secure cover; and at certain intervals there were towers built of large square stones ("migdal"). At the corners and above the gates were placed the strongest towers (II Chron. xxvi. 9), from which the guards could overlook the surrounding country (II Sam. xviii. 24 *et seq.*). The gates were closed by heavy wooden folding-doors (Judges xvi. 3), perhaps covered with brass (Isa. xlv. 2), and provided with bolts of brass or iron (Deut. iii. 5, xxxiii. 25; I Kings iv. 13). There was often a second wall outside of the principal wall, with exposed glacis ("ḥel"; I Kings xxi. 23; Lam. ii. 8; Isa. xxvi. 1). The most favorable situation for a fortress was on the edge of a precipice, as in the case of Jerusalem, or in that of Samaria, where it loomed up free on all sides on top of a mountain. No ditches with water surrounded the fortresses of the Israelites (compare Isa. xxxiii. 21; Nahum iii. 8), who, however, seem to have followed the custom of the Syrians of building strong castles or citadels in fortified cities, as in the case of Jerusalem, Shechem, and Thebez (compare Judges ix. 46 *et seq.*, 51; viii. 9, 17). These castles were generally located in the center of the city.

The Towers.

E. G. H. W. N.

FORTSCHRITT IM JUDENTHUM, DER. See PERIODICALS.

FORTY, THE NUMBER: In the Bible, next to the number seven, the number forty occurs most frequently. In Talmudical literature it is often met with, in many instances having been apparently used as a round number or as a concrete and definite expression in place of the abstract and indefinite "many" or "some," and hence becoming a symbolical number. As regards the period of forty years, the Jews seem to have shared with other peoples, especially the Greeks, the notion that the fortieth year was the height or acme of man's life; and from this fact forty years came to represent a generation (compare Nöldeke, "Untersuchungen zur Kritik des Alten Testaments," p. 188).

The rain which brought about the Deluge lasted forty days (Gen. vii. 4, 12, 17); the same period passed between the appearance of the mountain-tops and the opening of the windows in the ark (Gen. viii. 6). For the embalming of Jacob forty days were required (Gen. l. 3). Moses was without food on Mount Horeb for forty days (Ex. xxiv. 18). Elijah wandered without food for the same period (I Kings xix. 8; compare also the fasting of Jesus previous to his temptation, Matt. iv. 2). Ezekiel was ordered to lie on his right side forty days, to represent the forty years of the sin of Judah (Ezek. iv. 6). Forty days were spent by the spies in Canaan (Num. xiii. 25); Goliath challenged the army of Israel for forty days (I Sam. xvii. 16; compare Soṭah 41b). The same number of days was granted Nineveh for repentance (Jonah iii. 4). They also form the period required for purification after the

Forty Days.

birth of a male (Lev. xii. 2, 4), while after that of a female it is twice that number of days (*ib.* 5).

Forty Years.

Isaac married when forty years old (Gen. xxv. 20); so also Esau (Gen. xxvi. 34). Caleb was of the same age when sent as a spy (Josh. xiv. 7); and so was Ish-bosheth when commencing his short reign (II Sam. ii. 10; compare Acts vii. 23, where the age of Moses, when he was called to become the deliverer of his people, is given at forty years). Israel sojourned forty years in the desert (Ex. xvi. 35, and frequently elsewhere). The same period is given for the rule of each of several of the judges (Judges iii. 11), and for that of Deborah (v. 31, viii. 28; I Sam. iv. 18), as also for the reigns of David, Solomon, and Joash (II Sam. v. 4; I Kings ii. 11, xi. 42; I Chron. xxvi. 31, xxix. 27; II Chron. ix. 30, xxiv. 1). So also Israel was oppressed by the Philistines forty years (Judges xiii. 1). In Ezek. xxix. 11–13 a desolation of forty years is predicted for Egypt. A multiplication of 40 by 3, or three generations, is seen in the 120 years of the life of Moses (Deut. xxxiv. 7; compare Gen. vi. 6). Some (compare Wellhausen, "Prolegomena zur Geschichte Israels," 2d ed., 1883, i. 285) are inclined to see in the 480 years which are stated (I Kings vi. 1) to have passed between the Exodus and the building of the Temple of Solomon a multiplication of forty by twelve, or the round number of twelve generations.

Forty in Counts and Measures.

Among the presents sent by Jacob to Esau were forty cows (Gen. xxxii. 16). Ben-hadad sends "forty camels' burden" as a gift for Elisha (II Kings viii. 9). The governors before Nehemiah extorted from the people forty shekels of silver (Neh. v. 15). Abdon had forty sons (Judges xii. 14); Solomon, forty stalls of horses (I Kings v. 6). Barak's army consisted of forty thousand men (Judges v. 8); as many Syrian footmen were killed by David in battle (I Chron. xix. 18); and forty stripes were inflicted on certain evil-doers (Deut. xxv. 5). In the Tabernacle forty sockets of silver supported the twenty boards (Ex. xxvi. 19 *et seq.*; xxxvi. 24, 26); in the Temple of Solomon each of the ten lavers of brass contained forty baths; and in the Temple described by Ezekiel the "hekal" and the side-courts measured forty cubits in length (Ezek. xli. 2, xlvi. 22).

Forty in the Talmud.

The fortieth year is the age of reason ("ben arba'im la-binah," Ab. v. 26). Hillel (Sifre, Deut. xxxiv. 7; ed. Friedmann, 150a), Johanan ben Zakkai (R. H. 31b), and Akiba (Ab. R. N. vi.) set out upon their rabbinical careers when they were forty years old. To them, as also to Moses, is ascribed a life of 120 years, being divided in each case into three divisions of forty years each (Sifre, *l. c.*). Hillel's disciples were eighty in number (Suk. 28a). A woman marrying after forty can not bear children (B. B. 119b). Marriages are made in heaven by the announcement of the BAT ḲOL forty days before birth (Sanh. 22a; compare Soṭah 2b). Forty times' repetition renders a thing unforgettable (Pes. 72a; compare Yer. Giṭ. vi. 47d). The extravagance of Pekah is characterized by his consuming forty measures of pigeons for dessert (קנוח סעורה: Sanh. 94b; Pes. 57a). Forty measures was the weight of each stone carried into the Jordan (Josh. vi.; Soṭah 34a). In connection with Ps. xcv. 10 it is said that the Messianic age would last forty years (Sanh. 99a).

Forty in Temple History.

The number forty had a fatal significance in connection with the destruction of the Second Temple. Forty years before this catastrophe the Sanhedrin "went into exile," that is, left the premises of the Temple (Shab. 15a; 'Ab. Zarah 8b). Rabbi Zadok spent forty years in fasting to avert the calamity (Giṭ. 56a). In the war of Bar Kokba forty measures of phylactery-blocks (קצוצי תפלין) were found on the heads of the slain at Bethar (Giṭ. 58a).

The ritual purification-tank ("miḳweh") must hold forty measures of water (Miḳ. ii. 1 *et seq.*; compare 'Er. 14a). The measure of the heave-offering ("terumah") for a generous person (עין יפה) is a fortieth part of the produce (Ter. iv. 3). A dry season of forty days is the condition for ordering a public fast (Ta'an. 19a). On the other hand, the forty stripes of Deut. xxv. 5 are reduced to thirty-nine (Mak. 22a; compare II Cor. xi. 24). Forty is also given as the number is of the "principal labors" (אבות מלאכות) which are forbidden on the Sabbath (Shab. 69a, 73a).

FOSTAT. See EGYPT.

FOULD, ACHILLE: French statesman and financier; born at Paris Nov. 17, 1800; died at Tarbes Oct. 5, 1867. The son of a wealthy banker, he studied banking, and afterward traveled extensively. In 1847 he was chosen deputy for the town of Tarbes; he sat on the ministerial benches, and occupied himself with matters of finance. After the Revolution of 1848 he retired and wrote three pamphlets which excited considerable comment—"Observations sur la Question Financière, Adressées à l'Assemblée Nationale," "Pas d'Assignats," and "Opinion de M. A. Fould sur les Assignats." His violent attacks upon the Garnier-Pagès administration brought him into prominence, and on July 8, 1849, he was elected to represent the people of Paris in the legislative assembly. On Oct. 31 of the same year he was appointed minister of finance by the prince-president Louis Napoleon, whom he is said to have aided financially. As minister he promoted several important measures, including the abolition of the income tax and of the taxes on rents and on advances on mortgages; he also established the Algerian Bank, and provided for the pensioning of the aged. During the ministerial crises of 1851 he was

twice dismissed and recalled, but after the coup d'état (Dec. 2, 1851) he retained his portfolio until 1852, after which he became a senator and then minister of state. His resignation was due to the decree of the emperor regarding the property of the Orleans family.

Fould organized the Exposition Universelle of 1855. In November, 1860, he became a member of the privy council, and next year resumed the portfolio of finance in order to deal with the increasing deficit. Not succeeding any better than his predecessors, he again retired (Jan., 1867). In 1857 Fould was elected a member of the Academy of Fine Arts. He married into a Protestant family, and his children were educated in that faith; but he never formally abjured Judaism, though he was buried with the rites of the Protestant Church.

His son **Ernest Adolphe** (1824–75) was deputy for the Hautes-Pyrénées (1863–69). His grandson **Achille Charles** (b. Aug. 10, 1861) was elected deputy for Tarbes, Sept. 22, 1889.

His brother **Louis** (died at Paris in 1858) founded (1857) at the French Institute a prize of 20,000 francs for the best work on the origin and history of art prior to Pericles ("L'Univers Israélite," 1857–58, p. 419).

S. V. E.

FOULD, BENOIT: French politician; born at Paris Nov. 21, 1792; died there July 28, 1858. In 1827 he was nominated judge of the tribunal of commerce. At the legislative elections of May, 1834, he was chosen to represent St. Quentin, and devoted himself to financial questions. He was re-elected Nov. 4, 1837, and again on March 2, 1839, but failed in 1842 and in 1846. He took an active part in Jewish communal affairs.

S. V. E.

FOULD, ÉDOUARD MATHURIN: French politician; born at Paris Dec. 18, 1834; died at Moulins April 8, 1881. On June 1, 1863, he was elected deputy for Allier, and supported the empire. He resigned in 1868. In 1876 he was defeated by the Republican candidate at Montluçon.

S. V. E.

FOULD, GUSTAVE EUGÈNE: French politician and author; born at Paris Feb. 19, 1836; died at Asnières Aug. 27, 1884. On June 6, 1869, he was elected deputy of the Basses-Pyrénées, and during the Franco-Prussian war served with the Scouts of the Seine. Fould failed at the Paris municipal elections of 1872 and at the legislative elections of October, 1877, at Pau. He wrote "La Conversation" and "Brûlons le Grand Livre" (Paris, 1878). Under the pseudonym "Olivier de Jalin" he collaborated with Alexandre Dumas in "La Comtesse Romani," a comedy which had a successful run at the Gymnase in 1876. He married Wilhelmine Josephine Simon of the Théâtre Français, who wrote under the name "Gustave Heller."

FOUNDATION-STONE. See CORNER-STONE.

FOUNDLING (Hebrew, "asufi"): A deserted child whose parents are unknown. The question as to the status of such a child in the Jewish community was chiefly decided by the condition in which it was found. If there was evidence that its parents had abandoned it wilfully, its legitimacy was under suspicion, and it was therefore treated as doubtfully legitimate. If, however, there were indications that its abandonment was caused by the inability of the parents to support it, the child was regarded as legitimate; the necessary indications might either be furnished by the body of the child—as when it was found circumcised, or with its limbs carefully straightened, or its body anointed with oil, or its eyes painted, or a talisman hung on its neck—or might be obtained from the place where it was found—as near a synagogue, or on the sidewalk where many people passed, or on a tree where no wild beast could reach it. Nobody might claim the child as his or her offspring after it had been declared a foundling, except in a year of famine, when it was obvious that its parents only waited for some one to take it up, so that it might have a home. If they claimed it while it was still on the street they were believed in any case, and the child was considered as the offspring of a legitimate marriage (Kid. 73b; Maimonides, "Yad," Issure Biah, xv. 30, 31; Shulḥan 'Aruk, Eben ha-'Ezer, 4, 31, 32).

Those foundlings which were suspected of having been born through illegitimate connections were placed outside of the fold, and they might not intermarry with Israelites, nor with other foundlings or illegitimates. The only persons whom they were permitted to marry were proselytes and liberated slaves; and the offspring of such marriages were in the same status as the foundlings themselves (Kid. 74a; Maimonides, *l.c.* 33; Eben ha-'Ezer, 4, 36).

If a child was found in a place where Jews and non-Jews lived, even if there were only a few of the latter, he was considered, as regards intermarriage, as being a non-Jewish child, until he had been proselytized by the court or had become a Jew after reaching his majority, when he became subject to all the laws governing foundlings. In other respects, however—as to the permission to give him forbidden food, or as to the obligation of returning to him any object that he lost, etc.—the majority decided. If the majority of the inhabitants of the place were non-Jews, the foundling was considered a non-Jew; if the majority were Jews, he was considered a Jew; and if they were half and half, he was in a doubtful state (Mishnah Makshirin, ii. 7; Ket. 15b; Yoma 84b; Maimonides, *l.c.* 25, 26; Eben ha-'Ezer, 4, 33, 34).

The "shetuḳi" (the silent one)—*i.e.*, a child whose father is unknown—was placed in the same category with the "asufi" (foundling), and might marry only among proselytes or liberated slaves. Abba Saul called such a child "beḏuḳi" (examined), one whose status was established through the examination of the mother. If she said nothing, or if she admitted that the father of the child was an illegitimate, or if she said that she did not know who the father was, the child became subject to all the laws governing foundlings. If, however, she said that its father was a legitimate Israelite ("kasher"), she was be-

lieved, and the child might intermarry even with priests (Ket. 13a; Ḳid. 74a; Yer. Ket. i. 9; Maimonides, *l.c.* 11, 12; compare *ib.* xviii. 13–16; Eben ha-'Ezer, 6, 17).

Although it was necessary to mention the name of the father of the husband as well as of the wife in a bill of divorce, the shetuḳi or the asufi whose father was unknown could write a bill of divorce, mentioning only the name by which he himself was known (Eben ha-'Ezer, 129, 9). If he died childless, since he had no other heirs, his property was "hefḳer" (vacant, ownerless), and any one could appropriate it (see GER). This law also applied to the shetuḳi whose mother was known, for the relatives on the mother's side were not considered heirs in Jewish law (Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 276, 4, Isserles' gloss). See INHERITANCE.

There is no trace of institutions for foundlings in Talmudic literature. The custom probably prevailed that the foundling was taken into the house of a childless couple who brought it up as their own.

FOUNTAIN (Hebr. עין): A natural spring of water. Although Palestine as a whole is scantily supplied with water, it has a number of fountains. These often spring up in the hollows of cliffs; but sometimes wells have been dug. The Old Testament makes no sharp distinction between artificial wells and springs. Among the best-known fountains are the sources of the Jordan near Banias and Tell al-Ḳaḍi (Dan), the sources of the Gihon (St. Mary's Well) near Jerusalem, the Harod (Goliath) fountains in the valley leading from the plain of Jezreel to Scythopolis, and those near Nazareth. Numerous villages and towns have been named after the fountains which gave rise to the settlements, *e.g.*, En-dor, En-gannim, En-gedi, Enshemesh, En-rimmon, and En-hazor.

FOWLS. See POULTRY.

FOX (שׁוּעָל).—**Biblical Data:** There are at present two species of fox inhabiting Palestine: the *Canis flavescens*, found in the north, and the *C. niloticus*, common in the central and southern regions. But most of the passages of the Old Testament in which "shu'al" occurs seem to apply rather to the jackal (*Canis aureus*), the commonest beast of prey in Palestine. On the other hand, there are two special names for the jackal in the Old Testament, both of which are found only in the plural, "iyyim" and "tannim" (Isa. xiii. 22, xxxiv. 13 *et seq.*, xxxv. 7; Jer. ix. 10, x. 22, xlix. 33, etc.). It may be that "shu'al" in the Old Testament is intended as a general term for the whole family or for several species of the *Canidæ*, while "iyyim" and "tannim" denote the jackal specifically as the "howler" (comp. the Arabic "wawi," or "ibn awa") and as the animal with the outstretched body. According to Tristram, even at the present day the two animals are commonly confounded in Syria, though the inhabitants are aware of their distinction.

Thus the catching of 300 shu'alim in the story of Samson (Judges xv. 4) seems to refer to jackals rather than to foxes, since the former are gregarious and remain in droves, while the latter prowl singly and are taken alive with difficulty. So also in Ps. lxiii. 11, the word probably applies to the jackal, as it is characteristic of the latter, but not of the fox, to feed on dead bodies. Lam. v. 18 and Neh. iii. 35 are applicable alike to the fox and the jackal, as both are in the habit of burrowing among rocks and ruins; while Ezek. xiii. 4 and Cant. ii. 15 no doubt refer to the proverbial cunning of the fox and its fondness for grapes, though the jackal is equally destructive to vineyards.

That foxes and jackals were formerly, as now, common in Palestine, may be inferred from the names derived from these animals, as "Hazar-shual" (Josh. xv. 28) and "Shalim" (I Sam. ix. 4).

——**In Rabbinical Literature:** There is no ascertained reference to the jackal in the rabbinical writings, while the fox is often spoken of. The latter's term of gestation is six months; it prowls among ruins, burrows in the earth, is even found to inhabit a hollow gourd; kills poultry and young lambs and kids, and is noxious to vineyards (Bek. 8a; Mak. 24b; Ned. 81b; Ket. 111b; Ḥul. 53a; B. Ḳ. 92a; Eccl. R. 98a, etc). In proverbial expressions the cunning and treacherous fox is often contrasted with the kingly lion: "Be rather the tail [*i.e.*, the last] among lions than the head of foxes" (Sanh. 37a; Ab. iv. 15). Of one who belied his great reputation it was said: "The lion has become a fox" (B. Ḳ. 117a; comp. also B. M. 84b; Meg. 16b; Ned. 81b; Ab. ii. 15). The "fox fables" ("mishle shu'alim"), of which 300 were known to R. Meïr (Sanh. 38b; Suk. 28a), had no doubt escapades of the fox for their themes (comp. Ber. 61b; Esth. R. iii. 1; Eccl. R. v. 14; L. Levysohn, in "Jüdisches Volksblatt," vol. iii.). See ÆSOP'S FABLES AMONG THE JEWS.

The fox was also employed in the magic of the time. The tail of a fox was suspended between the eyes of the horse to protect it against the evil eye (Shab. 53a); its tooth was carried to promote or prevent sleep, according as it was taken from a live or a dead animal (Shab. 67a, Rashi); while the passing of a fox on one's left side was considered an evil omen (Sanh. 65b).

FOY: Branch of the family FOA, settled in the southwest of France since the middle of the eighteenth century. Special mention may be made of Solomon Foy, born at Bordeaux, Jan. 17, 1858, a violinist and author of "Rimes Voilées" (Bordeaux, 1877) and of various comedies and operettas. Edmund Foy was president of the chamber of commerce in Bayonne.

G. C. DE B.

FRAGA: City in Aragon. In 1328 Alfonso IV. confirmed all the privileges which the Moncadas had granted to the Jews of Fraga. Four years later he permitted his second wife, Leonora, to whom he had presented Huesca and Fraga, to admit six

Jewish families to Fraga. The Jews are said to have been persecuted there in 1389 and 1391. In 1438 the Jewish community was still as large as that in Jaca, and, like it, paid 200 sueldos annually in taxes. Fraga was the birthplace of the baptized physician Astruc Remoch. Isaac Arama served for several years as a preacher in Fraga.

G. M. K.

FRANCE (formerly called **Gaul**): Country forming the most westerly part of Central Europe.

——Roman-Gallic Epoch: The banishment of Archelaus to Vienne in Gaul in the year 6 (Josephus, "Ant." xvii. 13, §§ 2-3; *idem*, "B. J." ii. 7, § 3; Dion Cassius Cocceianus, "Hist. Romæ," lv. 27; Strabo, xvi. 2, 46), and that of Herod Antipas to Lugdunum (Lyons) in the year 39 (Josephus, "Ant." xviii. 7, § 2, but differently in "B. J." ii. 9, § 6), were assuredly not the determining factors in the Jewish immigration into the Gallic provinces. The immigration was due rather to economic causes and to chance trading-journeys. There is no documentary proof of the presence of Jews in this country dating earlier than the fourth century, but they were certainly there before that period. Hilary of Poitiers (died 366) is praised for having fled from their society (Venantius Fortunatus, "Vita S. Hilarii," iii.). A decree of the emperors Theodosius II. and Valentinian III., addressed to Amatius, prefect of Gaul (July 9, 425), prohibited Jews and pagans from practising law and from holding public offices ("militandi"), in order that Christians should not be in subjection to them, and thus be incited to change their faith ("Constit. Sirmond." vi., ed. Hoenel, "Corpus Juris Antejustin." i. 458). At the funeral of Hilary, Bishop of Arles, in 449, Jews and Christians mingled in crowds and wept, while the former sang psalms in Hebrew (Honoratus "Vita Hilarii," 22; "Prosperi et Honorati Opera," ed. Salinas, p. 304, Rome, 1732). From the year 465 the Church took official cognizance of the Jews. The Council of Vannes (465) forbade the clergy to partake of the meals of the Jews or to invite them to their own, because, Christian food being placed under the ban by the Jews, the clergy would appear inferior to them if they accepted Jewish food while the Jews refused to eat the food which Christians offered them ("Concil. Vanet." can. 12; Mansi, "Sacrorum Conciliorum Nova et Amplissima Collectio," vii. 954). In 472 Sidonius Apollinarius recommended a Jew to Eleutherius of Tournai, saying that "these people are accustomed to having good causes to plead." On two occasions in 473 he made use of the services of a Jew named Gozolas to send a letter to one of his correspondents. At the same date he recommended another Jew, who had been baptized, to Nonnechius, Bishop of Nantes ("Sidon. Apollin." ed. Baret, iii. 8, p. 252; iv. 8, p. 277; vi. 8, p. 350; viii. 4, p. 410).

Church Laws Against Jews.

Jews were found in Marseilles in the sixth century (Gregory of Tours, "Historia Francorum," v. 11, vi. 17; Gregory the Great, "Epistol. Greg." 1, 47; Migne, lxxvii. 503), at Arles (*ib.* vii. 24), at Uzès ("Vita Ferreoli"), at Narbonne (Gregory of Tours, viii. 1), at Clermont-Ferrand (*ib.* iv. 12; v. 11), at Orleans (Gregory, "Vit. Patr." vi. 7), at Paris, and at Bordeaux (Gregory, "De Virt. S. Martini," 3, 50). These places were generally centers of Roman administration, located on the great commercial routes, and there the Jews possessed synagogues (for Clermont, see Gregory of Tours, "Hist. Franc." v. 11; for Orleans, *ib.* viii. 1). In harmony with the Theodosian code, and according to an edict addressed in 331 to the decurions of Cologne by the emperor Constantine, the internal organization of the Jews seems to have been the same as in the Roman empire. They appear to have had priests (rabbis or ḥazzanim?), archisynagogues, patersynagogues, and other synagogue officials ("Cod. Theod." 4, xvi. 8: "Hieros et archisynagogos et patres synagogarum et ceteros qui synagogis deserviunt").

The Jews were principally merchants (Gregory of Tours, "Hist. Franc." iv. 12, 35; vi. 5, "Concil. Matisc." can. 2; Mansi, ix. 932) and slave-dealers ("Epist. Greg." 7, 24; Migne, lxxvii. 877); they were also tax-collectors (Gregory of Tours, "Hist. Franc." vii. 23), sailors (*idem*, "De Gloria Conf." 97), and physicians (*idem*, "Hist. Franc." v. 6).

They probably remained under the Roman law until the triumph of Christianity, with the status established by Caracalla—on a footing of equality with their fellow citizens. The emperor Constantius (321) compelled them to share in the curia, a heavy burden imposed on citizens of townships ("Cod. Theod." 3, xvi. 8). There is nothing to show that their association with their fellow citizens was not of an amicable nature, even after the establishment of Christianity in Gaul. It is known that the Christian clergy participated in their feasts ("Council of Agda," 506); intermarriage between Jews and Christians sometimes occurred (Council of Orleans, 533); the Jews made proselytes, and their religious customs were so freely adopted that at the third Council of Orleans (539) it was found necessary to warn the faithful against Jewish "superstitions," and to order them to abstain from traveling on Sunday and from adorning their persons or dwellings on that day.

Merovingian Period: During this period the Church endeavored to modify existing conditions in the interests of Christianity. In the provincial councils the bishops adopted a series of measures for the purpose of creating a chasm between Jews and Christians, and of marking the inferiority of the Jews. As stated above, the Council of Vannes prohibited the clergy from taking their meals with them ("Concil. Vanet." can. 12; Mansi, vii. 954; compare the action of the Council of Elvira in 305). This prohibition was repeated at the Council of Agda in 506 ("Concil. Agath." can. 40; Mansi, viii. 331), again at the Council of Epaon in 517 ("Concil. Epaon." can. 15; Mansi, viii. 561), and once more at the third Council of Orleans ("Concil. Aurel." iii. can. 13; Mansi, ix. 15). The second Council of Orleans (533), that of Clermont (535), and that of Orleans (538) prohibited all intermarriage of Jews and Christians. Christians who would not agree to dissolve such unions were to be excommunicated ("Concil. Aurel." ii. can. 19; Mansi, viii. 838; "Concil. Arvern." can. 6; Mansi, viii. 861; "Concil. Aurel." iii. can. 13; Mansi, ix

15). The Council of Clermont (535) forbade the appointing of Jews as judges ("Concil. Arvern." can. 9; Mansi, viii. 861). The third Council of Orleans (538) and again that of Mâcon (581) decreed that "since, by the grace of God, we live under the rule of Catholic kings," the Jews should not appear among Christians for four consecutive days after Good Friday ("Concil. Aurel." iii. can. 30; Mansi, ix. 19; "Concil. Matisc." can. 14; Mansi, ix. 934). The fourth Council of Orleans (541) decreed among other things that whenever a Jew made a proselyte ("advena"), or reconverted to his religion a Jew who had been baptized, or possessed himself of a Christian slave, or converted to Judaism any one born of Christian parents, he should be punished by the loss of all his slaves. If any one born of Christian parents became a Jew, and obtained his freedom on condition of remaining such, the condition must be considered void, for it was unjust that one living as a Jew should enjoy the freedom attaching to Christian birth ("Concil. Aurel." iv. can. 31; Mansi, ix. 118). The Council of Mâcon (581) reiterated the prohibition against appointing Jews as judges, and closed to them also the office of tax-collector, "in order that Christians may not be subjected to those whom God rejects" ("Concil. Matisc." can. 13; Mansi, ix. 934). To the prohibition against appearing in public during Holy Week were added the obligation to show reverence to ecclesiastics and the interdiction against walking before them. Those who broke this law were to be punished by the local magistrates (*ib.* can. 14; Mansi, *ib.*). Despite the decrees of previous councils, Jews living in some of the towns continued to hold Christian slaves. The Council of Mâcon, therefore, decreed that such slaves were to be ransomed for twelve sous, and either be set at liberty or continue in servitude under their new masters. If the Jews refused to free them, the slave, until his master accepted the price of his redemption, should be free to dwell among Christians wherever he chose. If a Jew succeeded in converting a Christian slave to Judaism he lost his property rights over that slave and the right of making him an object of testamentary bequest (*ib.* can. 16; Mansi, ix. 935). The Council of Narbonne forbade Jews to sing psalms at burials of their own people; those who transgressed this decree were compelled to pay a fine to the lord of the city ("Concil. Narbon." can. 9; Mansi, ix. 1016). The fifth Council of Paris (614) prohibited the Jews from asking or from exercising civic or administrative rights over Christians, unless they and their families should accept baptism from the bishop of the place ("Concil. Paris," v. can. 17; Mansi, x. 542). The same prohibition was renewed at the Council of Rheims in 624–625 ("Concil. Rem." can. 11; Mansi, x. 596). This council returned to the question of Christian slaves and decreed that if a Jew converted or tormented his Christian slaves they should revert to the state treasury (*ib.*).

Decrees of Church Councils.

It may be seen that these different measures were not in any way founded upon the supposition that the Jews were morally debased, but harmonized rather with the views of theologians and politicians. The Church, it will be observed, no longer content with issuing prohibitions concerning the conduct of Christians with relation to the Jews, now placed Jews themselves, in certain cases, under its own jurisdiction, and at the same time made it to the interest of the civil authorities to assist in carrying out its measures. The council found it necessary also to obtain the sanction of the temporal power for its canons, an aim which it pursued unflaggingly and with much success, for the Merovingian kings in general showed themselves willing to accept its authority. Yet they were not all submissive to the requests of the clergy. Pope Gregory the Great (599) rebuked Queen Brunhilda, Thierry, king of the Burgundians, and Theodebert, king of Austrasia, for allowing the Jews to hold Christian slaves. But such resistance was infrequent: the power of the Church at that time, in an almost barbarous state, is well known. Childebert was the first fanatic king, and he ratified the decisions of the third Council of Orleans concerning the presence of Jews in public during Holy Week ("Concil. Matisc." can. 14; Mansi, xiv. 836; according to Boretius, however, it is not certain that the article became a part of the constitution; (see "Beiträge zur Capitularienkritik," p. 21). He banished Ferreol (555), the Bishop of Uzès, for having had too friendly relations with the Jews ("Vita Ferreoli, apud Marcus Antonius Dominicy, Ausberti Familia Rediviva," App., p. 27, Paris, 1648). Chilperic was similarly influenced. In 582 he drove many Jews to the baptismal font, but they were not all sincere, and many returned to their former "perfidy." He employed as treasurer or as purchasing agent a Jew named Priscus, whom he had vainly urged to be baptized, and whom, happening once to be at Nogent-sur-Marne, he even asked Gregory of Tours to convert. Finally, he cast him into prison "in order to compel him to believe despite himself." Priscus promised to come to a conclusion in due time. In the interval a dispute arose between Priscus and a certain Phatir, a converted Jew for whom the king had stood sponsor. While Priscus was on his way to the synagogue with his companions Phatir slew him, and took refuge in the basilica of St. Julien. The murderer was afterward killed in the kingdom of Gontran by the relatives of Priscus (Gregory of Tours, "Hist. Franc." vi. 17). Gontran was in no way inferior to Chilperic in point of fanaticism. On the occasion of his entry into the city of Orleans (585), as the Jews had joined with the population in "singing his praises in their own tongue," the king said at table: "Wo unto this wicked and perfidious Jewish race, that thrives only by knavery. To-day they were lavish with their blatant flattery; all people, said they, should reverence me as their lord, and this only to induce me to rebuild at the state's expense their synagogue which the Christians destroyed long ago. That I shall never do, for God forbids it" (Gregory of Tours, "Hist. Franc." viii. 1). Clotaire II., who had been raised to the throne at a prelates' congress, hastened to legalize (Oct. 18, 614) the canon of the fifth Council of Paris (Oct. 10, 614) relating to the Jews ("Chlotar. Edit." cap. x., ed. Boretius, i. 22). Gondebaud, fourth king of the Burgundians, in his struggle

Under Childebert and Chilperic.

against Clovis (500) had been exposed to the enmity of the clergy. Forced to submit, he agreed to embrace Christianity. It was then that what is known as the "Loi Gombette" was drawn up, which among other things forbade all marriage between Jews and Christians, such unions, in accordance with the law of Theodosius IX., being declared adulterous by the "Loi Gombette" ("Lex Rom. Burg." tit. xix. 4; "Monum. Germ. LL." iii. 609). About the year 517 the same Gondebaud prescribed, in the law which is attributed to him, that any Jew who struck or kicked a Christian should be punished by having his hand cut off, though he might compromise by paying a compensation of 75 sous and a fine of 12 sous. For striking a priest the penalty was death and confiscation of property ("Libr Leg. Gundob." 102, 1-3; "Monum. Germ. LL." iii. 573).

Conversion of Jews.

In order to insure the public triumph of the Church, the clergy endeavored to bring the Jews to the acceptance of baptism. A certain Simon who was converted about the year 350 even became Bishop of Metz ("Pauli et Petri Carmina," 25, 25: Migne, "Patrol. Lat., Poet. Lat. Carol." i. 60). The Council of Agda (506) determined the conditions on which Jews were admitted to baptism. Ferreol, Bishop of Uzès, converted them by living in familiar intercourse with them. Having been severely rebuked for this by Childebert, Ferreol ordered the Jews of his diocese to meet in the Church of St. Theodoric, and preached to them a baptismal sermon. Some Jews abjured their faith; he forbade the others to remain in the city, and expelled them from his diocese (558) ("Vita Ferreoli," *l.c.*). Saint Germain (568) converted a Jew at Bourges named Sigerich (Venantius Fortunatus, "Vita S. Germ." cap. 62). Avitus, Bishop of Clermont, strove long but vainly to make converts. At length in 576 a Jew sought to be baptized. One of his former coreligionists poured fetid oil over his head. The following Sunday the mob that accompanied the bishop razed the synagogue to the ground. Afterward the bishop told the Jews that unless they were willing to embrace Christianity they must withdraw, since he as bishop could have but one flock. It is said that five hundred Jews then accepted baptism, and the rest withdrew to Marseilles (Gregory of Tours, "Hist. Franc." v. 11; Venantius Fortunatus, "Carm." v. 5, a poem written at the command of Gregory). The example of Avitus was imitated by Virgilius, Bishop of Arles, and by Theodore, Bishop of Marseilles, and it became necessary for Pope Gregory the Great, on an appeal from the Jews who were engaged in commerce at Marseilles, to enjoin more moderation and the employment of only suasion for the conversion of the incredulous ("Epist. Greg." i. 47; ed. Migne, lxxvii. 509). Sulpicius, Bishop of Bourges (before 644), engaged with equal ardor in the work of conversion ("Vita S. Sulpicii," i. 14).

The Jews were not unconcerned in the troubles which devastated the country during the struggles with the "barbarians." With their fellow citizens they defended the city of Arles, which was besieged in 508 by the Franks and the Burgundians. When Cæsarius, the bishop, gave evidence of Burgundian leanings and one of his kinsmen passed over to the hostile forces, the Jews and the Goths taxed the bishop with treason. According to the historian, he found a Jew to open negotiations with the enemy and to propose the surrender of the city ("Vita S. Cæsarii Episc. Arelat." i., by S. Cyprius, Bishop of Toulouse; ed. Migne, "Patrol. Lat." lxvii.). This story has been rightly mistrusted (see Israel Levi in "R. E. J." xxx. 295 *et seq.*).

Under Dagobert.

In 629 King Dagobert proposed to drive from his domains all Jews who would not accept Christianity. He was instigated to this step by Heraclius, Emperor of the East, to whom astrology had predicted the destruction of his empire by a circumcised people (Fredeg. "Chron." 65, ed. Monod, p. 147; comp. "Gesta Dagoberti," c. 24; Bouquet, ii. 586). The story, fabulous in itself, was not invented until after the Arab conquest in 632. It is known from other sources that the clergy were never so powerful under any Merovingian king as under Dagobert. From his reign to that of Pepin the Short no further mention of the Jews is found. But in the south of France, which was then known as "Septimania" and was a dependency of the Visigothic kings of Spain, the Jews continued to dwell and to prosper. From this epoch (689) dates the earliest known Jewish inscription relating to France, that of Narbonne ("R. E. J." xix. 75). The Jews of Narbonne, chiefly merchants, were popular among the people, who often rebelled against the Visigothic kings. It is noteworthy that Julian of Toledo ("Hist. Rebel. Adversus Wambam Insultatio in Tyrann. Galliæ," i. 25; ed. Migne, xcvi. 797) accuses Gaul of being Judaized. Wamba (672-680) decreed that all the Jews of his realm should either embrace Christianity or quit his dominions. This edict, which "threatened the interests of the country," provoked a general uprising. The Count of Nîmes, Hilderic; the abbot Ramire; and Guimaldus, Bishop of Maguelon, took the Jews under their protection, and even compelled their neighbors to follow their example. But the insurrection was crushed, and the edict of expulsion was put into force in 673 (*ib.* 28). The exile of the Jews was not of long duration, since in 681 the twelfth Council of Toledo took cognizance of them, and at the seventeenth, in 694, Egica demanded the punishment of relapsed Jews, but excepted from this measure those who inhabited the provinces of Gaul, in order that they might assist these regions in recovering from the losses they had sustained, and, in general, that the Jews who dwelt in the country might help the duke who was its governor and might contribute to the reestablishment of the province by their talent and by their care and industry. But this was always with the understanding that they be converted to the Catholic faith (Dom Vaissette, "Hist. Générale de Languedoc," ed. Privas, i. 750-751).

Carlovingian Period: From a letter of Pope Stephen III. (768-772) to Bishop Aribert of Narbonne it is seen that in his time the Jews still dwelt in Provence, and even in the territory of Narbonne, enjoying hereditary allodial tenure, and being exempt from high taxation in the towns and outskirts by concession of "the kings of France." They owned fields and vineyards and employed Christians ("Stephani

Papæ Epist." 2; ed. Migne, cxxix. 857). This concession is probably connected with a curious episode in the struggle with the Arabs. The "Roman de Philomène" (Dom Vaissette, ed. Du Mège, addit. to iii. 30) recounts how Charlemagne, after a fabulous siege of Narbonne, rewarded the Jews for the part they had taken in the surrender of the city; he yielded to them, for their own use, a part of the city, and granted them the right to live under a "Jewish king," as the Saracens lived under a Saracen king.

"King of the Jews" at Narbonne.

Meïr, son of Simon of Narbonne (1240), in his "Milḥemet Miẓwah" refers to the same story. It is a well-known fact, he adds, that at the siege of Narbonne King Charles, having had his horse killed under him, would himself have been killed but for a Jew who dismounted and gave the king his horse at the cost of his own life, for he was killed by the Saracens. A tradition that Charles granted to them a third part of the town and of its suburbs (Neubauer, in "R. E. J." x. 98–99) is partly confirmed by a document which once existed in the abbey of Grasse, and which showed that under the emperor Charlemagne a "king of the Jews" owned a section of the city of Narbonne, a possession which Charlemagne confirmed in 791 (Note of Du Mège, "Mémoires de la Société des Antiquaires," 1829, viii. 340). In the Royal Letters of 1364 (Doat Collection, 53 *et seq.* 339–353) it is also stated that there were two kings at Narbonne, a Jew and a Saracen, and that one-third of the city was given to the Jews. A tradition preserved by Abraham ibn Daud, and agreeing in part with the statement of Benjamin of Tudela, his contemporary, attributes these favors to R. Makir, whom Charlemagne summoned from Babylon, and who called himself a descendant of David (Neubauer, "Med. Jew. Chronicles," i. 82). The Jewish quarter of Narbonne was called "New City" ("Hist. Littér. de la France," xxvii. 561), and the "Great Jewry" (Tournai, "Catal. du Musée de Narbonne"). The Makir family bore, in fact, the name "Nasi" (prince), and lived in a building known as the "Cortada Regis Judæorum" (Saige, "Hist. des Juifs du Languedoc," p. 44). The granting of such privileges would certainly seem to be connected with some particular event, but more probably under Charles Martel or Pepin the Short than under Charlemagne. A similar story of the surrender of Toulouse to the Saracens by the Jews is rejected as a fable by Catel ("Mémoires de l'Histoire du Languedoc," p. 517), and also by Dom Vaissette (iii. 252).

Earliest Known Inscription Relating to the Jews of France, Dated Narbonne, 689.

Whatever be the amount of truth in these stories, it is certain that the Jews were again numerous in France under Charlemagne, their position being regulated by law. A formula for the Jewish oath was fixed ("Capit. de Judæis," cap. 4; Boretius, i. 258). They were allowed to enter into lawsuits with Christians ("Capit. Miss. Aquisgran. Alt." cap. 13; Boretius, i. 152), and in their relations with the latter were restrained only from making them work on Sunday (*ib.*). They must not, however, take in pawn goods belonging to the Church ("Capit. de Judæis," cap. 1–3; Boretius, i. 258: though it is doubtful whether this paragraph dates from Charlemagne). They must not trade in currency, wine, or corn (*ib.*; also a doubtful paragraph according to Boretius). Of more importance is the fact that they were tried by the emperor himself, to whom they belonged (*ib.*). They engaged in export trade, an instance of this being found in the Jew whom Charlemagne employed to go to Palestine and bring back precious merchandise ("Mon. Sangal." i. 16; "Monum. Germ., Scriptores," ii. 737). Furthermore, when the Normons disembarked on the coast of Narbonnese Gaul they were taken for Jewish merchants (*ib.* ii. 14; ii. 757). They boast, says one authority, of buying whatever they please from bishops and abbots ("Capit. Miss. Nuimag. dat." cap. 4; Boretius, i. 131). Isaac the Jew, who was sent by Charlemagne in 797 with two ambassadors to Harun al-Rashid, was probably one of these merchants ("Einh. Annal." ad ann. 801; "Monum. Germ., Scriptores," 1, 190). It is a curious fact that among the numerous provincial councils which met during Charlemagne's reign not one concerned itself with the Jews, although these had increased in number. In the same spirit as in the above-mentioned legends he is represented as asking the Bagdad calif for a rabbi to instruct the Jews whom he had allowed to settle at Narbonne ("Sefer ha-Ḳabbalah," ed. Neubauer, in "Med. Jew. Chron." i. 82). It is also stated that he wished to transplant the family of Kalonymus from Lucca to Mayence ("'Emeḳ ha-Bakah," p. 13). From this time forward mention is made of rabbis. A certificate of the son of Charlemagne is delivered to a rabbi, Domatus, Donnatus, or Dematus (see below). Hrabanus Maurus, Bishop of Fulda, states that in compiling

Under Charlemagne.

his works he consulted with Jews who knew the Bible (Migne, cix. 10). Bishop Agobard relates that in his diocese the Jews have preachers who go to hear the Christians, and he tells of the opinions which they held and which they doubtless placed on record in their writings (see below).

Louis le Débonnaire (814–833), faithful to the principles of his father, granted strict protection to the Jews, to whom he gave special attention in their position as merchants. The language which he uses in regard to them is characteristic; it is carefully weighed and free from all fanaticism. Louis takes under his protection (before 825) Rabbi Domatus and Samuel, his little son by Septimania; he gives orders against their being molested in the possession of their property, permits them to change or to sell it, to live according to their law, to hire Christians for their work, and to buy and sell foreign slaves within the empire. He prohibits Christians from diverting such slaves from their duties by offering baptism to them. These Jews being under the protection of the king, any who should plan or perpetrate their death were to be punished. It was equally forbidden to submit them to the ordeal by water or fire. The diploma granting these privileges was to be shown not only to civil officials, but also to the bishops, abbots, etc. ("Formul. Imp." 30; Rozière, "Recueil," No. 27; Bouquet, vi. 649). Louis accorded his protection to others also, and ("Formul. Imp." 31; Rozière, *l.c.* No. 28) not alone to individuals, but likewise to the Jews of the whole country. This is seen in an incident which occurred to the Jews of Lyons. Between 822 and 825 Agobard, bishop of the diocese of that city, had come to the court of Louis to protest against the law concerning the baptism of the pagan slaves of Jews. The substance of his complaint was that the privileges of the Jews were rigidly upheld. The Jews had a master ("magister Judæorum"), that is to say, a preserver of their privileges, appointed by the emperor, and charged with seeing that they were carried out. This master of the Jews threatened Agobard with the arrival of "missi dominici" who would punish him for his audacity. In fact, these missi had come to Lyons, and they showed themselves terrible toward the Christians, but gentle toward the Jews, who had charters declaring that they were in the right. It was said that the Jews, far from being objects of hatred to the emperor, were better loved and considered than the Christians (see AGOBARD).

Under Louis le Débonnaire.

Agobard's Account.

Agobard, with two other bishops, also wrote to the emperor a memoir relating all that the Church of Gaul and its heads, as well as the bishops, had done to keep the two religions distinct. In the letter to which he here makes allusion he refers to the "superstitious ideas and absurd beliefs of the Jews," citing traits which recall the "Shi'ur Ḳomah," "Sefer Yeẓirah," the Talmud, and divers Midrashim of late date (it may be remembered that Hai Gaon, in "Ṭa'am Zeḳenim," reports that the French Jews boast of possessing mystical works from Naṭronai). In their books these Jews, after their fashion, recount the history of Jesus and Peter (he seems to refer to a "Toledot Yeshu"); they pretend that the Christians adore idols, and that the powers obtained by the intercession of the saints are in reality secured through the devil. In a letter to Nibridius, Bishop of Narbonne, Agobard begs him to work for the separation of Jews and Christians as he himself is doing, enjoining upon the Christians to flee from the society of the Jews at Lyons and in some of the neighboring towns. Promiscuity is dangerous, for as a matter of fact the Christians celebrate the Sabbath with the Jews, desecrate Sunday, and transgress the regular fasts. Because the Jews boast of being of the race of the Patriarchs, the nation of the righteous, the children of the Prophets, the ignorant think that they are the only people of God and that the Jewish religion is better than their own ("Agobardi Opera," ed. Migne, civ.; comp. Bernhard Simon, "Jahrbücher des Fränkischen Reiches Unter Ludwig dem Frommen," i. 393 *et seq.*, Leipsic, 1874). The highly colored picture presented by the letter of Agobard shows not only the policy followed by the Church—the separation of Jews and Christians, and the reproaches then hurled at the Jews—but also the prosperity which the Jews enjoyed as merchants (not usurers), and the commencement of their literary activity.

Agobard had a worthy successor in the person of his disciple Amulo (Amolon), who in 846 published a letter ("Contra Judæos," ed. Migne, cxvi.) which took up and carried to completion Agobard's arguments; his memoir affords new information on the situation of the Jews of his diocese. The people had not yet perceived the danger of intermingling with the Jews, and the leaders were afflicted with the same blindness. Wine, even for religious purposes, was always purchased from the Jews; Christian freemen continued to take service with them, both in the city and elsewhere; the ignorant still claimed that the Jews preached to them better than did the priests. He states that certain converted Jews have informed him that in some places Jewish farmers of revenue abuse their power by compelling those of little spirit, the weak-minded, to deny Jesus. It is in this way that the deacon Bodon has been deceived into becoming a Jew. On several occasions Amulo has ordered his flock to keep aloof from the Jews, and has ordered the bishops to come into closer relationship with their charges in order that danger may be averted. Amulo likewise denounces the aberrations and superstitions of the Jews, who devote themselves entirely to their traditions, which they make the subject of discourses and sermons every Saturday in the synagogues. He mentions also the invidious expressions of which they make use to designate the Apostles and the Gospel, and their arguments in defense of their Messianic ideas (which accord with those of the "Sefer Zerubbabel" and the "Ma'asch of R. Joshua b. Levi"). This memoir is contemporary with two synods which met at Meaux (June 17, 845) and at Paris (Feb. 14, 846). At these councils, in which Amulo took part, the king was urged in the terms of the "Contra Judæos" to observe toward the Jews the ancient laws and edicts ("Concil. Meld." can. 73; Labbe, xiv. 836). The king, however, paid little attention to the ex-

Amulo's "Against the Jews."

hortations of the bishops (Prudentius of Troyes, "Annales," ed. Migne, cxv. 1399), and did not ratify the canon on the Jews ("Capitularium Sparnaci"). The attempt had failed once again. According to the legend related in the Annals of Hincmar (ad ann. 877; "Monum. Germ., Scriptores" i. 504, 589), Charles the Bald paid for this imprudence, being poisoned in Mantua by his Jewish doctor Sedecias (Annalista Saxo, *ib.* 584). The king also employed Jews on foreign missions (Diego, "Historia de los Condes de Barcelona," p. 26). The Jews, who continued to devote themselves to commerce, differed in their privileges from the Christians only in the amount of duty levied on them, paying one-tenth of the value of the goods, while Christians paid one-eleventh (Bouquet, vii. 104: if this capitulary is authentic). Ibn Kordadhbeh, who speaks of the southern French Jews about 850, depicts them going as far as the Indies and China ("Journal Asiatique," sixth series, v. 512). See COMMERCE.

From the middle of the ninth to the twelfth century is certainly an important epoch; it was then that French society became transformed by the development of the feudal system and the organization of the gilds; the arbitrary rapacity of the one oppressing the weak—agricultural serf and Jewish merchant alike—and the jealous exclusiveness of the other prohibiting the exercise of trades by non-Catholics, while both invested all things with the religious fanaticism which later expressed itself in the Crusades. At the same time it is the epoch in which the rabbinical schools, already mentioned in Amulo's account, appeared in full light, when Hebrew literature in France produced its first works, and when famous rabbis made French Judaism illustrious and impressed upon it the character which it was to retain for several centuries. Unfortunately, however, but few details concerning this transition period are known; they are as follows:

At Sens, about 876, the archbishop Ansegise, prelate of Gaul, expelled the Jews and the friars from his city—for a certain reason, according to an eleventh-century historian (Odorani, "Chron." ad ann. 883; Bouquet, viii. 237). As far as concerned the Jews this is, perhaps, the first sign of the triumph of feudalism. In 899 Charles the Simple confiscated, for the profit of the church at Narbonne, all the property held by the Jews and subject to the payment of tithes (Vaissette, iii. 63). According to Saige ("Hist. des Juifs du Languedoc," p. 9), this signifies that the Jews might not possess land upon which Church tithes were levied, but it did not abrogate their right to hold free land. At any rate, in the eleventh century they were in peaceful possession of their landed property around Narbonne.

The First Capets—987–1137: According to Richer, a historian who, as stated by Monod, inspires mistrust, Hugh Capet, "whose whole body was covered with sores," was killed by the Jews in 996 ("Richeri Historia," lib. iv., toward the end, p. 308, ed. Guadet). According to Guadet, Richer merely means by this statement that the Jewish physicians were the cause of his death. A Hebrew document (Berliner's "Magazin," iv.; "Oẓar Ṭob," p. 49) states that a Jew of Blois, who had been converted to Christianity, wished to destroy the Limoges community in 996, and accused the Jews of employing on three holidays of the year a wax image of the lord of the land, which they pierced in order to bring about his death, just as they did in the case of the host. But since the fable of the pierced host came into existence several centuries later, the story is open to doubt. Following the accusation of this convert, a priest appears to have counseled his lord no longer to tolerate the Jews in the city. In 1010 Alduin, Bishop of Limoges, offered the Jews of his diocese the choice between baptism and exile. For a month theologians held disputations with them, but without much success, for only three or four of the Jews abjured their faith; of the rest some fled into other cities, while others killed themselves ("Chronicles of Adhémar of Chabannes," ed. Bouquet, x. 152; "Chron. of William Godellus," *ib.* 262, according to whom the event occurred in 1007 or 1008). A Hebrew text also states that Duke Robert of Normandy having concerted with his vassals to destroy all the Jews on their lands who would not accept baptism, many were put to death or killed themselves. Among the martyrs was the learned Rabbi Senior. A rich and esteemed man in Rouen, Jacob b. Jekuthiel, went to Rome to implore the protection of the pope in favor of his coreligionists, and the pontiff sent a high dignitary to put a stop to the persecution (Berliner's "Magazin," iii.; "Oẓar Ṭob," pp. 46–48). Robert the Pious is well known for his religious prejudice and for the hatred which he bore toward heretics; it was he who first burned sectarians. There is probably some connection between this persecution and a rumor which appears to have been current in the year 1010. If Adhémar of Chabannes, who wrote in 1030, is to be believed, in 1010 the Western Jews addressed a letter to their Eastern coreligionists warning them of a military movement against the Saracens. In the preceding year the Church of the Holy Sepulcher had been converted into a mosque by the Mohammedans, a sacrilege which had aroused great feeling in Europe, and Pope Sergius IV. had sounded the alarm ("Monum. Germ., Scriptores," iv. 137). The exasperation of the Christians, it seems, brought into existence and spread the belief in a secret understanding between the Mohammedans and the Jews. Twenty years later Raoul Glaber (Bouquet, x. 34) knew more concerning this story. According to him, Jews of Orleans had sent to the East through a beggar a letter which provoked the order for the destruction of the Church of the Holy Sepulcher. Glaber adds that on the discovery of the crime the expulsion of the Jews was everywhere decreed. Some were driven out of the cities, others were put to death, while some killed themselves; only a few remained in all the "Roman world." Five years later a small number of those who had fled returned. Count Riant says that this whole story of the relations between the Jews and the Mohammedans is only one of those popular legends with which the chronicles of the time abound ("Inventaire Critique des Lettres Historiques des Croisades," p. 38, Paris, 1880). Another violent commotion arose about the year 1065. At this date Pope Alexander II. wrote to the Viscount of Nar-

Persecution of Jews in Limoges and Rouen.

bonne, Béranger, and to Guifred, bishop of the city, praising them for having prevented the massacre of the Jews in their district, and reminding them that God does not approve of the shedding of blood ("Concil." ix. 1138 and 1154; Vaissette, 355). A crusade had been formed against the Moors of Spain, and the Crusaders had killed without mercy all the Jews whom they met on their route.

During this period, which continues till the first Crusade, Jewish culture was awakening, and still showed a certain unity in the south of France and the north. Its domain did not embrace all human knowledge; it included in the first place poetry, which was at times purely liturgical—the echo of Israel's sufferings and the expression of its invincible hope—but which more often was a simple scholastic exercise without aspiration, destined rather to amuse and instruct than to move—a sort of dried sermon. Following this comes Biblical exegesis, the simple interpretation of the text, with neither daring nor depth, reflecting a complete faith in traditional interpretation, and based by preference upon the Midrashim, despite their fantastic character. Finally, and above all, their attention was occupied with the Talmud and its commentaries. The text of this work, together with that of the writings of the Geonim, particularly their responsa, was first revised and copied; then these writings were treated as a "corpus juris," and were commented upon and studied both as a pious exercise in dialectics and from the practical point of view. There was no philosophy, no natural science, no belles-lettres, among the French Jews of this period.

Franko-Jewish Literature.

Several names of scholars and poets emerge from the shadows of the tenth century: Makir, the gaon Todros, and Moses b. Abbun, chiefs of the school of Narbonne; Simon of Mans; his son Joseph and his grandson Abbun the Great; Judah b. Meïr ha-Kohen (in French "Leontin"), teacher of Gershon; Moses of Arles. In the eleventh century there were many famous authors who played a rôle of the first importance in the development of Jewish civilization and who left their imprint upon Judaism. The most illustrious of them was Gershon, called the "Light of the Exile," who was originally from Metz, but exercised his activity at Mayence and established the study of the Talmud upon the banks of the Rhine. He was a poet, and his productions breathe an intense emotion, due to the sorrows of the times. As grammarian, he turned his attention to the Masorah; as Talmudist, he was the author of the first Talmudic commentary produced in Europe, as well as of practical treatises of rabbinical casuistry and of responsa. As chief of the school, inspired by circumstances he passed measures ("takḳanot") of wide-reaching importance, which have retained the force of law throughout Occidental Judaism. He forbade polygamy and one-sided divorce. He had pupils from France, among others Judah b. Moses of Toulouse, Elias the Elder of Mans, and Simon the Elder of Mans, uncle of Rashi. He corresponded with the French rabbis Simson Cohen, Elias b. Elias, Daniel b. Jacob, Leon, Juston (originally in all probability from Burgundy), Samuel b. Judah, and Joseph b. Perigoros. Close to Gershon must be placed Joseph b. Samuel Ṭob-'Elem (Bonfils), rabbi of Limousin and Anjou, and a remarkable Talmudist. He left to posterity many fine editions of the rabbinical writings of his predecessors. He was also an excellent poet, and the author of interesting decisions and responsa. Liturgical poets, such as Joseph b. Solomon of Carcassonne, Benjamin b. Samuel of Coutances, and Elias the Elder b. Menahem of Mans, were numerous.

Jewish France was so rich in men of learning that she gave some of them to Germany, among them Isaac ha-Levi of Vitry, who became head of the school at Worms, and Isaac b. Judah, who became head of the school of Mayence. Both of these became teachers of Rashi.

The great figure which dominates the second half of the eleventh century, as well as the whole rabbinical history of France, is Rashi (Solomon b. Isaac) of Troyes (1040–1106). In him is personified the genius of northern French Judaism: its devoted attachment to tradition; its naive, untroubled faith; its piety, ardent but free from mysticism. His works are distinguished by their clearness, directness, and hatred of subtlety, and are written in a simple, concise, unaffected style, suited to his subject. His commentary on the Talmud, which was the product of colossal labor, and which eclipsed the similar works of all his predecessors, by its clearness and soundness made easy the study of that vast compilation, and soon become its indispensable complement. His commentary on the Bible (particularly on the Pentateuch), a sort of repertory of the Midrash, served for edification, but also advanced the taste for simple and natural exegesis. The school which he founded at Troyes, his birthplace, after having followed the teachings of those of Worms and Mayence, immediately became famous. Around his chair were gathered Simḥah b. Samuel, R. Samuel b. Meïr (Rashbam), and Shemaia, his grandsons; likewise Shemaria, Judah b. Nathan, and Isaac Levi b. Asher, all of whom continued his work. In his Biblical commentaries he availed himself of the works of his contemporaries. Among them must be cited Moses ha-Darshan, chief of the school of Narbonne, who was perhaps the founder of exegetical studies in France; Menahem b. Ḥelbo; and, above all, Joseph Caro. Thus the eleventh century was a period of fruitful activity in literature. Thenceforth French Judaism became one of the poles of universal Judaism.

Rashi.

The Crusades: The Jews of France do not seem to have suffered much during the Crusades, except, perhaps, during the first (1096), when the Crusaders are stated to have shut up the Jews of Rouen in a church and to have exterminated them without distinction of age or sex, sparing only those who accepted baptism (Guibert de Nogent, ed. Bouquet, xii. 240; "Chron. Rothomag."; Labbe, "Novæ Bibliothecæ, manuscript Lib." i. 367). According to a Hebrew document, the Jews throughout France were at that time in great fear, and wrote to their brothers in the Rhine countries making known to them their terror and asking them to fast and pray (anonymous text of Mayence, in A. Neubauer and Stern, "Hebräische Berichte über die Judenverfol-

gungen während der Kreuzzüge," p. 47). Happily their fears proved groundless.

At the time of the second Crusade, Jacob Tam, the grandson of Rashi, had cause to lament the actions of the Crusaders, who burst into his house, seized his possessions, destroyed a book of the Law, and carried him off into the open field with the intention of putting him to death. But perceiving one of the nobles, he called him to his aid and was rescued. Ephraim of Bonn is the only writer who tells of this incident; R. Tam himself makes no reference to it ("Judenverfolgungen," p. 64), and even Ephraim adds that in the other communities of France no one was put to death or compelled to abjure his faith. Nevertheless, the consequences of the Crusades were terrible for the Jews, for this great religious movement produced an excitement of the popular imagination which had dire results for them. It was about this time that accusations of ritual murder were bruited; mere manifestations of a mental malady on the part of majorities intolerant of the existence of a minority who kept aloof from them. From the economic and social point of view this epoch was destined to be for the Jews a turning-point. Until that time the Jews had been chiefly merchants; henceforth they become known above all as usurers. St. Bernard, abbot of Clairvaux, who preached the second Crusade, and who intervened with great courage to prevent the massacre of the German Jews, asked King Louis VII. to prohibit the Jews from accepting usurious rates of interest from those who set out for the Holy Land. Moreover, in speaking of their rapacity, and observing that in places where there were no Jews the Christian usurers were worse in their exactions, he says that on this account the latter might justly be accused of Judaizing ("Epistola," 363; ed. Migne, clxxxii. 564). Peter the Venerable, abbot of Cluny, wrote in 1146 to the king that even if he did not counsel the massacre of the Jews, they should at least be punished by being despoiled of their ill-gotten gains and thefts, and that the army of the Crusaders should not spare Jewish treasures ("Epistola," 36; ed. Migne, clxxxix. 366). For having resisted these appeals Louis VII. was accused by a contemporary historian of having been moved by cupidity ("Fragmentum Historicum Vitam Lud. VII. Summatim Complectens," in Bouquet, xii. 286). Pope Alexander III. in a letter to the Archbishop of Bourges (1179) addressed to him the same reproach (Bouquet, xv. 968). According to Ephraim of Bonn, the provisions of the bull of Pope Eugenius IV. exonerating the Crusaders from their debts to the Jews were carried out in France ("Judenverfolgungen," p. 64).

R. Tam in the Second Crusade.

The accusation of ritual murder in France was closely connected with the Crusades. According to a Jewish account of the second Crusade ("Judenverfolgungen," p. 62), the Crusaders, in order to justify their sanguinary exploits, pretended at times that they were punishing the Jews for the murder of Christians. It was said that the Jews committed this crime not because they had need of Christian blood for ritual purposes, but in order to repeat the crucifixion of Jesus. At Pontoise it was said some time before 1171 that they had crucified an adult Christian of the name of Richard. The dates given vary: it was in 1163 according to Lambert Waterlos, who died in 1170 (Bouquet, xiii. 520); in 1179 according to Rigord; in 1156 according to Geoffroy of the abbey of St. Martial of Limoges, who died in 1184 (Bouquet, xii. 438; see also "Judenverfolgungen," p. 34). The body was carried to Paris and worked numerous miracles in the Church of the Holy Innocents, where it was interred. Similar accusations were made against the Jews at Epernay and at Janville (department of Eure et Loire) about the same time—that is to say, about the year 1170—but no details are known ("Judenverfolgungen," pp. 34–35). The outburst at Blois is the most famous, and cost the lives of 31 persons. The affair was of a most lamentable nature. A man was watering a horse in the Loire. Frightened at the sight of a Jew who was near, the animal reared. This was sufficient to cause the man to return at once and accuse the Jew of having thrown into the stream the body of a Christian child which had been crucified by the Jew's coreligionists. He himself had been afraid of meeting the same death, and the horse had instinctively recoiled. Thibaut de Champagne, Count of Blois, immediately incarcerated all the Jews in the city. A priest suggested that the man should be put to the test by water, and as the test resulted in his favor, the proof of the crime of the Jews was regarded as conclusive. Having rejected baptism, 31 Jews were burned on Wednesday, May 26, 1171. Jacob Tam, who was informed of this sad occurrence, decided that this day should be one of fasting, and the communities of France, Anjou, and the provinces on the Rhine duly observed it as such (statement of Baruch ben Meïr of Orleans; letters of the notables of Orleans; letter of a Jew of Tours to R. Yom-Ṭob; "Martyrology of Ephraim of Bonn"; letter of the notables of Paris in "Judenverfolgungen," pp. 31 *et seq.*; Robert du Mont, in Bouquet, xiii. 315). Robert du Mont also says that Jews were burned in Paris likewise in 1177 for the murder of St. William. The belief in this legend was destined to be most baneful to the Jews of the entire kingdom of France. Philip Augustus, who, in 1180, at the age of fifteen succeeded Louis VII., his brother, had, according to his historian Rigord, often heard the young nobles who were his fellow students in the palace tell how the Jews of Paris went year by year into subterranean retreats on Passover or during the Holy Week, and sacrificed a Christian in order to outrage the Christian religion. Often during his brother's reign (they said) the guilty had been seized and thrown into the flames. Immediately after his coronation, Saturday, March 14, 1181, he ordered the Jews to be arrested in all their synagogues, and despoiled of their money and their vestments (an English chronicler, Raoul of Dicet [ii. 14], says that he released them for a ransom of 15,000 silver marks). The Jews, adds Rigord, were then very numerous, and many rabbis (didascali) had come to sojourn in Paris; they had become enriched to the extent of owning nearly half of the city; they were engaged in usury; their patrons were often despoiled of their possessions, while others were kept on parole in the houses of

Blood Accusation.

certain of the Jews. After having consulted a hermit who lived in the Vincennes forest, the king released the Christians of his domain from all their debts toward the Jews, with the exception of one-fifth which he transferred to himself. In the following April, 1182, he published an edict of expulsion, but according the Jews a delay of three months for the sale of their personal property. Immovable property, however, such as houses, fields, vines, barns, and wine-presses, he confiscated. The Jews attempted to win over the nobles to their side, but in vain. In July they were compelled to leave the royal domains of France; their synagogues were converted into churches (Rigord, "Gesta Philippi Augusti," i., vi. 12–17; ed. Delaborde, pp. 14 *et seq.*; see also Guillaume le Breton, "Philippidos," i. 389 *et seq.*; ed. Delaborde, p. 23).

Expulsion from France, 1182.

As may be seen, these successive measures were simply expedients to fill the royal coffers. The goods confiscated by the king were at once converted into cash (Leopold Delisle, "Catalogue des Actes du Regne de Philippe Auguste," 20, 21, 22, 27, 51, 58). It is well to add that at that time the royal domains were reduced to a very narrow strip of territory, extending around Paris and Orleans.

During the century which terminated so disastrously for the Jews their condition was not altogether bad, especially if compared with that of their brethren in Germany. Thus may be explained the remarkable intellectual activity which existed among them, the attraction which it exercised over the Jews of other countries, and the numerous works produced in those days. The impulse given by Rashi to study did not cease with his death; his successors—the members of his family first among them—brilliantly continued his work. Research moved within the same limits as in the preceding century, and dealt mainly with the Talmud, rabbinical jurisprudence, and Biblical exegesis. Rabbenu Tam, to whom reference will again be made, investigated at least one section of Hebrew grammar; he undertook the defense of Menahem b. Saruḳ against Dunash b. Labraṭ; as innovator in another direction he composed a poem on the accents and imitated the versification of the Spanish Jews, which impelled Abraham ibn Ezra to ask: "Who is this that has led the French into the temple of poetry?" But in this he had no successors, and did not create a school.

Biblical exegesis, which continued to be distinguished by its simplicity and naturalness, now commenced to place too much importance on interpretations based on the numerical values of letters and on analogous methods (gematria, notarikon). Liturgical poetry was constantly cultivated by a large number of rabbis. Talmudic studies underwent a marked transformation. Exposition of the Talmud having almost reached a limit (for who could hope to compete with Rashi's work?), scholars no longer confined themselves merely to understanding the Talmud, but, just as had been done formerly with the Mishnah, they selected from the Talmud their themes for academic and juristic discussions. By the help of parallel passages they shed new light on the text of the Talmud; by comparing analogous passages they sought to establish rules of jurisprudence; and, where the text contained contractions, whether real or merely apparent, external or internal, they pointed them out and sought to explain them away. On the other hand, from the Talmud they deduced laws applying to the conditions of contemporaneous life. Their glosses or postils, known under the name of "tosafot" (additions), were originally simple appendixes to the commentary of Rashi, discussing, correcting, or completing them. They represent the result of the discussions of the schools and of the teaching of the masters, and are notes made by the professor or, as was more often the case, collected by the pupils to carry with them when they visited other schools. Study, considered always as a means of salvation, became more and more simple dialectics, aptly compared with that of the scholastics of the time. But even in this extravagant display of ingenuity, of subtlety, and of erudition, the French rabbis, as their contemporaries of Germany, preserved a moderation ignored by their disciples, the Poles of the sixteenth and following centuries. Subtlety did not exclude clearness; logic never lost its rights; order ruled in the editing of their notes. The production of tosafot became the dominant and absorbing occupation of this period, and impressed its distinctive character upon the studies of the time. The work was participated in by a whole legion of scholars, spread over the north of France, Normandy as well as the Isle of France, Champagne as well as Burgundy and Lorraine. Champagne, however, was the most active center. In these different provinces schools were founded—at Ramerupt after Troyes, at Dampierre, at Auxerre, at Sens, at Falaise, at Paris, etc. To these centers of instruction, just as to the French universities, hastened pupils from distant countries, from Slavic lands, from Bohemia, and from Germany. Like the traveling students of that period, the pupils of the rabbis traversed the land, mocking at distance, insensible to privation, going from one master to another in their thirst for instruction. The earliest masters who gave prestige to this form of instruction were members of the family of Rashi: Judah b. Nathan, his son-in-law and the continuer of his commentary on the Talmud; Meïr, another son-in-law, who became director of the Troyes Academy after Rashi's death; Jacob Tam (called commonly "Rabbenu Tam," the son of Meïr)—the true founder of the school of tosafists, a man of strong will and energetic character, and known to his contemporaries as the supreme authority of French Judaism; his brother Samuel (Rashbam), an excellent exegete, somewhat daring in parts of his Biblical commentary; Samuel de Vitry, a nephew of R. Tam. To the same group belong Samuel de Vitry, a disciple of Rashi, and author of the Maḥzor Vitry; his great-grandson, Isaac b. Samuel the Elder, the famous "RI," whose name occurs frequently in the tosafot, and who was chief of the school at Dampierre (to be distinguished from Isaac b. Abraham, known as "RI ha-Baḥur" (the Younger), who succeeded him); Elhanan, son of Isaac b. Samuel, martyred in 1184. To these names of famous tosafists must also be added the following: Jacob of Orleans

The "Tosafot."

Centers of Rabbinic Learning.

(died in London in 1189), who was also an exegete; Samuel b. Ḥayyim of Verdun, disciple of R. Tam; Hoshaiah ha-Levi of Troyes; Menahem b. Perez of Joigny, also an exegete; Yom-Ṭob of Joigny (died at York in 1190), a liturgical poet and Biblical commentator; Samuel b. Aaron and Simon b. Samuel of Joinville; Eliezer b. Samuel of Metz, author of the "Sefer Yere'im"; Moses b. Abraham of Pontoise; Simon b. Joseph of Falaise; Yom-Ṭob; Judah b. Yom-Ṭob; Ḥayyim b. Hananel Cohen; the celebrated Judah b. Isaac, alias Sir Léon of Paris; Simson de Couçy, one of the most learned of the tosafists; Judah of Corbeil; Joseph and Isaac b. Baruch of Clisson; Eliezer b. Solomon; and the well-known Simson (b. Abraham) of Sens, commentator of the Mishnah and the Sifra. Side by side with these tosafists may be cited a number of scholars renowned for their vast knowledge, such as Joseph Caro, mentioned above in connection with the history of the previous century; Shemaiah, commentator on the Talmud; Joseph b. Isaac of Orleans, better known under the name of "Joseph Bechor Schor," an ingenious exegete; Solomon b. Isaac and Eleazar of Orleans; Samuel b. Jacob of Auxerre; Aaron and Bender d'Epernay; Eliezer of Beaugency, an exegete of authority; Jehiel b. David and Jekuthiel b. Judah of Troyes; Jacob and Isaac de Bray, who died in 1191; David of Brienne; Samuel de Joinville; Joseph b. Solomon de Dampierre; Joseph b. Joseph de Port Audemer; Samuel b. Joseph of Verdun; Abraham of Toul; Moses of Saumur; Joseph b. Moses and Simson of Troyes; David of Château-Thierry; Meshullam b. Nathan of Melun; Nathan, his son; Jedidia of the same town; Solomon b. Abraham b. Jehiel; Mattithiah b. Moses; Judah b. Abraham; Samuel, Moses, and Jacob b. Samson; Elijah b. Judah of Paris; Joseph Porat of Caen; Joseph the Saint and Samson of Corbeil; Joseph b. Isaac of Chinon; Joseph of Chartres, poet and exegete; Moses of Saumur; Isaac b. Solomon and Eliezer of Sens. This list could be considerably prolonged if all the learned men of the time were mentioned whose birthplace is not exactly known, although they are certainly French. It is sufficient to know that at a synod held at Troyes under the presidency of Samuel b. Meïr and R. Tam, rabbis came from Troyes, Auxerre, the banks of the Rhine, Paris and its environs, from Melun, Normandy and the coast, Anjou, Pontou, and Lorraine. These synods are distinctive of the history of northern France in the twelfth century; in imitation of the local or national councils, and principally at the instigation of R. Tam, the heads of the Israelite community met several times, without doubt at the time of the Champagne fairs, to deliberate upon dubious cases of jurisprudence, or to pass new laws necessitated by changed conditions. Thus, they forbade Jews to buy or to take in pledge crucifixes, church ornaments, or other objects connected with the Catholic form of worship; to summon their coreligionists to appear before non-Jewish judges; to allow themselves to be nominated by the civil authorities as provost or leader of the community without having been previously proposed for this office by the majority of the community. They also decided that the prohibition of R. Gershom against polygamy should be enforced, and that it should not be revoked at any time in the future except under urgent necessity and by a council of at least a hundred rabbis from three different regions —from France, Normandy, and Anjou. The command was renewed to excommunicate traitors who brought false charges against their brethren. Finally a question connected with the matrimonial laws was settled (Neubauer, "R. E. J." xvii. 66–73; Gross, "Gallia Judaica," pp. 251 *et seq.*).

Synods.

In the south of France the intellectual life of the Jews was equally intense, and for similar reasons. Never had their situation been more happy; rulers and people agreed in treating them with kindness. At Toulouse and at Béziers they had to suffer, it is true, odious restrictions At Béziers, on Palm Sunday, the bishop regularly exhorted the people to take vengeance on the Jews, "who had crucified Jesus." He even went further and gave them permission to attack the deicides and to raze their houses. This the inhabitants always did with such ardor that it resulted in bloodshed. The attack commenced on the first hour of the Saturday before Palm Sunday, and lasted until the last hour of the Saturday after Passover. At Toulouse, as a penalty for the alleged crime of having, in the time of Charlemagne, delivered up the town to the Saracens —a mere legend, since the Moors never entered the town—thrice a year a Jew was compelled to present himself before the church to have his ears boxed. But these two customs were justly abolished in the twelfth century; the latter, at the commencement of the century, was replaced by a fixed payment to the canons of St. Saturnin (Vaissète, ii. 151); that of Béziers in 1160 by a tax to be used in purchasing ornaments for the cathedral (*ib.* iii. 813). The favor which the Jews in general enjoyed at that time may be judged from the fact that they were employed by the counts and inferior lords in the position of "bailes." As such they had the administration of lands dependent directly on their lords; they also had a large share in the administration of justice. "Above all, they filled the office of farmers of revenue, and were allowed to farm out the tolls, the receipts of the towns and fiefs, and even certain of the revenues of the chapters and bishops" (Saige, "Les Juifs du Languedoc," pp. 15 *et seq.*). But if, as is natural, Christian documents impart this information, it does not follow that the Jews drew their revenues exclusively from such offices, for the Hebrew responsa show that they continued to practise the same trades as before. Their prosperity was due altogether to the ever-kindly attitude of the people toward them, and to the liberalism of the counts of Toulouse and the viscounts of Béziers, who had taken them under their protection. Raymond Trencavel and Roger II., viscounts of Béziers, and Raymond V. and VI., were in turn well disposed toward them, and entrusted them with the duties of bailes. The Jews of Béziers took no part in the popular conspiracy of that city, which in 1167 occasioned the assassination of Raymond Trencavel, and they accordingly did not suffer in the massacre with which that crime was avenged in 1169. At a later date, when Raymond VI. was at-

In the South.

tacked by the Crusaders, one of the direct charges brought against him was that of having, "to the shame of the faith," admitted Jews to public offices. The lords of Montpellier alone were consistently opposed to appointing Jews to the office of baile.

Provençal Learning.

Among the Jews of this district science reached heights even loftier than those to which it attained in northern France. The proximity of Spain, the peaceful condition of the district, and other circumstances which will be mentioned later, made Provence (a name then given to all the south of France) a chosen land for Jewish science, and assured it a brilliant part in the transmission of the civilization of classic times. There, too, rabbinical science was cultivated with ardor and produced remarkable men. Its centers were Arles, Béziers, Lunel, Marseilles, Montpellier, Narbonne, Nîmes, Posquières, and St. Gilles. When in 1160 Benjamin of Tudela on his way through Provence stopped at Narbonne, "one of the towns which are most famous for their knowledge, and whence the knowledge of the Law has spread through all the land," he found there Kalonymus, son of the nasi Todros, chief of the rabbinical school; Abraham Ab Bet Din, author of "Sefer ha-Eshkol"; R. Judah; and other learned men, all of whom had numerous pupils. He also found at Béziers another school, under the direction of Solomon Ḥalafta and Joseph b. Nathaniel; at Montpellier he met Reuben b. Todros, Nathan b. Simon, Samuel and Mordecai b. Samuel; at Posquières, the seat of a famous school, he saw Abraham b. David (RABaD), who was renowned for his knowledge, and who supported poor students at his own expense, and also Joseph b. Menahem, Benvenuti, Benjamin, Abraham, and Isaac b. Moses; while at St. Gilles was a community comprising about a hundred learned men, with Isaac b. Jacob, Abraham b. Judah, Eliezer, Isaac, Moses, and Jacob b. Levi, and Abba Mari b. Isaac at the head. At Arles was a community of two hundred Israelites, including Moses, Tobias, Isaiah, Solomon, Nathan, and Abba Mari. At Lunel, says Benjamin, "is a holy brotherhood which studies the Law day and night. The celebrated Meshullam b. Jacob teaches there; his five sons, Joseph, Isaac, Jacob (Nazir), Aaron, Asher, famous for their wisdom as well as for their wealth, have withdrawn themselves from all worldly interests, pursue their studies unceasingly, and abstain from eating meat. Moses b. Judah, Samuel he-Ḥazzan, Solomon ha-Kohen, and Judah b. Saul ibn Tibbon, the Spaniard, also live there, and pupils are taught and supported gratuitously." Finally Benjamin stopped at Marseilles, where he saw the wise Simon b. Anatoli, the latter's brother Jacob, and several other rabbis. The number of famous rabbis mentioned in this chronicle as living in the same year is worthy of note. To complete the list, however, there still remain to be mentioned Meïr b. Isaac of Trinquetailles, author of the "Sefer ha-'Ezer"; the famous Zerachiah ha-Levi, originally from Spain and author of the "Sefer ha-Ma'or," who lived at Lunel; Abraham b. Nathan ha-Yarḥi of Lunel, author of the "Sefer ha-Manhig"; the whole Kalonymus family at Narbonne; Isaac b. Merwan ha-Levi; Moses b. Joseph b. Merwan ha-Levi; etc.

Halakic Studies.

A new method lent variety to the studies of these Talmudists. Isaac Alfasi of Spain had composed a sort of compilation of the Talmud, omitting from it all matters not related to jurisprudence. This plan soon found favor with scholars of a methodical frame of mind, and the "Little Talmud," as the work of Alfasi was called, became the object of devoted study in Provence. Abraham Ab Bet Din was the first scholar there to follow its method and to effect a codification of the contents of the Talmud ("Sefer ha-Eshkol"). On the other hand, Zerachiah ha-Levi in his "Ma'or" criticised the "Sefer ha-Eshkol" severely. Abraham b. David thereupon energetically undertook the defense of his master, and was supported by his disciple, Meïr of Trinquetailles, in his "Sefer ha-'Ezer." Much as these ardent polemics agitated the south of France, they were to be surpassed by others of which Abraham b. David was destined to be the cause. To Alfasi's summary was due the creation of a veritable "summa" of the Talmud, the profoundest work and the most methodical that the Talmud ever inspired—the Mishneh Torah of Maimonides, in which for the first time the Talmudic rules were classified and elucidated according to a scientific plan. The author, absorbed in philosophy, intended that this "summa" should enable students to dispense with a too absorbing study of the Talmud. RABaD, a follower of tradition, was startled by such boldness, for he saw in the book, and perhaps correctly, a mortal danger to the intellectual activity of Judaism, and the cessation of those studies which, though narrow, furnished intellectual food for legions of scholars. Furthermore, Maimonides, a reverential pupil of Aristotle, and an ardent rationalist, did not hesitate to submit to the judgment of reason the theological opinions of the rabbis of the Talmud. Everything which implied the materiality of the Deity or a belief in the resurrection of the body, and all ordinances having, in his eyes, a superstitious character, were disregarded in the Mishneh Torah, and philosophic principles were placed at the foundation even of the legal code. It was a revolution; Rabad understood this, and he undertook to arrest it. He submitted the work of Maimonides to a criticism, minute, bitter, and sometimes brutal, upholding with all his might the doctrine that absolute faith must be accorded to the teachings of the Talmud. It was the battle of free inquiry against the principle of authority, the resistance of the conservative spirit to the audacity of dangerous innovation. Learned as this criticism was, and great as was the authority with which Rabad's incomparable Talmudic knowledge and highly esteemed works had invested him, his opposition was powerless against the prestige which Maimonides had already gained in Provence. There portions of the Mishneh Torah were received as the work progressed, and its completion was eagerly awaited (letter to Joseph b. Aknin). Maimonides, indeed, was consulted as an oracle in Provence; from Marseilles came requests for his opinion even in matters of astrology. Furthermore, he had written a theological treatise, the "Guide to the Perplexed," of an audac-

RABaD and RaMBaM.

ity remarkable for that time, and in which he applied to the Bible the methods of Aristotle and sought for a rational explanation of the religious ordinances. Far from being scandalized at this, the communities, such as that of Lunel, asked him to translate the work from the Arabic into Hebrew, in order that they might study it thoroughly; and at the end of the twelfth century the translation was undertaken by an inhabitant of Lunel. Such a phenomenon, new to France, is explained by the relationship which existed between the Jews there and those across the Pyrenees, where free inquiry was eagerly pursued. An event which rendered this Spanish influence still more potent was the persecution of the Almohades, who drove many Spanish scholars from Spain into Provence, and thereby brought about in miniature a renaissance similar in its way to that which the conquest of Constantinople afterward produced. Two families, the Ibn Tibbons and the Ḳimḥis, transplanted into Provence the Arabic-Jewish civilization of Spain, and the medium for utilizing the forces thus presented was found in the person of Meshullam b. Jacob, who desired to play the part of an intellectual Mæcenas, and who may justly claim to have been the author of the scientific movement among the southern Jews. He it was who called forth the talent of Judah b. Saul ibn Tibbon, originally from Granada, then a fugitive at Lunel. Meshullam and his son Asher insisted that Judah should translate the principal works of the Jews, which, being written in Arabic, could not be read by all. With their assistance Judah translated into Hebrew Baḥya's "Ḥobot ha-Lebabot," Solomon ibn Gabirol's "Tiḳḳun Middot ha-Nefesh," Judah ha-Levi's "Cuzari," Saadia's "Sefer ha-Emunot weha-De'ot," and even Ibn Janaḥ's Hebrew grammar. Judah ibn Tibbon became the head of a dynasty of translators who spread through the Occident all the sciences cultivated in Spain by the Arabs and the Jews. Concurrently with Judah ibn Tibbon, Joseph Ḳimḥi, also a refugee from Spain, translated the "Ḥobot ha-Lebabot." But while the talent of the Ibn Tibbons was directed to translating, that of the Ḳimḥis was on the whole devoted to Biblical exegesis and grammar. Through Joseph Ḳimḥi and his sons Moses and David were made accessible to Provence all those treasures of exegetical and grammatical science of which Jewish Spain had enjoyed the benefit. The simple haggadic exegesis current in the north of France was replaced by a freer, bolder interpretation of the Bible based upon a knowledge of grammar, and made profounder and more rigorous by a comparative study of Arabic grammar. The Ibn Tibbons finished the conquest of Provence commenced by Abraham ibn Ezra. When this Bohemian genius entered the country, bringing with him a whiff of the free air of Spain, and dazzling all with his display of Biblical knowledge and with the originality of his interpretation, he was received with enthusiasm; and his visit was long remembered.

The Translators.

Beside these two forces—conservatism on the one side, knowledge freeing itself from tradition on the other—appeared at this time a third, mysticism, which was destined soon to show itself all-powerful. Isaac the Blind, son of Abraham b. David (RABaD), was the founder of Cabala, and Isaac's son Asher was also a renowned cabalist, while even Abraham himself manifested a tendency toward mysticism. The same is true of the family of Meshullam b. Jacob, whose sons Aaron and Jacob are likewise reputed to have inclined toward such speculations (Gross, in "Monatsschrift," 1874, p. 173).

Thus from north to south French Judaism of the twelfth century affords the spectacle of an intense intellectual excitement.

Thirteenth Century. Northern France: This century, which opened with the return of the Jews to France proper (then reduced almost to the Isle of France), closed with their complete exile from France in a larger sense. In the month of July, 1198, Philip Augustus, "contrary to the general expectation and despite his own edict, recalled the Jews to Paris and made the churches of God suffer great persecutions" (Rigord). The king adopted this measure from no good will toward the Jews, for he had shown his true sentiments a short time before in the Bray affair. But since then he had learned that the Jews could be an excellent source of income from a fiscal point of view, especially as money-lenders. Not only did he recall them to his estates, but, as has been pointed out by Vuitry ("Etudes sur le Régime Financier de la France," i. 315 *et seq.*), he gave state sanction by his ordinances to their operations in banking and pawnbroking. He placed their business under control, determined the legal rate of interest, and obliged them to have seals affixed to all their deeds. Naturally this trade was taxed, and the affixing of the royal seal was paid for by the Jews. Henceforward there was in the treasury a special account called "Produit des Juifs," and the receipts from this source increased continually. At the same time it was to the interest of the treasury to secure possession of the Jews, considered as a fiscal resource. The Jews were therefore made serfs of the king in the royal demain, just at a time when the charters, becoming wider and wider, tended to bring about the disappearance of serfdom. In certain respects their position became even harder than that of serfs, for the latter could in certain cases appeal to custom and were often protected by the Church; but there was no custom to which the Jews might appeal, and the Church laid them under its ban. The kings and the lords said "my Jews," just as they said "my lands," and they disposed in like manner of the one and of the other (Vuitry, *l.c.* after Brussel, "Nouvel Examen de l'Usage Général des Fiefs en France," i., book ii., ch. xxxix., pp. 569 *et seq.*, Paris, 1750; "Ordonnances des Rois de France," i. 35, 44). The lords imitated the king: "they endeavored to have the Jews considered an inalienable dependence of their fiefs, and to establish the usage that if a Jew domiciled in one barony passed into another, the lord of his former domicil should have the right to seize his possessions." This agreement was made in 1198 between the king and the Count of Champagne in a treaty, the terms of which provided that neither should retain in his domains the Jews of the other

Recalled by Philip Augustus, 1198.

without the latter's consent, and furthermore that the Jews should not make loans or receive pledges without the express permission of the king and the count (Vuitry, *l.c.*). Other lords made similar conventions with the king (see Brussel, *l.c.*). Thenceforth they too had a revenue known as the "Produit des Juifs," comprising the taille, or annual quit-rent, the legal fees for the writs necessitated by the Jews' law trials, and the seal duty. A thoroughly characteristic feature of this fiscal policy is that the bishops (according to the agreement of 1204 regulating the spheres of ecclesiastical and seigniorial jurisdiction) continued to prohibit the clergy from excommunicating those who sold goods to the Jews or who bought from them. Indeed, king and lords even took a firm stand against Pope Innocent III. when he protested in 1205 against this new condition of affairs. The pontiff wrote to the king to censure him for his indulgence. If he was to believe what he had heard, the Jews by their usurious practises had gotten into their power the goods of the Church, they occupied castles, they acted as stewards and managers for the nobles, they had Christian servants, and Christian nurses on whom they committed abominable crimes. The civil authorities attached more faith to a deed signed by a debtor at the moment of the loan than to the witnesses whom he produced denying this deed. At Sens the Jews had been permitted to construct a synagogue higher than a church near which it stood, and there they sang so loudly as to disturb the service in the church. On Easter Day they walked in the streets and offered insults to the faith, maintaining that he whom their ancestors had crucified had been only a peasant. Their houses remained open till the middle of the night and served to receive stolen goods; assassination even occurred, as in the case of a poor scholar who had recently been found dead in the house of a Jew ("Diplôme de Brequigny," ii. 2, 610; Bouquet, xix. 471). The pope wrote in the same spirit to the Duke of Burgundy and to the Countess of Troyes and the Count de Nevers (1208; Bouquet, xix. 497). But his efforts were of no avail. Eudes, Duke of Burgundy, having been informed by Philip Augustus that the pope had taken the Crusaders under his protection and had exempted those who set out for Jerusalem from the payment of the interest due their creditors, replied that "the pope can not, without the consent of the king, make any arrangement which may prejudice the rights of the king and the barons," and he counseled the latter to resist the innovations which would thus be introduced into the kingdom. It is probably at this epoch that the rule was established, "Li meuble au Juif le roi sunt au roi," or "Li meuble au Juif sunt au baron" ("Etablissements de St. Louis," ed. Viollet, ii. 249–250, ch. 132–133, drawn from the "Customs of Anjou"). Louis VIII. (1223–1226), in his "Etablissement sur les Juifs" of 1223 ("Ordonnances," i. 47), while more inspired with the doctrines of the Church than his father, Philip Augustus, knew also how to look after the interests of his treasury. Although he declared that from Nov. 8, 1223, the interest on Jews' debts should no longer hold good, he at the same time ordered that the capital should be repaid to the Jews in three years and that the debts due the Jews should be inscribed and placed under the control of their lords. The lords then collected the debts for the Jews, doubtless receiving a commission. Louis furthermore ordered that the special seal for Jewish deeds should be abolished and replaced by the ordinary one (Petit-Dutailles, "Etude sur la Vie et le Regne de Louis VIII." Paris, 1894, in 101st fascicle of the Bibliothèque de l'Ecole des Hautes Etudes). In spite of all these restrictions designed to restrain, if not to suppress, the operations of loans, Louis IX. (1226–70), with his ardent piety and his submission to the Church, unreservedly condemned loans at interest. He was less amenable than Philip Augustus to fiscal considerations. Despite former conventions, in an assembly held at Melun in December, 1230 ("Ordonnances," i. 53), he compelled several lords to sign an agreement not to authorize the Jews to make any loan. No one in the whole kingdom was allowed to detain a Jew belonging to another, and each lord might recover a Jew who belonged to him, just as he might his own slave ("tanquam proprium servum"), wherever he might find him and however long a period had elapsed since the Jew had settled elsewhere. At the same time the ordinance of 1223 was enacted afresh, which only proves that it had not been carried into effect. Both king and lords were forbidden to borrow from the Jews. In 1234 the king went a step further; he liberated his subjects from the third part of their registered debts to the Jews. It was ordained that the third should be restored to those who had already paid their debts, but that the debtors should acquit themselves of the remaining two-thirds within a specified time. It was forbidden to imprison Christians or to sell their real estate in order to recover debts owed to the Jews ("Ordonnances," i. 54). The king wished in this way to strike a deadly blow at usury. Before his departure for the Crusade in 1249 his increasingly stringent piety suggested to him the expulsion of the Jews from the royal domains and the confiscation of a part of their possessions, but the order for the expulsion was only partly enforced if at all (see on this obscure question Bouquet, xxiii. 214; Matthew Paris, iii. 104; I. Loeb, in "R. E. J." xx. 26). Later he became conscience-stricken, and, overcome by scruples, he feared lest the treasury, by retaining some part of the interest paid by the borrowers, might be enriched with the product of usury. Also in 1257 or 1258 ("Ordonnances," i. 85), wishing, as he says, to provide for his safety of soul and peace of conscience, he issued a mandate for the restitution in his name of the amount of usurious interest which had been collected on the confiscated property, the restitution to be made either to those who had paid it or to their heirs. Later, after having discussed the subject with his son-in-law, Thibaut, King of Navarre and Count of Champagne, he decided to seize the persons and the property of the Jews (Sept. 13, 1268). But an order which followed close upon this last (1269) shows that on this occasion also St. Louis reconsidered the matter. Nevertheless, at the request of Paul Christian (Pablo

Innocent III.

Under Louis VIII. and St. Louis.

Increased Restrictions Under St. Louis.

Christiani), he compelled the Jews, under penalty of a fine, to wear at all times the "rouelle" or badge decreed by the Lateran Council in 1215. This consisted of a piece of red felt or cloth cut in the form of a wheel, four fingers in circumference, which had to be attached to the outer garment at the chest and back.

The pious zeal of St. Louis manifested itself in other ways also. One day, according to Joinville ("Vie de Saint Louis," ed. De Wailly, pp. 18–19), a great disputation between the clergy and the Jews was held at the monastery of Cluny. A knight, having demanded from the abbot permission to speak first, said to the leader of the Jews: "Do you believe that the Virgin Mary, who bore God in her body and arms, gave birth while a virgin and was mother of God?" On the reply of the Jew in the negative the knight, calling himself a fool for having entered the Jew's house, struck him. The Jews fled, carrying their wounded rabbi with them. When the abbot reproached the knight for his conduct, the latter replied that it was a greater fault to hold such disputations, since good Christians, through a misunderstanding of the arguments of the Jews, would become infidels. With regard to this, St. Louis said to the chronicler: "No one, unless he be very well instructed, shall be allowed to dispute with them, but if a layman hear the Christian law reviled, he shall defend it with his sword, of which he shall force as much into his body as he can make enter."

Disputations Between Jews and Christians.

These controversies were never sought for by the Jews, who were well acquainted with the danger of discussions. But the clergy and the friars were possessed by the desire, not so much to convert the Jews, as to let Christians see the defeat of the Synagogue. The very existence of the Jews was a subject which troubled simple souls, and it was well to explain to them that the obduracy "of those rebels" was due to the stupidity of their beliefs. With this end in view, various treatises had as early as the twelfth century been composed against the Jews, such as "Annulus seu Dialogus Christiani et Judei de Fidei Sacramentis," by Rupert; "Tractatus Adversus Judæorum Inveteratum Duritiem," by Pierre le Venerable, but attributed wrongly to William of Champeaux; "Tractatus Contra Judæum," anonymous; "Liber Contra Perfidiem Judæorum," by Pierre de Blois (on these works see Israel Lévi in "R. E. J." v. 239 *et seq.*, and Isidore Loeb, "La Controverse Religieuse Entre les Chrétiens et les Juifs au Moyen Age en France et en Espagne," in "Revue de la Histoire des Religions," 1888, p. 17).

In the thirteenth century such treatises were composed not only in Latin but also in French; *e.g.*, "De la Disputaison de la Sinagogue et de la Sainte Eglise" (Jubinal, "Mystères du XVe Siècle," ii. 404–408), and "La Disputaison du Juyf et du Crestien" ("Hist. Littèr. de le France," 23, 217). From Hebrew works it is evident that the rabbis were sometimes tormented by the Christians, generally by the members of the clergy or of the orders (Geiger, "Proben Jüdischer Vertheidigung Gegen Christ. Angriffe im Mittelalter," in Breslauer's "Jahrbuch," i. and ii., 1850–51). Of interest for the Jewish side of the disputations is a curious collection of the thirteenth century containing replies made "to infidels and Christians" by Joseph l'Official and several members of his family (Zadoc Kahn, "Le Livre de Joseph le Zelateur," in "R. E. J." i. 222 *et seq.*, iii. 1 *et seq.*). Among the Christian disputants were some of the most distinguished members of the French clergy: the Archbishop of Sens, the Chancellor of Paris, the confessor of the queen, the bishops of Mans, of Meaux, of Poitiers, of Angoulême, of Angers, of Vannes, of St. Malo, the Abbot of Cluny, and the Dominican friars. "The astonishing and extraordinary point in their replies is the free spirit of the Christian clergy and the free speech of the Jews." The "infidels" to whom the responses of the Jews were addressed were converts who with all the ardor of neophytes showed themselves as the bitter enemies of their former coreligionists. St. Louis favored conversions; several of the proselytes were held at the baptismal font by the king himself, and were named after him. As the property of converts was confiscated because of the loss which resulted to the treasury from the cessation of the payment of the taxes imposed on Jews, the king granted them pensions (Tillemont, "Vie de St. Louis," ed. J. de Gaulle, v. 296 *et seq.*). In 1239 Nicholas Donin, a convert from La Rochelle, brought before Pope Gregory a formal accusation against the Talmud, charging that it contained blasphemies against Jesus, against God, against morality, and against the Christians, not to speak of many errors, follies, and absurdities. The pope thereupon addressed bulls to the bishops of France, England, and Castile, to the bishop and to the priors of the Dominicans and the Franciscans of Paris, directing that all copies of the Talmud should be seized and that an investigation of the contents of this work should be made. In France alone, it seems, was this order obeyed. On March 3, 1240, while the Jews were in the synagogues, all copies of the Talmud were seized.

On June 12, 1240, a public debate was opened between Donin and four representatives of the Jews: Jehiel of Paris, Judah b. David of Melun, Samuel b. Solomon (perhaps Sir Morel de Falaise), and Moses de Coucy. The most weighty arguments were advanced by Jehiel, who has left a procès verbal of the controversy. After the disputation a tribunal was appointed to pass judgment upon the Talmud, among its members being Eudes de Chateauroux, Chancellor of the University of Paris; Guillaume d'Auvergne, Bishop of Paris; and the Inquisitor Henri de Cologne. After the same rabbis had been heard a second time, the Talmud was condemned to be burned. Two years after (in the middle of 1242) twenty-four cartloads of Hebrew books were solemnly burned at Paris. Doubtless all the copies had not been found, for in 1244 Innocent IV. wrote to St. Louis to institute a new confiscation. A little later, while at Lyons, the pope listened to the complaints of the Jews, and in 1247 he asked Eudes de Chateauroux to examine the Talmud from the Jewish standpoint, and to ascertain whether it might not be tolerated as harmless to the Christian faith, and whether the copies which had been confiscated might not be returned to their owners. The

Burning of the Talmud.

rabbis had represented to him that without the aid of the Talmud they could not understand the Bible or the rest of their statutes. Eudes informed the pope that the change of attitude involved in such a decision would be wrongly interpreted; and on May 15, 1248, the Talmud was condemned for the second time (Isidore Loeb in "R. E. J." i. 116, 247 *et seq.*, ii. 248 *et seq.*, iii. 39 *et seq.*; A. Darmesteter, *ib.* i. 140; Noël Valois, "Guillaume d'Auvergne," Paris, 1880). This was a fatal blow to Talmudic study in northern France, and from that moment it began to decline.

Under a king so pious and so hostile to the Jews as St. Louis, the Church could give free vent to its desire for regulating their condition. Never were so many councils occupied with their fate as in his reign: those of Narbonne (1227), Château Gautier (1231), Béziers (1246), Valence (1248), Alby (1254), Montpellier (1258), and Vienne (1267) all passed decrees affecting the Jews (Labbe, xi. 305, 444, 685, 698, 737, 781, 863). A comparison of these decrees with the ordinances of St. Louis shows that usually the pious king merely sanctioned the measures dictated by the bishops. But at length, in order to bring about the conversion of the Jews, St. Louis compelled them in 1269 to listen to the famous Paul Christian (Pablo Christiani, a converted Jew who had become a Dominican), to reply to the questions which he might put to them pertaining to religion, and to show him whatever books they had (Le Nain de Tillemont, v. 294; Ulysse Robert in "R. E. J." iii. 216). According to a Hebrew text (Neubauer in "J. Q. R." v. 713), a controversy appears to have taken place at Paris in 1273 between this Paul (wrongly called "Cordelier") and some French rabbis having at their head Abraham b. Solomon of Dreux; some of the sessions were held at the court of St. Louis' successor, Philip the Bold (1270–85), and some at the monastery of the Franciscans, the Archbishop of Paris and high dignitaries of the Church being present. The disputation appears to have provoked the massacre of more than a thousand persons, but even this failed to effect the conversion of any of the Jews. No Christian text has recorded this occurrence.

Philip the Bold continued to treat the provisions of the canonical law as though they were a part of the common law. He reminded the royal officers that by the terms of the ordonnance of 1269 the Jews were compelled to abstain from all usury and to wear on their coats a colored badge ("Ordonnances," i. 312). At the Parliament of Pentecost in 1280, in accordance with a resolution adopted by the councils of 1279 and 1280, a new statute was passed prohibiting Jews from keeping Christian servants in their houses. And finally, in his ordinance of April 19, 1283, the king ordered the bailes to carry out the law preventing the Jews from repairing their synagogues and from possessing copies of the Talmud (Langlois, "Philippe le Hardi," p. 298). With Philip the Fair the Jews reached the nadir of their misfortunes. Not only had the ordinance requiring the wearing of the badge been enforced, but accusations of sorcery had been made (Ordonnance on the improvement of morals of 1254); and now the belief in ritual murder was to reappear. Since the previous century it had been scarcely mentioned in France. At Valreas, however, in 1247 it had caused several Jews to be sentenced to torture ("R. E. J." vii. 304); at Pons in Saintonge Jews seem to have been accused of the same crime, but at what date is not known ("Joseph le Zelateur" in "R. E. J." iii. 15); and at Troyes on April 25, 1288, for the pretended murder of a Christian child thirteen Jews chosen from among the richer members of the community were condemned by the Inquisition to perish in the flames. Several elegies, and a very fine French ballad written in Hebrew characters, commemorate this last event (A. Darmesteter in "R. E. J." ii. 199 *et seq.*). Two years later at Paris a Jew and his wife living in the Rue des Billettes were burned together, but this time on a new charge, that of piercing the host. The heinous crime was discovered by the clots of blood which sprang from the host and which nothing could stop. Ballads perpetuated the story of this miracle; the stained-glass windows of many churches commemorated it; and later, in the controversies between Catholic and Protestant theologians concerning the Real Presence, it furnished an argument for the former in favor of their thesis. Even to-day the "miracle of the Rue des Billettes" is recalled each year in the Church St. Jean-St. François, Rue Charlot, Paris (Bouquet, xx. 658; xxi. 127, 132; xxii. 32). But it was not superstition which guided Philip the Fair, who was a very practical politician. Even before ascending the throne, as Vuitry justly remarks (new series, i. 91), he had perceived the value of the Jews from a financial standpoint. In taking possession of Champagne in 1284 in the name of his wife, he received 25,000 livres as a gift from the Jews of that province, in return for which he confirmed their terms of settlement. In 1288 he even claimed that in his royal capacity all the Jews belonged to him; but he was compelled to recognize the right of the lords to the possession of some of them (Boutaric, "La France sous Philippe le Bel," p. 300). Submitted to his caprices, the Jews were by turns protected and persecuted, according to the interests of the moment. In 1288, considering that they were a fruitful possession for his demain, he refused to allow them to be imprisoned upon the requisition of the Church without the seneschal or the baile being informed ("Ordonnances," i. 317). Advised in 1302 that the Inquisitors wished to inquire into certain cases concerning the Jews, on the plea that charges of usury and sorcery were involved, he forbade the officers and royal judges to arrest or even disturb any Jew at the request of the Inquisitors (*ib.* 346). Nevertheless in 1290 he had expelled all the Jews coming from Gascony and England (*ib.* 317), doubtless to avoid all dispute with his powerful neighbor, the English king. In 1292 he levied, through the agency of the Jew Manasseh of Crécy, an extra tax on the Jews (Boutaric, p. 300); in 1295 he arrested them all, ordering that an inventory of their goods should be drawn up, and that they should not be released without a special order from him. Their money was to be

Under Philip the Bold and Philip the Fair.

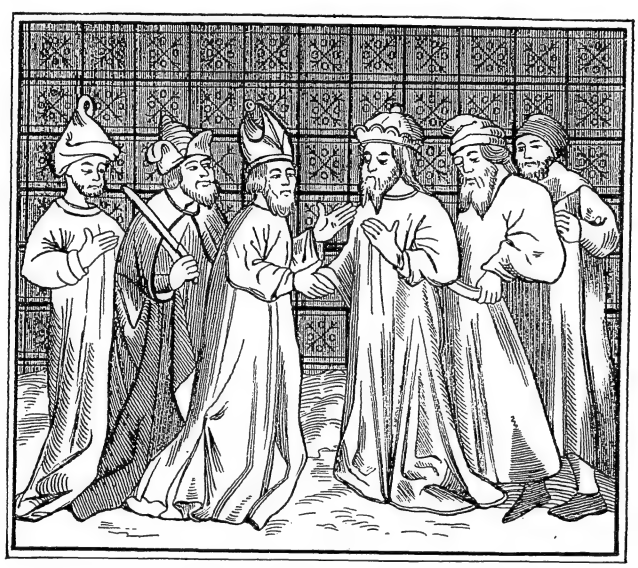
Blood Accusation and Host Desecration.

Increasing Taxation.

turned over to receivers; objects of value which had been left in pawn with them might be repurchased by their owners during a period of eight days, after which they would be sold for the benefit of the treasury (Boutaric, p. 301). But this was only a threat to compel the Jews to satisfy the royal demands. In 1299 the king imposed on them another tax, and at the same time renewed the edict of 1230 ("Ordonnances," i. 333; Brussel, p. 609). Again in 1303 he imposed a tax upon them; but the Jews alleged this time that since they had not been able to obtain the payment of moneys due to them, they were not in a position to pay the new tax punctually. The king thereupon ordered his officers to compel the debtors of the Jews to pay their debts ("Ordonnances," i. 545). Thenceforth, although the Jews found themselves unable to meet any further exactions, the demands of Philip the Fair became more imperious. Toward the middle of 1306 the treasury was nearly empty, and the king, as he was about to do the following year in the case of the Templars, decided to kill the goose that laid the golden egg. He condemned the Jews to banishment, and took forcible possession of their property, real and personal (Bouquet, xxi. 27; "Continuation de Nangis," p. 355). Their houses, lands, and movable goods were sold at auction; and for the king were reserved any treasures found buried in the dwellings that had belonged to the Jews. That Philip the Fair intended merely to fill the gap in his treasury, and was not at all concerned about the well-being of his subjects, is shown by the fact that he put himself in the place of the Jewish moneylenders and exacted from their Christian debtors the payment of their debts, which they themselves had to declare. Furthermore, three months before the sale of the property of the Jews the king took measures to insure that this event should be coincident with the prohibition of clipped money, in order that those who purchased the goods should have to pay in undebased coin. Finally, fearing that the Jews might have hidden some of their treasures, he declared that one-fifth of any amount found should be paid to the discoverer (Vuitry, "Etudes," new series, i. 91 *et seq.*; Simeon Luce, "Catalogue des Documents du Trésor des Chartres Relatifs aux Juifs sous le Regne de Philippe le Bel").

Exile of 1306.

It was on July 22, the day after the Ninth of Ab, that the Jews were arrested. In prison they received notice that they had been sentenced to exile; that, abandoning their goods and debts, and taking only the clothes which they had on their backs and the sum of 12 sous tournois each, they would have to quit the kingdom within one month ("R. E. J." ii. 15 *et seq.*; Saige, pp. 27, 28, 87 *et seq.*). Speaking of this exile, a French historian has said: "The expulsion of 1306 was, taking all things into account, practically the revocation of the Edict of Nantes issued by the Louis XIV. of the Middle Ages [*i.e.*, Philip the Fair]. In striking at the Jews Philip the Fair at the same time dried up one of the most fruitful sources of the financial, commercial, and industrial prosperity of his kingdom" (Simeon Luce in "R. E. J." ii. 16).



Conference of Franco-Jewish Rabbis, Thirteenth Century.
(After a miniature in the Bibliothèque Nationale, Paris.)

Although the history of the Jews of France in a way began its course again a short time afterward, it may be said that in reality it ceased at this date. It was specially sad for them that during the preceding century the kingdom of France had increased considerably in extent. Outside the Isle of France, it now comprised Champagne, the Vermandois, Normandy, Perche, Maine, Anjou, Touraine, Poitou, the Marche, Lyonnais, Auvergne, and Languedoc, reaching from the Rhône to the Pyrenees—Provence, as the Jews called it. The exiles could not take refuge anywhere except in Lorraine, the county of Burgundy, Savoy, Dauphiné, Roussillon, and a part of Provence. It is not possible to estimate the number of fugitives; that given by Grätz, 100,000 ("Gesch." 3d ed., vii. 245), has no foundation in fact.

Thirteenth Century. Southern France: The fate of the Jews of the south in the course of the thirteenth century by no means resembled their previous experience. It was a period of reaction. The coalition of the pope, the Church, and the enemies of the counts of Toulouse now forced the counts, who with their vassals had a century before protected the Jews so efficaciously, to yield to the intolerance of the times. The crusade against the Albigenses had partly for its cause the fact that Raymond VI. and his vassals had confided certain public offices to the Jews; and this wrong was one of those for which the Count of Toulouse and a dozen of his principal vassals made the amende honorable at the Council of St. Gilles (1209), by swearing not to entrust public or private offices to Jews in the future

(Vaissette, iii. 162–163). In his territory they were not allowed even to lease the tolls, imposts, or other revenues. At Narbonne, however, they continued to act as brokers down to 1306. Their condition became worse when in 1229 Raymond VII. had to give up to Blanche of Castile, mother of St. Louis, the portion of Lower Languedoc extending from Carcassonne to Beaucaire; and still more precarious when, after Raymond's death in 1249, his daughter Jeanne, wife of Alphonse of Poitiers, the brother of St. Louis, inherited the remainder of his dominions.

Policy of Alphonse of Poitiers.

Alphonse of Poitiers' policy toward the Jews was similar to that of his brother, with this difference, however, says Boutaric, his biographer (p. 318), that, while St. Louis undertook to drive usury out of his kingdom, Alphonse desired to enrich himself. As Count of Poitou, in 1249 he granted to the inhabitants of La Rochelle the privilege of no longer harboring Jews in their city. He even agreed to expel the Jews from Poitiers, St. Jean d'Angely, Niort, Saintes, and St. Maxant, on condition that those cities indemnify him for his loss. But the Jews apparently offered larger sums in order to be allowed to remain; in a record dated 1250 it is in fact noted that the Jews of Poitou had made a partial payment of 1,000 livres. Alphonse, like his brother, ordered the Jews to wear the circular badge (1269), but he subsequently sold them exemption from this law (Archives Nationales, J. J. 24d, fol. 730). Being in need of money, in 1268 he again followed his brother's example and arrested all the Jews in his domains, sequestrating their property. He desired to do the same in the territory of the barons, but the latter protested, since they had received large sums from the Jews in return for permission to dwell there; and Alphonse was obliged to yield (Boutaric, pp. 320, 321). The arrest of the Jews proved so obnoxious that the count consented to liberate the poor, the sick, the children under fourteen years, and all those that agreed to declare the amount of their possessions. The seneschals received orders to promise the prisoners liberty in return for a ransom, and to bid them send two of the wealthiest among them to the count, who would confer with them directly. A number of the Jews who had made false statements in regard to their property were kept close prisoners. Others, weary of confinement, turned informers. One of these reported to the seneschal of Poitou that certain treasures had been hidden in cellars. This report proved true, and the success of the search soon reached the ears of the other seneschals. One of the informers incurred the enmity of Jews and Christians to such an extent that he did not dare remain in the territory of the count. The Jews were finally liberated on payment of large sums, which those under each seneschal's jurisdiction undertook to pay jointly, as follows: those of Poitou 8,000 livres, of Saintonge 6,000 livres, of Rouergue 1,000 livres, and of Auvergne 2,000 livres. Those of Toulouse promised to pay 3,500 livres, Alphonse having estimated their possessions at only 1,300 livres, but he now ordered them to pay 5,000 livres (*ib.*). This spoliation was not as profitable as the count had expected, for his agents filled their own pockets with the sums extorted from the Jews. In 1270 Alphonse again harassed the Jews, commanding them to return to their debtors all sums which they had received as usury. He himself derived the benefit of this procedure, for the pope had authorized him to devote such sums to defraying in part the expenses of the Crusade. On the death of Alphonse of Poitiers his estates came into possession of Philip the Bold, and the Jews of these provinces now shared the fate of their coreligionists of the north, whose history has been recounted above. (On the relation of the Jews to the local seigniors, see Saige, *passim*.)

Relations with the Inquisition.

The Inquisition, which had been instituted in order to suppress the heresy of the Albigenses, finally occupied itself with the Jews of southern France also. The popes complained that not only were baptized Jews returning to their former faith, but that Christians also were being converted to Judaism. In March, 1273, Gregory X. formulated the following rules: Relapsed Jews, as well as Christians who abjured their faith in favor of "the Jewish superstition," were to be treated by the Inquisitors as heretics. The instigators of such apostasies, as well as those who received or defended the guilty ones, were to be punished in the same way as the delinquents. It was in accordance with these rules that on Jan. 4, 1278, the Jews of Toulouse, who had buried a Christian convert in their cemetery, were brought before the Inquisition for trial, and their rabbi, Isaac Males, was condemned to the stake (Vaissette, original ed., iv., documents, col. 5). Philip the Fair, as mentioned above, at first ordered his seneschals not to imprison any Jews at the instance of the Inquisitors, but in 1299 he rescinded this order (see Israel Lévi, "Les Juifs et l'Inquisition dans la France Méridionale," 1891; Lea, "History of the Inquisition," ii. 96).

The Schools of Paris and Elsewhere.

When the edict of exile was suddenly pronounced in 1306, the intellectual decadence of the Jews of northern France was already far advanced. But down to the time of the burning of the Talmud, that is, down to the first half of the thirteenth century, the rabbinical schools flourished and preserved their prestige. Talmudic scholars continued the work of the tosafists; the school of Sir Leon (d. 1224) at Paris attracted many disciples, and flourished still more under his successor, Jehiel b. Joseph, alias Sir Vives of Meaux. Among the 300 pupils that the latter gathered around him were Isaac of Corbeil, his son-in-law; Perez b. Elijah, of the same city; Judah ha-Kohen, probably of Mayence; and the celebrated Meïr of Rothenberg. On account of Jehiel's eminence he was chosen to direct the disputation relating to the Talmud, referred to above. After the condemnation of that work, however, the school of Paris declined. Jehiel even sent an emissary to Palestine to collect subsidies for his academy; he finally left France (*c.* 1260) to end his days in the Holy Land. A part of his tosafot, consultations, and decisions have been preserved. Jehiel's school ceased to exist after his departure. Samuel of Evreux, a distinguished tosafist, and a contemporary of Jehiel, taught at Château-Thierry. His

elder brother, Moses of Evreux, was the author of the "Tosafot of Evreux." Samuel b. Solomon of Falaise, alias Sir Morel, who took part in the disputation of Paris, also conducted a famous school; he was considered one of the most learned tosafists. Judah b. David, Sir Morel's companion in the disputation, taught at Melun. Moses of Coucy, the fourth of the disputants, was distinguished for his oratorical ability. In 1235–36 he traveled through France and Spain, preaching the observance of the religious ordinances, and the practise of justice and charity toward all, Jews and non-Jews alike; and in 1250 he edited a collection of Jewish laws ("Sefer Miẓwot Gadol," or "SeMaG") which had great authority. His tosafot and his commentaries to the Pentateuch added to his fame. Isaac of Corbeil, Jehiel's son-in-law, who presided over the school of Corbeil, published in 1277 an abridged edition of the "Semag" under the title "'Ammude ha-Golah" or "Sefer Miẓwot Ḳaṭan" ("SeMaḲ"), a sort of Talmudic breviary, containing a miscellany of religious and moral reflections and some fables. Perez b. Elijah of Corbeil, who also taught in that city, was the last tosafist; a voluminous writer, he composed, in addition to some well-known tosafot, Talmudic commentaries and glosses, and several ritual collections. His contemporary, Isaac b. Isaac of Chinon, was called "head of the Talmudic schools of France." Previous to Perez b. Elijah, Nathaniel the Holy had directed the rabbinic school of Chinon (after 1224). Eliezer of Touques, likewise one of the last tosafists, collected extracts from the tosafot of Sens, of Evreux, and of other schools, and added to them some of his own. The unsettled character of the times induced the rabbis to be content with merely collecting the work of their predecessors, so that the Talmudists of the second half of the thirteenth century, in contrast to those of the preceding century, were chiefly compilers. Nor can the Bible commentaries of this century compare with those of the preceding century; the tosafot to the Torah, Aaron b. Joseph's "Gan" (1250), Isaac ha-Levi b. Judah's "Pa'aneaḥ Raza," and Hezekiah b. Manoah's "Ḥazḳunni" (1240) are interesting compilations, in which are contained many ingenious interpretations, but in which the Haggadah, and to a greater degree gematria, occupy a too prominent place. Berechiah ha-Naḳdan stands out from among these men of somewhat limited views; he was interested in theologic questions, translated a lapidary and Adelard of Bath's "Quæstiones Naturales," and composed a charming collection of fables in rimed prose intermixed with verse (I. Lévi, in "R. E. J." xlvi. 285).

Jewish Learning in Southern France.

The Jews of the south of France were meanwhile studying not only the Talmud, the Bible, and questions pertaining to the ritual, but also the humanities; and they even cultivated poetry. Science was introduced in the form of translations from the Arabic. Samuel ibn Tibbon (flourished 1199–1213) translated into Hebrew Maimonides' "Guide" and several of his smaller writings, Aristotle's "Meteorology," a philosophical treatise of Averroes, and various medical works; and also wrote original theses on these subjects. His son-in-law, Jacob b. Abba Mari b. Anatoli, who stood in friendly relation with Michael Scot, may be said, with the latter, to have introduced Averroism into the West. He was also the first to apply the rationalism of Maimonides to the interpretation of the Bible. His "Malmad ha-Talmidim" is a collection of philosophic-allegorical homilies on the Bible and the Haggadah. An advanced thinker, he attacked Christianity and Mohammedanism, as well as in general the belief in miracles, the monastic life, and the ignorance and hypocrisy of his time. In his explanations of the text of the Scriptures he does not hesitate to have recourse to the erudition of "Michael, the great scholar."

Moses b. Samuel ibn Tibbon surpassed his predecessors in the extent of his labors. He made accessible to the Jews almost all the commentaries of Averroes; the "Principles" of Alfarabi; Euclid; the "Almagest"; Avicenna's "Canons"; the "Aphorisms" of Hippocrates, of Ḥunain b. Isaac, and of Razes; the medical works of Maimonides, as well as all the latter's other works that had not yet been translated. Samuel's grandson, Jacob b. Machir ibn Tibbon, called "Profatius," equaled Moses in productivity as a translator, and in addition wrote scientific works. Solomon b. Moses of Melgueil, the translator of Avicenna, belongs to the same group of scholars.

Secular poetry, escaping from the fetters of religion, flourished in this liberal atmosphere. Isaac Gorni spread his compositions all over southern France, and gave a vivid picture of Jewish life. The more prolific Abraham b. Isaac Bedersi composed liturgical poems, elegies, satires, and didactic verse, in which he often displays originality of expression and delicacy of feeling. His master, Joseph b. Hanan Ezobi, devoted himself to religious poetry, while Isaiah, son of Samuel, and Phinehas ha-Levi b. Yehosifya cultivated secular poetry as well. Jedaiah Penini, son of Abraham Bedersi (alias En Bonet b. Abraham or Bonet Profiat), who belongs to the thirteenth and fourteenth centuries, was a man of science and a philosopher, as well as the most remarkable poet produced in French Judaism. His "Beḥinat 'Olam," which has been translated a number of times, is a world-poem of sadness and melancholy.

Polemics and Apologetics.

Controversy was introduced into Provence by the Ḳimḥis. Although northern France had the work of Joseph the Zealot, this is merely a collection of brief discussions entered into in connection with certain verses of the Bible. Southern France, on the other hand, produced regular treatises in defense of Judaism against the attacks of Christianity. Joseph Ḳimḥi, who wrote the "Sefer ha-Berit" (Book of the Covenant), was followed by Meïr b. Simon of Narbonne with his "Milḥemet Miẓwah" (Holy War), which contains much information concerning the unfortunate condition of the Jews of that time. Mordecai b. Yehosifya, in his "Maḥaziḳ Emunah," defends Judaism against the attacks of Paul Christian. But the Ḳimḥis, curiously enough, could not introduce into Provence the severe and grammatical exegesis which they had

brought from Spain; for the advanced exegetes, like Jacob Anatoli, Nissim of Marseilles, and Levi of Villefranche, mentioned above, went further than the Ḳimḥis in their free treatment of the text, and, dominated by a boundless admiration for Maimonides, could permit no other than the allegorical interpretation of the Scriptures. The Talmud continued to be assiduously studied by numbers of scholars; but they were not leaders in the intellectual world, and even their principal works contain nothing particularly striking. Nevertheless, the following may be mentioned: Meshullam b. Moses of Béziers, with his "Sefer ha-Shelomoh"; Abraham ha-Levi b. Joseph b. Benvenisti, with his novellæ and his "Bedeḳ ha-Bayit," a criticism of Solomon b. Adret's "Torat ha-Bayit"; and Menahem b. Solomon Meïri (Don Vidal Solomon), with his commentaries on the Talmud and his "Bet ha-Neḥirah," an introduction to the commentary of Abot, and interesting for the information it gives concerning the rabbis of the time. The novellæ ("ḥiddushim"), which were characteristic of Provence, no longer showed any originality. There was a fundamental difference between the new learning originating with Maimonides and the traditional learning centering in the Talmud; and this difference, as was to be expected, soon led to controversies, which form one of the most interesting chapters in the history of the Jews, not only of southern France, but of entire Judaism.

Maimonists and Anti-Maimonists.

The publication of Maimonides' Mishneh Torah had aroused the indignation of Abraham ibn Daud, as well as of the Spanish Talmudist Meïr b. Todros Abulafia ha-Levi, nasi of Toledo. The latter wrote his impressions to one of Maimonides' correspondents, Jonathan Cohen of Lunel: he was especially scandalized by the way in which Maimonides had juggled with the doctrine of the Resurrection; it had disturbed the Jews, and was leading them to an absolute denial of the future life. Aaron b. Meshullam of Lunel came to the defense of Maimonides, answering the Spanish scholar with much warmth. As Meïr felt that his views were not finding favor at home, he turned to the rabbis of northern France, and made Solomon of Dreux, Simson of Sens, Simson of Corbeil, David of Château-Thierry, Abraham of Touques, Eliezer b. Aaron of Bourgogne, and others, judges in the dispute. They sided with Meïr, but their discussions were confined to an exchange of letters, the dates of which are not known, though they must have been written at least before 1210, since Aaron b. Meshullam died in that year. But after Samuel ibn Tibbon translated Maimonides' "Guide of the Perplexed," the popularity of the works of the Jewish philosopher thoroughly aroused the orthodox rabbis of southern France, who regarded the dissemination of Maimonides' rationalism as dangerous to Judaism. The Talmudist Solomon b. Abraham of Montpellier, assisted by two of his pupils, David b. Saul and Jonah of Girona, threatened to excommunicate any one who should read Maimonides' works. This was the first time within Judaism that such a step had been taken; the Rabbis were doubtless influenced by the example of the Inquisition, which then held sway in that region. The Jews of southern France, who had been taught from infancy to admire Maimonides, considered it presumptuous to treat him as a heretic, and no rabbi of Provence was found willing to join Solomon of Montpellier in uttering the ban. The latter, at the instance of Meïr Abulafia, appealed for cooperation to the French rabbis, who were known for their unswervable attachment to tradition; he sent Judah of Girona to them, and he obtained their promise to support the sentence of excommunication. Thereupon all the Jews of Provence rose in protest; the rabbis of Lunel, Béziers, and Narbonne, and following them those of all the communities of that region, answered in kind, excommunicating Solomon and his two disciples. The quarrel spread across the Pyrenees, and the communities of Aragon and Castile sided with Maimonides (1232). The community of Toledo alone did not respond; this alarmed Solomon's opponents, and one of them, the famous David Ḳimḥi, who had at first been suspected of rationalism by the rabbis of northern France, but had succeeded in convincing them of his true position, set out for Spain in order to bring the community of Toledo into line. But before reaching that city he learned that its foremost scholar, Judah b. Alfakar, with whom he had previously corresponded, had published a letter in which he sided against Maimonides, declaring that the doctrine of Judaism had nothing in common with the philosophy of Aristotle. This letter had already provoked many replies. But David Ḳimḥi received at the same time the astounding news that Solomon b. Abraham, abandoned by almost all his followers, had, seemingly in a fit of madness, denounced to the Inquisition in Montpellier the "Sefer Madda'" (the introduction to the Mishneh Torah) and the "Guide" of Maimonides. The whole city of Montpellier, where the partizans and adversaries of Solomon had carried their quarrels even into the streets, was filled with consternation when the books of the famous Jewish theologian were solemnly burned (1234 or 1235). The adversaries of Maimonides were confounded by their triumph. Some, including Jonah, repented of their action in public; the vanquished heaped scorn upon the victors. It even seems that Jaime, seignior of Montpellier, who was greatly attached to two partizans of Maimonides, caused to be arrested and condemned for calumny those who had attacked Maimonides and his followers. The excitement in southern France was not allayed for a long time, and later, when the contest took place between the liberal and orthodox parties, although it too was based on Maimonides' teachings, no one dared mention his name or attack his opinions. The quarrel was in fact renewed in 1303 by Abba Mari b. Moses b. Joseph (also known as "En Astruc") of Lunel, assisted by Simon b. Joseph ("En Duran") of Lunel. In several letters addressed to Solomon b. Adret of Barcelona, the foremost rabbinical authority of the time, Abba Mari pointed out the errors of the philosophical school, which interpreted as allegories not only passages of the Talmud, but also Bible stories. Thus Abraham and Sarah were taken to signify the union of matter and form; the twelve tribes to mean the twelve planets; etc. Furthermore, the writer complained that instead of praying and

reciting the Psalms, the people read Aristotle and Plato; and that on Sabbaths and festivals the young people studied works devoted to dangerous interpretations. He declared that steps must be taken to check this peril, and that the books dangerous to the faith must be excommunicated.

Dispute About Philosophical Studies.

Although Solomon b. Adret shared the views of his correspondent, he did not dare to take the initiative in so grave a matter, but desired to wait until the communities interested in the question should force the action upon him. Abba Mari then took the matter into his own hands, and wrote successively to most of the rabbis of Provence. Levi of Villefranche, a scholar who was visiting Samuel Sulami, was charged with having interpreted the Scriptures allegorically, and his host no longer dared to keep him in his house. Soon the communities were again divided. A letter from Barcelona, signed by Solomon b. Adret and fourteen other rabbis, and threatening with excommunication any one who should engage in philosophic studies before the age of thirty, was brought to Montpellier. This letter was not published immediately, as the community desired to examine it first. After long discussions Abba Mari, in spite of the opposition of the famous Jacob b. Machir, one of the Ibn Tibbons, finally decided to read it in the synagogue of Montpellier. But because many of the faithful rallied to the support of Jacob b. Machir, Abba Mari was forced to abandon the matter. The quarrel between the orthodox and the liberal factions became ever more bitter, and both sides wrote to the rabbis of Barcelona explaining the state of affairs. Solomon b. Adret, frightened by the attitude of his adversaries, did not dare to take part openly against them, but asked Abba Mari to reconsider the matter, being himself disposed to rest satisfied with the open repentance of Levi of Villefranche, the only guilty one. Solomon took this stand in consequence of the increasing number of protests that reached him. That sent by Jacob b. Machir, imperious in tone, defended philosophic studies and taxed Solomon b. Adret with duplicity. Adret was hard pressed by Abba Mari and the other rabbis, and finally, in the month of Ab, 1305, the interdiction against studying "Greek" books before the age of twenty-five, and against interpreting the Scriptures allegorically, was pronounced in the synagogue of Barcelona. The liberal party of Montpellier, headed by Solomon of Lunel, instead of confessing itself defeated, applied to the governor of Montpellier, without whose authorization the sentence of excommunication could not be uttered against the Jews of the city; and Solomon then pronounced an anathema upon all who should forbid their children the study of science. The quarrel continued, and rabbis from all parts of Provence took sides for or against the sentence of excommunication pronounced by Solomon b. Adret. The poet Jedaiah Penini wrote a strong letter to the rabbi of Barcelona, entreating him for the honor of Judaism and in the interest of science to revoke his sentence of excommunication. At this point the edict of Philip the Fair put a sad end to the quarrel.

Return of the Jews to France, 1315: Nine years had hardly passed since the expulsion of 1306 when Louis X. (1314–16) recalled the Jews. In an edict dated July 28, 1315, he permitted them to return for a period of twelve years, authorizing them to establish themselves in the cities in which they had lived before their banishment. He issued this edict in answer to the demands of the people. Geoffroy of Paris, the popular poet of the time, says in fact that the Jews were gentle in comparison with the Christians who had taken their place, and who had flayed their debtors alive; if the Jews had remained, the country would have been happier; for there were no longer any money-lenders at all (Bouquet, xxii. 118). The king probably had the interests of his treasury also in view. The profits of the former confiscations had gone into the treasury, and by recalling the Jews for only twelve years he would have an opportunity for ransoming them at the end of this period. It appears that they gave the sum of 122,500 livres for the privilege of returning. It is also probable, as Vuitry states, that a large number of the debts owing to the Jews had not been recovered, and that the holders of the notes had preserved them; the decree of return specified that two-thirds of the old debts recovered by the Jews should go into the treasury. The conditions under which they were allowed to settle in the land are set forth in a number of articles; some of the guaranties which were accorded the Jews had probably been demanded by them and been paid for. They were to live by the work of their hands or to sell merchandise of a good quality; they were to wear the circular badge, and not discuss religion with laymen. They were not to be molested, either with regard to the chattels they had carried away at the time of their banishment, or with regard to the loans which they had made since then, or in general with regard to anything which had happened in the past. Their synagogues and their cemeteries were to be restored to them on condition that they would refund their value; or, if these could not be restored, the king would give them the necessary sites at a reasonable price. The books of the Law that had not yet been returned to them were also to be restored, with the exception of the Talmud. After the period of twelve years granted to them the king might not expel the Jews again without giving them a year's time in which to dispose of their property and carry away their goods. They were not to lend on usury, and no one was to be forced by the king or his officers to repay to them usurious loans. If they engaged in pawnbroking, they were not to take more than two deniers in the pound a week; they were to lend only on pledges. Two men with the title "auditors of the Jews" were entrusted with the execution of this ordinance, and were to take cognizance of all claims that might arise in connection with goods belonging to the Jews which had been sold before the expulsion for less than half of what was regarded as a fair price. The king finally declared that he took the Jews under his special protection, and that he desired to have their persons and property protected from all violence, injury, and oppression ("Ordonnances," i. 604; Brussel, p. 617; Vuitry, *l.c.* p. 98).

Philip V. the Tall (1316–22) at first continued the policy of Louis X. with regard to the Jews. By his decrees of April, 1317, and Feb., 1319, he granted

them certain privileges, and somewhat ameliorated their social status; but the financial consideration that induced these measures is apparent. The king modified the sentences that might be pronounced upon them; exacted the wearing of the circular badge only in the cities; placed the Jews under the jurisdiction of their own bailiffs; determined and regulated the financial operations in which they might engage; and even authorized them to own houses ("Ordonnances," i. 646, 682; Vuitry, *l.c.* 101). But while he decreed that they should no longer be subject to mortmain, and that their estates were to descend to their families, still the same general rule obtained as in the time of St. Louis, that the property of the Jews belonged to the seignior within whose domains they dwelt; and the king expressly declared that they were to remain subject to tallage and to pay taxes in proportion to the amount of their fortunes. While they were enjoined to sell only merchandise of a good quality, they were to indemnify the treasury, and not the deceived buyer, in cases of fraud.

Under Philip V.

Unfortunately for the Jews, this was a period of physical and intellectual misery. In 1320 appeared the Pastoureaux, a band of peasants and herdsmen, mostly less than twenty years of age, eager for battle, adventure, and pillage. They were led by unscrupulous men—a priest driven from his church on account of his misdeeds, and an unfrocked monk—and they were reenforced by hordes of miscreants and bandits. To the number of 40,000 they overran Languedoc, attacking principally the Jews, whom no one dared to protect. Five hundred of the latter sought refuge in the fortress of Verdun-sur-Garonne, and defended themselves valiantly; but, seeing their efforts useless, they decided that the eldest among them should put the others to death; he was aided in this work of martyrdom by a vigorous youth, and soon all had perished except the children, who had not been given to the sword; these were baptized. The governor of Toulouse, attempting to check this band of brigands, imprisoned some in that city, but they were liberated by the mob, who then turned to massacre the Jews. The Pastoureaux were everywhere supported by the mob, and sometimes by the citizens, who either encouraged the massacre or were afraid to protect the Jews. At Alby the consuls tried to stop the horde at the city gates, but the Pastoureaux forced their way in, shouting that they had come to kill the Jews; the populace received them as friends and brothers, "for the love of Christ, against the enemies of the faith."

At Lezat the consuls made common cause with them. Even the officials sometimes shared the popular fanaticism. The progress of the Pastoureaux was arrested only in the district of the seneschal of Carcassonne (P. Lehugeur, "Hist. de Philippe le Long," 1897; Grätz, "Geschichte," 3d ed., pp. 255 *et seq.*). Charles IV. subsequently appointed commissioners to inquire into the affair in the districts of the seneschals of Toulouse, Périgord, and Carcassonne; but his action was taken only because the royal treasury had suffered as a result of the riots; the cities in which the troubles had occurred were sentenced to pay a fine. Various instances show both the weakness of the authorities and the prevalent hostility toward the Jews. At Château-Thierry in 1318 the synagogue was entered, the tabernacle broken open, and the scrolls of the Law carried off ("Actes du Parlement de Paris," v. 230). In 1319 certain impostors traversed the country, and, pretending to be the king's agents, searched the houses of the Jews, and despoiled them in the name of the law. At Troyes the Jews were accused of having entered the churches, and also of having shouted so loudly in their synagogues as to disturb divine services in the churches; Philip the Tall thereupon (Feb. 26, 1320) directed the bailiff of Troyes to punish the Jews so severely that in future they would cease committing such outrages ("Bibliothèque de l'Ecole de Chartres," 1849, p. 414). On July 12, 1317, the king had ordered the arrest of several persons on suspicion of having killed a child, and two Jews of Chinon had been hanged on this charge. In Puy the Jews were similarly accused (Mandet, "Hist. du Velay," iv. 117). According to one historian, "the people of that time were seized with a delirium that begat epidemics of frenzy. The public mind was disturbed by imaginary terrors; common gossip treated of nothing but compacts, witchcraft, and magic" (Fleury, "Hist. Eccl." p. 92). In their excitement the people of Guienne imagined that the lepers had formed a conspiracy to destroy their countrymen, either by leaving the infirmaries in order to infect the healthy, or by poisoning the wells and fountains. Thereupon they seized some of these unfortunates, and without any form of trial burned them at the stake. The king, too weak to quell this uprising, sought to profit by it. He instituted an investigation; the lepers were arrested, and those that yielded to torture and confessed were condemned to the stake, and their property was confiscated. All this happened before June 21. The Bishop of Alby then took it on himself to follow the king's example, but was forced to desist and mulcted in a fine. The Jews, who, like the lepers, lived apart from the rest of the community, and who, like them, were objects of public dread, soon suffered from the same charges as had been brought against the lepers. Some of the latter, on examination, alleged that the Jews, who themselves did not dare to poison the rivers, had induced them to commit this crime. According to a later version of the story, it was a Jew who had thrown poison into the river at Tours. When the king was informed of this alleged crime, he condemned the Jews to pay a fine of 150,000 livres; their goods were confiscated, and the wealthiest among them were imprisoned as security for the fine. Then letters were produced, alleged to have been written by the kings of Tunis and Granada to the Jews, and offering them commissions to poison the Christians. These forgeries, however, were dated July 2, *i.e.*, after sentence had been pronounced. According to one chronicle, some of the Jews were condemned to the stake, but the official documents disagree with this statement. While the people had attacked the lepers before the latter's condemnation, they attacked the Jews in

Under Charles IV.

Conditions at Tours.

some places only after sentence had been pronounced. On Aug. 27 one hundred and sixty Jews were thrown into a burning furnace at Chinon, among them being the famous rabbi Eliezer b. Joseph of Chinon (Estorhi Farḥi, "Kaftor u-Ferah," written in 1322; on the date see D. Kaufmann in "R. E. J." xxix. 298). Doubtless other massacres took place in Languedoc, and records of them have been preserved in Kalonymus b. Kalonymus' "Eben Bohan" (written in 1322). At Vitry le Brûlé forty Jews, imprisoned and facing death, commissioned two of their number to kill the remainder. In many places, as at Tours, Chaumont, and Vitry, the Jews, like the lepers, were put on the stand (a fact of which Kalonymus bitterly complains), and were asked to denounce their accomplices (Duplès-Agier, "Rev. de l'Ecole de Chartres," 1857, p. 267; Lehugeur, *l.c.*; L. Lazard, in "R. E. J." xvii. 210; Vaissette, x. 616; "Continuation de Guillaume de Nangis," Bouquet, xx. 628–629; "Continuatio Chronici Gerardi de Fracheto," xxi. 56; Jean de Saint Victor, xxi. 674; "Chron. de Saint Louis," xx. 704; "Chron. Anonyme," xxi. 140, 152; Mandet, "Hist. du Velay," iv. 117; Labbe, "Collectio Concil." xxv. 568; Brussel, p. 607; "Actes du Parlement, Mandement du 8 Février, 1322"). The entire chronology of these occurrences is obscure.

Charles IV., who succeeded Philip the Tall in 1322, undertook to collect the fine which the Jews had been sentenced to pay. While discussing this affair with the seneschals of Languedoc on Feb. 20, 1322, he foresaw that certain of the Jews would desire to leave the country (Vaissette, x. 616). In fact, such an exodus took place; but, according to Brussel, it was not a voluntary one. They were expelled on June 24, 1322. In 1324 the property of Jews was confiscated, either as a consequence of their expulsion, or as indemnity for the non-payment of the fine (Brussel, p. 623). However this may be, there were no Jews in France between 1322 and 1359 (see Isidor Loeb in "Grätz Jubelschrift," pp. 51 *et seq.*).

Under John the Good.

After the disaster at Poitiers (1356) and the captivity of John the Good, France was in dire straits. The ransom of the king had been fixed at 3,000,000 écus in gold. Soldiers plundered everywhere; there were fields that had not been tilled for three years; the silver mark was worth 102 livres. It was then that the regent, Duke Charles of Normandy, negotiated with Manassier of Vesoul for the recall of the Jews to France; they were to remain for a period of twenty years, were to pay an entrance fee of 14 florins gold for each family, and of one florin and two tournois for each child or servant, and a yearly tax of seven florins for each family, and of one florin for each child or servant ("Ordonnances," iii. 468, 469). The charter granted to them by the dauphin Charles, and ratified March 1, 1350, by King John ("Arch. Nat." J J 89, folios 316–320), was very liberal, the Jews taking precaution to guard against the ills and injustices from which they had suffered on previous occasions. Even two guardians of these privileges were appointed for them, Robert of Outreloue for Languedoc, and the Count of Etampes for the kingdom of France proper ("Ordonnances," iii. 351, 352, 471, 472). As the Jews who returned to France at that time were chiefly engaged in money-lending, the privileges accorded to them bear chiefly on that calling; they were permitted to lend on interest at the rate of four deniers in the pound per week. That the Jews were few in number is clearly shown from the fact that between 1359 and 1394 there is scarcely any trace of Jewish intellectual activity. While John was in the south of France (Dec. 27, 1362) he permitted the Jews to practise medicine and surgery, provided that they had passed an examination before Christian instructors ("Arch. Nat." J J 93, 163; comp. "Ordonnances," iii. 603). But with his well-known duplicity he declared, in Oct., 1363, that the privileges had been abused which had been granted, and were therefore annulled. Further, he compelled them to wear the circular badge again, and in defiance of the charter of 1360 made them subject to the common courts in whatever district they were living ("Ordonnances," iii. 603, 641).

Under Charles V.

Charles V. (1364–80), however, kept the contract that he had made as regent. The Count of Etampes interposed frequently in the Parliament of Paris and in other civil and ecclesiastical tribunals, on behalf of the Jews, to secure their freedom from the general jurisdiction.

Meanwhile the Jews of Paris lived quietly in the district of St. Antoine, near the dwelling of Hugues Aubriot, the grand provost of Paris, who protected them. Aubriot's enemies subsequently explained this good will by saying that he was fond of the beautiful Jewesses. He was also reproached with having restored to the Jews children that had been baptized ("Chronique des Quatre Premiers Valois," p. 295). Thefts committed against the Jews were promptly and severely punished, even when the offenders belonged to the nobility (Simeon Luce, "Rev. Hist." vii. 362 *et seq.*). But this state of affairs excited jealousy, and the creditors of the Jews, among whom were some of the noblemen of the highest rank, again endeavored to have them expelled from the kingdom. Thus toward the end of 1367 or the beginning of 1368 King Charles issued a decree of banishment, but revoked it before it had been put into effect ("Mandements de Charles V." ed. Delisle, No. 430, pp. 216, 217). In Languedoc, where the distress was very great and the rate of interest necessarily higher than in other parts of the country, the Jews were more bitterly hated. Attempts were made to compel them to attend service in the churches. On the complaint of Deys (or Denis) Quinon, attorney-general for the Jews, Charles V. put an end to this grievance on March 22, 1369, because, unless this was done, "the Jews might suffer great bodily harm" ("Ordonnances," v. 167, 168).

In 1370, when the king increased the general taxes, he solemnly confirmed the privileges that he had granted to the Jews, demanding of them only 1,500 francs. In 1372 he restored to them certain manuscripts which had been confiscated. But at the same time he did not lose sight of his own interests, and when he was in need of money, in 1378, he made an agreement with the Jews in accordance with which, in return for being exempted from all other imposts, they were to pay him 20,000 francs in gold, in four instalments, and 200 francs a week ("Ordon-

nances," vi. 339). In 1379 he granted them an important concession in connection with the fairs of Champagne and Brie. On visiting the fairs the Jews were accustomed to take mortgages on the property of their creditors. But they could foreclose these mortgages only when solvent Christians acted as sureties, and they complained that, since they could not in general find any one to act as surety, they always lost their claims. The king therefore decreed that Jews might in future be accepted as sureties ("Ordonnances," vi. 439).

With the death of Charles V. in 1380, evil days set in for this band of money-lenders, whose sojourn in France was dependent on the interests of the treasury and the enforcement of authority. On the accession of the new king, Charles VI., the people of Paris, impatient to have the special taxes levied by Charles V. revoked, marched to the palace to make their request. This being granted, they retired; whereupon certain of the nobles, who had joined the crowd, proposed that the expulsion of the Jews be demanded. Only a short time before, the right of remaining had been granted to the Jews on the payment of certain sums. As the chancellor did not send an immediate reply, the people gathered in the streets and seized the records and the money in the public treasury. Then they rushed into a district where the Jews occupied forty houses, pillaging and plundering on all sides. In this work they were encouraged by the nobles and the bourgeoisie, who had joined the mob in order that they might seize such of their notes as were held by the Jews. Pillaging was followed by slaughter; all the Jews met were killed; such as escaped fled to the Châtelet, where they asked to be confined with the prisoners and thus be saved from the fury of the mob. The king did not yield to the people; the next day he ordered the Jews to return to their homes, and commanded, under severe penalties, the restoration of their property. But very few obeyed the royal order ("Chron. des Réligieux de St. Denis"; "Chron. de Charles VI." i. 53–57, in "Documents Inédits de l'Hist. de France"). In consequence of this riot several Jews left Paris, while others accepted baptism (Félibien-Lobineau, "Hist. de Paris," iii.).

Under Charles VI.

In 1382 there was another disturbance, known as the "Riot of the Maillotins." This was caused also by the exigencies of the treasury, a new tax having been levied at the rate of a twelfth of the value of all commodities. The rioters, armed with mallets, fell upon the appraisers, and then attacked the houses of the Jews, which they pillaged for four days ("Arch. Nat." J J 122, fol. 55; 136, fol. 114). The mob looked upon the Jews as accomplices of the treasury; indeed, as a matter of fact, a large part of the usury which they exacted went into the public coffers. This riot was followed by others outside Paris. When the news came to Mantes the inhabitants of that town, incited by the soldiers, who assured them of the king's consent, pillaged the Jewish quarter ("Arch. Nat." J J 122, fol. 96; Douet d'Arcq, "Procès Inédites Relative au Règne de Charles VI." i. 45, 56). This time again the king supported the Jews. In a letter of Charles VI. dated 1387 ("Ordonnances," vii. 169) the Jews of Paris and of several other parts of the kingdom are said to have represented themselves as having been despoiled of their property and of the pledges which they had been unable to restore to their owners ("Ordonnances," vi. 563); adding that they had become so poor and reduced in numbers that unless their coreligionists of Languedoc were compelled to bear part of the burden of the tax, they would be unable to pay the contribution levied upon them ("Ordonnances," vii. 169, 233). In proportion to the needs of the treasury, the Jews, in addition to paying the usual taxes, were compelled to advance still greater sums to the king. In return they received various dangerous concessions. They had the privilege of exacting interest at the rate of a denier in the pound per week, but were forbidden to take compound interest. Yet some thought they were authorized to exact this, and the public prosecutor and the officers of justice proceeded against the guilty ones, but when they complained to the king the latter imposed "perpetual silence" on the prosecutor and granted the Jews immunity from all persecution for the period of ten years ("Ordonnances," vii. 170). They also obtained the suppression of the "letters of regret" which persons indebted to them had caused to be issued by royal authority. In 1388 the king declared that letters of this class which had been signed by him would in the future be regarded as void, but he demanded of the Jews 10,000 livres for affixing his seal to this concession ("Ordonnances," vii. 170). The judiciary, however, jealous of its privileges, and dissatisfied with having them set aside by the king to further his own interest, imprisoned in the Conciergerie such Jews as had been guilty of exacting compound interest. In return for another subsidy the king delivered the Jews once again from persecution in 1394 ("Ordonnances," vii. 643). Then, according to the chronicler of St. Denis, an incident occurred that brought matters to a crisis. The Jews of Paris were accused of having induced Denis Machault of Ville-Parisis, who had accepted baptism, to return to Judaism. The case was tried before the provost of Paris, assisted by various lawyers and theologians, and seven Jews who had been arrested were condemned to be burned at the stake. But the Parliament changed this sentence, ordering that the Jews should be publicly flogged on three successive Saturdays, and should then be banished, and that their property should be confiscated (Félibien-Lobineau, "Hist. de Paris; Procès Justificative," iv. 546; Joannes Galli, in "Sauval," ii. 524).

On Sept. 17, 1394, Charles VI. suddenly published an ordinance in which he declared, in substance, that for a long time he had been taking note of the many complaints provoked by the excesses and misdemeanors which the Jews committed against Christians; and that the prosecutors, having made several investigations, had discovered many violations by the Jews of the agreement they had made with him. Therefore he decreed as an irrevocable law and statute that thenceforth no Jew should dwell in his domains ("Ordonnances," vii. 675). According to the "Réligieux de St. Denis," the king signed this decree at the instance of the queen ("Chron. de Charles VI." ii. 119). The de-

Expulsion.

cree was not immediately enforced, a respite being granted to the Jews in order that they might sell their property and pay their debts. Those indebted to them were enjoined to redeem their obligations within a set time; otherwise their pledges held in pawn were to be sold by the Jews. The provost was to escort the Jews to the frontier of the kingdom. Subsequently the king released the Christians from their debts.

six Talmudists within the limits of old France. Mattithiah b. Joseph Trèves, who was acknowledged as rabbi by Charles V. and as such exempted from wearing the circular badge ("Responsa of Isaac b. Sheshet," pp. 270–272; "Ordonnances," v. 498), endeavored to found a school in Paris, but trained only eight rabbis. On his death his son Johanan was called upon to resist the claims of a competitor, Isaiah b. Abba Mari (Astruc of Savoy), who, with the ap-

MAP OF FRANCE SHOWING CHIEF TOWNS WHERE JEWS DWELT BEFORE THE EXPULSION OF 1394.

The banishment of the Jews from Languedoc and Languedoil put an end to a condition that had long been precarious, and the number of them that went into exile was probably not large. No references to this exodus have been preserved in Jewish literature, yet many traces exist to show the decline of Judaism during the thirty-six years that elapsed between their return and their expulsion. At the time of the return there were not more than five or

probation of Meïr b. Baruch ha-Levi of Vienna, claimed the sole right of ordaining rabbis in France. Johanan was obliged to apply to the Spanish rabbis, Hasdai Crescas, Isaac b. Sheshet, and Moses Halawa, for aid in maintaining his rights, for at that time Languedoc had neither scholars nor rabbis of authority, and writers were found only in the Comtat Venaissin, in Provence proper, and in Roumillon. Nevertheless, Jewish science and literature

continued to prosper in Provence during the first half of the fourteenth century. The ban that had been laid upon scientific studies had stimulated, instead of arrested, their progress. Rationalism was never more potent, and philosophy was never more eagerly listened to. Levi b. Gershon (RaLBaG) was a Peripatetic who had attended the school of Averroes, and, as Munk has pointed out ("Mélanges," p. 497), was the most daring of Jewish philosophers—he even admitted the eternity of the world. Few scholars of the Middle Ages had such encyclopedic learning; he wrote commentaries to most of the works of Averroes, and at the same time to the Bible; he wrote on theology, into which he introduced astronomy; he invented an instrument for observation—the "staff of Levi." At the request of Philip of Vitry he composed a treatise on harmony; he was the author of works on arithmetic, trigonometry, algebra, and geometry; he was known for his medical skill; and at the same time he gained the respect of rabbinical authorities by his knowledge of the Talmud. His Biblical exegesis is remarkable, being largely philosophical and ethical. The stories of the Bible he regards as lessons which he loves to cite and develop. Ecclesiastes is a statement of various propositions from among which the reader has the right to make his choice.

Levi b. Gershon.

Moses Narboni of Perpignan was hardly less daring in his conclusions; he also explained philosophically the ethical treatises of the Bible, commented on Averroes, wrote on philosophy, theology, medicine, and the exact sciences; but he veiled his thoughts more skilfully, and selected the commentary as his vehicle for expressing them. Kalonymus b. Kalonymus, who lived somewhat earlier than these two scholars, was also one of the representatives of Jewish civilization in southern France. His relations with King Robert of Naples are well known. He continued the work of translation, and turned into Hebrew many scientific works written in Arabic, including works on medicine, geometry, mathematics, cosmography, astronomy, and various commentaries to Averroes. He wrote also many original works on philosophy and arithmetic. But among Jews he is most famous for his satirical treatise on morals, in which he derided the vices not only of the world in general, but also of the mystics, astrologers, grammarians, poets, and Talmudists; and for his parody on the treatise Megillah, in which he reviewed all the eccentricities of mankind. Averroes was then in vogue, and his commentaries were often translated, as by Moses of Beaucaire, Kalonymus b. David b. Todros of Arles, Samuel b. Judah, or Miles of Marseilles (who was imprisoned at Beaucaire in 1322 in connection with the affair of the lepers), and the prolific translator Todros Todrosi. A number of others translated Ghazzali and Arnault of Villeneuve. Joseph b. Abba Mari, Don Bonafoux of Argentière (1279–1340), was one of the most prolific writers of the time, a thinker of moderate views, opposed to the exaggerations of the school of allegory, but a firm supporter of science. His commentaries to the Bible, his treatises on grammar and lexicography, his philosophic notes to the Scriptures, his interpretation of the "Moreh" are clear and often apt, without pretending at originality.

Narboni, Kalonymus, and Others.

To the same school belong David of Roquemartine, Abba Mari b. Eligdor, Sen Astruc of Noves, David of Estella—all disciples of Maimonides. Remembering the controversies of 1303–06, they did not touch upon the burning questions of Biblical history or legislation, but dealt rather with the Wisdom series—Proverbs, Job, and Ecclesiastes—which lend themselves more easily to philosophic speculations.

Nor was there a lack of scientists; such were the physicians Abraham Caslari; Isaac Lattes, who was also a theologian and Talmudist; Immanuel b. Jacob of Tarascon, called "Bonfils," a mathematician and astronomer, author of the treatise "Shesh Kenafayim" on conjunctions and eclipses, and the translator of a story of Alexander; Isaac b. Todros, the hygienist; and Jacob Bonet, son of David Bonform, the astronomer.

There were, however, fewer Talmudists. The most famous, such as Aaron b. Jacob ha-Kohen of Narbonne, the author of the ritual collection "Orḥot Ḥayyim," and Jeruham, the author of a similar work, "Toledot Adam we-Ḥawah," left France in 1306. Among those who remained—not in the territory of the king, but in the neighboring provinces—were Simson b. Isaac of Chinon, the author of the "Sefer Keritut," an introduction to the Talmud, and Isaac b. Mordecai Ḳimḥi, or Petit of Nyons. It should be noted that all these authors either wrote before the expulsion of 1322 or did not live in France proper. The country beyond the Rhône and the Pyrenean provinces that had not yet been incorporated with France were the refuge of Jewish science and of its last French representatives. And soon the Comtat Venaissin, which formed part of the Pontifical States, was to be their last shelter; for the Jews were expelled in succession from every new province acquired by the French crown. See the articles Brittany; Champagne; Dauphiné; Provence; Savoy.

J. I. L.

The edict of banishment of Charles VI. was enforced with the utmost severity. Nobles whose interests were injured by the expulsion were nevertheless compelled to obey the order. The Duke of Foix, who was favorably inclined toward the Jewish community of Pamiers, endeavored, though un-

successfully, to maintain them in the duchy. An exception was made in the case of Dauphiné, because in ceding this province to Charles VI. Count Louis II. of Poitiers expressly stipulated that the Jews should be allowed to continue there and to retain their accustomed privileges. The Jews of Dauphiné remained undisturbed until the end of the sixteenth century, when the edict of expulsion was extended to that province also. However, most of them had emigrated before Louis XI. (1461–83) had been long on the throne; for, charging them with excessive usury and with dealings with his enemies while he was in Flanders, he had imposed upon them a fine too heavy for them to pay.

The Rest of France.

Seventeen years after the annexation of Provence (1481) an edict of banishment was issued against the Jews of that province. This edict, which probably had not been carried out with extreme severity, was renewed by Louis XII. in 1501. After this date, with the exception of Marseilles, where they succeeded in maintaining themselves until 1758, there were no Jews in Provence. Portuguese and Spanish Maranos indeed settled in the sixteenth century at BORDEAUX, BAYONNE, and in some other localities; but they were tolerated only as "new-Christians"; they began to profess Judaism openly only after 1730.

In the beginning of the seventeenth century Jews began again to penetrate into France. This necessitated a new edict (April 23, 1615), in which Louis XIII. forbade Christians, under the penalty of death and confiscation, to shelter Jews or to converse with them. The Regency was no less severe. In 1683 Louis XIV. expelled the Jews from the newly acquired colony of Martinique. In annexing ALSACE and Lorraine, Louis was at first inclined toward the banishment of the Jews living in those provinces, but thought better of it in view of the benefit he could derive from them; and on Sept. 25, 1675, he granted them letters patent, taking them under his special protection. This, however, did not prevent them from being subjected to every kind of extortion, and their position remained the same as it had been under the Austrian government.

While the Alsatian Jews were thus laboring under barbarous legislation, the condition of those of Comtat Venaissin (see AVIGNON; CARPENTRAS; CAVAILLON), which belonged to the Holy See, became unbearable. All the additional measures devised against them by the councils during the fifteenth and sixteenth centuries were applied to the letter in the second half of the seventeenth century and afterward.

In the course of the eighteenth century the attitude of the authorities toward the Jews was modified. A spirit of tolerance began to prevail, which corrected the iniquities of the legislation. The authorities often overlooked infractions of the edict of banishment; a colony of Portuguese and German Jews was tolerated at Paris. The voices of enlightened Christians, like Dohm, who demanded justice for the proscribed people, began to be heard. An Alsatian Jew named Cerf Berr, who had rendered great service to the French government as purveyor to the army, was the interpreter of the Jews before Louis XVI. The humane minister Malesherbes summoned a commission of Jewish notables to make suggestions for the amelioration of the condition of their coreligionists. This commission included Cerf Berr and eminent representatives of the Portuguese Jews from Bordeaux and Bayonne, like Furtado, Gradis, Isaac Rodrigues, Lopez Dubec, etc. The direct result of the efforts of these men was the abolition, in 1784, of the degrading poll-tax and the permission to settle in all parts of France. Shortly afterward the Jewish question was raised by two men of genius, who subsequently became prominent in the French Revolution—Count Mirabeau and the abbé Grégoire, the former of whom, while on a diplomatic mission in Prussia, had made the acquaintance of Mendelssohn and his school, who were then working toward the intellectual emancipation of the Jews. In a pamphlet, "Sur Moses Mendelssohn et la Reforme Politique" (London, 1787), Mirabeau refuted the arguments of the German anti-Semites like Michaelis, and claimed for the Jews the full rights of citizenship. This pamphlet naturally provoked many writings for and against the Jews, and the French public became interested in the question. On the proposition of Roederer the Royal Society of Science and Arts of Metz offered a prize for the best essay in answer to the question: "What are the best means to make the Jews happier and more useful in France?" Nine essays, of which only two were unfavorable to the Jews, were submitted to the judgment of the learned assembly. The prize was awarded jointly to three essays, written respectively by Salkind Hurwitz, a Polish Jew, interpreter at the Royal Library of Paris; Thierry, a member of Parliament for Nancy; and the abbé Grégoire. Of these three the most important for the Jews was the essay of the abbé Grégoire, because of the character of the author.

Beginnings of Emancipation.

Meanwhile the Revolution broke out. The fall of the Bastile was the signal for disorders everywhere in Alsace. In certain districts the peasants attacked the dwellings of the Jews, who took refuge in Basel. A gloomy picture of the outrages upon them was sketched before the National Assembly (Aug. 3) by the abbé Grégoire, who demanded their complete emancipation. The National Assembly shared the indignation of the prelate, but left undecided the question of emancipation; it was intimidated by the anti-Semitic deputies of Alsace, especially by a certain Rewbell, who declared that the decree which granted the Jews citizens' rights would be the signal for their destruction in Alsace. On Dec. 22, 1799, the Jewish question came again before the Assembly in debating the question of admitting to public service all citizens without distinction of creed. Mirabeau, Count Clermont Tannerre, and the abbé Grégoire exerted all the power of their eloquence to bring about the desired emancipation; but the repeated disturbances in Alsace and the strong opposition of the deputies of that province and of the clericals, like La Fare, Bishop of Nancy, the abbé Maury, and others, caused the decision to be again postponed. Only the Portuguese and the Avi-

Debates in the National Assembly.

gnonese Jews, who had hitherto enjoyed all civil rights as naturalized Frenchmen, were declared full citizens by a majority of 150 (Jan. 28, 1790). This partial victory infused new hope into the Jews of the German districts, who made still greater efforts in the struggle for freedom. They won over the eloquent advocate Godard, whose influence in revolutionary circles was considerable. Through his exertions the National Guards and the diverse sections pronounced themselves in favor of the Jews, and the abbé Malot was sent by the General Assembly of the Commune to plead their cause before the National Assembly. Unfortunately the grave affairs which absorbed the Assembly, the prolonged agitations in Alsace, and the passions of the clerical party kept in check the active propaganda of the Jews and their friends. A few days before the dissolution of the National Assembly (Sept. 27, 1791) a member of the Jacobin Club, formerly a parliamentary councilor, named Duport, unexpectedly ascended the tribune and said: "I believe that freedom of worship does not permit any distinction in the political rights of citizens on account of their creed. The question of the political existence of the Jews has been postponed. Still the Moslems and the men of all sects are admitted to enjoy political rights in France. I demand that the motion for postponement be withdrawn, and a decree passed that the Jews in France enjoy the privileges of full citizens." This proposition was accepted amid loud applause. Rewbell endeavored, indeed, to oppose the motion, but he was interrupted by Regnault de Saint-Jean, president of the Assembly, who suggested "that every one who spoke against this motion should be called to order, because he would be opposing the constitution itself."

During the Reign of Terror.

Judaism in France thus became, as the Alsatian deputy Schwendt wrote to his constituents, "nothing more than the name of a distinct religion." However, the reactionaries did not cease their agitations, and the Jews were subjected to much suffering during the Reign of Terror. At Bordeaux Jewish bankers, compromised in the cause of the Girondins, had to pay considerable sums to save their lives; in Alsace there was scarcely a Jew of any means who was not mulcted in heavy fines. Forty-nine Jews were imprisoned at Paris as suspects; nine of them were executed. The decree of the convention by which the Catholic faith was annulled and replaced by the worship of Reason was applied by the provincial clubs, especially by those of the German districts, to the Jewish religion. Synagogues were pillaged, the celebration of Sabbath and festivals interdicted, and rabbis imprisoned. Meanwhile the French Jews gave proofs of their patriotism and of their gratitude to the land which had emancipated them. Many of them fell on the field of honor in combating in the ranks of the Army of the Republic the forces of Europe in coalition. To contribute to the war fund candelabra of synagogues were sold, and many Jews deprived themselves of their jewels to make similar contributions.

An attempt to destroy the good work of the Revolution with regard to the Jews was made under Napoleon, who was himself not very favorably inclined toward them. The reactionaries Bonald, Fontanes, Molé, and others led a campaign against them, and a pretext for curtailing their rights was easily found. Charges of excessive usury were brought before Napoleon while, on his return from Austerlitz (1806), he was at Strasburg, where the deep-rooted prejudices against the Jews were still active. He then charged the state council with the revision of the existing legislation concerning the Jews. The majority of the members of this body was not, however, inclined to enact restrictive laws against all the Jews because of the misdeeds of some usurers. Influential persons, among whom was the minister of the interior, Champagny, endeavored to bring Napoleon to a better opinion of the Jews. They called to his attention how quickly they had become proficient in the arts and sciences, in agriculture and handicrafts. Persons were mentioned who had been decorated with the Order of the Legion of Honor for courage in war. But Napoleon, on May 30, 1806, issued a decree by which he suspended for a year the execution of the judgments rendered in favor of Jewish money-lenders in Alsace and in the Rhenish provinces. By the same decree he summoned an assembly of Jewish notables, ostensibly to devise means whereby useful occupations might be made more general among the Jews, but in reality to question the representatives of the Jews concerning the moral character of the Mosaic law. Among the 111 notables chosen, somewhat arbitrarily, by the prefects, were well-known men like Berr Isaac Berr, his son Michel Berr, Abraham Furtado, Sinzheim, Abraham Vita di Cologna, and many others, who were fully aware that they were called to defend Judaism before the world. From the first sitting (Saturday, July 26, 1806), presided over by Abraham Furtado, they disarmed the ill will of Napoleon by their tact and manifestation of patriotism. Although advocating various religious opinions, harmony did not cease to reign between the members, and they were unanimous in their answers to the twelve questions put before them by the commissioner of the government, the reactionary Molé (see Sanhedrin, French). The chief point of the question was whether the Jewish civil and matrimonial laws, the prescriptions concerning the relations between Jews and non-Jews, and the regulations in regard to usury were in accordance with the spirit of modern times. On Sept. 18, 1806, the commissioner Molé announced to the Assembly that the emperor was satisfied with the answers and that he intended, in order to give a religious sanction to the principles expressed therein, to call together a Sanhedrin. Like the Sanhedrin of old, this Sanhedrin was to be composed of seventy-one members, two-thirds rabbis and one-third laymen, having at their head one president and two vice-presidents.

Attitude of Napoleon.

The Sanhedrin.

On Feb. 9, 1807, four days after the dissolution of the Assembly of Notables, the Sanhedrin, under the presidency of David Sinzheim, held its first meeting in a hall of the Hôtel de Ville, especially decorated for the occasion. The answers of the Assembly of Notables were the main subject of its discussions. After several sittings they were all approved and

drawn up in French and in Hebrew. Thenceforth the principles laid down by the Assembly of Notables were to have legal force for all the Jews of the French empire. But who was to see to the enforcement of these decisions? Hitherto the Jewish inhabitants of every town formed a separate community which had its own administration, without any connection with the government. Napoleon therefore, in consonance with his general centralizing tendencies, conceived the idea of organizing the Jewish community on a legal basis, and of placing corporate bodies and hierarchical functionaries at its head. By a decree issued from Madrid on March 17, 1808, he instituted the system of consistories which is still in force in France. The spirit by which the emperor was guided in this is seen in the formula of oaths which the members of the first consistories had to take: "I vow and promise before God, on the Holy Bible, to show obedience to the constitutions of the empire and loyalty to the emperor. I promise also to make known anything that I may hear contrary to the interests of the sovereign or of the state." By another decree the Jews were invited to adopt family names. They were not allowed, however, to take names of towns or Biblical names. These decrees, gratifying as they were to the Jews, were unfortunately followed by another, of the same date, which restricted for ten years their commercial freedom. According to the terms of this last decree no foreign Jew was allowed to settle in the German departments, nor one from those departments in any other district. No French Jew was to engage in any trade without the permission of the prefect, which permission was to be granted only on the testimony of the civil magistrates and the consistory as to the good character of the applicant. Contracts of Jews who could not show a patent were to be null and void. No Jew drafted into the army was to be allowed to procure a substitute. Owing to the numerous complaints made by the Jews and to the favorable reports of the authorities, however, exemption from these restrictions was shortly afterward granted to the Jews of Paris, of Leghorn, of the department of the Lower Pyrenees, and of fifteen other districts in France and Italy. At the end of the ten years the restrictions were not renewed, despite the efforts of certain enemies of the Jews.

The Consistories.

The restoration of Louis XVIII. did not bring any change in the political condition of the Jews. Such of their enemies as cherished the hope that the Bourbons would hasten to undo the good work of the Revolution with regard to the Jews were soon disappointed. Since the emancipation the French Jews had made such progress that the most clerical monarch could not find any pretext for curtailing their rights as citizens. They were no longer poor, downtrodden pedlers or moneylenders, with whom every petty official could do as he liked. Many of them already occupied high positions in the army and the magistracy, and in the arts and sciences. And a new victory was won by French Judaism in 1831. Of the faiths recognized by the state, only the Jewish had to support its ministers, while those of the Catholic and Protestant churches were supported by the government. This legal inferiority was removed in that year, thanks to the intervention of the Duke of Orleans, lieutenant-general of the kingdom, and to the campaign led in Parliament by the deputies Rambuteau and Viennet. Encouraged by these prominent men, the minister of education, on Nov. 13, 1830, offered a motion to place Judaism upon an equal footing with Catholicism and Protestantism as regards support for the synagogues and for the rabbis from the public treasury. The motion was accompanied by flattering compliments to the French Jews, "who," said the minister, "since the removal of their disabilities by the Revolution, have shown themselves worthy of the privileges granted them." After a short discussion the motion was adopted by a large majority. In January, 1831, it passed in the Chamber of Peers by 89 votes to 57, and on Feb. 8 it was ratified by King Louis Philip, who from the beginning had shown himself favorable to placing Judaism on an equal footing with the other faiths. Shortly afterward the rabbinical college, which had been founded at Metz in 1829, was recognized as a state institution, and was granted a subsidy. The government likewise liquidated the debts contracted by various Jewish communities before the Revolution.

After the Restoration.

State Recognition.

Strangely enough, while the Jews had been thus placed in every point the equals of their Christian fellow citizens, the oath "More Judaico" still continued to be administered to them, in spite of the repeated protestations of the rabbis and the consistory. It was only in 1846, owing to a brilliant speech of the Jewish advocate Adolphe Crémieux, pronounced before the Court of Nimes in defense of a rabbi who had refused to take this oath, and to a valuable essay on the subject by a prominent Christian advocate of Strasburg, named Martin, that the supreme court (Cour de Cassation) removed this last remnant of the legislation of the Middle Ages. With this act of justice the history of the Jews of France merges into the general history of the French people. The rapidity with which many of them won affluence and distinction in the nineteenth century is without parallel. In spite of the deep-rooted prejudices which prevail in certain classes of French society, many of them occupy high positions in literature, art, science, jurisprudence, the army—indeed, in every walk of life. Among them there were men whose fame extended beyond the boundaries of their own country, as, for instance, Adolphe Crémieux, Fould, Goudchaux, and Raynal, in politics: Fromenthal Halévy, Samuel David, Jonas Waldteufel, Léonce Cohen, and Ernest Cahen, in music; Solomon Munk, Joseph and Hartwig Derenbourg, Michel Bréal, Jules Oppert, H. Weill, Solomon and Théodore Reinach, Arsène and James Darmesteter, and Joseph Halévy, in classical philology and Oriental languages and literatures; M. Loewy, Albert Levy, and Gabriel Lippmann, in astronomy and science; Bédarrides, A. Bloch, and Lyon-Caen, in jurisprudence: Georges Hayem and Germain Sée, in medicine; Adolphe Franck and H. L. Bergson, in philosophy; Emile Soldi, Emmanuel Hannaux, and Z. Astruc,

Assimilation.

in sculpture; Emile Lévy, Jules Worms, E. Brandon, Edouard Lièvre, Alphonse Hirsch, and Fribourg, in painting; Joseph Hirsch, Maurice Levy, and L. Bachman, in engineering; Albert Wolff, Blowitz, Joseph Reinach, Arthur Meyer, Catulle Mendès, Henri Avenel, and Henri Michel, in literature and journalism; Ad. d'Ennery, Abraham Dreyfus, Ernest Blum, Hector Crémieux, Albin Valabrègue, and Eugène Manuel, in drama; Rachel, Amélie Hirsch, Rosine Bloch, Worms, and Berr as actors and actresses.

In the last decade of the nineteenth century the reactionaries, having failed in every attempt to overthrow the republic, had recourse to anti-Semitism, by means of which they maintained a persistent agitation for over ten years. The Jews were charged with the ruin of the country and with all the crimes which the fertile imagination of a Drumont or a Viau could invent; and as the accused often disdained to answer such slanderous attacks, the charges were believed by a great number of people to be true. A campaign was started against Jewish army officers, which culminated in the celebrated DREYFUS CASE. This unhappy affair, which brought France to the brink of ruin, opened the eyes of the Republicans to the plans of the reactionists; and the heyday of anti-Semitism in France is now fast disappearing.

In compliance with the decree of March 17, 1808, the Jewish population of France was divided into seven consistories, which contained a total of 46,160 inhabitants. Of this number 16,155 belonged to the department of the Lower Rhine, 10,000 to that of the Upper Rhine, and 20,005 to the rest of France. The seats of the consistories were: Paris, Strasburg, Wintzenheim (later Colmar), Metz, Nancy, Bordeaux, and Marseilles. With the increase of the Jewish population new consistories were established at Lyons (1857) and at Bayonne (1859). In 1845 three consistories were established in Algeria. Through the Franco-Prussian war of 1870, French Judaism lost the three most populous consistories of Alsace and Lorraine; but, owing to the great number of Jews who retained French nationality and emigrated from those provinces to France, they were replaced by three new ones established at Vesoul, Lille, and Besançon. At present (1903) the twelve consistories comprise 89 Jewish congregations, divided among 33 rabbis, with a total population of about 100,000 persons, of whom about 60,000 live in Paris.

Since the establishment of the consistories the method of recruiting their members has undergone many changes. At first they were chosen by the civil authorities of the various departments; in 1844 the right of election was extended to the various municipal and state functionaries; finally, a law was passed in 1846 by virtue of which every Jew who had attained the age of twenty-five was placed on the list of electors. In every congregation there exists an administrative committee or synagogue administration, consisting of five or six members elected either by the consistory, as is the case in the district of Paris, or by the suffrages of the congregation.

Mode of Consistorial Election.

According to the terms of the decree of 1808, rabbis may be appointed only to congregations numbering at least 200 members. Where several congregations in separate towns do not possess the number of Jewish inhabitants required by law, they may join together for the purpose, and the seat of the rabbi is fixed in the most important communities. Since 1872 the election of rabbis is confided to the departmental consistories, which are assisted by a certain number of delegates from the various congregations. When the choice is made the name of the candidate is sent to the Central Consistory of Paris. The latter body, after confirming the selection, submits it to the government for final ratification. At the head of each departmental consistory stands the departmental chief rabbi. The supreme chief of the rabbinical hierarchy of France is the rabbi of the Central Consistory of Paris (Le Grand Rabbin du Consistoire Central des Israélites de France), who is elected by a college composed of the twelve members of the Central Consistory and two delegates chosen by universal suffrage from each of the twelve departmental consistories. This office has been held in succession by the following: Segré D. Sinzheim, Abraham Vita di Cologna, Emmanuel Deutz, Marchand Ennery, Ulmann, Isidor, and the present (1903) Rabbi Zadoc Kahn.

The Reform movement, which between 1830 and 1840 divided German Judaism into two hostile camps, found but a feeble echo in France. The attempts at Reform made by O. Terquem, who in a series of pamphlets, called "Lettres Zarfatiques," attacked all religious institutions and traditions, failed to produce any effect. This is due partly to the indifference of the French public to logical discussion and partly to the spirit of toleration which is innate in the most devout in France. However, Jewish ritual ceremonies and prayers have been given a more modern form. As early as 1831 the Central Consistory had prohibited the preaching of sermons in any other language than French. In 1856 Ulmann summoned to Paris all the rabbis of the consistories to discuss the reorganization of the ritual for French Judaism. Among the innovations introduced by this assembly the most noteworthy are: the permission to employ the organ in the synagogue; the bringing of new-born children to the synagogue to receive the benediction of the rabbi; the religious initiation; the covering of coffins with flowers, the placing of hangings at the entry of the mortuary, and the employment of more luxurious hearses; the adoption of an official dress for rabbis resembling that of the Catholic priest, with the slight difference that the band is of white. Besides these innovations the assembly revised the prayer-book and suppressed some of the prayers.

Reform in France.

E. C. I. BR.

FRANCES, IMMANUEL BEN DAVID: Italian poet and rabbinical scholar; born in Mantua July 22, 1618 (?); died at Leghorn after 1703. He received his instruction from his elder brother Jacob and from Joseph Firmo of Ancona. In 1674 he was chosen by some Italian communities to represent them in a case against the heirs of R. Zachariah Porto. A responsum by him in this matter is found in "She'elot u-Teshubot Mayim Rabbim," iv., No. 41. Another responsum is cited in Lampronti's "Paḥad Yiẓḥaḳ," *s.v.* מצוה מחמת מיתה. Both he and his brother Jacob were determined opponents of the followers of Shabbethai Ẓebi, against whom they wrote a volume of poems entitled "Ẓebi Muddaḥ" (ed. Mortara, in "Ḳobeẓ 'al Yad" of the Meḳize Nirdamim, Berlin, 1885). Immanuel also opposed the cabalists, creating so strong a feeling among the rabbis of Mantua that they destroyed his brother's published poems and forced him (Immanuel) to leave the city. He wandered from place to place, even to Algiers, settling finally in Leghorn. He wrote to his friend Abraham Kokab to protest against his busying himself with classical literature.

In addition to many occasional poems Frances wrote, in conjunction with his brother Jacob, "Wikkuaḥ Itiel we-Ukal," a dialogue on woman, and "Wikkuaḥ Libni we-Shim'i," on his brother's poem against the cabalists. Two of Immanuel's poems were published by Nepi-Ghirondi in "Toledot Gedole Yisrael" (pp. 291–293), others by Abraham Baruch Piperno in "Ḳol 'Ugab," Leghorn, 1846. Immanuel's best-known work is "Meteḳ Sefatayim" (written in Algiers), a treatise on Hebrew prosody, in which he makes use of a number of his own verses. It has been edited by H. Brody ("Hebr. Prosodie von Immanuel Frances," Cracow, 1892), and translated and thoroughly discussed by Martin Hartmann ("Die Hebräische Verskunst," Berlin, 1894). An approbation of Frances is found in Jacob Haggis' "Halakot Ḳeṭannot," Venice, 1704. His epitaph, composed by himself, is to be found in Ugolino, "Thesaurus," xxxiii., cols. 1463-1464; in Wolf, "Bibliotheca Hebræa," iii. 1794b; and in David Kahana's biography, p. 13.

G.

FRANCES, JACOB BEN DAVID: Italian scholar and poet; born at Mantua in 1615; died at Florence in 1667. After having been thoroughly grounded in the Talmud by his father, he continued his studies with Shemaiah de Medina (רשד"ם) at Venice. His reputation as a poet is founded mainly on his satires, which vehemently attacked Shabbethai Ẓebi and his following and warned against his agents. Together with his brother and pupil, the poet Immanuel Frances, he vainly called upon the rabbis, especially those of Smyrna, to take measures against the impostor. The followers of Shabbethai in turn scattered pamphlets broadcast denouncing him as a heretic. His house was attacked, and attempts were even made upon his life. As Frances traced the errors of Shabbethaian teaching to cabalistic speculations on the kingdom of the Messiah, he published a poem in which he condemned the study of Cabala by the uninitiated and ridiculed the aberrations of mysticism. The cabalists, and especially the rabbis of Mantua, demanded that the poem be burned. The impending controversy was cut short by the author's death. His faithful brother Immanuel ben David Frances carried on his defense.

G. I. E.

FRANCES, JOSEPH: Spanish scholar; lived at Ferrara, Italy, about the middle of the sixteenth century. He was the author of a commentary to Jedaiah Bedersi's "Beḥinat ha-'Olam" and "Baḳḳashat ha-Memin," published with the texts (Ferrara, 1552).

G. M. Sel.

FRANCHE-COMTÉ: Ancient province of France, also called "Haute-Bourgogne" or "Comté de Bourgogne"; now divided into the departments of Haute-Saône, Doubs, and Jura. There is little mention of Jews in Franche-Comté before the thirteenth century. Not until Philip Augustus drove them out of France at the end of the twelfth century, and at the time of the wars of Méranie, did they begin to settle there. They very soon attracted the suspicion of the clergy. Scarcely half a century after their arrival a new sect came into existence, called "Judaizing Christians" because they observed Saturday instead of Sunday and refused baptism. The general Council of Lyons (1245) took action against these heretics, and the Bishop of Besançon was asked to watch over the Jewish propaganda and to compel every Jew in his diocese to wear a badge. Twenty years later Pope Clement IV. addressed a bull to Jean de Chalon, the "Sire de Salins," who was almost incontestably master of the county of Burgundy, to excite his zeal against the Vaudois and against Judaizing Christians. The diocesan statutes contained clauses forbidding Christians to engage Jewish servants (especially nurses, because they taught children to hate the Christian religion). The clergy kept the Jews at a distance from ecclesiastical domains; for instance, the curé of Luxeuil changed the day of the hay market to Saturday to prevent the Jews from taking part in it.

Favored by Nobility.

The nobles, however, made advances to them, partly, perhaps, because the Jews were an important source of revenue. Jean I. de Vergy, Sire of Champlitte and Autrey, took them under his special protection, gave them safe-conducts, and even released them from statute labor, from paying tolls, from the riding-tax, and from other imposts. Jean I. de Chalon-Arlay established a Jewish colony near his château in the village of Lombard, and there is still an ancient cemetery in this vicinity in which the skeletons are found face downward, and which tradition recognizes as the old Jewish cemetery. The members of each organized community paid an annual tax, varying from twenty to one hundred sols. Continually at strife with one another or with the King of France, or even with the Em-

peror of Germany, most of the nobles of Franche-Comté were in debt, and had need of Jewish money. About 1296, Jews furnished money to Chalon-Arlay and the Count of Montbéliard to support them in their struggle with Philip the Fair. At this time the material condition of the Jews appears to have been fairly prosperous. They had their open accounts at Vesoul, Besançon, Gray, Salins, etc. Many of the nobles had to place their domains in pawn with the Jews. Thus the market-town of Marnay, which belonged to the important family of Chalon, was given over to the Jews of Dole and Villars for five years. One rich Jew of Vesoul, Elias or Helyon, was the creditor of the greatest nobles of Franche-Comté. Vesoul was a center for money-changers, and must have contained a large contingent of Jews. A beautiful synagogue stood in the center of the town; it was still in existence in the sixteenth century, as was also the house of Helyon.

The general expulsion of Jews in 1306 does not appear to have affected those in Bourgogne, though their commerce received a blow from which it never recovered. But soon the Jews of Franche-Comté also were forced into exile; they and the lepers were accused of poisoning the wells. Their goods were confiscated. The house of Helyon was given by Queen Jeanne, wife of Philip the Tall, to a lady of her suite, who sold it at the death of the queen and built a chapel with the proceeds. Most of the exiles went to Besançon, at that time an imperial city, thus escaping the authority of the King of France. It is possible that a certain number were allowed to remain on relinquishing their claims to the debts due them. But the exiles soon returned to Franche-Comté. In 1331, at the death of Queen Jeanne, the county of Burgundy passed into the hands of Duke Eudes, but the queen's will caused dissatisfaction, and all the barons arose against him. He had need of the Jews, and recalled them. The account of expenditures in 1332–33 shows that their number was increased by thirty-two families. In 1348, however, the Black Death broke out. Gollut, the historian of the sixteenth century, states that the Jews of Franche-Comté shared the fate of the Jews in other countries and died under extreme torture. This is erroneous. Their oppressors were content with expelling them after having taken away their property. From October 28 to 30 they proceeded to arrest the Jews of the bailiwick of Amont (Haute-Saône) and to take an inventory of their possessions; but the revenue department, which wished to refill its empty treasury, was disappointed. Certain Jews of Vesoul, Symon, Rubininer, and Hebrelin escaped, but were recaptured and imprisoned. Some of them were hidden away. Finally, after about one hundred days of imprisonment, everything that could be found was taken from them, and the ducal treasury received a net increase of 494 florins.

Accusation of Well-Poisoning.

On Jan. 27, 1349, the Jews, furnished with a safe-conduct, were driven out of the county of Burgundy and escorted as far as Montbozon. A short time afterward the Jews of Doubs, Jura, and Montbéliard were ordered to leave within five months. It is doubtful whether this decree was ever executed, because in 1355 the Archbishop of Besançon renewed the ordinance against the employment of Christian servants. From this time on there is little mention of Jews. In 1360 Manasseh of Vesoul, who negotiated the return of the Jews to France at this time, settled in Paris, where he became steward to the king. In 1374 the Jews were driven out of Salins. On Nov. 21, 1384, Philip the Bold regulated the status of the Jews. He permitted fifty-two families to settle in the towns of his domain on payment of an entrance fee and an annual tax. He fixed the rate of interest; henceforth a Jew was to be believed on his oath, and the evidence of a single apostate was declared invalid. The chiefs of the Jews were called "masters of law"; the Jewish cemetery was separated from the others, and a noble of the court was instituted guardian of the Jews.

The general expulsion of the Jews from France in 1394 put an end to their presence in Franche-Comté. Israel Lévi has proved that a certain number of well-known rabbis lived in this province in the first half of the fourteenth century—for instance, Joseph b. Jacob Tournoy and Joseph de Musidan.

G. I. S.

FRANCHETTI, AUGUSTO: Italian lawyer and historian; born at Florence July 10, 1840; attended the lycée at Marseilles; studied law at Pisa, where he was admitted to the bar in 1863; and then settled at Florence. As dramatic critic of "La Nazione" and the "Nuova Antologia," he devoted much time to the drama, and especially to Aristophanes, whose works he translated into Italian verse. In 1874 he was appointed professor of modern history at the Istituto di Scienze Sociali. In view of his services rendered to Italian literature and especially to the study of Dante, he was elected corresponding member of the Accademia della Crusca of Florence.

Since 1872 Franchetti has been a member of the Consiglio Comunale; and since 1886 he has been almost continuously in the municipal council. For forty years he has been one of the directors of the Jewish community of Florence (president 1870–99), rendering valuable services while the new synagogue was being built. In 1899 he was elected president of the Florentine commission of the Collegio Rabbinico Italiano, taking a prominent part in the reorganization of the institution.

Franchetti's works include: "Le Nuvole di Aristofane Tradotte in Versi Italiani con Introduzione e Note di Domenico Comparetti," 1881; "Storia d'Italia dal 1789 al 1799," 2d ed., Milan, 1903, a large and valuable work; and many historical essays relating to the French Revolution, published in "Rassegna Settimanale," "Nuova Antologia," and "Archivio Storico Italiano."

BIBLIOGRAPHY: De Gubernatis, *Les Ecrivains du Jour.*

S. I. E.

FRANCHETTI, LEOPOLDO, BARON: Italian deputy; born at Florence in 1847; studied law at Pisa. In company with Deputy Sidney Sonnino he undertook a journey to Sicily for the purpose of studying the social, political, and economic condi-

tions of that island; their observations were subsequently published in two volumes. In 1878 he together with Sonnino founded the weekly "Rassegna Settimanale," which was later converted into the daily "La Rassegna" and published at Rome; it was subsequently discontinued for lack of circulation. In the last decade of the nineteenth century Franchetti became governor of the East-African colony Eritrea. On his election to Parliament Franchetti interested himself especially in the affairs of the navy, and has published many parliamentary reports.

S. I. E.

FRANCHI, GUGLIELMO DEI: Jewish convert to Christianity; born at Rome; died there about 1600. Embracing Christianity, he joined the monastic order of Vallombrosa, and devoted himself to the dissemination of knowledge of Hebrew among Christians. In 1596 he published at Rome a Hebrew alphabet ("Alphabeticum Hebraicum"), giving the rules for the reading of Hebrew; and three years later a short Hebrew grammar, "Sole della Lingua Sancta, nel Quale Brevemente si Contiene la Grammatica Hebræa" (Bergamo, 1599).

D. I. Br.

FRANCIA: A family of Spanish descent, whose arms, according to D'Hozier, were: Argent, a crown bearing the letters "G. F. R." sable, surrounded by two palms sinople, with branches saltire.

Members of the Francia family emigrated in the seventeenth century to London, where they became influential and wealthy. The founders of this branch were **Simon Francia** (*c.* 1677) and **Domingo Roderigues (Roiz) Francia,** died 1688. The latter left two sons, **Francis** and **Simon, Jr.** His grandson was **George Roderigues Francia,** known in the synagogue of which he was parnas as "Abraham Francia," who says in his will, "I doe order my interment in the buriall place of my nation at Mile End with the usual decencies." He died 1695, leaving five sons and five daughters, one of whom married a son of David Pinto in Amsterdam. It was one of his sons, **Francis Francia,** who was tried for high treason Jan. 22, 1716, as an adherent of the Old Pretender, the so-called James III. (Jacobs and Wolf, "Bibl. Anglo.-Jud." p. 95). He was acquitted because he was an alien, having been born in France. His elder brother was **Simon Francia.** A number of other members of this family appear in the court records of the time. Their coat of arms—a lion rampant, carrying a standard per pale, five fleurs-de-lis, the shield surmounted by a helmet—is to be seen on several of their gravestones. The arms, however, seem never to have been recorded.

The widow of George Francia caused his armorial bearings to be registered at Bordeaux Nov. 29, 1697. His son **Abraham** signed as elder the communal regulations of Bordeaux in 1760. **Benjamin Francia** figures in the list of notables of Bordeaux in 1809.

The family had a special synagogue at Bordeaux, which was closed in 1812.

FRANCISCANS. See Friars.

FRANCK, ADOLPHE: French philosopher; born at Liocourt, department of the Meurthe, Oct. 9, 1809; died at Paris April 11, 1893. Destined for the rabbinate, at the age of fourteen he was committed to the care of Marchand Ennery; at the same time he obtained a secular education. Failing to win a rabbinical scholarship, he dallied awhile with medicine, and at length turned to philosophy, in which he found his proper field. In 1832 Franck became "agrégé" of philosophy, taking the first position on the list. He then taught successively at the colleges of Douai, Nancy, and Versailles, and in 1840 at the Collège Charlemagne at Paris, where among his pupils were Edmond About and Francisque Sarcey. The same year he began a complementary course of public lectures at the Sorbonne. In 1842 he was appointed assistant curator of the Bibliothèque Royale. After a visit to Italy (1843), necessitated by his health, he began his "Dictionnaire des Sciences Philosophiques," his principal work. In 1844 he was elected member of the Institut de France (Académie des Sciences Morales et Politiques) in recognition of his "Esquisse d'une Histoire de la Logique" and his work on the Cabala, which latter became very popular and was translated into German by Adolf Jellinek (Leipsic, 1844).

Adolphe Franck.

In 1847 Franck again took up his work at the Sorbonne and started a course in social philosophy. After a few months he was asked by Barthélemy St. Hilaire, whom the revolution of 1848 had drawn into the political arena, to take his place at the Collège de France. Franck was himself affected by the political turmoil of the time, and in 1848 became candidate for the deputyship of the department of the Meurthe, but failed of election. In 1856 he became incumbent of the chair of natural and civil

law, a position which he held for thirty years. He became president of the Anti-Atheist League, and took deep interest in the work of the Society for the Translation of the Scriptures, which he joined at its inauguration in 1866. He founded and controlled the "Paix Sociale," the organ of the Anti-Atheist League, wrote for the "Journal des Débats," and was one of the editors of the "Journal des Savants." An active defender of Judaism, his lecture at the Collège de France entitled "Le Rôle des Juifs dans le Développement de la Civilisation" was reprinted in the "Archives Israélites" of 1855, to which journal he contributed for fifty years, and in which he published the two essays "De la Création" (1845) and "Le Péché Original et la Femme" (1885). He was a patron of the Société des Etudes Juives, and became its president in 1888. Chosen member of the Consistoire Central des Israélites de France for Nancy in 1844, he soon became its vice-president. Under the empire he was the representative of Judaism at the Conseil Supérieur de l'Instruction Publique, resigning in 1874 on a question of organization. He was also one of the founders and presidents of the Ligue de la Paix.

Franck's work met with speedy recognition. He became chevalier of the Legion of Honor in 1844, officer in 1862, and commander in 1869. The revolution of 1870, however, prevented his reaching the Senate, a position to which the emperor had wished to elevate him.

The following are Franck's best-known works:

La Kabbale ou Philosophie Religieuse des Hébreux. Paris, 1843; 2d ed., 1889.
Dictionnaire des Sciences Philosophiques. 1843-52, 6 vols.; new ed., 1875.

S. I. B.

FRANCO: A Jewish family which derived its name from a place near Navarre, Spain. There were Francos at Amsterdam, Venice, Tunis, Constantinople, Adrianople, Silistria, Magnesia, Smyrna, Brusa, and in the islands of Crete and Rhodes. According to the family traditions, the Francos of Constantinople, who are Austrian subjects, are the descendants of two Jews of Prague, the brothers Abraham and Moses, who settled in Constantinople in 1780.

Daniel Franco: Rabbinical judge of Tunis about 1797 (Cazès, "Notes Bibliographiques").

D. M. Fr.

David Franco (חפשי) Mendes: Hebrew poet; born at Amsterdam Aug. 13, 1713; died there Oct. 10, 1792. A business man, he devoted his leisure hours to the study of the Talmud, in which he became very proficient. He knew several languages, and was especially well versed in Hebrew. For six months preceding his death he was honorary secretary of the Spanish-Portuguese community at Amsterdam.

David Franco Mendes was, next to Moses Ḥayyim Luzzatto and Naphtali H. Wessely, the most important Neo-Hebraic poet of his time. Delitzsch describes his poems as traditional in subject, national in spirit, and artistic in form. He followed Racine in his historical drama "Gemul 'Atalyah," Amsterdam, 1770; Vienna, 1800; Warsaw, 1860. Under the title "Teshu'at Yisrael bi-Yede Yehudit" (Rödelheim, 1840) he translated into Hebrew Pietro Metastasio's "Betulia Liberata." He was a frequent contributor to "Ha-Meassef," in which he published some poems and short biographies of eminent Spanish-Portuguese coreligionists. He left several manuscripts, written partly in Hebrew, partly in Portuguese and Spanish, most of which are in possession of the seminary of the Spanish-Portuguese community at Amsterdam. They include: "Bi'at ha-Mashiaḥ," on the advent of the Messiah; "Nir le-Dawid," responsa, several of which are printed in the collection "Peri 'Ez Ḥayyim"; a collection of Hebrew epitaphs; and "Kinnor Dawid," a large collection of poems by him and others. His "Memorias do Estabelecimento e Progresso dos Judeos Portuguezes e Espanhoes nesta Famosa Cidade de Amsterdam: Recapilados de Papeis Antigos Impressos e Escritos, no Ao. 5529 = 1769" (MS. No. 220, pp. 4), "Memorias Succintas da Consternaçaõ de Nosso K. K. de Amsterdam nos Tribulaçoẽs desde Cidade e Provincia, no Ao. 1787" (MS. No. 34, pp. 4), and "Collecaõ de Antiguidades" (manuscript) are of historical value.

G. M. K.

Mendez Mordecai Franco: President of the Portuguese Jewish community of Amsterdam about 1684.

Moses Franco: Historian and schoolmaster in the employ of the Alliance Israélite Universelle; born at Constantinople 1864. He studied at the Ecole Normale Orientale Israélite, Paris, was principal of several Jewish schools in the East, and founded the Jewish schools at Safed, Palestine. In collaboration with Col. Rushdi Bey he has compiled three French readers that have been officially introduced into the Turkish schools of the Ottoman empire, namely: "Alphabet Français," 1889; "Premier Livre de Lecture," 1888; and "Cours Moyen de Lecture," 1889. He is the author of "Histoire des Israélites de l'Empire Ottoman," Paris, 1897; and "Les Sciences Mystiques chez les Juifs d'Orient," *ib.* 1900. In 1901–02 he published "La Communauté Israélite de Safed" (in "Revue des Ecoles de l'Alliance Israélite Universelle"). For sixteen years Franco has contributed to two Anglo-French periodicals of Con-

stantinople, "Stamboul" (1886–97) and "Le Moniteur Oriental" (1897–1903). He is now director of the Alliance Israélite Universelle School at Shumla, Bulgaria. S.

Pinhero Aaron Franco: Dutch mathematician; lived at Amsterdam in the seventeenth century; author of the astronomical work "Lunario Perpetuo Calculado," Amsterdam, 1657 (Kayserling, "Bibl. Esp.-Port.-Jud." p. 47).

Raḥamim Franco: Talmudist and chief rabbi of Hebron; born 1833; died 1896. In 1851, when Rhodes was devastated by a terrible earthquake, Franco went to Europe to collect subscriptions for the victims of the disaster. On his return he settled at Jerusalem, and toward the end of his life at Hebron, where he officiated for seven months as chief rabbi. He was the author of three works, two of which are still in manuscript. The third is a book of responsa entitled "Sha'are Raḥamim," Jerusalem, 1881.

Samuel Franco: Turkish cabalist, and chief rabbi of Salonica in 1492.

Solomon Franco: Printer at Constantinople, and founder of a press which existed there for nearly fifty years. Rashi's commentary on the Bible without the text was the only work printed during Solomon's lifetime (1639). Joseph of Trani's responsa, which appeared next year, were published by his son **Abraham.** In collaboration with his brother Jacob Gabbai, he printed the "Bet Aharon" of Aaron Souroujon, 1678, and other works. The last book printed by him was the "Zebaḥ Sebaḥ" of Solomon Algazi (1683). Abraham Franco was enabled, through the generosity of Nissim ben David, to cast a new set of fonts for the "Leb Sameaḥ" of 1652. Before that time, he states, none in Constantinople but his father Solomon had known how to cast type.

D. M. Fr.

FRANCOLM, ISAAC ASHER: German preacher and religious teacher; born at Breslau Dec. 15, 1788; died there July 1, 1849; Ph.D., Leipsic, 1817. After conducting a Jewish elementary school at Breslau for three years, he was called in 1820 to the community of Königsberg, Prussia, as preacher and religious teacher (one of his rivals for the position being Zunz), and was confirmed in his office by the government.

Francolm did much to modernize the synagogue service and religious instruction, and he introduced into Germany the confirmation of girls. Some Orthodox members of the community brought this matter before the government, and Francolm was forbidden not only to confirm girls, but also to introduce any other innovations into the service, especially preaching in the vernacular. On the expiration of his contract in 1826 he declined a reengagement, and accepted the position of chief inspector and principal of the Königliche Wilhelmsschule, a Jewish institution at Breslau, in which office he remained until 1847.

Among Francolm's numerous works are: "Der Alte Bund: Aufsätze für Israeliten zur Beförderung des Richtigen Verständnisses der Bibel," a religious weekly of which only ten numbers were published, 1820; "Die Grundzüge der Religionslehre aus den Zehn Geboten Entwickelt," Neustadt-on-the-Oder, 1826; "Die Mosaische Sittenlehre: Zum Gebrauch beim Religionsunterricht," Breslau, 1831; "Worte eines Juden nach Beendeter Landestrauer um den König Friedrich Wilhelm III.: An Seine Christlichen Brüder Gerichtet," *ib.* 1840; "Die Juden und die Kreuzfahrer in England Unter Richard Löwenherz." Besides these he published works of fiction and some books on mathematics and pedagogics.

Bibliography: H. Jolowicz, *Gesch. der Juden in Königsberg*, pp. 129 *et seq.*; Jost, *Neuere Gesch. der Israeliten*, iii. 162, 190; Vogelstein, *Beiträge zur Gesch. des Unterrichtswesens in der Jüd. Gemeinde zu Königsberg*, pp. 21 *et seq.*, Königsberg, 1903.

S. F. P.

FRANGI, ḤAYYIM (surnamed **Ḥayyim Menahem):** Turkish rabbinical author; born in 1833 at Constantinople; died there in 1903. He has published two Hebrew works: "Yismaḥ Leb" (2 vols., Salonica, 1867–83), containing responsa and sermons; and "Maṭṭeh Leḥem" (Constantinople, 1902), a collection of all the juridical decisions rendered by the author in the twenty-five years during which he has exercised the functions of president of the rabbinical tribunal. He has also edited the work of one of his teachers, Eliezer of Toledo, under the title "Mishnat Rabbi Eliezer" (2 vols., Salonica and Smyrna, 1853).

S. M. Fr.

FRÄNK, BÄR B. GERSHON: Hungarian scholar; born in Presburg about 1777; died there on the second day of the Feast of Weeks, 1845. He was shoḥeṭ and teacher in his native city for more than forty years. He wrote ten works, of which the following, some in German with Hebrew characters, and some partly in Hebrew, were published: "Megillat Matityahu," Vienna, 1806, 1822; "Maṭṭeh Mosheh," an allegory after the Talmud and the Midrash, Presburg, 1834; "Maḥaneh Yisrael," observances for Jewish women, together with moral precepts from the Talmud, Vienna, 1816; "Maḥaneh Yissakar," *ib.* 1822; "Ḥuṭ ha-Meshullash," regulations for Shema', ẓiẓit, and tefillin, *ib.* 1829; "Maḥaneh Levi," Prague, 1827. The last three are compilations of "dinim." His last work was "Or ha-Emunah," tales from the Pentateuch, with notes in Hebrew, Presburg, 1841.

Bibliography: Preface to *Or ha-Emunah*; Benjacob, *Ozar ha-Sefarim*, s.v.; Weisz, *Abne Bet ha-Yoẓer*, pp. 19, 77.

S. P. Wi.

FRANK, EVE. See Frank, Jacob, and the Frankists.

FRANK, JACOB, AND THE FRANKISTS: The Frankists were a semi-Christian religious organization which came into being among the Jews of Poland about the middle of the eighteenth century. This organization was the ultimate result of two causes: (1) the Messianic movement which agitated the Jewish world after the appearance of Shabbethai Ẓebi, the pseudo-Messiah from Smyrna, and which degenerated later into religious mysticism; and (2) the social and economic upheaval in the life of the Polish Jewry. The spread of the Messianic movement (1660–70) occurred in the period following the harrying and killing of the Jews in

the days of Bogdan Chmielnicki. Hundreds of ruined communities, in which almost every family mourned its martyred dead, awaited aid from Heaven. They were inclined to see in the Ukraine massacres the pre-Messianic sufferings (see Eschatology), and in Shabbethai Ẓebi the coming Messiah-Deliverer. The fall of the false Messiah and his conversion to Mohammedanism estranged him from many of his followers, but among the more uncultured portion of the Jewish people the belief in the mystic mission of Shabbethai persisted for a long time.

Having lost its political significance, Messianism at the end of the seventeenth century assumed a mystical coloring, and the open popular movement was transformed into a secret sectarian cult. A half-Jewish, half-Mohammedan sect of Shabbethaians was established in Turkey. In Poland, and particularly in Podolia and Galicia, there were formed numerous secret societies of Shabbethaians known among the people as "Shabbethai Ẓebiists," or "Shebs" (according to the Western pronunciation of "Shabbethai"). In expectation of the great Messianic revolution the members of these societies threw off the burden of strict Jewish dogma and discarded many religious laws and customs. The mystical cult of the Shebs included the elements of both asceticism and sensuality: some did penance for their sins, subjected themselves to self-inflicted torture, and "mourned for Zion"; others disregarded the strict rules of chastity characteristic of Judaism, and at times gave themselves over to licentiousness. The Polish rabbis attempted the extermination of the "Shabbethaian heresy" in the assembly of Lemberg (1722) and elsewhere, but could not fully succeed, as it was kept alive mostly in secret circles which had something akin to a Masonic organization.

Jacob Frank.

The spread of mysticism was favored by the distressing social-economic condition of the Jews in Podolia and Galicia during the first half of the eighteenth century, when Poland was falling into decay, and the Haidamak movements destroyed in many Jewish centers security of person and property. The resulting decline of the rabbinical schools and of mental activity was on the whole favorable to the growth of mystical doctrines, which among the masses assumed at times the most monstrous forms.

The Shabbethaian Heresy.

From among these secret circles of the Shabbethaians came the founder of the Frankist sect, **Jacob Frank**, born in Podolia about 1726. His father was expelled from the community for belonging to the secret society of Ẓebiists, and moved to Wallachia, where the influence of the Turkish Shabbethaians was strongly felt. While still a boy at school Frank displayed an aversion to Jewish learning founded on the Talmud, and afterward often styled himself "a plain man" or "an untutored man." In the capacity of a traveling merchant he often entered Turkey; there he was named "Frank," a name generally given in the East to a European; and there he lived in the centers of contemporary Shabbethaianism—Salonica and Smyrna.

In the beginning of the fifth decade of the eighteenth century he became intimate with the leaders of the sect and adopted its semi-Mohammedan cult. In 1755 he appeared in Podolia, and, gathering about him a group of local sectarians, began to preach to them the revelations which were communicated to him by the successors of the false Messiah in Salonica. In their secret gatherings was performed, under the leadership of Frank, much that was directly opposed to the religious-ethical conceptions of the orthodox Jews. One of these gatherings ending in a scandal, the attention of the rabbis was drawn to the new propaganda. As a foreigner, Frank was obliged to leave Podolia, while his followers were given over to the rabbis and the "ḳahal" authorities (1756). At the rabbinical court held in the village of Satanov many of the sectarians confessed to having broken the fundamental laws of morality; and women confessed to having violated their marriage vows, and told of the sexual looseness which reigned in the sect under the guise of mystical symbolism.

As a result of these disclosures the congress of rabbis in Brody proclaimed a strong "ḥerem" (excommunication) against all impenitent heretics, and made it obligatory upon every pious Jew to search them out and expose them. The persecuted sectarians informed the Catholic Bishop of Kamenetz-Podolsk that the Jewish sect to which they belonged rejected the Talmud and recognized only the sacred book of the Cabala, the Zohar, which they alleged admitted the truth of the doctrine of the Trinity. They claimed that they regarded the Messiah-Deliverer as one of the three divinities, but failed to state that by the Messiah they meant Shabbethai Ẓebi. The bishop took seriously the "Anti-Talmudists," or "Zoharists," as the sectarians began to style themselves, and in 1757 arranged a religious

discussion between them and the rabbis. The Anti-Talmudists presented their equivocal theses, to which the rabbis gave a very lukewarm and unwilling reply for fear of offending the Church dignitaries who were present. The bishop decided that the Talmudists had been vanquished, and ordered them to pay a fine to their opponents, and to burn all copies of the Talmud in the bishopric of Podolia.

The Anti-Talmudists.

After the death of their patron, the bishop, the sectarians were subjected to severe persecution by the rabbis and the heads of the ḳahals. The Anti-Talmudists succeeded in obtaining from Augustus III. (1733–63) an edict guaranteeing them safety; but even this did not avail to free them from the unfortunate position of men who, having parted from their coreligionists, had not yet succeeded in identifying themselves with another faith.

At this critical moment Jacob Frank came to Podolia with a new project; he posed as a direct successor of Shabbethai Ẓebi, and assured his adherents that he had received revelations from Heaven. These revelations called for the conversion of Frank and his followers to the Christian religion, which was to be a visible transition stage to the future "Messianic religion." In 1759 negotiations looking toward the conversion of the Frankists to Christianity were being actively carried on with the higher representatives of the Polish Church; at the same time the Frankists tried to secure another discussion with the rabbis. The Polish primate Lubenski and the papal nuncio Nicholas Serra were suspicious of the aspirations of the Frankists, but at the instance of the administrator of the bishopric of Lemberg, the canon Mikulski, the discussion was arranged. It was held in Lemberg, and was presided over by Mikulski.

This time the rabbis energetically repulsed their opponents. After the discussion the Frankists were requested to demonstrate in practise their adherence to Christianity (1759); Jacob Frank, who had then arrived in Lemberg, encouraged his followers to take the decisive step. The baptism of the Frankists was celebrated with great solemnity in the churches of Lemberg, members of the Polish nobility acting as god-parents. The neophytes adopted the names of their godfathers and godmothers, and ultimately joined the ranks of the Polish nobility. In the course of one year more than 500 persons were converted to Christianity in Lemberg, among them the intimates and the disciples of Frank. Frank himself was baptized in Warsaw, Augustus III. acting as godfather (1759). The baptismal name of Frank was "Joseph." The insincerity of the Frankists soon became apparent, however, for they continued to intermarry only among themselves, and held Frank in reverence, calling him "the holy master"; and it was also discovered that Frank endeavored to pass as a Mohammedan in Turkey. He was therefore arrested in Warsaw (1760) and delivered to the Church's tribunal on the charge of feigned conversion to Catholicism and the spreading of a pernicious heresy. The Church tribunal convicted Frank as a teacher of heresy, and imprisoned him in the monastery in the fortress of Chenstochov, so that he might not communicate with his adherents.

Baptism of the Frankists.

Frank's imprisonment lasted thirteen years, yet it only tended to increase his influence with the sect by surrounding him with the aureola of martyrdom. Many of the Frankists established themselves in the vicinity of Chenstochov, and kept up constant communication with the "holy master," often gaining access to the fortress. Frank inspired his followers by mystical speeches and epistles, in which he stated that salvation could be gained only through the "religion of Edom," or "dat" (="law"), by which was meant a strange mixture of Christian and Shabbethaian beliefs. After the first partition of Poland Frank was released from captivity by the Russian general Bibikov, who had occupied Chenstochov (1772). Until 1786 Frank lived in the Moravian town of Brünn, and was surrounded by a numerous suite of sectarians and "pilgrims" who came from Poland. For many of the pilgrims there was great attraction in the person of Eve, the beautiful daughter of Frank, who at this time began to play an important rôle in the organization of the sect.

Frank in Prison.

Accompanied by his daughter, Frank repeatedly traveled to Vienna, and succeeded in gaining the favor of the court. The pious Maria Theresa regarded him as a disseminator of Christianity among the Jews, and it is even said that Joseph II. was favorably inclined to the young Eve Frank. Ultimately the sectarian plans of Frank were found out here also; he was obliged to leave Austria, and moved with his daughter and his suite to Offenbach, a small German town. Here he assumed the title of "Baron of Offenbach," and lived as a wealthy nobleman, receiving money from his Polish and Moravian adherents, who made frequent pilgrimages to Offenbach. On the death of Frank (1791) Eve became the "holy mistress" and the leader of the sect. As time went on the number of pilgrims and the supply of money constantly diminished, while Eve continued to live in her accustomed luxury. She finally became involved in debt, and died neglected in 1816.

The Frankists scattered in Poland and Bohemia were gradually transformed from feigned to real Catholics, and their descendants merged into the surrounding Christian population. The sect disappeared without leaving any traces in Judaism because it had no positive religious-ethical foundation. Attempts to formulate the teachings of Frank upon the basis of a collection of his utterances preserved in manuscript ("Biblia Balamutna") have so far failed. There is no doubt, however, that Frankism consisted in a negation of the religious as well as of the ethical discipline of Judaism. "I came to free the world from the laws and the regulations which have hitherto existed," says Frank in one of his characteristic utterances. In this movement visionary mysticism degenerated into mystification, and Messianism into an endeavor to get rid of the "Jewish sorrow" by renouncing Judaism. See Baruch Yavan.

FRANK, KATHI (KATHARINA FRANKL): Austrian actress; born at Bösing, near Presburg, Oct. 11, 1852. She appeared for the first time at the Viktoria Theater at Berlin in 1871. After acting at Potsdam and Bremen, she joined (1872) the Vienna Stadttheater and in 1875 the Burgtheater (imperial court theater), returning in 1876 to the Stadttheater. From 1882 to 1899 she appeared successively at Hamburg, Riga, Vienna (Carltheater), Stuttgart (court theater), and Frankfort-on-the-Main. During 1900 and 1901 she traveled, playing at the German theaters at Moscow, at St. Petersburg, and at the Irving Place Theater in New York. She is at present (1903) playing in New York. Her principal rôles are: *Maria Stuart*, *Judith* in "Uriel Acosta," *Jane Eyre* in "Die Waise aus Lowood," *Jungfrau von Orleans*, *Martha* in "Demetrius," *Lady Macbeth*, *Iphigenie*, *Sappho*, *Deborah*, etc.

FRANK, MENDEL: Polish rabbi of the first half of the sixteenth century. He was at first rabbi of Posen, and a decision rendered by him there on a question of divorce is mentioned by R. Shaknah of Lublin (see "Ḥelḳat Meḥoḳek" on Eben ha-'Ezer, 45). Later he became rabbi of Brisk or Brest-Litovsk, and an order issued by King Sigismund I. (Sept. 4, 1531) commanding the Jews of Brest-Litovsk to submit to R. Mendel's jurisdiction proves either that he was not popular in that place, or, as Bershadski contends ("Litovskie Evrei," p. 377, St. Petersburg, 1883), that the Jews of Lithuania did not like the newly instituted rabbinical jurisdiction over their affairs, preferring to submit their differences to the general authorities. There is also extant a letter from Queen Bona, dated May 28, 1532, ordering the starost of Brest not to recognize appeals of Jews from the decisions of R. Mendel Frank and not to interfere with him in any way. The interest which the king and the queen took in R. Mendel, and the antagonism of the Jews, make probable the conjecture that he was not chosen rabbi by the community, but was forced upon it by Michael Esofovich, who was made chief of the Jews of Lithuania in 1514, and had, among other privileges conferred upon him by the king, the right to appoint rabbis.

FRANK, NATHAN: American lawyer; member of the national House of Representatives; born in Peoria, Illinois, Feb. 23, 1852; educated in the public schools there, at Washington University, St. Louis, and at the Harvard Law School, from which he graduated in 1871. He has since practised law in St. Louis, and is the author of a work on bankruptcy law. He was the Republican nominee for the 50th Congress, but was defeated; was renominated for the 51st Congress and elected.

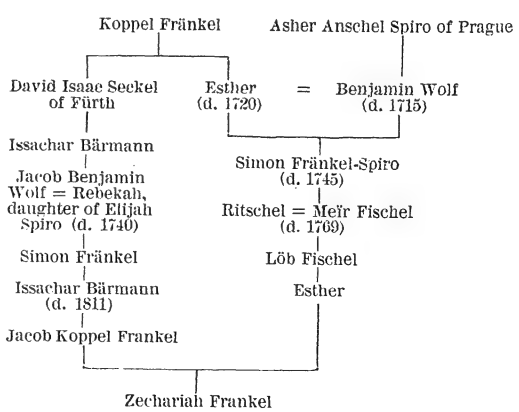
A.

FRANKAU, JULIA (*née* **JULIA DAVIS**): British author and novelist; born in Dublin, Ireland, July 30, 1864. Julia Frankau was educated by Madame Paul Lafargue, daughter of Karl Marx. Writing under the pseudonym "Frank Danby," she has achieved conspicuous success as a novelist. Her first work, "Doctor Phillips: A Maida Vale Idyll," a story of Jewish life in the West End of London, was published in 1887, and created quite a sensation by its realistic treatment. It was followed by "Babes in Bohemia" (London, 1889) and "Pigs in Clover" (*ib.* 1903), also with Jewish characters. Under her own name Julia Frankau issued, in 1900, an elaborate treatise on color-printing entitled "Eighteenth Century Color-Plates," and, in 1902, "The Life and Works of John Raphael Smith." She is a prolific contributor to the periodical press, and has written a number of critical essays for "The Saturday Review."

J. F. H. V.

FRÄNKEL (FRANKEL): A family of scholars and Talmudists, the earliest known member of which was **Koppel Fränkel** (1650), the richest Viennese Jew of his time. In 1670, when the Jews were banished from Vienna, Koppel Fränkel's children settled at Fürth; only one of his four daughters was married—**Esther,** to Benjamin Wolf b. Asher Anschel Spiro, preacher and head of the yeshibah of Prague, and a descendant of Jehiel Michael Spiro, who flourished about 1560. The children from this alliance, the first of whom was **Simon,** chief (פרימום) of the community of Prague, bore the compound name of **Fränkel-Spiro.** A short time later another alliance was made between these two families: **Jacob Benjamin Wolf Fränkel,** of Fürth, a descendant of Koppel Fränkel on the male side, married Rebekah, daughter of Elijah Spiro, a cousin of Benjamin Wolf, the founder of the Fränkel-Spiro branch. This latter branch also subsequently married into the main Fränkel branch, and from this triple alliance descended the well-known scholar Zechariah Frankel, whose father adopted



the name of "Frankel." The pedigree of Zechariah Frankel may therefore be constructed as on the preceding page.

J. M. SEL.

FRÄNKEL, ALBERT: German physician; born March 10, 1848, at Frankfort-on-the-Oder. He received his education at the gymnasium of his native town and at the University of Berlin, whence he graduated as doctor of medicine in 1870. After having been assistant to Kussmaul, Traube, and Von Leyden in Berlin, he settled in the German capital, becoming lecturer at the university in 1877. He was a nephew of Traube (d. 1876), the third volume of whose "Gesammelte Beiträge zur Pathologie und Physiologie" he published in 1878. Fränkel received the title of "Professor" in 1884, and became director of the medical department of the Am Urbanplatz Hospital, Berlin.

Following in the footsteps of Traube, Fränkel's first works were on experimental pathology, among them being the following: "Ueber den Einfluss der Verminderten Sauerstoffzufuhr zu den Geweben auf den Eiweiszerfall," in Virchow's "Archiv," vol. lxvii.; with Von Leyden, "Ueber die Grösse der Kohlensäureausscheidung im Fieber," *ib.* vol. lxxvi.; with J. Geppert, "Ueber die Wirkungen der Verdünnten Luft auf den Organismus," Berlin, 1873.

After becoming lecturer at the university his field of special research was the diseases of the lungs and the heart. Of his essays and works in this department may be mentioned: "Bakteriologische Mittheilungen über die Aetiologie der Pneumonie," in "Zeitsch. für Klinische Medizin," vols. x. and xi., in which essay he was the first to expound the theory of the micrococci of pneumonia; "Pathologie und Therapie der Krankheiten des Respirationsapparates," 1890–1902; "Ueber Septikopyämische Erkrankungen, Speciell Akute Dermatomyositis," 1894; "Ueber Akute Leukämie," 1895; "Zur Pathologischen Anatomie des Bronchialasthma," 1898. His writings have appeared in the "Charité Annalen," "Zeitschrift für Klinische Medizin," "Berliner Klinische Wochenschrift," and "Deutsche Medizinische Wochenschrift."

S. F. T. H.

FRÄNKEL, ALEXANDER: Austrian physician; born at Vienna Nov. 9, 1857. After attending the gymnasium and university of that city, he received the degree of doctor of medicine in 1880 and joined the sanitary corps of the Austrian army. As surgeon of the Teutonic Knights he took part in the Servian-Bulgarian war of 1885–86. He resigned from the army in 1890, becoming lecturer on surgery at the University of Vienna. Since 1893 he has been chief surgeon at the Vienna Karolinen Kinderspital, and since 1895 assistant chief surgeon of the general dispensary there.

In 1896 Fränkel became editor-in-chief of the "Wiener Klinische Wochenschrift." He has written many essays for this journal, and also for the "Wiener Medizinische Wochenschrift," "Wiener Klinik," "Zeitschrift für Heilkunde," "Centralblatt für Chirurgie," and other publications. Fränkel has embraced Christianity.

S. F. T. H.

FRÄNKEL, BENJAMIN: Russian scholar; lived at Warsaw in the first half of the nineteenth century. He traveled in Germany and England. He published the following works: (1) "Teru'at Melek," on patriotism and the obligation of loyalty, published together with a German translation, Breslau, 1833; (2) "Neẓaḥ we-Hod," treating of the immortality and perpetual peace of the soul according to the prophets and philosophers, published together with an English translation, London, 1836; (3) "Ebel Kabed," an elegy in Hebrew and English on the death of Baron Nathan Rothschild, *ib.* 1836.

Samuel Ghirondi, who made the acquaintance of Fränkel in Italy, highly praises his learning and piety.

H. R. I. BR.

FRÄNKEL, DAVID BEN NAPHTALI (known also as **David Mirles**): German rabbi; born at Berlin about 1704; died there April 4, 1762. For a time he was rabbi of Dessau, and became chief rabbi of Berlin in 1742. Fränkel exercised a great influence as teacher over Moses Mendelssohn, who followed him to the Prussian capital. It was Fränkel who introduced Mendelssohn to Maimonides' "Moreh Nebukim," and it was he, too, who befriended his poor disciple, procuring for him free lodging and a few days' board every week in the house of Ḥayyim Bamberger.

As a Talmudist Fränkel was almost the first to devote himself to a study of the Jerusalem Talmud, which had been largely neglected. He gave a great impetus to the study of this work by his "Ḳorban ha-'Edah," a commentary in three parts (part 1, on the order Mo'ed, Dessau, 1743; part 2, on Nashim, Berlin, 1757; part 3, on Neziḳin, *ib.* 1760). His additional notes on the Jerusalem Talmud and on Maimonides were published, together with the preceding work, under the title "Shiyyure Ḳorban," Dessau, 1743.

S. S. A. R.

FRÄNKEL, ELKAN: Court Jew (1703–12) to the margrave William Frederic of Brandenburg-Ansbach; died in the state prison of Wülzburg, near Weissenburg on the Sand, in 1720. His family was among the exiles of Vienna in 1670, his father being R. Enoch Levy, his mother a daughter of the wealthy Koppel Ritschel in Vienna. Elkan is first mentioned in 1686 as a member of the Jewish community of Fürth. There he took charge of the financial interests of the Margrave of Ansbach, who had a part of the Fürth Jews under his protection; he was appointed by the margrave parnas of Fürth in 1704, and chief parnas of Ansbach in 1710. Fränkel acquired great influence at court; his

advice was asked in important political affairs, and he helped many to secure official positions.

The Jews of the margravate had every reason to be grateful to him; they owed to him, for example, the remission of a heavy fine which had been imposed upon them after an official investigation into their practise of usury (1708). He also boasted of having prevented a contemplated confiscation of Hebrew books (1702). His enemies later on made use of this assertion to complete his ruin; for he was much hated by Jews and Christians for his haughty demeanor. In 1712 Fränkel was denounced by a converted Jew for being in possession of blasphemous books, for making use of his influence at court for encroaching upon all branches of political life, and for having defrauded the public revenues. The investigation conducted on behalf of the government by a personal enemy of Fränkel was most partial; all these accusations were declared to be true, although no proofs were adduced, and even the pretended deficit could not be detected.

The margrave did nothing to protect his favorite, but sentenced him to be scourged in the marketplace and to be imprisoned for life. He died in prison, as stated above; his fortune was confiscated, and his family expelled.

D. A. Fe.

FRÄNKEL, ERNST: German physician; born at Breslau May 5, 1844; studied medicine at the universities of Berlin, Vienna, and Breslau (M.D. 1866). He took part in the Austro-Prussian war in 1866 and in the Franco-Prussian war in 1870–71 as assistant surgeon. In 1872 he established himself as physician, especially as accoucheur and gynecologist, in his native town. In 1873 he became privatdocent at the Breslau University, and in 1893 honorary professor. He has taken an active part in the politics and government of the city, and in 1903 was elected alderman of Breslau.

Fränkel has written several essays for the medical journals, among which are "Diagnose und Operative Behandlung der Extrauterinschwangerschaft," in Volkmann's "Sammlung Klinischer Vorträge," 1882; and "Die Appendicitis in Ihren Beziehungen zur Schwangerschaft, Geburt und Wochenbett, *ib.* 1898. He is also the author of "Tagesfragen der Operativen Gynäkologie," Vienna and Leipsic, 1896; "Die Allgemeine Therapie der Krankheiten der Weiblichen Geschlechtsorgane," in Eulenburg's "Handbuch der Allgemeinen Therapie und der Therapeutischen Methodik," Berlin and Vienna, 1898–99.

S. F. T. H.

FRÄNKEL, GABRIEL: Court Jew of the margraves of Ansbach about 1700. He was very influential at court, and highly esteemed by the Jews of the margravate. He maintained his prominent position until his death. In reward of his faithful services all the privileges granted to him were continued to his heirs by a special charter (1730).

Bibliography: Hänle, *Gesch. der Juden im Ehemaligen Fürstenthum Ansbach*, Ansbach, 1867.

FRÄNKEL, HIRSCH: Chief rabbi in the margravate of Ansbach, with residence at Schwabach, 1709–13; died in prison 1723. He was a brother of Elkan Fränkel, and was accused with him of possessing blasphemous and superstitious books. After a searching investigation, and in accordance with the judgment of the University of Altorf, he was sentenced to imprisonment for life.

Bibliography; Hänle, *Gesch. der Juden im Ehemaligen Fürstenthum Ansbach*, Ansbach, 1867.

FRÄNKEL, JONAS: German banker and philanthropist; son of Joel Wolf, grandson of David Fränkel, the author of "Korban 'Edah"; born at Breslau at the end of the eighteenth century; died there Jan. 27, 1846. Owing to his great commercial ability he rose from extreme poverty to affluence, and became one of the leading bankers of Breslau. As an acknowledgment of the services rendered by him in the development of commerce and industry in Germany, the Prussian government awarded him the title of "Kommerzienrath." Notwithstanding his numerous occupations, Fränkel was an indefatigable communal worker. He was the director of many charitable institutions, to the support of which he contributed liberally; he erected at his own expense a hospital, to which were annexed an orphanage, a bet ha-midrash, and a synagogue. Being childless, he bequeathed part of his fortune to a family foundation, which provides dowries for portionless girls of the Fränkel family; but the greater part of his wealth he left to charitable institutions, especially to the erection of a Jewish seminary. This seminary, which bears his name, was inaugurated at Breslau in 1854 and became the greatest Jewish institution of its kind; in it most of the leading Jewish scholars of the second half of the nineteenth century were educated. See Seminaries, Rabbinical.

J. I. Br.

FRÄNKEL, LUDWIG: German writer; born at Leipsic Jan. 24, 1868. He studied at the universities of Leipsic and Berlin, and in England, receiving the degree of doctor of philosophy in 1889. He is the author of most of the articles pertaining to literature in the fourteenth edition of Brockhaus' "Konversations Lexikon." He became secretary of the German National Museum at Nuremberg in 1892. In 1893 he resigned this position to become docent at the Technical High School of Stuttgart (1893–1895). At present (1903) he is instructor in Munich.

Fränkel is a prolific writer on literature, modern languages, German history, bibliography, and folklore. His book, "Warum Heisst Rom die Ewige Stadt?" may be specially mentioned. It received the Witte prize in 1886, and was published in 1891 under the title "Rom, die Ewige Stadt der Weltgeschichte, und die Deutschen." His editions of Uhland appeared, together with various treatises, in 1888, 1889, 1893, 1894, 1903; those of Shakespeare, 1889–1894, 1893, 1895–1896; that of Schiller's "Wal-

lenstein," 1902; a German edition of Manzoni, "I Promessi Sposi," 1893; and of Bojardo, "Orlando Inamorato," 1895. He also wrote articles on many Jewish subjects for several German journals.

S. F. T. H.

FRÄNKEL, LUDWIG F.: German physician; born May 23, 1806, at Berlin; died there July 6, 1872. He received his education at the University of Berlin, from which he graduated in 1830, in the same year becoming physician in that city, with water-cure as his specialty. In 1840 he was called to Ebersdorf, in the principality of Reuss, as chief physician of the water-cure hospital; but he remained there only four years, when he removed to Magdeburg, Prussia, where he practised until 1848. He then became chief physician of the water-cure hospital in Berlin (Heilanstalt der Wasserfreunde), resigning this position in 1867 on account of his extensive private practise.

From 1856 to 1857 Fränkel edited in Berlin the "Journal für Naturgemässe Gesundheitspflege und Heilkunde, mit Besonderer Beziehung zur Wasserheilkunde." He has published essays in "Jahresbericht des Vereins der Wasserfreunde" and "Medizinische Centralzeitung," and has written the following separate works: "Die Specielle Physiologie," Berlin, 1839; "Aerztliche Bemerkungen über die Anwendung des Kalten Wassers in Chronischen Krankheiten," *ib.* 1840; "Das Wesen und die Heilung der Hypochondrie," *ib.* 1842; "Arznei oder Wasser?" Magdeburg, 1848; "Behandlung der Fieberhaften Hautausschläge und der Primären Syphilis mit Wasser," Berlin, 1850.

FRÄNKEL, MOSES BEN ABRAHAM: German rabbi; father of David Fränkel; born at Berlin June 30, 1739; died at Dessau Feb. 20, 1812. In 1787 he settled at Dessau, where he filled the office of rabbi; he was at the same time "Messrabbiner" at Leipsic during the periodical fairs. Possessed of some means, he not only refused a salary, but also supported young Talmudical students. In cases of inheritance submitted to him for decision, he often, when the amount was not large, satisfied both parties by paying out of his own pocket the disputed sum. Fränkel was the author of "Be'er Mosheh," responsa, dealing chiefly with cases of inheritance (Berlin, 1803); and "Ha-Bi'urim de-Dibre Ḳohelet," a twofold commentary—cabalistic and Talmudic—on Ecclesiastes (1809).

FRÄNKEL, SECKEL ISAAC: German banker; born at Parchim, Mecklenburg-Schwerin, Jan. 14, 1765; died at Hamburg June 4, 1835.

He acquired by private study not only a high degree of general culture, but also a thorough knowledge of nine languages, ancient and modern, supporting himself at the same time by teaching. He subsequently went to Hamburg, where he became bookkeeper in one of the larger banking-houses. He soon founded a bank himself and accumulated a considerable fortune. Although not unfavorably disposed toward Reform, Fränkel opposed the introduction of Eduard Kley's German hymn-book, considering it too radical a departure from the past of Judaism. With M. J. Bresslau, heading the Reform Tempel Verein, he issued a prayer-book, the "Ordnung der Oeffentlichen Andacht" (Hamburg, 1819), in which Hebrew prayers were interspersed with the newly introduced German hymns. Fränkel translated the apocryphal books from Greek into Hebrew (Leipsic, 1830), and wrote a poem in Hebrew on the sojourn of the French in Hamburg, entitled "Ḥeble ha-Moniyyah we-Ḳin'at El" (Altona, 1815).

FRÄNKEL, SIGMUND: Austrian physician and chemist; born at Cracow May 22, 1868. After completing his course at the gymnasium of Gratz (Styria), he studied medicine at the universities of Prague, Freiburg in Baden, and Vienna, graduating from the last-named in 1892. After working at the zoological station at Triest and in Strasburg and Cambridge, he went to Vienna, where he lectured on physiological chemistry and pharmacology at the university.

Fränkel has written essays in Pflüger's "Archiv für Physiologie," Hoppe-Seyler's "Zeitschrift für Physiologische Chemie," "Wiener Klinische Wochenschrift," "Wiener Medicinische Blätter"; "Monatshefte für Chemie"; and the "New York Medical Record." He has also published the following works: "Ueber Spaltungproducte des Eiweisses bei der Peptischen und Tryptischen Verdauung," Wiesbaden, 1896; and "Arzneimittelsynthese," Berlin, 1901.

FRÄNKEL (FRANKEL-SPIRA), SIMON WOLF: Head of the Jewish community in Prague for two decades beginning May 20, 1724, and a stanch defender of his oppressed coreligionists; died June 9, 1745. He was wealthy by inheritance, and his extensive business interests brought him often into contact with the great of the land; he thus gained a knowledge of the laws of the country which raised him high above the mass of his brethren. He founded an orphan asylum, and won lasting popularity by elevating the standard of the Jewish school system. He was, however, very fond of display, and not free from ambition. At the birth of Archduke—afterward Emperor—Joseph in April, 1741, he furnished at his own expense a costly public festival and parade in the Jewry of Prague, on which occasion he appeared in a carriage drawn by six horses and surrounded by footmen and horse-guards. This fondness for show aroused the envy of the mob, which some years later found vent in unrestrained pillage of the Jewry, several Jews being murdered and many more severely wounded. Following upon this came Maria Theresia's order expelling all Jews from Bohemia. Simon Wolf Fränkel, who was insulted and slandered, collapsed completely under the burden of mental and spiritual troubles. Only a few days before his death he signed a petition for aid addressed to the London Jews.

His successor as the head of the community was a

son of his brother Koppel, **Israel Fränkel.** His valuable services to the community in advancing the home manufacture of silk, and in improving the "Invalidenbräuhaus," of which he for a long time was the lessee, were recognized by the Bohemian "Landesgubernium." Israel Fränkel, who was a devoted student of the Mishnah, died in his birthplace, Prague, on April 15, 1767.

FRÄNKEL, WOLFGANG BERNHARD: German physician; born at Bonn Nov. 11, 1795; died at Elberfeld March 5, 1851. He took an active part in the campaigns of 1812, 1813, 1814, and 1815 as an officer in the middle-Rhenish army, fighting at first with, and later against, Napoleon. Returning to his native town in 1815, Fränkel studied at the gymnasium and the university, receiving his degree as doctor of medicine in 1824. He then settled in Elberfeld, where he practised until his death. He embraced the Christian religion in 1840. Fränkel was the author of "Die Flechten und Ihre Behandlung," Elberfeld, 1830, 3d ed. Wiesbaden, 1855; "Das Bekenntniss des Proselyten, das Unglück der Juden und Ihre Emancipation in Deutschland," Elberfeld, 1841; "Die Unmöglichkeit der Emancipation der Juden im Christlichen Staat," *ib.* 1841; "Die Rabbiner Versammlung und der Reformverein," *ib.* 1844.

FRANKEL, ZECHARIAS: German theologian; born at Prague Sept. 30, 1801; died at Breslau Feb. 13, 1875. Frankel was the founder and the most eminent member of the school of historical Judaism, which advocates freedom of research, while in practical life it upholds the authority of tradition. Frankel was, through his father, a descendant of Vienna exiles of 1670 and of the famous rabbinical Spira family, while on his mother's side he descended from the Fischel family, which has given to the community of Prague a number of distinguished Talmudists. He received his early Talmudic education at the yeshibah of Bezalel Ronsperg (Daniel Rosenbaum); in 1825 he went to Budapest, where he prepared himself for the university, from which he graduated in 1831. In the following year he was appointed district rabbi ("Kreisrabbiner") of Leitmeritz by the government, being the first rabbi in Bohemia with a modern education. He made Teplitz his seat, where the congregation, the largest in the district, had elected him rabbi. He was called to Dresden in 1836 as chief rabbi, and was confirmed in this position by the Saxon government. In 1843 he was invited to the chief rabbinate at Berlin, which position had been vacant since 1800, but after a long correspondence he declined, chiefly because the Prussian government, in accordance with its fixed policy, refused to officially recognize the office. He remained in Dresden until 1854, when he was called to the presidency of the Breslau seminary, where he remained until his death.

Zecharias Frankel.

The atmosphere of Prague was wholly favorable to the development of the romantic love for the past that is at the bottom of the principle of historic Judaism which Frankel advocated. He furthermore held firmly the belief that reason based on scholarship and not mere desire on the part of the laity must be the justification for Reform. In this sense Frankel declared himself when the president of the Teplitz congregation expressed the hope that the new rabbi would introduce reforms and do away with the "Missbräuche" (abuses). He stated that he knew of no abuses; and that if there were any it was not at all the business of the laity to interfere in such matters (Brann, in his "Jahrbuch," 1899, pp. 109 *et seq.*). Still he introduced some slight modifications in the worship, as the abrogation of the piyyuṭim, the introduction of a choir of boys, and the like. He was, however, strenuously opposed to any innovation which was objectionable to Jewish sentiment. In this respect his denunciation of the action of the "Landesrabbiner" Joseph Hoffmann of Saxe-Meiningen, who permitted Jewish high-school boys to write on the Sabbath, is very significant ("Orient," iii. 398 *et seq.*). His position in the controversy on the new Hamburg prayer-book (1842) displeased both parties; the Liberals were dissatisfied because, instead of declaring that their prayer-book was in accord with Jewish tradition, he pointed out inconsistencies from the historical and dogmatic points of view; and the Orthodox were dissatisfied because he declared changes in the traditional ritual permissible (*l.c.* iii. 352–363, 377–384). A great impression was produced by his letter of July 18, 1845, published in a Frankfort-on-the-Main journal, in which he announced his secession from the rabbinical conference then in session in that city (see CONFERENCES, RABBINICAL), and stated that he could not cooperate with a body of rabbis who had passed a resolution declaring the Hebrew language unnecessary for public worship. This letter made Frankel one of the leaders of the conservative element. In opposition to the rabbinical conferences, he planned conventions of scholars. His principles were enunciated in his monthly "Zeitschrift für die Religiösen Interessen des Judenthums," which he published from 1844 onward. But Frankel's conciliatory attitude was bound to create for him enemies in the camps of the extremists on both sides, and such was the case with both Abraham Geiger and Samson Raphael Hirsch.

Religious Attitude.

As the man of the golden mean Frankel was chosen president of the new rabbinical seminary at Breslau (Aug. 10, 1854). Geiger, who had inspired Jonas Fränkel, the president of his congregation, to found this institution, opposed the appointment vig-

orously, and when the examination questions given by Frankel to the first graduating class appeared, Geiger published them in a German translation with the evident intention of ridiculing the casuistic method of Talmudic instruction (Geiger, "Jüd. Zeit." i. 169 *et seq.*). Samson Raphael Hirsch, immediately on the opening of the seminary, addressed an open letter to Frankel, demanding a statement as to the religious principles which would guide the instruction at the new institution. Frankel ignored the challenge. When the fourth volume of Grätz's history appeared Hirsch impeached the orthodoxy of the new institution (1856), and his attacks became more systematic when Frankel in 1859 published his Hebrew introduction to the Mishnah. The first attack began with the letter of Gottlieb Fischer, rabbi of Stuhlweissenburg, published in Hirsch's "Jeschurun," 1860. Hirsch himself began in the following year a series of articles in which he took exception to some of Frankel's statements, especially to his definition of rabbinical tradition, which he found vague; he further objected to Frankel's conception of the rabbinical controversies, which were, according to Frankel, improperly decided by certain devices common in parliamentary bodies. It can hardly be denied that Frankel evaded the clear definition of what "tradition" meant to him. He contented himself with proving from Rabbenu Asher that not everything called a "law," and reputed as given by Moses on Mount Sinai, was actually of Mosaic origin. Hirsch was seconded by various Orthodox rabbis, as Solomon Klein of Colmar and B. H. Auerbach, while some of Frankel's supporters, like Rapoport, were half-hearted. Frankel but once published a brief statement in his magazine, in which, however, he failed to give an outspoken exposition of his views ("Monatsschrift," 1861, pp. 159 *et seq.*). The general Jewish public remained indifferent to the whole controversy, and Frankel's position was gradually strengthened by the number of graduates from the seminary who earned reputations as scholars and as representatives of conservative Judaism.

Attacks on His Orthodoxy.

Frankel began his literary career rather late. His first independent publication was his work on the Jewish oath, "Die Eidesleistung bei den Juden in Theologischer und Historischer Beziehung" (Dresden, 1840, 2d ed. 1847). This work owed its origin to a political question. The law of Aug. 16, 1838, had improved the position of the Jews in Saxony, but still discriminated with regard to the Jewish oath, which was to be taken under conditions which seemed to involve the supposition that a Jew could not fully be trusted in his testimony before a civil court. Frankel proved that no Jewish doctrine justified such an assumption, and owing to his work a new regulation (Feb. 13, 1840) put the Jews on the same basis as Christians as regards testimony in court. His second great work was his "Historisch-Kritische Studien zu der Septuaginta Nebst Beiträgen zu den Targumim: Vorstudien zu der Septuaginta" (Leipsic, 1841). To the same category belong three later works: "Ueber den Einfluss der Palästinensischen Exegese auf die Alexandrinische Hermeneutik" (Leipsic, 1851); "Ueber Palästinensische und Alexandrinische Schriftforschung," published in the program for the opening of the Breslau seminary (Breslau, 1854); "Zu dem Targum der Propheten" (Breslau, 1872). In all these works it was his object to show that the exegesis of the Alexandrian Jews, and with it that of the early Church Fathers, was dependent on Talmudic exegesis. In this investigation he became a pioneer, and many of his disciples followed him with similar investigations, not only of the Septuagint, but also of the Vulgate and of the Peshiṭta. A political motive was involved in his study on legal procedure, "Der Gerichtliche Beweis nach Mosaisch-Talmudischem Rechte: Ein Beitrag zur Kenntnis des Mosaisch-Talmudischen Criminal- und Civilrechts: Nebst einer Untersuchung über die Preussische Gesetzgebung Hinsichtlich des Zeugnisses der Juden" (Berlin, 1846). The law of Prussia discriminated against the Jews in so far as the testimony of a Jew against a Christian was valid only in civil cases, and in these only when they involved a sum less than fifty thalers. It was due to Frankel's work, which was cited as an authority in the Prussian Diet, that the new law of July 23, 1847 referring to the Jews, abolished this discrimination.

Literary Activity.

Septuagint Studies.

Frankel's duties as professor of Talmudic literature showed him the necessity of modern scientific text-books upon rabbinical literature and archeology. To this necessity are due his introduction to the Mishnah, "Darke ha-Mishnah" (Leipsic, 1859), with a supplement and index under the title "Tosafot u-Mafteaḥ le-Sefer Darke ha-Mishnah" (1867). Of the storm which this book created mention has been made already. It is one of the most valuable attempts at a systematized exposition of the history of early rabbinical literature and theology, and has largely inspired subsequent works of that kind, as those of Jacob Brüll and Isaac H. Weiss. His outline of rabbinical marriage law, "Grundlinien des Mosaisch-Talmudischen Eherechts" (Breslau, 1860), was likewise meant to serve as a text-book on that subject, as was also his attempt at a history of the post-Talmudic literature of casuistry, "Entwurf einer Geschichte der Literatur der Nachtalmudischen Responsen" (Breslau, 1865), which, however, is the weakest of his works.

Introduction to Mishnah.

Frankel's studies in the history of Talmudic literature had convinced him that the neglect of the Palestinian Talmud was a serious drawback in the critical investigation of the development of Talmudic law. To this field he determined to devote the remainder of his life. In 1870 he published his introduction to the Jerusalem Talmud under the title "Mebo ha-Yerushalmi" (Breslau). He afterward began a critical edition of the Palestinian Talmud, with a commentary, but only three treatises had appeared, Berakot and Peah (Vienna, 1874) and Demai (Breslau, 1875), when his death intervened. He wrote frequently for the two magazines which he edited, the "Zeitschrift für die Religiösen Interessen des Judenthums" (Leipsic, 1844–46), and the "Monatsschrift," begun in 1851, and which he edited until 1868, when Grätz succeeded him as editor.

Though a son of the rationalistic era which had two of its intensest partizans, Peter Beer and Herz Homberg, in his native city, Frankel developed, partly through opposition to shallow rationalism and partly through the romantic environments of the ancient city of Prague, that love and sympathy for the past that made him the typical expounder of the historical school which was known as the "Breslau school." His marriage with Rachel Meyer was childless.

Bibliography: *Monatsschrift*, 1875, pp. 97–98, 145–148; 1876, pp. 12–26; Rabbinowitz, *Rabbi Zechariah Frankel*, Warsaw, 1898–1902 (in Hebrew); *Menorah*, 1901, pp. 329–336. Much material is contained in *Monatsschrift*, 1901, to which several of his disciples contributed, and which contains a complete bibliography of Frankel's writings by Brann (pp. 336–352).

S. D.

FRANKENBERG, ABRAHAM VON: German mystic of the seventeenth century; friend and correspondent of Manasseh ben Israel. He was a nobleman and the most influential personage in the district of Oels in Silesia. A disciple of Jacob Böhme, he said: "The true light will come from the Jews; their time is not far distant," etc. He also wrote: "Hebræi habent fontes, Græci rivos, Latini paludes" (cited by Grätz, "Geschichte"). He wrote to Manasseh ben Israel on the coming glory and salvation of the Jews; and his mystic writings undoubtedly influenced his countrymen. As a token of his friendship, Manasseh presented Frankenberg with a portrait of himself bearing the emblem of a wanderer and a torch (the printer's device of Manasseh), and the circumscription (in Hebrew), "Thy word is a lamp unto my feet" (Ps. cxix. 105).

Bibliography: Grätz, *Gesch.* x. 83, and note 2; M. Kayserling, *Menasse ben Israel*, in *Jahrbuch für die Gesch. der Juden und des Judenthums*, ii. 120, and note 109, Leipsic, 1861; *Cat. Anglo-Jew. Hist. Exh.* frontispiece.

D. A. M. F.

FRANKENBURGER, WOLF: German deputy; born at Obbach, Bavaria, June 8, 1827; died at Nuremberg July 18, 1889. While a student at Würzburg he took part in the political agitation of 1848, and soon obtained a reputation as a public speaker and a friend of the people. He began to practise law in Nuremberg in 1861; in 1869 he was elected to the Bavarian Diet, of which he remained a member until his death. For one term (1874–78) he was a member of the German Reichstag, taking as such an especially active part in the discussions preceding the legal reforms of that period.

Frankenburger, after the beginning of the Franco-Prussian war (1870–71), strongly advocated the union of the southern and the northern states of Germany; and when, after the conclusion of peace, his ability and rectitude secured for him the position of Liberal leader, he threw all the weight of his influence against the sectionalism of the Bavarian Center and in favor of a strong central government. He was especially well qualified to deal with financial questions, and rendered important services as regular reporter on the army budget for the Bavarian House of Representatives, for which services the king rewarded him with the Michaelsorden I. Class.

Frankenburger omitted no opportunity to champion the rights of his coreligionists. In 1880 he was instrumental in abrogating the taxes which, in many parts of Bavaria, the Jews had been compelled to pay to pastors and mayors. These taxes had many curious names, as "Beichtgroschen," "Schmattgeld," and "Wölfelsteuer," and were principally of the nature of surplice-fees ("Stoyagebühr") and New-Year's gifts. It was also on his motion, which received the unanimous vote of the Chamber of Deputies, that the sum of 5,500 florins for the betterment of the poorly endowed rabbinical offices of Bavaria was included in the budget of April 19, 1872. By this measure at least the semblance of state consideration for Jewish worship was obtained.

FRANKENHEIM, MORITZ LUDWIG: German physicist; born in Brunswick June 29, 1801; died in Dresden Jan. 14, 1869; educated at the gymnasia of Wolfenbüttel and Braunschweig, and the Berlin University (Ph. D. 1823). He was privatdocent at the Berlin University (1826–27); assistant professor of physics, geography, and mathematics at Breslau University (1827–50); professor there (1850). He wrote: "Dissertatio de Theoria Gasorum et Vaporum," Berlin, 1823; "Populäre Astronomie," Brunswick, 1827–29; "De Crystallorum Cohæsione," Breslau, 1829; "Die Lehre von der Cohäsion," *ib.* 1835; "Krystallisation und Amorphie," *ib.* 1852; and "Zur Krystallkunde. I. Charakteristiken der Krystalle," Leipsic, 1869; also numerous papers in various professional journals.

S. N. D.

FRANKENTHAL, ADOLPH L.: United States consul at Bern, Switzerland; born July 1, 1851, at Lübeck, Germany. Frankenthal was educated at the public and high schools of his native town, and received instruction in Hebrew from the local rabbi. When fifteen years of age he entered commercial life in Hamburg. Five years later (1871) he emigrated to the United States and settled in Boston, where he engaged in business as a merchant. He soon took an active part in public life, especially in Jewish circles, being particularly prominent in various Jewish orders. In 1898 he was appointed United States consul at Bern, Switzerland, which position he still (1903) holds.

A. F. T. H.

FRANKFORT-ON-THE-MAIN: City in the Prussian province of Hesse-Nassau, Germany. The date of the organization of its Jewish community is uncertain. Probably no Jews were living in Frankfort at the time of the first and second Crusades, as the city is not mentioned among the places where Jews were persecuted, although references occur to persecutions in the neighboring cities of Mayence and Worms. A Jew of Frankfort is mentioned in connection with the sale of a house at Cologne between 1175 and 1191. Eliezer b. Nathan, rabbi at Mayence toward the end of the twelfth century, says that there were not then ten adult Jews in Frankfort. The first reliable information concerning

Frankfort Jews dates from 1241, on May 24 of which year 180 Hebrews were killed during a riot and many fled, this being the first "Judenschlacht." As the affair was detrimental to the income of the emperor, he was incensed with the city for seven years, and King Conrad IV. did not forgive the citizens until May 6, 1246. The emperor distributed so liberally among the princes and his retainers the income he derived from the Jews that he had nothing left for himself; yet the Jews remained under his protection. In 1286 King Rudolf pledged to Count Adolf of Nassau 20 marks yearly from the income derived from the Frankfort Jews. When Adolf was made king under the title of "Adolf of Nassau," he pledged these 20 marks to the knight Gottfried of Merenberg (1292); and the latter again pledged 4 marks of this sum to the knight Heinrich of Sachsenhausen. King Adolf also gave 25 marks to Gottfried of Eppstein as a hereditary fief; and from 1297 he gave 300 marks yearly of the Jews' tax to the Archbishop of Mayence, adding to this sum 500 pounds of hellers in 1299. As early as 1303 the archbishop pledged 100 marks of this amount, and thus the Jews of the city of Frankfort became subject to the archbishop. The emperor, however, attempted to exact still more money from the Jews, and it was due only to the resistance of the city that King Adolf did not succeed in 1292 in obtaining from them the sum required for his coronation.

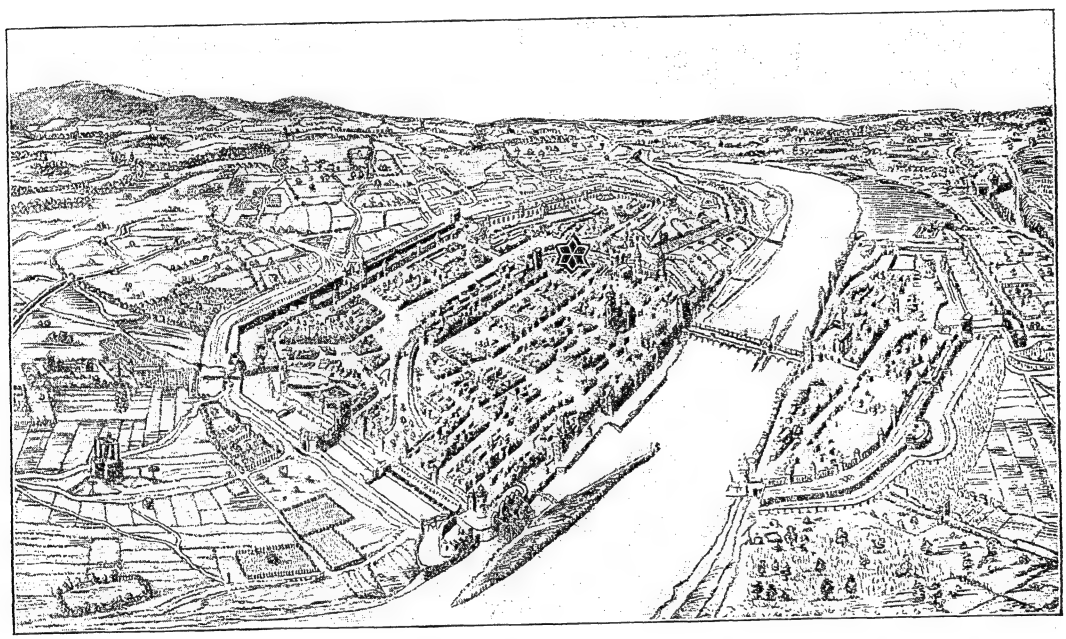
In the Thirteenth Century.

The Jews were subject not only to the emperor and to the archbishop, but also to the city; in 1331 King Ludwig recommended his "beloved Kammerknechte" to the protection of the municipality. Under Ludwig the Frankfort Jews were accused of a crime and cruelly persecuted, and many fled. The king then confiscated the houses and other property of the fugitives, and sold them to the municipal council for 3,000 pounds of hellers. Those that returned had their property restored to them; and, as the Jews had been treated unjustly, the king promised not to punish them again, but to be content with the verdict of the municipal council. The Jews were required, however, to pay to the king a new impost, the "goldene Opferpfennig."

During the Black Death (1349) the Jews of Frankfort were again persecuted. At the beginning of these outbreaks the circumspect Carl IV., who feared for his income, pledged the Jews to the city for more than 15,000 pounds of hellers, stipulating that he would redeem them, which he never did. The Flagellants, on coming to Frankfort, destroyed nearly the entire community, the Jews in their distress setting fire to their own houses. Their property was confiscated by the council by way of indemnity. Jews returned to Frankfort very gradually. In 1354 Carl IV. renewed his pledge to the city; three years later the Archbishop of Mayence again advanced his claims, but the Jews and the council came to an agreement with him in 1358. In 1367 the city was again in full possession of the income derived from the Jews, but this did not prevent the emperor from occasionally levying extraordinary taxes; for example, Sigismund (1414) exacted a contribution from the Jews toward the expenses of the Council of Constance.

In the Fourteenth Century.

The Jews were under the jurisdiction of the municipal council. Beginning with 1488, privileges ("Judenstättigkeiten") were issued that had to be



Plan of Frankfort-on-the-Main in 1552. Star Shows Position of Jewish Quarter.
(From the "Archiven für Frankfurter Geschichte und Kunst.")

renewed every three years. The Jews lived originally in the vicinity of the cathedral, this part of the city being necessary for their commerce; but Christians also lived there. Hence it was a hard blow to the former when they were forced (1462) to settle outside the old city ramparts and the moat. At first the city built their dwellings, but later they were required to erect their own houses. The "Judengasse" originally consisted merely of one row of houses; and when this became overcrowded, a part of the moat was filled in, and houses were built upon the new ground thus obtained. There were three gates in the street: one at each end and one in the center. The cemetery of the community, which was situated on the Fischerfeld, and which is still in existence, is mentioned for the first time in 1300, but a tombstone dated July, 1272, has been preserved. Among the communal buildings were the synagogue (called also the "Judenschule"), the "Judenbadstube," the "Juden-Tanzhaus" or "Spielhaus," and the hospital. The Jewish inhabitants were more numerous in the early years of the community than later on; in 1241 they numbered about 200; in 1357 there were 12 tax-paying families; from 1357 to 1379, not more than 14 on the average; from 1401 to 1450, an average of 12; while in 1473 there were 17 families.

Medal Commemorating the Great Fire in the "Judengasse" of Frankfort-on-the-Main in 1711.

Toward the end of the Middle Ages the number of the Frankfort Jews was considerably increased by emigrants from Nuremberg (1498); and Frankfort took the place of Nuremberg as the leading Jewish community in the empire. This is seen in the numerous requests made by other cities to the magistrates of Frankfort for information concerning their method of procedure in cases affecting Jews (see Neustadt in "Zeitschrift für Geschichte der Juden in Deutschland," i. 190). Civil cases were decided by a commission of twelve, with the chief rabbi at its head. The reports of this commission from 1645 to 1808 are in the archives of the community. In 1509 the Jews were threatened with confiscation of their Hebrew books by PFEFFERKORN, who arrived in the city with an imperial edict; on April 10, 1510, they were obliged to surrender all their books, which were not restored to them until June 6, after they had sent a special embassy to the emperor. In 1525 the impending danger of expulsion was averted by the municipal council; but the Jews were restricted in their commerce, and were forbidden to build their houses higher than three stories. Although this measure crowded them more closely, there were 43 Jewish families in Frankfort in 1543, and 454 in 1612. (A list of these families was published in 1614; 2d ed., Mayence, 1678; republished in the "Israelit," Aug. 17, 1899).

From the Fifteenth to the Seventeenth Century.

Hard times were now approaching. In 1612 the Jews of Frankfort suffered much on account of some persons who were heavily indebted to them, chief among these being FETTMILCH. On Aug. 22, 1614, these men headed an attack on the Jews' street, sweeping away everything in the space of thirteen hours; and the unfortunate Jews, who had sought refuge in the cemetery, begged for permission to depart. On the following day 1,380 Jews, glad to have saved even their lives, left the city and went to Offenbach, Hanau, and Höchst. The synagogue as well as the Torah-scrolls was destroyed, and the cemetery was desecrated. When the emperor heard of the affair he proscribed Fettmilch; but the Jews were not brought back until Feb., 1616, when their street was placed under the protection of the emperor and the empire, as announced in a notice affixed to each of the three gates. By 1618 there were 370 families, living in 195 houses, of which 111 lay to the right of the Bornheimerpforte, and 84 to the left. The houses were of wood, with stone foundations, and were named according to signs suspended in front. The names were those of animals (*e.g.*, ox, duck, wild duck), of fruits (apple, red apple), of trees (fir, elder, nut), or of miscellaneous objects (tongs, scales, winecup); but sometimes a house was named simply from the color of the shield, *e.g.*, red

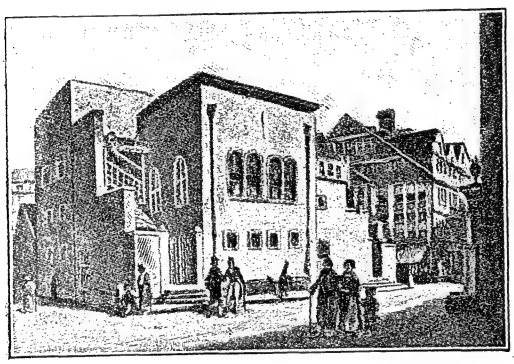
(From Schudt, "Jüdische Merckwürdigkeiten," 1714–17.)

= "Rothschild"; black = "Schwarzschild," etc. The main synagogue was built in 1462; a smaller one was erected in 1603. Among the other communal buildings were the bath, to the east of the synagogue, the dance-house, the inn, the slaughter-house, the bakehouse, and the hospital.

With their return to Frankfort a new epoch in the history of the Jews of that city begins. They were still debarred from acquiring real estate, but they loaned money, even accepting manuscripts as pledges. The rate of interest, formerly as high as 24 per cent, was now reduced to 8 per cent. As the unredeemed pledges were sold, traffic in second-hand goods arose, which was further stimulated by the fact that the Jews were not permitted to sell new goods. They were also forbidden to deal in spices, provisions, weapons, cloth, and (from 1634) corn. But in spite of these interdictions their commerce gradually increased. During the Thirty Years' war the Jews fared no worse than their neighbors. In 1694 there were 415 Jewish families; of these, 109 persons were engaged as money-lenders and dealers in second-hand goods; 106 dealt in dry-goods, clothes, and trimmings; 24 in spices and provisions; 9 retailed wine and beer; 3 were innkeepers; and 2 had restaurants. Besides these there were the communal officials.



The "Neuschule," Frankfort-on-the-Main.
(After an old woodcut.)

The importance and status of the community at the beginning of the eighteenth century are indicated by the gracious reception accorded to the deputation that offered presents to Joseph I. on his visit to Heidelberg in 1702. On Jan. 14, 1711, a fire which broke out in the house of Rabbi Naphtali Cohen destroyed the synagogue together with nearly the whole Judengasse. The rabbi was accused of having caused the fire by cabalistic means, and was forced to leave the city. The 8,000 homeless Jews found shelter either in the pest-house or with compassionate Christians. The synagogue and the dwelling-houses were speedily rebuilt, and the street was widened six feet. In 1715 the community issued an edict against luxury. From 1718 onward the "Residenten," or representatives of the community of Frankfort at Vienna, were accorded official recognition. In 1721 part of the Judengasse was again destroyed by fire. About the

(From Schudt, "Jüdische Merckwürdigkeiten," 1714-17.)

same period conflicts with the Shabbethaians caused excitement in the community. In consequence of the denunciation of a baptized Jew the edition of the Talmud published at Frankfort and Amsterdam between the years 1714 and 1721 was confiscated; and certain prayer-books were likewise seized on account of the "'Alenu" prayer. The books were restored, however, on Aug. 1, 1753, chiefly through the efforts of Moses Kann.

The middle of the century was marked by the dissensions between the Kann and Kulp parties. The Kulp party, to which many influential men belonged, endeavored to harmonize the ancient constitution of the community with new measures for the benefit of the people; but their efforts were thwarted by the wealthy Kann family, whose influence was predominant both in the government of the community and among the people. In 1750 the two parties effected a compromise, which was, however, of but short duration. The community was further excited by Jonathan Eybeschütz's amulet controversy. In 1756 the Jews received permission to leave their street in urgent cases on Sundays and feast-days for the purpose of fetching a physician or a barber or of mailing a letter, but they were required to return by the shortest way. In 1766 the Cleve divorce controversy began to excite the rabbinate of Frankfort also. At the coronation of Joseph II. the Frankfort Jews were permitted for the first time to appear in public, when they swore allegiance to the emperor (May 28, 1764). The community of Frankfort rendered great service in suppressing Eisenmenger's "Entdecktes Judenthum," confiscating all the copies in 1700. Eisenmenger sued the community for 30,000 gulden. Although he lost his case, proceedings were several times renewed with the aid of King Frederick I. of Prussia, and only in 1773 was the community finally released from all claims brought by Eisenmenger's heirs.

In 1753 there were 204 houses, built on both sides of the Jews' street. On May 29, 1774, a fire destroyed 21 dwellings, and the homeless again found shelter in the houses of Christians. When their houses were rebuilt the Jews endeavored to remain outside of the ghetto, but were forced to return by a decree of Feb. 13, 1776. One hundred and forty houses on the Jews' street were destroyed by fire when the French bombarded the city in 1796.

(After an old woodcut.)

The Cemetery.

The cemetery, as stated above, is situated on the old Fischerfeld. In 1349 the cemetery was enclosed within the city moat and walls, which were fortified with jetties. Beginning with 1424 the neighboring communities also buried their dead there; but this privilege was withdrawn by the magistrate in 1505. When Frankfort was besieged during the interregnum in 1552, a garrison with cannon was stationed in the cemetery, and an attempt was even made to force the Jews to sink the tombstones and to level the ground; but against this they protested successfully (July 15, 1552). During the Fettmilch riots the whole community spent the night of Sept. 1, 1614, in the cemetery, prepared for death, and thought themselves fortunate when they were permitted to leave the city through the Fischerfeld gate on the following afternoon. In 1640 a dispute in regard to passage through the cemetery was decided in favor of the Jews. The community occasionally paid damages to Christians who were injured by the oxen ("bekorim": the first-born that may not be used; comp. Ex. xiii. 3) which grazed within the cemetery walls. In 1694 a neighboring garden was bought for the purpose of enlarging the cemetery. During the great fire of 1711 the Jews sought refuge with

all their possessions among the tombs of the fathers. The communal baking-ovens, which before the fire were behind the synagogue, were transferred to a new site acquired in 1694. The only building preserved from the flames was the hospital for the poor, near the cemetery; behind it another hospital was built in 1715 to replace the one in the Judengasse that had been destroyed. A slaughter-house for poultry and a fire-station were erected between the ovens and the cemetery. The fire-station existed down to 1882; the site of the ovens is now covered by the handsome building of the Sick Fund, and that of the Holzplatz and the garden by the Philanthropin schoolhouse. On the site of the two hospitals the Neue Gemeinde-Synagoge was built in 1882. The cemetery, covering more than five acres, was closed in 1828; its epitaphs have been published by Dr. M. Horovitz.

Permit Granted to a Frankfort Jew to View the Coronation Procession of Leopold II., 1790.
(In the possession of C. H. Bjerregaard, New York.)

The end of the eighteenth century marks a new epoch for the Jews of Frankfort. In 1796 they received permission to live among Christians. In 1811 the prince-primate granted them full civic equality. In 1809 they were already scattered throughout the city and had taken surnames. A reaction, however, came in 1816, when the city, on regaining its autonomy, completely excluded the Jews from the municipal government. In 1819 there were riots to the cry of "Hep-hep!", and the magistrate discussed the advisability of restricting the number of Jews to not more than 500 families and of assigning to them a special part of the city. These schemes, however, were not carried into effect. In 1853 the civic rights of the Jews were enlarged, and in 1864 all restrictions were removed. The synagogue that had been rebuilt after the fire of 1711 in the Judengasse was torn down in 1854, and a new synagogue was erected on the site (1855–60). The synagogue on the Börneplatz was consecrated in 1882. The Israelitische Religionsgesellschaft, an independent congregation founded in 1851 (incorporated 1900), built a synagogue in 1853, and enlarged it in 1874. In 1817 there were in Frankfort 4,309 Jews; in 1858, 5,730; in 1871, 10,009; in 1880, 13,856; in 1890, 17,479; and in 1900, 22,000 in a total population of 288,489.

Medal Struck in Commemoration of the Erection of the Frankfort Synagogue in 1852.

The following rabbis and scholars of Frankfort may be mentioned:

Simeon Darshan, author of "Yalḳuṭ Shim'oni."
Alexander Süsslin, author of the collection "Aguddah."
R. Isaac b. Nathan, a victim of the first "Judenschlacht" (1241).
Anselm, 1388.
Abraham of Hanau, 1332.
Gumprecht, martyr in 1349.
Joseph Lampe, 1363.
Asher, 1374.
Meïr b. Samuel of Nordhausen, 1385; took part in the convention of rabbis at Mayence in 1381.
Süsslin of Speyer, 1394.
Nathan Levi, 1430-60.
Simon Cohen, a relative of Moses Minz.
Israel Rheinbach; held office till 1505.
Isaac b. Eliakim; took part in the convention of rabbis at Worms in 1542.
Naphtali Treves, author.
Herz Treves, son of the preceding; also an author.
Akiba Frankfurt; widely known as a preacher; died in 1597.
Lewa b. Bezalel, chief rabbi of Prague, delivered the funeral oration.
Simon of Aschaffenburg, author of a supercommentary to Rashi's Pentateuch commentary; lived at Frankfort until his death.
Elia Loanz, pupil of Akiba Frankfurt; wrote a song, "Streit Zwischen Wasser und Wein," to the melody of "Dietrich von Bern," and many other works; was a native of Frankfort.
Eliezer Treves.
Abraham Naphtali Herz Levi.

Samuel b. Eliezer of Friedberg, during whose incumbency the most important event was the convention of rabbis held at Frankfort in 1603.

Isaiah Hurwitz; called to Frankfort in 1606; went to Prague in 1622. He was the author of the cabalistic work "Shene Luḥot ha-Berit."

Joseph Juspa Hahn, author of a work dealing with the liturgy and with the chief phases of religious life; officiated up to the time of his death in 1637.

Samuel Hildesheim; elected in 1618.

Pethahiah; elected 1622; author of the cabalistic work "Sefer ha-Kawwanot," which relates the events in connection with the Fettmilch riot, and which was approved by Elhanan Helen, author of the "Megillat Winz."

Rabbis and Scholars.

Ḥayyim Cohen of Prague, grandson of Lewa b. Bezalel; officiated in 1628.

Shabbethai Hurwitz, son of Isaiah Hurwitz; elected in 1632. He was the author of "Wawe ha-'Ammudim," the introduction to his father's work. In 1643 he went, like his predecessor, to Posen.

Meïr Schiff, author of novellæ to the Talmud; born at Frankfort in 1605; died while rabbi of Fulda in 1641, just after he had been called to the rabbinate of Prague; was buried at Frankfort.

Mendel Barr of Cracow; elected in 1644; died in 1666. He was a pupil of Joel Sirkes, and inclined toward the Cabala. Among his prominent pupils were Ḥayyim Jair Bacharach and Meïr Stern.

Aaron Samuel Kaidanower of Wilna; called to Frankfort in 1667; went to Cracow in 1677. He was the author of "Birkat ha-Zebaḥ," commentary to some treatises of the Talmud.

Isaiah Hurwitz, son of Shabbethai Hurwitz, and grandson of Isaiah Hurwitz. David Grünhut, cabalist, cited by Eisenmenger and Schudt, was his contemporary. Hurwitz went to Posen.

Samuel b. Ẓebi of Cracow; elected 1690. He added valuable references to the Frankfort edition of the Talmud (1721). His son, Judah Aryeh Löb, known as a writer, was associate rabbi; Löb's father-in-law, Samuel Schotten, though rabbi at Darmstadt, was living at Frankfort as "Klaus" rabbi, and after Samuel b. Ẓebi's death (1703) he became president of the rabbinate.

Naphtali Cohen; called in 1704. As stated above, he was accused of having caused the fire of 1711, and, being compelled to leave the city, he wandered about for many years.

Moses Frankfurter, author of a commentary to the Mekilta.

Joseph b. Moses Kossmann, author of "Noheg ke-Ẓon Yosef," a work on the ritual of the community of Frankfort.

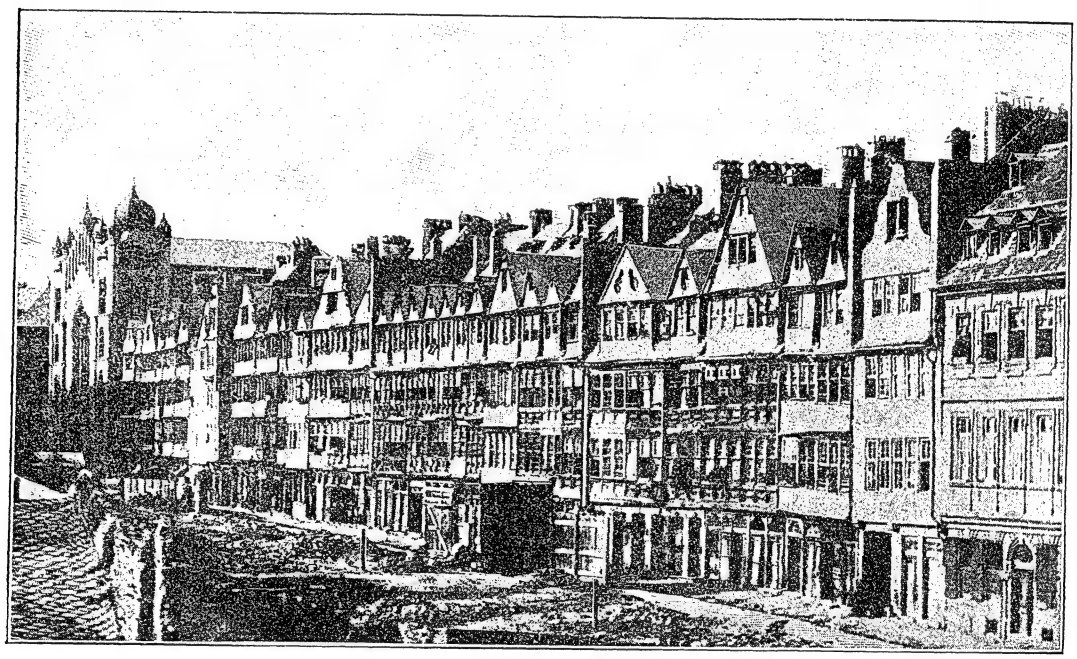
Pethahiah b. David Lida, who issued in 1727 at Frankfort his father's "Yad Kol Bo." The book was confiscated, but was restored with the approval of several professors and preachers.

Naphtali Cohen's successors in the rabbinate of Frankfort were as follows:

Abraham Broda of Prague; died in 1717; famous both as a writer and as a scholar.

Jacob Cohen Popers of Prague; called from Coblenz to Frankfort. He was noted for his many pupils, and for his learned correspondence, which is included in the responsa collection "Sheb Ya'aḳob." He became involved in the current controversies in regard to Shabbethaism.

Jacob Joshua Falk (1741–56); known to Talmudists through his valuable Talmud commentary "Pene Yehoshua'," and to historians through his conflict with Jonathan Eybeschütz. During his rabbinate occurred the Kann-Kulp controversy mentioned above. Kulp's party was opposed to the rabbi and sided with Eybeschütz. Falk had to leave the city in consequence of this disturbance. He died at Offenbach in 1775, at the age of 75, and was buried at Frankfort.



THE "JUDENGASSE" OF FRANKFORT-ON-THE-MAIN.
(From a photograph.)

Moses Kann, Moses Rapp, and Nathan Maas took charge of the rabbinate until 1759. Maas was the real leader in the controversy in which the rabbinate of Frankfort engaged with reference to the divorce granted at Cleve (referred to above), as his opinion was authoritative.

Abraham Lissa; elected in 1759; died in 1768. He was a notable Talmudist, and the author of "Birkat Abraham"; he also studied medicine. Maas again acted as deputy rabbi from 1769 to 1771; he is also known through his commentary to two treatises of the Talmud.

Phineas Hurwitz; elected 1771; died 1805. He was the author of "Hafla'ah" and other Talmudic works. Prominent scholars were at that time living at Frankfort; among them David Scheuer, who became rabbi at Mayence, and Nathan Adler, a strict ritualist, who gathered about him a group of men that attempted to introduce Ḥasidism into Frankfort. The community, with the consent of the rabbi, soon found it necessary to proceed against Adler. Hurwitz also opposed the school of Mendelssohn.

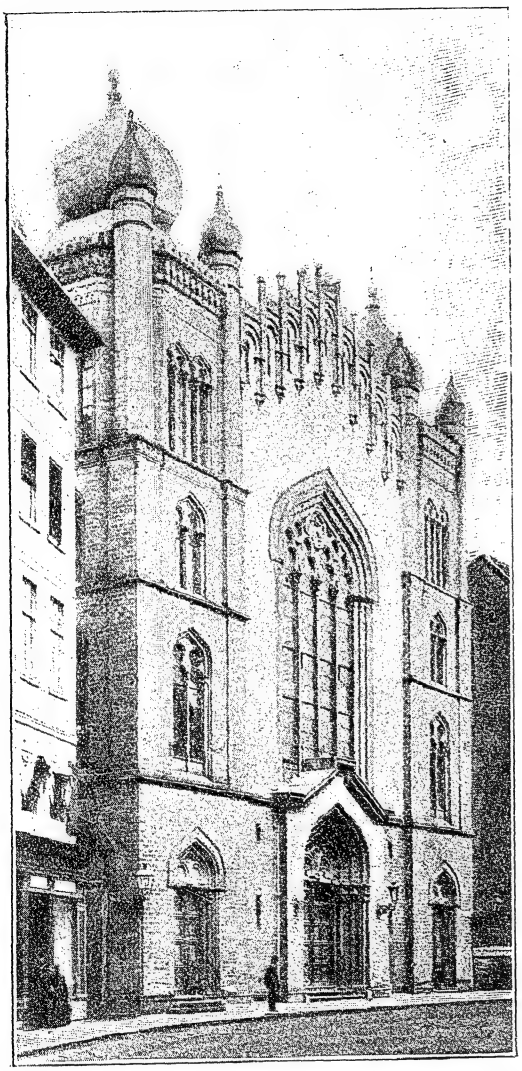
Hirsch Hurwitz, son of Phineas Hurwitz; died Sept. 8, 1817. He was the author of several haggadic and halakic works.

Leopold Stein; elected 1844; officiated down to 1862; also known as poet and writer.

Abraham Geiger, Samson Raphael Hirsch, Breuer, Nehemiah Brüll, M. Horovitz, and Rudolph Plaut succeeded Stein in the order named; Seligsohn was elected to the office in 1903.

Among the philanthropic institutions of Frankfort the following are important:

Achawa (Verein zur Brüderlichkeit; 1864).



The Synagogue in the "Judengasse," Frankfort-on-the-Main.

G. A. F.

——**Typography:** The law of this free city that no Jew should establish a printing-house there, greatly impeded the development of Hebrew typography in Frankfort. Many books published there, especially prayer-books, appeared without place of publication or publisher's name. Owing to this restriction the printing requirements of Frankfort were in large measure met by Jewish presses established in neighboring towns and villages, as Hanau, Homburg, Offenbach, and Rödelheim, the last-named place being specially notable. Besides the local wants of Frankfort there was the yearly fair which was practically the center of the German-Jewish book-trade. In a measure the presses of the above four towns were really intended to supply the fair trade of Frankfort.

According to Wolf ("Bibl. Hebr." ii. 1385), the history of Hebrew typography at Frankfort-on-the-Main begins with 1625, in which year selihot were printed there. But Steinschneider and Cassel declare this statement doubtful. The chronogram of a certain prayer-book seems to show that it was printed there in 1656, but this chronogram is known only from references to it in a second edition printed at Amsterdam in 1658 ("Cat. Bodl." Nos. 2149, 2152). It may be said with certainty, however, that Hebrew printing began in Frankfort not later than 1662, when the Pentateuch with a German glossary was printed. The books printed at Frankfort up to 1676 do not bear any printer's name.

From the year 1677 till the beginning of the eighteenth century there existed at Frankfort two Christian printing establishments at which Hebrew books were printed: (1) The press owned till 1694 by Balthasar Christian Wust, who began with David Clodius' Hebrew Bible; his last work was the unvocalized Bible prepared by Eisenmenger, 1694; up to 1707 the press was continued by John Wust. Among his typesetters who worked on the "Amarot Ṭehorot" (1698) and the responsa "Ḥawwot Yaïr" were two Christians: Christian Nicolas and John Kaspar Pugil. (2) That of Blasius Ilsnerus, who printed in 1682 the "Ḥiddushe Haggadot" of Samuel Edels.

Many works which appeared in the last quarter of the seventeenth century without bearing the names of either printers or publishers belong probably to the publications of Isaac and Seligmann, sons of Hirz Reis, who published in 1687 a beautiful edition of the Yalḳuṭ. But though the proprietors of the presses were Christians, the publishers were often Jews; among them may be mentioned Joseph Trier Cohen (1690–1715), Leser Schuch, Solomon Hanau, and Solomon and Abraham, sons of Kalman, who in 1699 published through John Wust the Alfasi in three volumes.

But the most flourishing period in the history of Hebrew typography in Frankfort was the first quarter of the eighteenth century. Hebrew books were printed in several establishments, including those of Mat. Andrea (1707–10), Jo. Ph. Andrea (1716), Nicolas Weinmann (1709), Antony Heinscheit (1711–19), and, above all, John Kölner, who during the twenty years of his activity (1708–27) furnished half of the Hebrew works printed at Frankfort up to the middle of the nineteenth century. Among the more important works printed by Kölner may be mentioned the "Bayit Ḥadash," in 5 vols., corrected by Samuel Dresles (1712–16), and the continuation of the Babylonian Talmud (1720–23) begun at Amsterdam, between which city and Frankfort there was a sort of partnership in printing. Kölner printed with the same Amsterdam type the "Yeshu'ah be-Yisrael" (1719–20). He then conceived the idea of printing the Alfasi after the model of the Sabbionetta edition of 1554, a copy of which was bought for 40 thalers. He resolved upon printing 1,700 copies at the price of 10 thalers each; the expenses, 11,000 thalers, were to have been obtained by means of a lottery; that is to say, each subscriber was entitled to a copy of the book and to a lottery ticket; but the whole plan miscarried.

Between the years 1726 and 1736 no Hebrew printing appears to have been done in Frankfort, and during the last three-quarters of the eighteenth century very few Hebrew works were printed there. Among these were: "Toledot Adam," a Hebrew letter-writer printed in 1736; and in 1742 the responsa "Sheb Ya'aḳob," the three Babot of the Jerusalem Talmud, and the second part of the "Pene Yehoshua'," the third part appearing in 1756. Abraham Broda's "Eshel Abraham" was issued in 1776. Hebrew printing has continued at Frankfort up to the present day.

FRANKFORT-ON-THE-ODER: Chief town of a district of the same name in the Prussian province of Brandenburg, and situated on the left bank of the River Oder. It is very likely that the fairs held in the city drew a number of Jews there at an early date. Obscure though their early history may be, it is at least known that there was an organized community in Frankfort in the fifteenth century; for in 1506 the Frankfort synagogue was affiliated with a university founded there in that year under Elector Joachim I. Later, in the sixteenth century, the Jews of Frankfort obtained certain privileges from Elector Joachim II., in spite of the opposition of the town council, the members of which were antagonistic to the Jews. Thus in 1546 the elector ordered the council to permit the Jew Simon to slay animals according to the Jewish rite for himself and his family. In 1551 by an edict of the elector the Jews were granted free access to a fair called "Reminiscere-messe," and the council was directed not to impose a too burdensome taxation upon the Jews. The council, however, resented with much indignation an edict which allowed Jews from abroad to come to Frankfort, while it wished to get rid even of those already there. Not desiring to set the council against him, the elector explained his edict to mean that while the foreign Jews might deal at the fairs of Frankfort they might not settle there. Still in the following year by another edict the council was again ordered not to tax the Jews too heavily. This edict was due to a complaint made by the Jews that the council required them to pay, in addition to the annual protection-fee of 30 gulden, 60 gulden per annum as revenue; the Jews were willing to pay only half of that sum. From time to time the elector granted permission to other members of the Jewish race to settle at Frankfort. In 1568 the inhabitants of that town petitioned the elector to expel the Jews from Frankfort, charging them with exorbitant usury and with blasphemy in their synagogues against the Christian religion, but the petition had no effect.

It was about this time that there lived at Frankfort the rich Michael Juda, who, owing to his immense wealth, afterward became the subject of legends. He is supposed by some to have been a knight or a count, and by others to have been an officiating rabbi at Frankfort.

The Jews did not long enjoy their privileges. By command of the elector John George all the Jews of Brandenburg were compelled to leave the country in 1573. As the inhabitants of Frankfort were more prejudiced against the Jews than were those of any other town, not one Jew was allowed to remain, even under secret protection, nor were the Jews soon readmitted, as was the case in other towns of Brandenburg. The elector Frederick William permitted some rich Jews of Hamburg, Glogau, and other towns to settle in Brandenburg in 1671, and these founded the new communities of Frankfort-on-the-Oder and Landsberg. Frederick William carried his liberality further by ordering the authorities of the University of Frankfort to admit to the lectures two Jewish students, Tobias Cohen and Gabriel Felix Moschides, allowing them an annual subsidy. The community of Frankfort soon came into conflict with that of Landsberg on account of a certain Ḥayyim, rabbi of Neumark, whose friends worked for his election as chief rabbi of Brandenburg. Notwithstanding the liberality of the elector, the inhabitants of Frankfort were not less averse to the Jews than they had been in former times, for in 1688 they again petitioned the elector to expel them from Frankfort, alleging sixteen reasons for such a course. The result of this petition was that the dishonoring "Leibzoll," from which the Jews had formerly been exempt, was imposed. This Leibzoll, or poll-tax, was re-

pealed in 1787, and strangers (who, as may be seen clearly from the "Memoiren" of Glückel von Hameln [pp. 222, 233], were allowed to frequent the fairs soon after the readmission of the Jews to Frankfort) were also exempted from it. The number of the Jews of Frankfort in 1688 was twenty authorized and twenty-three unauthorized. The Jewish population of Frankfort-on-the-Oder in 1890 was 775 in a total population of 55,738.

——**Typography:** Hebrew printing at Frankfort-on-the-Oder began toward the end of the sixteenth century. In 1595–96 the Bible was printed by Joachim and Friedrich Hartmann, and in 1597 Hai Gaon's "Musar Haskel," by Eichhorn. But Hebrew printing proper dates only from 1677, in which year the Bible and two works of Shabbethai Cohen, "Toḳpo Kohen" and "Neḳudat ha-Kesef," were printed; in 1679 appeared Joseph Darshan's "Yesod Yosef," without printer's name. From 1681 onward the owners of the printing establishments were Christians, mostly professors at the university, who left the actual work in care of Jewish typesetters and correctors. The first owner was Joseph Christian Beckmann, who opened his printing-house in 1681 with the "Arba' Ḥorashim" of Issachar Bär b. Elhanan. In 1695 Michael Gottschalk became possessor of the printing-house, and continued with the same type till 1732. The most important works produced by Gottschalk were the Talmud (1698) and Midrash Rabbah (1704). The print was not particularly good, being in many places faint; the type was small and plain, the paper gray. Professor Grilo owned a printing-house from 1740 (in which year he printed the Zohar) till 1767, when it was continued by his widow (1767–88) and afterward by his daughter (1792–97). Then it passed to Professor Elsner, who conducted it till 1818, when Frankfort-on-the-Oder lost both its university and its Hebrew printing establishments. Among the Jewish typesetters special notice must be given to a young girl Ella, daughter of Moses, who worked with Gottschalk on the Talmud edition and other books printed in 1700. She is mentioned in the colophon to the treatise Niddah.

FRANKFURT (known also as **Guenzburg**), **AKIBA B. JACOB:** German preacher and author; died at Frankfort-on-the-Main 1597. He was the son-in-law of R. Simeon Guenzburg of Frankfort, with whose congregation he was associated as preacher, and by whose name he came to be known. Frankfurt wrote: "Teḥinnot be-Kol Yom," prayers for the days of the week, published by Elijah Loanza, Basel, 1599; "Zemirot we-Shirim le-Shabbot," songs for the Sabbath, some of which have been translated into Judæo-German, with notes in Hebrew; "Wikkuaḥ ha-Yayin we ha-Mayim," a dispute between wine and water, in verse, with a translation in Judæo-German, published together with the two preceding, and separately, Amsterdam, 1759; "Zemirot le-Lel Shabbot," songs for Sabbath evening, Berlin, 1713.

S. S. N. T. L.

FRANKFURTER, BERNHARD: German teacher and writer; son of Rabbi Moses Frankfurter; born at Herdorf March 15, 1801; died Aug. 13, 1867. In 1822 he became a teacher in the Israelitischer Volksschule at Nordstetten, Württemberg. Among his pupils was Berthold Auerbach, with whom he remained on terms of the most intimate friendship until his death. Auerbach commemorates his teacher in the tale "Der Lauterbacher," one of his "Schwarzwälder Dorfgeschichten," for which Frankfurter furnished him considerable material.

FRANKFURTER, JUDAH LÖW B. SIMON. See JUDAH LÖB B. SIMON.

FRANKFURTER, MOSES BEN SIMON: Dayyan and printer of Amsterdam; born 1672; died 1762. It appears from his epitaph (Mülder, "Jets over de Bergraafplaatsen," p. 15) that Frankfurter assumed in his old age the name of "Aaron." In 1720 he established a printing-press at Amsterdam, from which he issued some of his own works. He was the author of: "Nefesh Yehudah," a commentary on Isaac Aboab's "Menorat ha-Ma'or," with a Judæo-German translation (Amsterdam, 1701); "Zeh Yenaḥamenu," a short commentary on the Mekilta (*ib.* 1712); "Sha'ar Shim'on," prayers for the sick, a compendium of his father's "Sefer ha-Ḥayyim," in two parts, the second in Judæo-German (*ib.* 1714); "Sheba' Petilot," the moral teachings of the "Menorat ha-Ma'or," in seven chapters (*ib.* 1721); "Ṭob Leket," glosses to the Hilkot Semaḥot of the Shulḥan 'Aruk, Yoreh De'ah (*ib.* 1746); "Be'er Heṭeb," glosses on Shulḥan 'Aruk, Ḥoshen Mishpaṭ, similar to those of Judah Ashkenazi on the three other parts of the Shulḥan 'Aruk (*ib.* 1749). Frankfurter also edited several works, the most important being the rabbinic Bible entitled "Ḳehillat Mosheh," which contains many commentaries not found in other editions. It includes his own glosses to the Pentateuch (*ib.* 1724).

FRANKFURTER, NAPHTALI: German preacher; brother of Bernhard Frankfurter; born at Oberdorf Feb. 13, 1810; died April 13, 1866; studied at the universities of Heidelberg and Tübingen, graduating (Ph.D.) in 1833. For a time acting rabbi at Lehrensteinfels, he was called as rabbi to Braunsbach in Württemberg, and in 1840 to Hamburg as preacher of the temple. He was also very active in educational matters. In 1848 his fellow citizens elected him to the Hamburg Parliament ("Constituante"). Frankfurter belonged to the extreme (religious) Reform party. Besides the "Gallerie der Ausgezeichneten Israeliten Aller Jahrhunderte; Ihre

Portraits und Biographien," issued conjointly with his friend Berthold Auerbach (1838), and the pamphlet "Stillstand und Fortschritt: Zur Würdigung der Parteien im Heutigen Judenthume" (Hamburg-1841), he published a volume of his sermons.

FRANKFURTER, SIMON BEN ISRAEL: Dutch rabbinical scholar; father of Moses Frankfurter; born at Schwerin, Germany; died at Amsterdam Dec. 9, 1712. He was the author of a work in two parts, containing the rites and prayers for the use of the sick and the mourning, the first part in Hebrew under the title "Dine Semaḥot," the second in Judæo-German with the title "Alle Dinim von Freuden" (Amsterdam, 1703). It was republished by Moses Frankfurter under the title of "Sefer ha-Ḥayyim" (*ib.* 1716). C. Rehfuss of Heidelberg published it with a German translation (Frankfort-on-the-Main, 1834), and Benjamin H. Ascher of London translated it into English under the title of "The Book of Life" (London, 1847).

FRANKFURTER, SOLOMON: Austrian librarian and archeologist; born at Presburg, Hungary, Nov. 9, 1856. He studied at Vienna (Ph.D. 1883) and Berlin, devoting himself especially to philological, historical, and archeological studies. In Berlin he attended lectures at the Hildesheimer Rabbinical Seminary. In 1884 he was made an officer of the Vienna University Library, where he now occupies the position of scriptor. In addition to various contributions on philological, archeological, educational, and bibliographical subjects in reviews and magazines, he published: (with W. Kubitschek) "Führer Durch Carnuntum," Vienna, 1891 (4th ed., 1894); "Die Berliner Schulreform-Conferenz" (Dec. 4–17, 1890), Vienna, 1891; "Die Preussische Mittelschulreform und das Oesterreichische Mittelschulwesen," Vienna, 1892; "Graf Leo Thun-Hohenstein, Franz Exner und Herm. Bonitz: Beiträge zur Gesch. der Oesterreichischen Unterrichtsreform," Vienna, 1893; "Graf Leo Thun-Hohenstein," 1895; "Die Organisation des Höheren Unterrichts in Oesterreich," Munich, 1897; "Die Qualifikation für den Staatlichen Bibliotheksberuf in Oesterreich," Vienna, 1898; "Register zu den Archaeologisch-Epigraphischen Mitteilungen aus Oesterreich-Ungarn," Vienna, 1902.

S.

FRANKINCENSE (לבונה, incorrectly rendered "incense" in Isa. xliii. 23, lx. 6; Jer. vi. 20, A. V.): Frankincense was not indigenous to Palestine—the assumption that the tree from which it is derived was at home in the Lebanon Mountains rests merely on the similarity of the name ("lebanon" = *λίβανος*)—though gardens for the cultivation of the exotic plant may have existed there (comp. Cant. iv. 6, 14; the gardens of Jericho, En-gedi, Zoar: Josephus, "Ant." viii. 6, § 6; ix. 1, § 2; Pliny, "Historia Naturalis," xii. 31). Frankincense was imported mainly from Arabia (especially from Saba; Isa. lx. 6; Jer. vi. 20), and as it was needed for sacrificial purposes (according to the critical school, only after the priestly codification: see INCENSE), stores of it were kept in the Temple (I Chron. x. [A. V. ix.] 29; Neh. xiii. 5, 9). Voluntary offerings of it are mentioned (Jer. xvii. 26, xli. 5, R. V.). It is also referred to as among the luxuries of the wealthy (Cant. iii. 6), and may have been used as an ingredient in the perfumes burned in honor of dead kings (see CREMATION; Jer. xxxiv. 5; II Chron. xvi. 14, xxi. 19).

In southern Arabia (Sprenger, "Die Alte Geographie Arabiens," 1875, pp. 296–297; Glaser, "Skizze der Gesch. und Geographie Arabiens," 1880, ii. 167–168), in a mountainous district, is found a tree of shrub-like appearance, with compound leaves, five-toothed calyx, five petals, ten stamens, and a triangular, three-celled fruit, with winged seeds (the *Boswellia sacra*). This tree, which was known even to the classical writers, furnishes frankincense. It is, however, also very likely that in remote antiquity (according to Egyptologists, in the seventeenth pre-Christian century) Somaliland was one of the countries whence this coveted luxury and sacerdotal necessity was imported. India, too, produced it. In the latter country it is the *Boswellia thurifera* or *Boswellia serrata* which furnishes the resin (olibanum). The bark is slit and the gum oozes out: hence the Greek name *σταγονίας*. Sometimes palm mats are spread on the ground to catch the exuding gum; otherwise no further care is required (see Pliny, *l.c.* xii. 32; Theophrastus, "Plants," ix. 4). The Indian product is perhaps the finer and purer—*i.e.*, the "white"—frankincense (hence the name לבונה, from לבן, "white"), called "lebonah zakkah" (Ex. xxx. 34; LXX. *διαφανής*; Vulg. "lucidissimum"); it was one of the ingredients of the holiest incense (comp. Matt. ii. 11), and was identical, it seems, with that which was used by the Arabs in their sacrificial ritual (Doughty, "Arabia Deserta," i. 452, ii. 144, Cambridge, 1888). It is white, brittle, and bitter to the taste, while the ordinary species is a gum of yellowish color.

In the Talmud this frankincense is enumerated as one of the eleven components of the incense (Ker. 6a, b). It was not to be sold to an idolater ('Ab Zarah i. 5). It is also mentioned as an ingredient in the preparation intended to stupefy an individual about to undergo capital punishment (see CRUCIFIXION; Sanh. 43a).

FRANKISTS. See FRANK, JACOB.

FRANKL, LOTHAR AMADEUS, RITTER VON HOCHWART: Austrian neuropathist; born at Vienna June 12, 1862; son of Ludwig August FRANKL; educated at the Schottengymnasium and at the university of his native town, graduating as doctor of medicine in 1886. Until 1888 Frankl was assistant at the First Medical Clinic; and until 1889, at the psychiatrical hospital of the university, in which year he became chief of the neuropathical

dispensary of the First Medical Hospital. In 1891 he was admitted, as privat-docent of neuropathy, to the medical faculty of Vienna University, receiving in 1898 the appointment of assistant professor.

Frankl has published many works and essays on neurology, especially upon tetanus, Menière's vertigo, and nervous diseases of the bladder, all of which appeared in Nothnagel's "Handbuch der Speciellen Pathologie und Therapie." To the medical journals he has contributed articles upon trigeminus neurology, the anatomy of the brain, intentional convulsion, and traumatical neurosis, and (with Dr. Fröhlich) experimental studies on the innervation of the rectum, paralysis of the facial nerves, psychosis after ocular operations, etc.

S. F. T. H.

FRANKL, LUDWIG AUGUST, RITTER VON HOCHWART: Austrian poet and writer; born at Chrast, Bohemia, Feb. 3, 1810; died at Vienna March 12, 1894. He received his early education at the Piarists' gymnasium of Prague and at the Piarists' college of Leitomischl, his teacher in Hebrew being Zecharias Frankel. During 1828–37 he studied medicine at Vienna and in Italy, and received the degree of M.D. from the University of Padua. During his stay in Italy he became acquainted with Thorwaldsen, Mezzofanti, Leopardi, Niccolini, and other men of renown. He practised but a short time as physician. In 1838, upon the advice of his friend Josef Wertheimer, he accepted the position of secretary and archivist of the Vienna Jewish congregation. This position he held over forty years. His first poetical production, "Das Habsburglied, Historische Balladen" (Vienna, 1832), gained him an acknowledged position among Viennese writers. These patriotic songs were followed by "Episch-Lyrische Dichtungen" (Vienna, 1834); "Sagen aus dem Morgenlande" (Leipsic, 1834), an imitation of Oriental poetry; and the romantic epos "Christoforo Colombo" (Stuttgart, 1836). He translated Byron's "Parisina" (Leipsic, 1835), and "Paradise and the Peri," part of Thomas Moore's poem "Lalla Rookh" (Vienna, 1835). He was editor of the "Oesterreichisches Morgenblatt" in 1841, and published Josef Emanuel Hilscher's poems after the latter's death. A collection of his "Dichtungen" appeared in 1840 (Leipsic), the Biblical-romantic poem "Rachel" in 1842 (7th ed., Vienna, 1880), and "Elegien," in which he gave expression to his feelings on the unhappy condition of his Jewish brethren, likewise in 1842. At the same time he founded the "Sonntagsblätter," one of the best literary organs in Austria. He edited it until March, 1848, when it was suppressed by the government. In 1846 appeared an epos by him entitled "Don Juan de Austria" (Leipsic; 3d ed., Prague, 1884).

Ludwig August Frankl, Ritter von Hochwart.

The Vienna Revolution of March, 1848, was greeted by Frankl with the enthusiasm of an idealist.

The Revolution of 1848.

His poem "Die Universität," reechoing the liberal ideas of that great movement, was set to music by nineteen composers and circulated to the extent of 500,000 copies in Austria and Germany. As a member of the Students' Legion he was wounded (Oct. 6, 1848) in the uprising against the government. Under the title "Gusle" he published, in German, a collection of Servian national songs (Vienna, 1852). In the following poems: "Hippocrates und die Moderne Medicin" (5th ed., Vienna, 1860), "Die Charlatane" (3d ed., *ib.* 1862), "Hippocrates und die Cholera" (3d ed., *ib.* 1864), "Medicin und Mediciner in Knittelversen" (7th ed., Vienna, *ib.* 1861), "Nach 500 Jahren: Satire zur Säkularfeier der Wiener Universität" (Leipsic, 1865), he satirized medical charlatanism. His "Zur Geschichte der Juden in Wien" appeared in Vienna in 1853. In the poem "Der Primator" (Prague, 1861), published in many editions, he gives a touching description of the persecutions and sufferings of Jews. Other productions of his prolific pen are:

Helden- und Liederbuch. Prague, 1861 (2d ed., 1863).
Ahnenbilder. Leipsic, 1864.
Libanon, ein Poetisches Familienbuch. Vienna, 1867 (4th ed.).
Tragische Könige, Epische Gesänge. Vienna, 1876 (2d ed., 1880).
Lyrische Gedichte. Stuttgart, 1880 (5th ed.).
Episches und Lyrisches. Stuttgart, 1890.
Beiträge zu den Biographien Nikolaus Lenau's, Ferdinand Raimund's, Friedrich Hebbel's, Franz Grillparzer's. Vienna, 1882–85.
Andreas Hofer im Liede. Innsbruck, 1884.
Biographie des Malers Friedrich von Amerling. Vienna, 1889.
Lenau und Sophie Löwenthal, Tagebuch und Briefe des Dichters. Stuttgart, 1891.
Gesammelte Poetische Werke (except the satirical poems). 3 vols., Vienna, 1880.
His correspondence with Anastasius Grün (1845–76) was published by his son Bruno von Frankl ("Aus dem 19ten Jahrhundert," vol. i., Berlin, 1897).

At the request of Elise v. Herz-Lämel he went to Jerusalem (1856), and with her help founded there a Jewish school and philanthropic institution. His journeys in Asia and in Greece are vividly depicted, in verse and prose, in a work of two volumes, "Nach Jerusalem" (Leipsic, 1858), which has been translated into several languages, among them Hebrew. Later he added a third volume, "Aus Aegypten" (Vienna, 1860). Frankl advocated the erection of an asylum for the blind near Vienna, on an eminence called "Hohe Warte." The institution was established mainly through the generosity of Baron Jonas von Königswarter. Through Frankl's efforts a European congress of superintendents and teachers of asylums for the blind, over which he presided, was convened at Vienna in 1873. The Schiller monument in Vienna was also the result of his initiative. On the day of its dedication, Nov. 10, 1876, the emperor Francis Joseph, in recognition of Frankl's great services, conferred on him the hereditary title "Ritter von Hochwart"; in 1880 Vienna honored him with the freedom of the city. In 1851 he was appointed professor of ethics at the

Philanthropic Work.

Conservatorium der Gesellschaft der Musikfreunde of the Austrian Empire; later he became a member of the Vienna school board.

True to the impressions of his youth, he kept in remembrance the Jewish life of his parental home, which he visited only a few weeks before his death; his feelings on that occasion found expression in a poem entitled "Chrast," his swan-song. Another of his later poems is the touching elegy which he dedicated to the memory of Adolf Fischhof (March 28, 1893), a fellow patriot in the stormy days of 1848.

S. S. MAN.

FRANKL, OTTO: Austrian jurist; born in Prague Oct. 4, 1855; studied at the universities of Prague, Göttingen, and Leipsic; made privat-docent (1883), and professor of law at Prague (1891). His principal sphere lies in mining and bankruptcy law. Among his most important works are: "Die Formerfordernisse der Schenkung nach Oesterreichischem Rechte," Gratz, 1883; "Der Freischurf," Prague, 1885; "Der Concurs der Offenen Handelsgesellschaft," Prague, 1890; "Die Haftpflicht für Bergschäden nach Oesterreichischem Rechte," Bonn, 1892; "Zur Revision des Oesterreichischen Concursrechtes," Vienna, 1896. He is also one of the editors of the "Juristische Vierteljahrsschrift" and of the "Grundriss des Oesterreichischen Rechts in Systematischer Darstellung" (Leipsic). S.

FRANKL, PINKUS FRIEDRICH: German rabbi; born at Ungarisch-Brod, Moravia, Jan., 1848; died at Johannisbad Aug. 22, 1887. After attending the yeshibah at Presburg, Frankl prepared himself for the rabbinate at the seminary in Breslau, and at the same time studied Orientalia at the university of that city, graduating (Ph.D.) in 1870. In 1875 he became the secretary of the Wiener Israelitische Allianz, and in 1877 succeeded Abraham Geiger in the rabbinate of Berlin. Four years later Frankl added to his rabbinical duties those of teacher in the Lehranstalt für die Wissenschaft des Judenthums. At that time he became the associate of Grätz in the publication of the "Monatsschrift." He wrote: "Ein Mutazilitischer Kalam aus dem X. Jahrhundert," first printed in the "Sitzungsberichte" of the Vienna Academy of Science, 1872; "Studien über die Septuaginta und Peschitta zu Jeremiah," 1872; "Karäische Studien," 1876; a series of articles in "Ha-Shaḥar," 1876–77, under the title "Aḥar Reshef le-Bakker," being a criticism on Pinsker's "Likḳute Ḳadmoniyot"; "Beiträge zur Literaturgeschichte der Karäer, 1887; "Predigten," 1888. Frankl also published some piyyuṭim of Eleazar ha-Ḳalir, under the title "Piyyuṭe ben Ḳalir," in the "Zunz Jubelschrift" (Hebrew part, pp. 201–207), Berlin, 1884.

FRANKL-GRÜN, ADOLF: Austrian rabbi; born at Ungarisch-Brod, Moravia, Jan. 21, 1847. He received his education at the schools of his native town, at Leipnik, and at Eisenstadt (Hungary), where he became teacher of Hebrew at Dr. Hildesheimer's rabbinical school. He then attended the universities of Breslau and Jena and the theological seminary at Breslau, receiving in 1877 the degree of doctor of philosophy from Jena and the rabbinical degree from Breslau. In the same year he became rabbi at Kremsier, Austria, and religious teacher at both colleges of that city. He still (1903) occupies both positions.

He is the author of several volumes of sermons and has written numerous essays. His principal works are: "Die Ethik des Juda Hallewi," 1885; "Geschichte der Juden in Kremsier," 3 vols., 1896; "Varianten in Parallelen der Bibel"; and "Jüdische Zeitgeschichte und Zeitgenossen," Vienna, 1903.

S. F. T. H.

FRANKLIN, BENJAMIN A.: Jamaica merchant; born at Manchester, England, 1811; died at Kingston, Jamaica, April 26, 1888. He went to the island about the year 1837, and engaged in business, becoming a magistrate and consul for Denmark. The tonnage dues on shipping were abolished mainly at his representation. Franklin founded the Hebrew Benevolent Society in 1851, and promoted the union of the Sephardic and Ashkenazic communities. He was for many years chairman of the Hebrew National Schools, and aided in establishing the Kingston Sailors' Home (in 1864). After returning for ten years to England, he went back to Jamaica and died there.

J. G. L.

FRANKLIN, FABIAN: American mathematician, editor, and author; born in Eger, Hungary, Jan. 18, 1853; son of Morris Joshua and Sarah Heilprin, of a family which has had several distinguished representatives in the United States. He was graduated B.A. from Columbian University, Washington, D. C., in 1869, and engaged in civil engineering and surveying up to 1877. In that year he became, by invitation, a fellow of Johns Hopkins University (Ph.D. 1880), where he exhibited unusual ability in mathematics, being successively appointed assistant, associate, associate professor, and professor of mathematics in that university (1879–95). Franklin has always been greatly interested in economic and public questions, and in 1895 he retired from his professorship and assumed editorial charge of the "Baltimore News." He has contributed to the "American Journal of Mathematics" and other mathematical publications, to the "Nation," and to the "North American Review." Franklin is an associate fellow of the American Academy of Arts and Sciences, Boston.

FRANKLIN, JACOB ABRAHAM: English journalist and philanthropist; born at Portsmouth 1809; died Aug. 3, 1877. On his retirement from business he went to London and took an active part in communal affairs there. He established a weekly periodical, "The Voice of Jacob"—the first organ in the Anglo-Jewish community—in which to express

his views against the Reform movement of 1842. Franklin represented the Manchester community at the board of deputies; was chairman of a committee of the Jewish board of guardians; was a founder of the Anglo-Jewish Association, and a member of its executive. Animated by a zeal for Jewish education, he was anxious to establish a Jewish board-school in London, and succeeded in obtaining participation by the Jewish schools in parliamentary grants. He was a fellow of the Society of Arts, and read a number of papers on decimal coinage, education, etc., being examined on the latter subject before a parliamentary committee. At his death he bequeathed the bulk of his property for the carrying out of certain educational projects, among them the publication of Jewish text-books. Under the auspices of the Franklin Fund appeared such works as N. S. Joseph's "Natural Religion," Lady Magnus' "Outlines of Jewish History," and Friedländer's "The Jewish Religion."

J. G. L.

FRANKS: American Jewish family which included a number of officers of some distinction engaged on both sides in the American Revolutionary war. The earliest known member appears to have been Jacob Franks, a merchant who settled in New York at the beginning of the eighteenth century.

David Franks: Loyalist in the war of the American Revolution; born in New York Sept. 23, 1720; died in Philadelphia Oct., 1793; the son of Jacob Franks. He went to Philadelphia early in life, and soon became well known in both business and social circles. He was elected a member of the provincial assembly in 1748; during the French and Indian war he was engaged by the government to supply the army with provisions; in 1755, upon the defeat of General Braddock, he helped to raise a fund of £5,000 for the further defense of the colony; on Nov. 7, 1765, he signed the Non-Importation Resolution; his name is also appended to an agreement to take the king's paper money in lieu of gold and silver. During the war with England he was an intermediary in the exchange of prisoners as well as an "agent to the contractors for victualing the troops of the King of Great Britain." In 1778 Franks was imprisoned by order of Congress, his intentions being considered "inimical to the safety and liberty of the United States"; he was shortly released, only to be arrested two years later as an enemy to the American cause. Later, ruined in fortune, he left for England, but returned in 1783 and engaged in the brokerage business in Philadelphia, in which he continued until his death from yellow fever during the epidemic of 1793.

Col.*; *Pennsylvania Magazine*; *Records of Christ Church, Philadelphia* (MS.).

David Salisbury Franks: American diplomatic agent, and officer in the American Revolutionary army. He probably left England at an early age, for he is described as a "young English merchant" in a document of 1775; he settled in Montreal, Canada, in 1774, and engaged in business. He was active in congregational affairs, and in 1775 was president of the Shearith Israel congregation (see CANADA). He early evinced an attachment for the American cause, and on May 3, 1775, was arrested for speaking disrespectfully of the king, but was discharged six days later. When General Montgomery took possession of Montreal, Franks advanced money for the support of the army. In 1776 General Wooster appointed him paymaster to the garrison at Montreal, and when the army retreated from Canada he enlisted as a volunteer, and later joined a Massachusetts regiment. Upon the recommendation of the Board of War he was ordered in 1778 to serve under Count d'Estaing, then commanding the sea forces of the United States; upon the failure of the expedition he went to Philadelphia, becoming a member of General Benedict Arnold's military family. In 1779 he went as a volunteer to Charlestown, serving as aide-de-camp to General Lincoln, but was recalled to attend the trial of General Arnold for improper conduct while in command of Philadelphia, in which trial Franks was himself implicated. He was aide-de-camp to Arnold at the time of the latter's treason in Sept., 1780; suspicion was directed against him, and on Oct. 2 he was arrested, but when the case was tried the next day, he was honorably acquitted. Not satisfied with this, he wrote to Washington asking for a court of inquiry to examine into his conduct; on Nov. 2, 1780, the court met at West Point and completely exonerated him. In 1781 he was sent by the superintendent of finance, Robert Morris, to Europe as bearer of despatches to Jay in Madrid and Franklin in Paris; on his return Congress reinstated him in the army with the rank of major. On Jan. 15, 1784, Congress resolved "that a triplicate of the definitive treaty [of peace] be sent out to the ministers plenipotentiary by Lieut.-Col. David S. Franks," and he left again for Europe. The next year he was appointed vice-consul at Marseilles; in 1786 he served in a confidential capacity in the negotiations connected with the treaty of peace and commerce made with Morocco, and on his return to New York in 1787 brought the treaty with him. He applied to Washington in 1789 and to Jefferson in 1790 for a position in the consular service, but nothing came of these requests. On Jan. 28, 1789, he was granted four hundred acres of land in recognition of his services during the Revolutionary war. Major Franks was one of the original members of the Society of the Cincinnati, Pennsylvania division.

Isaac Franks: Officer in the American Revolutionary army; born in New York May 27, 1759; died in Philadelphia March 4, 1822. At the outbreak of the war in June, 1776, when only seventeen years old he enlisted in Colonel Lesher's regiment, New York Volunteers, and served with it in the battle of Long Island; on Sept. 15 of the same year he was taken prisoner at the capture of New York, but effected his escape after three months' detention. In 1777 he was appointed to the quartermaster's department, and in Jan., 1778, he was made forage-master, being stationed at West Point until Feb. 22, 1781, when he was appointed by Congress ensign in the Seventh Massachusetts Regiment; he continued in that capacity until July, 1782, when he resigned on account of ill health. In 1789 Franks was appointed a notary and tabellion public of the Commonwealth of Pennsylvania; in 1794 Governor Mifflin commissioned him lieutenant-colonel of the Second Regiment, Philadelphia county. It was in his house at Germantown, a suburb of Philadelphia, that President Washington resided during the prevalence of yellow fever in the city in 1793. He was appointed in 1795 a justice of the peace for the townships of Germantown and Roxborough. On Feb. 18, 1819, he was made prothonotary of the Supreme Court of Pennsylvania, and held that position until his death three years later. Colonel Franks' portrait was painted by Gilbert Stewart, and is now in the Gibson Collection of the Pennsylvania Academy of the Fine Arts, Philadelphia, with whose permission it is reproduced here.

Soc.* vol. v.; Leon Hühner, in *ib.* vol. x. 168–170; *Massachusetts Soldiers and Sailors in the War of the Revolution*, vi. 20, Boston, 1899; *Papers of the Supreme Court of Pennsylvania* (MSS. in the possession of the Pennsylvania Historical Society, Philadelphia).

Michael Franks: Private in the French and Indian war; his name is included in a list of Captain van Braam's company, dated July 9, 1754, and in a list of those "who have received His Excellency's bounty money."

BIBLIOGRAPHY: Cyrus Adler, in *Publications Am. Jew. Hist. Soc.* ii. 180–181; *Journal of Colonel George Washington*, ed. by J. M. Toner, pp. 177, 194, 203, Albany, 1893.

Rebecca Franks: Prominent member of Philadelphia loyalist society during the Revolution; born in Philadelphia about 1760; died in Bath, England, March, 1823; daughter of David Franks. During the Revolutionary war her sympathies, like her father's, were with the mother country, and during the British occupation of Philadelphia in 1778 she assisted in the "Meschianza," the celebrated fête given in honor of General Howe, and at which Major André presided. "The Times, a Poem by Camilio Querno, Poet Laureate of the Congress," a loyalist composition, has been attributed to her. Her literary ability, as well as her vivacity and wit, were well known; she carried on a correspondence with prominent men, and General Charles Lee, of the Continental army, addressed to her a letter which attracted much attention, being published in the magazines of the day. In 1782 she married, in New York, Lieutenant-Colonel, afterward General, Henry Johnson, G.C.B., and removed to England, residing in Bath until her death.

A. A. S. W. R.

FRANZOS, KARL EMIL: Austrian author; born Oct. 25, 1848, in the Russian government of Podolia. His childhood was spent at Czortkow, Galicia, the "Barnow" of his stories. Franzos attended the German gymnasium at Czernowitz and studied law at the universities of Gratz and Vienna. After passing the state examination he devoted himself to journalism, and traveled (1872–76) through Europe, Russia, the countries of the Danube, Turkey, Asia Minor, and Egypt. In 1877 he settled in Vienna, and published as the fruit of his travels "Aus Halb-Asien" (Leipsic, 1876; 4th ed., Berlin, 1900), "Vom Don zur Donau" (Leipsic, 1878; 2d ed., 1890), and "Aus der Grossen Ebene" (Stuttgart, 1888). In these three books, which have been translated into many European languages, he gives brilliant sketches of the social conditions of the countries he visited. From 1882 to 1885 he edited the "Neue Illustrirte Zeitung," and in 1886 founded the "Deutsche Dichtung," which he edited himself. In 1887 he moved to Berlin.

Franzos' childhood was spent in a Jewish-Polish village, surrounded by the narrowness of Orthodox Galician Judaism. His father had seen German life and received a German education. Returning to Galicia as a district physician, he became a benefactor to his poor countrymen, who, although they loved and admired him as their physician, stood aloof from him, unable to understand how he, one of themselves, could dispense with regulations which for them were religion. Of these Galician Jews Karl Franzos gives a vivid description in "Die Juden von Barnow" (Stuttgart, 1877; 6th ed., Leipsic, 1900) and in "Moschko von Parma" (Breslau, 1880; 3d ed., 1898). In 1888 he published in Breslau "Judith Trachtenberg" (4th ed., 1900), also dealing with a Jewish subject. Franzos claims the authorship of the well-known epigram, "Every country

Karl Emil Franzos.

has the Jews that it deserves" (Jedes Land hat die Juden die es verdient). Differing from Auerbach, Bernstein, and Kompert, Franzos lays stress on the tragic sides of Jewish life, the fateful conflict of old and new, of internal and external forces.

Although his fame is based on his remarkable sketches of life and character in Galician ghettos, he is not merely a ghetto novelist. His pen secured him a place among the chief authors of contemporary Germany. In 1887 appeared his most important work, "Ein Kampf ums Recht," Breslau, 4th ed., 1900, in which he describes the fight of a Bukowina farmer for what he imagines his right, and the conflict between his traditional race-right and the law of the many-tongued modern Austrian empire.

Besides the works mentioned Franzos wrote:

Junge Liebe, Breslau, 1878; Von den Türken in Europa (a translation of James Baker's "Turkey in Europe"), Breslau, 1878; Stille Geschichten, Dresden, 1880; Mein Franz, a short story in verse, Leipsic, 1881; Der Präsident, Berlin, 1884; Die Reise nach dem Schicksal, Stuttgart, 1885; Trug, Stuttgart, 1885; Die Schatten, Stuttgart, 1888; Der Gott des Alten Doktors, Jena, 1892; Die Suggestion und die Dichtung, a collection of literary studies, Berlin, 1892; Der Wahrheitssucher, Berlin, 1893; Ungeschickte Leute, Berlin, 1894; Ein Opfer, Berlin, 1894; Der Kleine Martin, Berlin, 1894; Leib-Weihnachtskuchen und Sein Kind, Berlin, 1894; Allerlei Geister, Berlin, 1895; Mann und Weib, Berlin, 1899; Heine's Geburtstag; Aus Anhalt und Thüringen, both Berlin, 1900; Ernst Schulze und Caecilie, Berlin, 1901.

In 1879 Franzos published "Georg Büchner's Sämmtliche Werke und Handschriftlicher Nachlass"; in 1883 he edited "Deutsches Dichterbuch aus Oesterreich" (Leipsic); in 1895, "Die Geschichte der Erstlingswerke" (Berlin), autobiographical sketches of the first efforts of contemporaneous German authors; in 1899, "Konrad Meyer" (Berlin), a study of that well-known German novelist. Nearly all of his books have been translated into English, French, and other European languages.

Franzos has always taken an interest in Jewish affairs, and has held several communal offices in Vienna and Berlin. His wife is **Ottilie Benedikt**, born at Vienna Sept. 24, 1856, who published (under the nom-de-plume "F. Ottner") two novels: "Das Adoptivkind und Andere Novellen" (1896) and "Schweigen" (1902).

FRAT MAIMON or **SOLOMON BEN MENAHEM:** Provençal scholar; flourished in the second half of the fourteenth century. The name "Frat" is, according to Neubauer, abbreviated from "Frater." Frat Maimon was the author of four works, which are known only by quotations made from them by three of his disciples: (1) "'Edut le-Yisrael," probably a controversial treatise on religion; (2) "Neẓer Maṭṭa'i," on the philosophical explanations of the haggadot found in the Talmud; (3) a commentary on the poem "Batte ha-Nefesh" of Levi ben Abraham; (4) comments on Genesis.

FRATERNITATEA. See Periodicals.

FRATERNITIES: Societies for mutual benefit. If it be true that "the origin of the friendly society is probably in all countries the burial club" ("Encyc. Brit." ix. 780), Jewish organizations of that nature may be traced back nearly two thousand years. Fraternities for the burial of the dead are mentioned in the Talmud (M. Ḳ. 27b). The ḥebra ḳaddisha, or burial society, was known in its present form early in the fifteenth century, and numerous associations resembling it more or less closely have existed ever since. But the modern fraternal organization with its insurance or endowment features belongs with few exceptions to the second half of the nineteenth century. The history of such Jewish fraternities, whether ancient or modern, still remains to be written (Steinschneider, "Allg. Einleitung in die Jüd. Lit. der Mittelalters," in "J. Q. R." xv. 314, 315). There are many thousands of Jewish societies scattered among communities in all parts of the world; but the present article is restricted to the larger "orders," which flourish mostly in the United States. These orders not only offer pecuniary benefits and cheap insurance, but also serve as social centers, and have afforded the machinery for national Jewish organization throughout the United States. Besides the B'nai B'rith (see Jew. Encyc. iii. 275) the most important are:

Ahavas Israel, Independent Order: Founded 1890; 124 lodges; 121,499 members (1902).

American Israelites, Independent Order: Founded 1894; 3,000 male and 2,500 female members (1899). Headquarters in New York.

American Star, Order: Founded 1884; 5,500 members in 1899. (Defunct?)

B'nai B'rith, Improved Order: Founded 1887; 40 lodges and 1,500 members (1901).

B'rith Abraham, Order: Founded 1859; 288 lodges; 42,000 members of both sexes. Headquarters in New York.

B'rith Abraham, Independent Order: Founded 1887 (an offshoot of the preceding); 302 lodges; 56,949 members. Headquarters in New York.

Free Sons of Benjamin, Independent Order: Founded 1879; 192 lodges; 14,088 male, 1,361 female, members (1901). Headquarters in New York.

Free Sons of Israel, Independent Order: Founded 1849; 103 lodges; about 11,000 members. Headquarters in New York. There are also an "Improved Order" and a "Junior Order" of the same name.

Free Sons of Judah, Independent Order: 119 lodges; 6,447 members (1901).

Kesher Shel Barzel, Order: Founded 1860 (offshoot of Order B'rith Abraham); dissolved 1903.

Progressive Order of the West: 1,082 members (1901).

Sons of Abraham, Independent Order: Founded 1892; 2,400 members (1899). Headquarters in New York.

United Israelites, Independent Order: Founded in Philadelphia 1886; reported to have had 200 lodges in 1894.

Western Star, Independent Order: An offshoot of Order American Star; about 5,000 members, chiefly in Chicago and other parts of the West.

England is probably the only other country which has Jewish fraternal organizations of this kind. "The Jewish Year Book" for 1901–02 records, besides four Jewish "courts" of the **Ancient Order of Foresters** and seven Jewish "beacons" of the **Order of Ancient Maccabeans,** the following fraternities:

Ancient Order of Mount Sinai: Six lodges.
Grand Order of Israel: Fourteen lodges.
Hebrew Order of Druids: Seven lodges.
Order Achei Berith: Sixteen lodges.

There are, besides, numerous lodges of Freemasons and other nominally non-Jewish fraternal societies which are composed wholly or mostly of Jews. Many Jews have attained high rank in such bodies,

as, for instance, Max Selanick, who is at present (1903) the highest official of the Knights of Pythias in the state of New York. See FREEMASONRY.

A. P. WI.

FRAUD AND MISTAKE: Where in a transaction one of the parties loses by the fraud, *i.e.*, the misrepresentation, of the other, or by his suppression of the truth, the law gives relief either by rescinding the contract or by awarding damages. In some cases such relief is afforded when the loss occurs through mistake, without any evil intent on the part of him who gains by it. The Mosaic and rabbinical law forbids many fraudulent practises under religious and punitive sanctions. The law also sets aside some sales or purchases simply for excess or deficiency of price. The implied warranty that an article sold will come up to its description in quality and quantity may also be treated in connection with the subject of fraud and mistake.

I. Forbidden Practises: 1. The written law is very severe against the use of false measures of length, false weights, false hollow measures, and untrue scales (Lev. xix. 35, 36); and it speaks of the possession of twofold weights or measures, one great and one small, as an abomination to the Lord (Deut. xxv. 13–16). This law applies in dealings with Gentiles as well as Jews (B. Ḳ. 113b). It is the duty of the courts to appoint inspectors of scales, weights, and measures (baraita to B. B. 89a), and to punish offenders by floggings, and, in later times, by fines also (Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 231, 2). A deficient bushel should not be kept in the house for any purpose, lest somebody measure with it. In many places the custom required all measures to be sealed by authority.

2. It is as unlawful to cheat a Gentile as an Israelite. If there is a blemish in an article about to be sold, the buyer must be informed. Flesh or hide of a "fallen" beast must not be sold, even to a Gentile, as that of a slaughtered beast. "They must not furbish up man or beast," says the Mishnah (B. M. iv. 12). Thus, one must not dye a bondman's beard black; nor drug an animal so as to raise and stiffen its hair; nor paint old implements to make them look like new. Many similar tricks are named. Bad grain should not be mixed with good grain and the whole sold as good. Water must not be put into wine at all. A merchant may put corn from five thrashing-floors into one bin, and pour wine from many presses into one barrel; for all know that he does not grow his grain or his grapes (B. M. 60a).

Adulteration.

3. A man must not assume false appearances to gain his neighbor's good opinion (גונב דעת); thus, for instance, though good manners force you to invite to dinner even one who, as you well know, can not accept, you must not press such a one to accept (Ḥul. 94a)

4. For special rules as to weights and measures see WEIGHTS AND MEASURES; but the moral aspect may be stated here, namely, that the heavenly punishment of the falsifier is very hard; for his is a sin for which there can hardly be real atonement; since he is a robber of the public, and he can not restore the money to those he has wronged, which is the first condition for receiving pardon (B. B. 88b).

II. Grounds for Rescission: Whenever a sale is made, a mistake in measure, weight, or number, no matter how small it may be, gives to the injured party the right to have the transaction set aside, to have the goods returned to the seller, and the price to the buyer, whether the mistake was made in the goods or in the money; and this at any time when the mistake is discovered. For it is a "purchase by mistake"; and such a purchase is void (Ḳid. 42b; Giṭ. 14a). He who receives money from his neighbor, whether as the price in a sale, or as a loan, or as a payment, and finds an excess, must return it, even unasked (B. M. 63b). On the other hand, in the sale of land or of slaves or of chattels, if the thing bought has a blemish in it which was unknown to the purchaser, the latter may return it at any time. Maimonides deduces this from the authorities given above as to mistake in weight or number. But whenever the purchaser uses the thing with knowledge of the blemish, he is barred (by analogy to the case put in Ket. 76a). Neither party can, without consent of the other, ask a reduction or proportional return of the price: the seller must take back his goods; the buyer must return them or pay in full. However, if houses at a distance have been sold, and it turns out they have been injured by trespassers before the sale, the injury being such as can be remedied by repairs, the seller may, by deducting the cost of repairs from the price, make the sale stand good; for here the blemish is temporary (Ṭur. v. 96, 6, on the authority of Asheri; see Ḥoshen Mishpaṭ, 232, 5).

Blemish.

What is a blemish within these rules depends in the main on the custom of the place. Every buyer has the right to expect that the thing bought is free from all blemish. Even if the seller proclaims that he will not be responsible for any fault, the buyer may still rescind on finding a blemish that has not been specially declared; for the waiver of the buyer is void unless he knows what he waives.

When the seller names several blemishes in the thing on sale, and it has only one of them, the court may conclude that the other faults were named only to put the buyer off his guard, and may rescind the contract (see the illustrations of a cow and a bondwoman in B. M. 80a). In a bondman or bondwoman only such blemishes are to be considered as interfere with his or her capacity for work; for slaves are not kept for pleasure. It is a blemish in a bondman that he is an "armed bandit," or that he is "inscribed to the king" (for punishment), but not that he is a thief or a gambler or a drunkard; for slaves are not presumed to be very moral (B. B. 92b).

III. Fitness for a Purpose: The Mishnah (B. B. vi. 1) says: "If one sells grain to his neighbor, and he sows it, but it will not sprout, the seller is not liable on a warranty. Simeon b. Gamaliel says (not contradicting what precedes): 'For garden seeds that are not eaten, he is liable.'" In other words, the seller must have either actual notice of

the purpose for which the article is bought, or implied notice in the nature of the article. It seems that there is no implied warranty that flaxseed will sprout; for though it is most frequently bought to be sown, it is also bought for linseed-oil; and "in money matters we do not go by the majority of cases." So also, when an ox is bought, and it turns out vicious, the seller may not be liable, for he can say, "I have sold it for butchering." But herein the great masters Rab and Samuel differed, the former insisting that farmers buy oxen so generally for the plow that the seller should presume this as the purpose.

Adaptability to an End.

Where the goods sold do not meet the description, there is no sale (Mishnah B. B. v. 6). Either party may object. So, when red wheat is delivered for white, or white for red; olive-wood for sycamore, or sycamore for olive, etc., either party may insist that there was a mistake; for every man has his own preference. But when the mistake is made of delivering a low grade for a high grade, the seller may not rescind; or if a high grade instead of a low one, the buyer may not rescind—even though, by reason of a great rise or fall in the market price, it may be of advantage to do so.

IV. Damages: Cases have been enumerated in which a return of the faulty article is impracticable, because it has been consumed before the fault is discovered; it might also be at such a distance that the cost of bringing it back would exceed the value. In these cases the seller must return the price, deducting only so much thereof as the buyer has been benefited. On the other hand, where the seller has sold an article unfit for the purpose for which the purchaser procured it, with knowledge of the purpose and of the unfitness therefor, he is liable not only for the return of the price, but also for the useless outlays to which the buyer has been put, such as in the sowing of seeds or in the transportation of goods to a foreign market. This liability for extra damages is asserted, though without authority in the Talmud, by the Ṭurim and the Shulḥan 'Aruk (Ḥoshen Mishpaṭ, 232, 21).

Full details are also found in the codes for cases in which the goods sold by fraud or mistake are lost or are further injured in the hands of the buyer, before or after the discovery of the blemish (*ib.* 232, *passim*).

V. The Talmud takes notice not only of direct fraud between two parties dealing with each other, but also of wrongs done through their collusion (קינוניא = *κοινωνία*) to third parties. Hence the rule not to return a lost bond; because it may have been redeemed already, yet the debtor and creditor may collusively put it in force against the purchasers of the former's lands (see FINDER). Under EXECUTION it has been shown (1) that the debtor, to clear himself from the ban, must satisfy the court that no property is held by another, as ostensible owner, for his benefit, and (2) that any property held is bound for his debts; in short, that feigned conveyances of the debtor's property are void as against his creditors. While fraudulent conveyances and the remedies against them occupy such a wide field in English and American law, the Talmud says nothing, and the codes hardly anything, as to how the creditor may proceed to overcome a fraud thus attempted against his rights.

BIBLIOGRAPHY: *Shulḥan 'Aruk, Ḥoshen Mishpaṭ*, sections quoted above, and sections 328-339, passim; *Yad ha-Ḥazaḳah*, especially *Mekirah*.

S. S. L. N. D.

FRAUENSCHUL or WEIBERSCHUL: That part of the synagogue which is reserved for women, whether an annex, as in the Altneuschul of Prague and in the synagogue of Worms, or a gallery; the latter is generally in the rear of the building, on the west side, but sometimes on the north or south side. Modern synagogues have often two galleries, one above the other.

The separation of the sexes in synagogues is most likely coeval with synagogal services, although it is not mentioned in the old sources, and the ruins of ancient synagogues found in Palestine are not in such a state of preservation that conclusions can be reached in regard to their interior arrangements. According to Talmudic reports, which most likely present a genuine tradition, there was in the Temple at Jerusalem a women's gallery, so built that its occupants could witness the ceremonies, while a grating hid them from the view of the men (Sukkah v. 2, 51b; Tamid ii. 5; Maimonides, "Yad," Bet ha-Beḥirah, v. 9).

The rabbinical codes are silent in regard to the Frauenschul. Joseph Saul Nathansohn (d. 1875), in discussing the question whether the sexton of a synagogue who lived in the building was permitted to make use of the women's synagogue as a dining-room on the occasion of the circumcision of a child, quotes no precedent on the subject, but decides that the women's synagogue has not the same degree of sacredness as the part reserved for men ("Sho'el u-Meshib," vi. 1, No. 3, Lemberg, 1890).

Modern synagogues of the Reform rite frequently have pews for men and women on one floor, as in some synagogues in Vienna and in the Reform synagogue of Berlin. In America, family pews have been introduced in the Reform synagogues; and even some of the conservative congregations, otherwise following the old ritual, have adopted the practise of seating men and women in the same pews. A. D.

FRAUENSTÄDT, CHRISTIAN MARTIN JULIUS: German student of philosophy; born at Bojanowo, Posen, April 17, 1813; died at Berlin Jan. 13, 1879. He was educated at the house of his uncle at Neisse, and embraced Christianity in 1833. Studying theology and, later, philosophy at Berlin, he formed the acquaintance of Schopenhauer, and took up his residence in Berlin in 1848.

Frauenstädt was a disciple of Schopenhauer, as is shown by his works. He wrote: "Studien und Kritiken zur Theologie und Philosophie," Berlin, 1840; "Ueber das Wahre Verhältniss der Vernunft zur Offenbarung," Darmstadt, 1848; "Aesthetische Fragen," Dessau, 1853; "Die Naturwissenschaft in Ihrem Einfluss auf Poesie, Religion, Moral, und Philosophie," *ib.* 1855; "Der Materialismus, Seine Wahrheit und Sein Irrthum," *ib.* 1856 (written against Büchner); "Briefe über die Natürliche Religion," *ib.* 1858; "Lichtstrahlen aus Immanuel

Kant's Werken," *ib.* 1872. Schopenhauer made Frauenstädt his literary executor, to undertake the editing of his works. Among Frauenstädt's works relating especially to Schopenhauer are:

"Briefe über die Schopenhauer'sche Philosophie," Leipsic, 1854; "Lichtstrahlen aus Schopenhauer's Werken," *ib.* 1862, 7th ed. 1891 (with Otto Lindner); "Schopenhauer, von Ihm und über Ihn," Berlin, 1863; "Aus Schopenhauer's Handschriftlichem Nachlass," Leipsic, 1864; "Das Sittliche Leben," *ib.* 1866; "Blicke in die Intellektuelle, Physische, und Moralische Welt," *ib.* 1869; "Schopenhauer-Lexikon," *ib.* 1871; "Neue Briefe über die Schopenhauer'sche Philosophie," *ib.* 1876. He edited "Gesammtausgabe der Werke Schopenhauer's," 6 vols., *ib.* 1873–74, 2d ed. 1877.

FRAUENTHAL, MAX: American soldier; born at Marienthal, Rheinpfalz, Bavaria, in 1836; emigrated to America in 1851; lived for a time in Texas and Louisiana, finally settling in Brookhaven, Miss. On the outbreak of the Civil war he, with several coreligionists, enlisted at Summit, Miss., in a company subsequently known as "Company A, Sixteenth Regiment, Mississippi Volunteers." Frauenthal accompanied Gen. Stonewall Jackson through the valley of Virginia, and served till the end of the war, escaping with slight wounds. In the presence of several officers, General Ewell among the number, Frauenthal was highly complimented by his colonel. "If I had ten thousand men like Frauenthal," said the colonel, "I would drive the Yankees into the Potomac before night." Frauenthal particularly distinguished himself at the "Bloody Acute Angle" in the battle of Spottsylvania Court House (May 12, 1864). In a letter to the "Galveston Daily News," Colonel A. T. Watts, now judge at Dallas, Texas (who was a private in the same company as Frauenthal), contributes an account of the "grand, terrific, sustained fighting in the Angle of Livid Hell and Darksome Death." After describing in detail the formation of the "Acute Angle," Judge Watts concludes: "Frauenthal, a little Jew, had the heart of a lion. For several hours he stood at the immediate point of contact (the apex of the angle), amid the most terrific hail of lead, and coolly and deliberately loaded and fired without cringing."

Frauenthal is now (1903) living in Conway, Ark., and is commander of the Conway Camp of United Confederate Veterans.

A. H. C.

FREDERICK II. (surnamed **the Great**): King of Prussia; born 1712; reigned from 1740 till his death in 1786. He was not friendly to the Jews, although he issued a "Schutzjude" patent to Moses Mendelssohn in October, 1763.

During the early years of Frederick's reign the Jews were left in comparative peace under the law of 1730. Soon after Frederick had made a treaty of peace with Maria Theresa of Austria, he proceeded to issue a series of anti-Jewish edicts. His policy was to maintain the proportion between Jews and Christians in Prussia at a definite, fixed ratio. On April 17, 1750, a "neue revidierte General-privilegium und Schutzbrief vor die Judenschaft in Preussen und der Mark Brandenburg" was enacted, but was not promulgated till 1756. It was particularly oppressive. The Berlin community, consisting of 333 families (estimated at 1,945 souls), at this time had the number of its Schutzjuden fixed arbitrarily at 150; and only the eldest sons could succeed to their fathers' rights. All other Jews were declared to be "extraordinary," which meant that they were not allowed to transmit their privilege of residence to their children. Throughout the kingdom this law was enforced with much rigor. In Silesia and West Prussia no Jews could live in the open country ("plattes Land"). Jewish servants were not allowed to marry; and Jewish beggars and pedlers were inhibited.

The "General-privilegium," 1750.

During Frederick's entire reign the Prussian Jews continually protested against harsh edicts, but without much success. In 1763, however, succession to the rights of the Schutzjuden was extended to second sons on condition that these take up manufacturing. For this privilege the Jews had to pay 70,000 thalers. For further privileges the Jews had to purchase a definite number of pieces of porcelain from the royal porcelain manufactory. These pieces were often specially made in grotesque shapes, as in the form of apes, and for this reason were afterward much valued by collectors. In addition to such exactions the Jews paid regular taxes.

While the Jews were prohibited from following certain trades and occupations (flax-spinning, 1761; agriculture, 1763; flour and wood industries) because of the jealousy of Christian competitors, they were compelled in 1768 to take charge of the stocking and cap manufactories at Templin and to become absolutely responsible for their financial success.

By the rescript of 1750, severe penalties were imposed on those Jews who practised usury. In 1752–53 interest rates were fixed at 12 per cent per annum, and in 1755 at 6 per cent and 7 per cent. Bankrupts were harshly dealt with; and the entire Jewish community of a locality was made responsible for the crimes committed by Jewish thieves (1773). In 1770 the oppressive usury laws were somewhat modified by repeal acts.

Payments of protection-money often caused trouble for the Jews in Frederick's reign. During the Seven Years' war Frederick would have no Jewish soldiers in his army; a yearly tax was paid instead. The Jews had also to bear a share of the ransom imposed on Berlin by the Russian invaders of 1763. During the war, moreover, the Jews had to lend large sums of money to the king. In 1765 the 438 Jewish families in Berlin had to pay a tax of 25,000 thalers; hitherto an annual tax of but 15,000 thalers had been paid for 250 families. In 1770 the Jews were not allowed to pass buckets at fires; a yearly tax was imposed instead. In 1773 the Jews had to deliver a certain quantity of silver to the

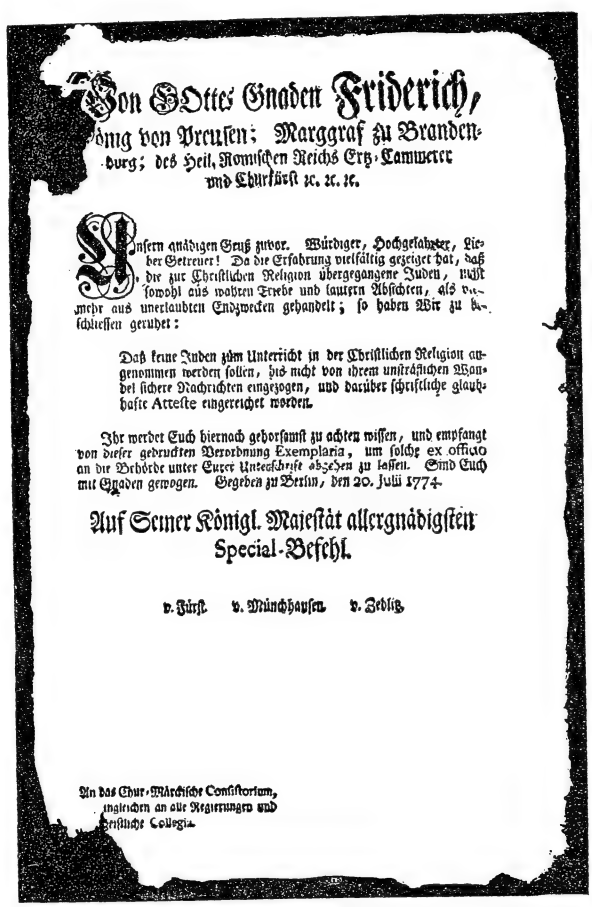
Restrictive Measures.

royal treasury. Additional edicts were promulgated in 1773, 1777, 1782; and as late as 1785 a law was passed against surreptitious begging by Jews.

Although Frederick declared that absolute justice must be meted out to Jews in the law courts, the "more Judaico" was required again (1747). Jews had to take this oath in the synagogue in the presence of ten adults and be clothed with the "arba' kanfot" and tefillin. On especially solemn occasions they had to sit on coffins and hold slaughtering-knives. This requirement was modified, however, in 1782.

There were nineteen factories and mills owned by Jews during Frederick's reign, among them Daniel Itzig's lead-factory at Sorge and his oil-mill at Berlin (Geiger, "Geschichte der Juden in Berlin," ii. 93). Among the king's Jewish mint-masters ("Münzjuden") were Ephraim, 1754; Moses Isaac and Daniel Itzig, 1756; Daniel Itzig and Ephraim, 1758; and Veitel Heine Ephraim, 1773.

With the inner life of the Jews Frederick had nothing to do. Although in 1771 he struck Mendelssohn's name from the list of members of the proposed Berliner Akademie der Wissenschaften, yet in 1783 he spoke of him as "the famous Jewish scholar." Dohm's "Ueber die Bürgerliche Verbesserung der Juden" (1781) failed to influence Frederick toward a greater liberality in the treatment of his Jewish subjects. It was Voltaire's somewhat ambiguous transactions with Abraham Hirsch or Hirschel which caused Frederick to break off relations with him (Carlyle, "Frederick the Great," book v.).



Von GOttes Gnaden Friderich,
König von Preußen; Marggraf zu Branden-
burg; des Heil. Römischen Reichs Erz-Cammerer
und Churfürst ꝛc. ꝛc. ꝛc.

Unsern gnädigen Gruß zuvor. Würdiger, Hochgelahrter, Lieber Getreuer! Da die Erfahrung vielfältig gezeiget hat, daß die zur Christlichen Religion übergegangene Juden, nicht sowohl aus wahren Triebe und lautern Absichten, als vielmehr aus unerlaubten Endzwecken gehandelt; so haben Wir zu beschließen geruhet:

Daß keine Juden zum Unterricht in der Christlichen Religion angenommen werden sollen, bis nicht von ihrem unsträflichen Wandel sichere Nachrichten eingezogen, und darüber schriftliche glaubhafte Atteste eingereichet worden.

Ihr werdet Euch hiernach gehorsamst zu achten wissen, und empfangt von dieser gedruckten Verordnung Exemplaria, um solche ex officio an die Behörde unter Eurer Untergebene abgehen zu lassen. Sind Euch mit Gnaden gewogen. Gegeben zu Berlin, den 20. Julii 1774.

Auf Seiner Königl. Majestät allergnädigsten Special-Befehl.

v. Fürst. v. Münchhausen. v. Zedlitz.

An das Chur-Märkische Consistorium, ingleichen an alle Regierungen und Geistliche Collegia.

Edict of Frederick the Great with Regard to the Conversion of Jews.

FREEMASONRY: The institutions, rites, and principles of a secret society devoted to the promotion of fraternal feeling and morality among the members of the order. In its modern form it appears to have arisen in London in 1717, and thence spread through the British Isles to the Continent, reaching North America about 1729. In the preliminary stages which led up to freemasonry, there are traces of the influence of Judah Templo, the constructor of a model of Solomon's Temple, who visited England in the reign of Charles II. A coat of arms said to have been used or painted by him resembles greatly that adopted later by the freemasons of England ("Transactions Jew. Hist. Soc. Eng." ii.). The society claims affiliation with the ancient craft of working masonry, and by this means traces back much of its symbolism and ritual to the building of the First Temple by Solomon. So far does this tendency go that G. Oliver, in his "Antiquities of Freemasonry" (London, 1823), attempts to show that Moses was a grand master. One of the higher grades of the order is connected with the legend of the death of Hiram "Abif" (a misunderstanding of II Chron. ii. 13). According to Masonic legend, he was killed by three workmen just at the completion of the Temple; and there is a mystery about his death as represented in the Masonic rites. This may possibly trace back to the rabbinic legend that while all the workmen were killed so that they should not build another temple devoted to idolatry, Hiram himself was raised to heaven like Enoch (Pesiḳ. R. vi. 25a, ed. Friedmann). In the early stages of freemasonry, however, nothing was said of Solomon (Fort, "Early History and Antiquities of Freemasonry," p. 181, Philadelphia, 1875), and nothing is said of the Hiram legend in the earliest printed constitution of 1723 (R. F. Gould, "History of Freemasonry," iv. 365).

The technical language, symbolism, and rites of freemasonry are full of Jewish ideas and of terms like "Urim and Thummim," "Acharon Schilton," "Rehum," "Sephirot," "Jachin," "Ish Chotzeb" (comp. I Kings v. 18, list of terms on following page), but these may have been derived, without

any Jewish intermediation, from commentaries on the Old Testament. Many of these terms are derived from the Biblical account of the building of Solomon's Temple (I Kings v. *et seq.*), and the two pillars Jachin and Boaz take a predominant position in Masonic symbolism. In the Scottish Rite the dates of all official documents are given according to the Hebrew months and Jewish era, and use is made of the older form (Samaritan or Phenician) of the Hebrew alphabet. The impostor Cagliostro appears to have introduced some of the terms of the Cabala into his "rite of Misraim," but this again might have been derived from the Christian Cabala.

Modern anti-Semites, especially among the Roman Catholics, attempt to identify freemasonry with Jewish propagandism, going so far as to state that the whole movement is ruled by five or six Jews acting secretly as its head. But the only specific instance of Jewish influence mentioned by them is the introduction of the degree of "kohen" by one Martinez Paschalis. There is, however, no evidence that he was a Jew. Mackey ("Encyclopedia of Freemasonry") states that he was a German who made himself acquainted with the Jewish Cabala during his travels in the East. It is also claimed that Stephen Morin, founder of the Scottish Rite in America, was a Jew. There is no evidence of this, but it is probable that M. M. Hays and Isaac da Costa who derived the degrees from Morin, and introduced them into South Carolina about 1801, were Jews; yet so far the only evidence of specifically Jewish influence consists in the fact that this particular branch of a certain section of freemasonry appears to have been introduced into South Carolina by Jews.

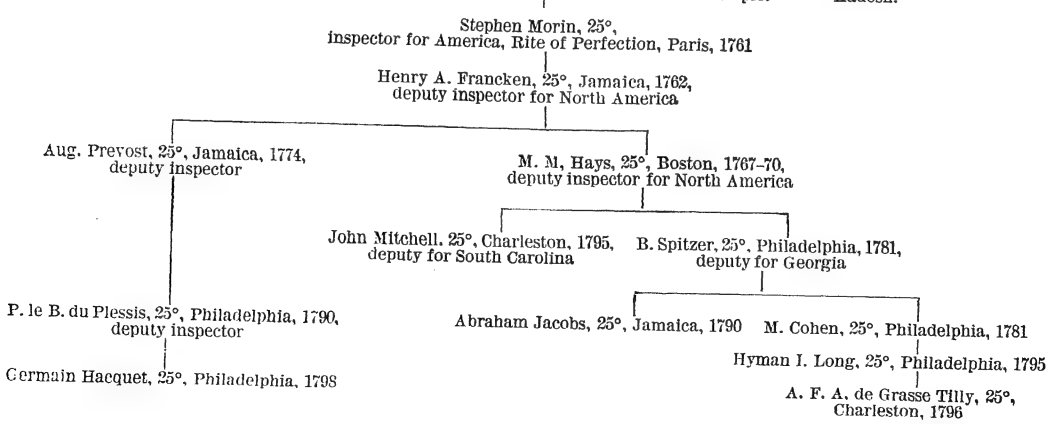
There is even some doubt about this affiliation. Freemasonry itself was introduced into South Carolina as early as 1736 (De Saussure, "History of Freemasonry in South Carolina," p. 5, Charleston, 1878). The Ancient Accepted Scottish Rite, with its additional thirty-third degree, appears to have been instituted in 1786 at Charleston, though the actual organization of the higher council was not effected till 1801. But the Jews who received their degrees directly or indirectly from Morin never appear to have reached any higher degree than the twenty-fifth, of the Rite of Perfection, as can be seen from the following genealogy derived from Steven's "Cyclopedia of Fraternities" (p. 50, New York, 1899):

All the later stages had gone out of Jewish hands before 1801. It is also claimed that the Jews introduced freemasonry into Rhode Island.

Jews have been most conspicuous in their connection with freemasonry in France since the Revolution. One of the branches of the craft, the Supreme Council of the Orient, had Adolphe Crémieux as its S.G.C. (Sovereign Grand Councilor) from 1868 to 1880. He introduced the practise of having the S.G.C. confirmed by the lodges instead of being arbitrarily selected by his predecessor. In Germany for a long time Jews were not permitted entrance into the lodges. In 1836 the Amsterdam Grand Lodge protested to the Grand Lodge of Germany against the refusal to admit some of its members because they were of the Jewish faith. From 1868 to 1876 the question of the affiliation of Jewish members was discussed with some heat. Although in the latter year the majority of the lodges favored the affiliation, the requisite two-thirds majority was not obtained (Gould, *l.c.* v. 248–250). In England a number of lodges exist formed exclusively of Jews, but as a rule the latter have joined the ordinary lodges, in which some of them have reached a very high rank.

The following list contains the chief technical terms of freemasonry which are connected with Jewish ideas and expressions:

Abaddon.
Abda (I Kings iv. 6).
Abif.
Adonai (see GOD, NAMES OF).
Adon Hiram (see ADONIRAM).
Ahiah (I Kings iv. 3).
"Ahiman Rezon" (title given to the book of constitutions of the Grand Lodge of Ancient York, supposed to be Hebrew for "the Law of the Selected Brethren").
Aholiab.
Bagulkal (significant word in the higher degrees, supposed to be Hebrew).
Bel (used erroneously to represent the Tetragrammaton).
Bendekar (I Kings iv. 9).
Bereith.
Breastplate.
Cedars of Lebanon.
Cherubim.
Chesed.
Cohen.
Dedication of the Temple.
Emeth.
Enoch.
Ephod.
Ephraimites.
Ezel (I Sam. xx. 19).
Gabaon (see GIBEON AND GIBEONITES).
Gedaliah.
Giblim (I Kings v. 18).
Haggai.
High Priest.
Hiram Abif (architect of Solomon's Temple).
Hiram, King of Tyre.
Holy of Holies.
Horns for the Altar.
I Am What I Am.
Immanuel.
Jachin.
Jacob's Ladder.
Jah.
Jehoshaphat (place where the lodge is built).
Jehovah.
Kabbala.
Kadosh.



Kamea ("amulet").
Lebanon.
Levites.
Maacha (I Kings ii. 39).
Manna, Pot of.
Melchizedek.
Melech.
Miter.
Mizraim, Rite of.
Naamah.
Peleg (supposed to be the architect of the Tower of Babel; twentieth degree of the Scottish Rite).
Pentalpha (see Solomon's Seal).
Rabbanaim.
Rabboni.
Sabbaoth.
Sanhedrin.
Seal of Solomon.
Sephiroth.
Shaddai.
Shamir.
Shekel.
Shekinah.
Shem Hamphoresch.
Shiboleth.
Shield of David.
Signet of Zerubbabel.
Tabernacle.
Temple.
Tetragrammaton.
Tomb of Adoniram.
Tubal Cain.
Twelve-Lettered Name.
Two-Lettered Name.
Zabud (I Kings iv. 5).
Zadok.
Zedekiah.
Zeredatha.
Zerubbabel.

The majority of the above names and terms, derived from Mackey's "Lexicon of Freemasonry," are mostly used in the higher degrees of the Scottish Rite, sometimes erroneously, as can be seen by referring to the separate items in this ENCYCLOPEDIA.

FREETHINKERS AND FREETHOUGHT.

See RATIONALISTS; SKEPTICS.

FREE WILL: The doctrine that volition is self-originating and unpredictable. That man is free to choose between certain courses of conduct was regarded by rabbinical Judaism as a fundamental principle of the Jewish religion. Although generally following the ethical system of the Stoics, Philo, influenced by Judaism, professed the doctrine of free will ("Quod Deus Sit Immutabilis," ed. Mangey, p. 279), and Josephus states that the Pharisees maintained it against both the Sadducees, who attributed everything to chance, and the Essenes, who ascribed all to predestination and divine providence ("Ant." xiii. 5, § 9; xviii. 1, § 5). "All is in the hands of God except the fear of God" is an undisputed maxim of the Talmud (Ber. 33b; Niddah 16b).

The discussions that arose between the Kadarites, the Islamic partizans of free will, and their opponents, the Jabbarites, attracted the attention of Jewish thinkers, who thereupon endeavored to reconcile the principle of free will with a belief in divine providence and omniscience; the latter was considered by the Jewish philosophers of the Middle Ages the most important objection to the doctrine of free will.

Influence of Islam.

Saadia propounds the difficulty thus: "If God, in His omniscience, knows beforehand all events, He must necessarily know who will disobey Him; in that case the very fact of God's knowledge compels man to act accordingly" ("Kitab al-Imanat wal-I'tikadat," iii. 154). To this Saadia answers that God's knowledge is not causative; for, were it so, everything that comes into existence must have existed from eternity, since God's knowledge of it was from eternity. But may it be inferred that man can act contrary to the knowledge of God? "No," says Saadia, "because God knows things as they really are." As soon as man makes a choice between alternatives God knows it. In other words, the decision of man precedes God's knowledge.

Baḥya contented himself with asserting the principle of free will without discussing the details of the subject. He passes over without comment the objection raised by the fact of God's omniscience, and evades that of divine providence by declaring the problem too complicated for solution ("Ḥobot ha-Lebabot," iii. 8). Judah ha-Levi followed Saadia with regard to God's omniscience. For him, too, the decisions of man precede God's knowledge, which he divides into two categories, creative or causative, and accidental ("Cuzari," ed. Cassel, p. 418). However, he went further than Saadia in that he endeavored to reconcile the principle of free will with the belief in divine providence, which was entirely neglected by the author of "Emunot we-De'ot." Following the doctrine of the Stoics on this subject, Judah ha-Levi distinguishes between principal and secondary causes. To the first belong the immutable laws of nature, which proceed directly from the first cause; to the second belong natural causes, which are traceable to the first cause through a series of linked causes. Man's freedom is the last link in the chain of secondary causes, and is also traceable indirectly to the first cause. The act decided upon being thus an effect of the second ary cause, free will, which presupposes alternatives, comes into play; but as it is indirectly traceable to the first cause, man's freedom of choice does not limit the freedom of divine providence.

Abraham ibn Daud resolves the problem of divine providence in the same way as Judah ha-Levi, but offers a simpler solution of the problem of God's omniscience. He distinguishes two kinds of possibilities: a subjective one, which has ignorance for cause, and a relative one. For instance, for one who is sojourning in Spain there may be doubt whether at the moment the King of Babylon is alive or dead; either is a possibility. But for one who is in the presence of the king there is no possibility; one or the other is a certainty. Such subjective possibility must be eliminated from God as quite irreconcilable with His omniscience; but the notion of possibility in the strictest sense is by no means a limitation of His omniscience. It is perfectly conceivable that from the beginning God so regulated creation that in certain cases both alternatives should be possible events. It is not detracting from God's omniscience to believe that in order to give room to man's will to assert itself freely He left certain actions undecided in His own mind ("Emunah Ramah," p. 96).

Abraham ibn Daud.

So far the solution of the problem of God's omniscience is in a certain degree the same: a greater or smaller limitation of God's knowledge with regard to human actions. Such a solution could not be accepted by Maimonides, for, according to his theories of the divine attributes, God could not at any given time acquire knowledge which He had not previously possessed. God's knowledge of human actions, therefore, must date from the beginning. The objection made to the principle of free will on the ground of God's omniscience rests, according to Maimonides, on an error. Misled by the use of the term

"knowledge," people believed that all that is requisite for their knowledge is requisite also for the knowledge of God. The truth is "that the fact that God knows things while they are in a state of possibility—when their existence belongs to the future—does not change the nature of 'possible' in any way; that nature remains unchanged; and the knowledge of the realization of one of several possibilities does not yet affect that realization" ("Moreh," iii. 20). As to the question of divine providence, Maimonides did not even attempt to bring it into harmony with the principle of free-will.

Maimonides.

Abraham ben David of Posquières reproaches Maimonides with having in his "Yad" heaped questions around the principle of free will without offering any reasonable solutions. Indeed, this reproach is not unfounded, for on this point Maimonides formulates a dogma rather than gives reasons. His theory may be summed up thus: The principle of free will must be admitted, for otherwise there would be neither punishment nor reward. The question of God's omniscience can not be conceived any more than can His essence, for His knowledge is quite different from ours. Abraham ben David proposes therefore the following solution: Being a microcosm, man is subjected to sidereal influences which determine his fate. This fate, however, is not immutable, for through his freedom of choice he has the power to change it by his religious and moral conduct. God, indeed, knows the decrees of the constellations and the resolutions of man; still, in annulling the stellar decrees man is acting in opposition not to God, but to the constellations.

The weakness of this solution is evident. Whether God's knowledge of man's fate be direct or indirect, the fact remains that it may turn out otherwise than God foresaw it. A more rational solution in this direction is furnished by Levi ben Gershon. According to him, all sublunary events are determined by the celestial bodies. Man, however, may successfully oppose their determinations in so far as his own person is concerned. God knows all that is determined by the celestial bodies; but as man's freedom may annul their determinations He knows them only as possibilities. "To affirm that God knows the possible only as possible is not detracting from His supreme intelligence, for to know things as they are means to know them well" ("Milḥamot," iii. 106). The same solution may be applied to the question of divine providence, since through freedom of choice man can annul the stellar determinations.

Gersonides.

Moses Narboni devoted to free will a special treatise entitled "Ma'amar bi-Beḥirah." It was directed against Abner of Burgos' "'Iggeret ha-Gezerah," in which the convert propounds the Asharitic doctrine of predestination. Narboni's solution is in essence, if not in form, the same as that given by Abraham ibn Daud with regard to the question of God's omniscience, and as that given by Judah ha-Levi with regard to the question of divine providence. A new stand was taken by Ḥasdai Crescas, who, in opposition to all his predecessors, inclined toward the rejection, or at least toward the limitation, of free will. According to him, the law of causality is so universal that human conduct can not escape its operations. Man, unconscious of the cause, may believe his choice is a free one, but in reality it is not, because there exists always that which determines his resolution. Still the Torah teaches freedom of choice and presupposes self-determination. Crescas, therefore, concludes that human will is free in certain respects, but limited in others. Will acts as a free agent when considered alone, but operates by necessity when regarded in relation to the remote cause; or will operates in freedom, both per se and with regard to the provoking cause, but it is bound if analyzed with reference to the divine omniscience. Man feels himself free; therefore he is responsible, and must be rewarded or punished. The praise or blame attachable to good or evil actions is proportionate to the willingness of those by whom they are performed ("Or Adonai," ii. 4 *et seq.*). Crescas' views had considerable influence on Spinoza.

Ḥasdai Crescas.

Albo follows Maimonides both in the question of God's omniscience and in that of divine providence ("'Iḳḳarim," iv., ch. 3, 7–10). The Zohar repeatedly asserts the principle of free will, and solves the problems of omniscience and providence by adopting the Aristotelian view that God has a knowledge of universals only, and not of particulars (see Jew. Encyc. iii. 473).

Like the Motazilites, the first Karaite teachers called themselves "Aṣḥab al-'Adl wal-Tauḥid," because professing the principles of free will. Joseph al-Baṣri and Aaron of Nicomedia treated of the relation between free will and God's omniscience and providence, but they contributed nothing original to the solution of the problem, merely copying the views of the Rabbinite thinkers, chiefly Saadia.

Karaites.

FREE-WILL OFFERING ("nedabah"): A term applied to gifts presented out of the benevolence or religious impulse of heart of the giver, and not in fulfilment of any obligation, promise, or vow. It is used as the term for the contributions of Israel to the construction and furnishings of the Tabernacle in the wilderness (Ex. xxxv. 29, xxxvi. 3); for the materials presented for the building of the First Temple (I Chron. xxix. 5b–9, 14); for the gifts for the support of the Temple service under King Hezekiah (II Chron. xxxi. 14); for the contributions toward the building of the Second Temple in Jerusalem, mentioned in the decree of Cyrus (Ezra i. 4); for the gifts of Israel in its own land toward religious services (Ezra iii. 5); and for the material wealth carried back by Ezra (viii. 28).

A free-will offering may be a burnt offering or a peace-offering (Ezek. xlvi. 12; Lev. xxii. 18, 21); the term is also used of promises or vows made by the

worshiper (compare Deut. xxiii. 21–23; Ps. cxix. 108).

A further classification is made (Lev. vii. 11 *et seq.*) wherein the PEACE-OFFERING includes the praise-offering ("zebaḥ ha-todah"), the votive offering ("zebaḥ neder"), and the free-will offering ("zebaḥ nedabah"). The ceremonial of these offerings (Lev. vii. 29, 30, 34) provided that the fat parts should be burned as in the regulations of the BURNT OFFERING, but that the breast should be Aaron's and his sons' (verse 31), and the other flesh should be eaten only on the day of sacrifice in the case of the praise-offering, but also on the second day in the case of the votive and free-will offerings (Lev. vii. 16; xix. 5, 6). According to the general statement (Lev. xxii. 21, 22) the animal presented must be perfect, with no blemish. But in the next verse (23) an exception is made in favor of the free-will offering, which may have "anything superfluous or lacking" in its parts. In Lev. xxii. 18–21 there seem to be but two divisions of the peace-offering, namely, (1) the votive and (2) the free-will offering; while in Num. xv. 8 "peace-offerings" is apparently used as synonymous with "free-will offering" (compare verse 3).

Free-will offerings were made especially on great feast-days: (1) the Feast of Unleavened Bread (II Chron. xxxv. 7–9; compare xxx. 24), (2) the Feast of Weeks (Deut. xvi. 10; compare xxvi. 1–11), (3) the Feast of Tabernacles (Ezra iii. 4, 5; compare Num. xxix. 39; Lev. xxiii. 37, 38).

FREIDUS, ABRAHAM SOLOMON: Bibliographer; born in Riga, Russia, May 1, 1867. He went to Paris in 1886, and thence to the United States in the autumn of 1889. In March, 1897, he entered the service of the New York Public Library as assistant cataloguer, and was soon assigned to the department of Hebraica and Judaica, of which he is still (1903) in charge. This department now includes 15,000 volumes and pamphlets, and has become one of the most frequently consulted Jewish collections in the world. Freidus' scheme of classification of the Jewish department contains nearly 500 subdivisions, and may be considered the first elaborate scheme of classifying Jewish literature for library purposes (see BIBLIOGRAPHY; LIBRARY CLASSIFICATION).

A. P. WI.

FREIHEIM, J. B.: American lawyer and soldier; born in Bavaria 1848; died at Camden, Ark., Aug. 22, 1899. Freiheim was an early Jewish resident of Louisiana, where he was reared. He studied at the Louisiana State Military Academy, and at the outbreak of the Civil war enlisted in the Confederate army. He served in Company F, Twelfth Louisiana Infantry, throughout the struggle. At Franklin, Tenn., he led his company—he had been promoted to sergeant—after every commissioned officer had been killed.

At the close of the war Freiheim returned to Louisiana, and later settled in Arkansas. Although not twenty-one years of age, he was admitted to the bar and began to practise law at Camden, Ark., where he resided for the rest of his life. In later years he was register of the local land-office of the United States.

A. A. M. F.

FREIMANN, AARON: German librarian and historian; born Aug. 5, 1871, at Filehne, Posen. He is the son of Israel Meïr Freimann, and grandson, on his mother's side, of the chief rabbi of Altona, Jacob Ettlinger. He attended the high school of Ostrowo, and in 1893 entered the University of Berlin (Ph.D., 1896), where he studied history and Oriental languages, devoting himself at the same time to the study of archival and library systems. Since 1897 he has been chief of the Hebrew department at the Stadtbibliotek in Frankfort-on-the-Main, and since 1900 one of the editors of "Zeitschrift für Hebräische Bibliographie." He is the author of "Die Isagoge des Porphyrius in den Syrischen Uebersetzungen" (1896), and "Geschichte der Israelitischen Gemeinde Ostrowo" (1896). To the "Ḳobeẓ al-Yad," a collective work published by the Mekize Nirdamim Society, he contributed articles on the history of the Jews in Prague S.

FREIMANN, ISRAEL MEÏR: German rabbi; born Sept. 27, 1830, at Cracow; died Aug. 21, 1884, at Ostrowo. He received his education from his father and in various Talmudical schools of Hungary. After a short stay in Leipsic (1850) he went to Breslau; from 1856 to 1860 he studied philosophy and Oriental languages. He graduated (Ph.D., Jena) in 1860, and was called in the same year to the rabbinate of Filehne, Posen. On Sept. 7, 1871, he was made rabbi of Ostrowo, which office he occupied until his death. He declined the position of rector of the rabbinical seminary of Breslau after Zachariah Frankel's death. The great esteem in which he was held by his fellow citizens is shown by the naming, in 1900, of a street "Freimannstrasse" His edition of the midrashic work "We-Hizhir" (1st part, Leipsic, 1873; 2d part, Warsaw, 1890), to which he added some valuable notes, is indisputable evidence of his learning. The responsa ("Binyan Ẓiyyon") of his father-in-law Jacob Ettlinger contain many of his essays.

FRENKEL, ISRAEL: Russian Hebraist and teacher; born at Radom, Russian Poland, Sept. 18, 1853. He was a pupil in Talmudic literature of Samuel Mohilever, chief rabbi of Radom; and at the same time studied Hebrew, German, and French. Frenkel has been a teacher in the Talmud Torah at Radom since its foundation in 1882. His translations into Hebrew include: Lessing's drama "Miss Sarah Sampson," under the title "Sarah Bat Shimshon," Warsaw, 1887; the songs in metric verse in

Radner's translation of "Wilhelm Tell," Wilna, 1878; (from the Polish) Kozlovski's "Esterka," under the title "Massa' Ester," drama in six acts, the heroine of which is Esther, the Jewish mistress of Casimir III. the Great, Warsaw, 1889. Frenkel is a correspondent of "Ha-Ẓefirah."

BIBLIOGRAPHY: Sokolov, *Sefer Zikkaron*, p. 96; Zeitlin, *Bibl. Post-Mendels.* pp. 93, 286, 437.

H. R. M. SEL.

FRENKEL, ISRAEL: Russian physician; born at Rypin, government of Plotzk, June 29, 1857. At the age of twelve he had received only a religious education. One of his teachers, however, Ḳalman Pivover, who from a simple "melammed" became later a distinguished physician, had inspired him with a desire for secular knowledge. Frenkel graduated from the gymnasium of Plotzk, and then studied medicine at the University of Warsaw. Graduating in 1885 as an M.D., he settled in Warsaw. He was greatly attracted by Hebrew studies, and began contributing to Jewish papers while still attending the gymnasium. Afterward, at the university, he contributed to Hebrew scientific papers articles on recent discoveries in medicine and biology. Later Frenkel became a regular contributor to "Ha-Ẓefirah," and published a Hebrew work on nervous and venereal diseases entitled "Shomer ha-Beri'ut," Warsaw, 1889.

H. R. I. BR.

FRENSDORFF, SOLOMON: German Hebraist; born at Hamburg Feb. 24, 1803; died at Hanover March 23, 1880. While pursuing his studies at the Johanneum gymnasium in his native city, he was introduced into Hebrew literature by Isaac Bernays, who exerted considerable influence upon his later attitude toward Judaism and religion in general. He studied philosophy and Semitic languages at the University of Bonn. In that city he became acquainted with Abraham Geiger, who, in various letters to his friends, repeatedly expressed the highest esteem for Frensdorff's character and learning.

In 1837 Frensdorff became head master of the Jewish religious school at Hanover, and in 1848 was appointed principal of the new Jewish seminary for teachers in that city, which position he held until his death.

Frensdorff throughout his career devoted himself chiefly to the critical examination and publication of Masoretic works. His writings on these are valued highly for their accuracy. They are: "Fragmente aus der Punktations- und Accentlehre der Hebräischen Sprache," with the Hebrew text ("Darke ha-Niḳḳud weha-Neginot"), ascribed to R. Moses Punctator, Hanover, 1847 (dedicated to Bernays); "Oklah we-Oklah," *ib.* 1864; "Die Massora Magna," part i.: "Massoretisches Wörterbuch," Leipsic and Hanover, 1876; "Aus dem Sefer ha-Zikronot des Elias Levita," in "Monatsschrift," xii. 96 *et seq.*

S. H. M.

FRESCO, DAVID: Turkish writer; descendant of Spanish exiles; born at Constantinople about 1850. He edited successively five Judæo-Spanish periodicals: "El Nacional" (1871: changed in 1872 to "El Telegraphe," later [1872] to "El Telegrafo"); "El Sol" (1879); "El Amigo de la Familla" (1886); "El Instructor" (1888); "El Tiempo" (1889); the last is the best edited and most widely circulated paper in the East. Fresco, who is very popular, has translated many works into Ladino. Among them are: "Los Judios y la Sciencia," from Schleiden's "Die Bedeutung der Juden für Erhaltung und Wiederbelebung der Wissenschaften im Mittelalter" (Constantinople, 1878); "La Ley Natural," from Volney's "Natural Law" (*ib.* 1879); "Jerusalem," from Mendelssohn's "Jerusalem" (*ib.* 1879); "Amor de Sion," from Abr. Mapu's work of the same name (*ib.* 1880); "Los Maraños de España," from Philippson's "Die Marranen" (*ib.* 1880); "La Calomnia de la Sangre," from the Hebrew (*ib.* 1880); "Una Victima de la Iñoranza" (*ib.* 1881); "Los Mysterios de Paris," from the original of Eugene Sue. He also translated several novels by Emile Richebourg, and other French writers.

FREUD, SIGMUND: Austrian physician; born May 6, 1856, at Freiberg in Moravia. He received his education at the University of Vienna, where he was graduated as M.D. in 1881. He was admitted to the University of Vienna as privatdocent in 1885. From 1885 to 1886 he attended the lectures of Charcot at Paris, and, returning to Vienna, became a specialist of neuropathy. In 1903 he received the honorary title of professor from the university. Freud has published various medical works, especially on histology, anatomy of the brain, and nervous diseases, the most noteworthy being: "Ueber Coca," 1884; "Zur Auffassung der Aphasien," 1891; and, together with J. Breuer, "Studien über Hysterie," 1895.

FREUDENTHAL, BERTHOLD: Professor of law at the Academy of Frankfort-on-the-Main; born at Breslau, Aug. 23, 1872; son of Jacob FREUDENTHAL. Freudenthal received his education at the gymnasium of Breslau and the universities of Breslau, Berlin, Halle, and Tübingen, becoming a member of the judicial court of his native city in 1898, and lecturer at the university there in the following year. In 1901 he was called to the same position, and in 1903 was appointed professor, in the Akademie für Sozial- und Handelswissenschaften at Frankfort-on-the-Main. He has published: "Die Wahlbestechung, eine Strafrechtliche Untersuchung," Bres-

lau, 1896; "Die Begegnungsdelikte, ein Beitrag zur Lehre von der Nothwendigen Theilnahme," *ib.* 1899; "Die Nothwendige Theilnahme am Verbrechen," *ib.* 1901.

S. F. T. H.

FREUDENTHAL, JACOB: German philosopher; born June 20, 1839, at Bodenfelde, province of Hanover, Prussia. Freudenthal received his education at the universities of Breslau and Göttingen, and at the rabbinical seminary of Breslau. After graduating from the University of Göttingen (1863) he became teacher of the Samson school in Wolfenbüttel (1863-64), whence he removed to Breslau as teacher in the rabbinical seminary there, a position which he resigned in 1888. In 1875 he became lecturer in philosophy at the University of Breslau; in 1878 he was elected assistant professor, in 1888 professor, of philosophy. He was a member of the senate of the university in 1894-96, and dean of the philosophical faculty in 1898-99. The Prussian Academy of Science sent him to England in 1888 to study English philosophy, and in 1898 to the Netherlands to prosecute researches on the life of Spinoza.

The results of these voyages were his "Beiträge zur Englischen Philosophie," in the "Archiv für Geschichte der Philosophie" (iv. 450 *et seq.*, v. 1 *et seq.*), and "Die Lebensgeschichte Spinoza's," Leipsic, 1899. He has contributed various essays to the publications of the Prussian Academy of Science, to the "Rheinische Museum," to the "Archiv für Geschichte der Philosophie," to "Hermes," to the "J. Q. R.," to "Monatsschrift Allg. Zeit. des Judenthums," etc. He published, besides the above-named works: "Ueber den Begriff der *Φαντασία* bei Aristoteles" (1863); "Die Flavius Josephus Beigelegte Schrift über die Herrschaft der Vernunft," 1869; "Hellenistische Studien" (1875-79); and "Ueber die Theologie des Xenophanes" (1886).

FREUDLINE. See NAMES.

FREUND, ERNST: American jurist; born in New York Jan. 30, 1864; attended gymnasia at Dresden and Frankfort-on-the-Main, and the universities of Berlin and Heidelberg, receiving from the latter the degree of J.U.D., and later, from Columbia University, New York, the degree of Ph.D.

Freund was lecturer on administrative law at Columbia University (1892-93); instructor, assistant professor, and associate professor of jurisprudence and public law at the University of Chicago (1894-1902), and is now (1903) professor of law at the University of Chicago Law School. He has published "The Legal Nature of Corporations" (1897), and contributed to the "Political Science Quarterly," the "Harvard Law Review," and the "American Law Review."

A.

FREUND, ERNST: Austrian physician; born at Vienna Dec. 15, 1863; educated at the University of Vienna, whence he was graduated as M.D. in 1888. Soon afterward he became physician at the Allgemeine Krankenhaus, continuing at the same time his studies in the chemical laboratory of Professor Ludwig. In 1891 Freund was appointed chief of the chemical laboratory of the Rudolfinum. His scientific activity has centered in medical chemistry; and he is the author of the following works: "Zur Diagnose des Carcinoms," Vienna, 1885; "Ein Beitrag zur Kentniss der Blutgerinnung," in "Medicinische Jahrbücher," 1886; "Ueber das Vorkommen von Cellulose in Tuberkeln und im Blute bei Tuberculose," *ib.*; "Ueber die Ursache der Blutgerinnung," *ib.*; "Ueber Zusammensetzung der Blutasche," in "Wiener Medicinische Wochenschrift," 1887, No. 40; "Ueber die Ausscheidung von Phosphorsauerem Kalk als Ursache der Blutgerinnung," *ib.* 1889; and, with F. Obermayer, "Ueber die Chemische Zusammensetzung Leukämischen Blutes," in "Zeitschrift für Physiologische Chemie," 1891.

FREUND, SAMUEL BEN ISSACHAR BÄR: Bohemian Talmudist; born at Tuschkau Dec., 1794; died at Prague June 18, 1881. After studying under Eleazar of Triesch and Baruch Fränkel of Leipnik he went to the yeshibah at Prague, where he studied under Bezalel Ronsperg (Rosenbaum). A few years later Freund became rabbi of Lobositz. In 1832 he was called to Prague, where he was appointed assistant dayyan to Samuel Landau, son of Ezekiel Landau. When Landau died (1834) Freund acted alone as chief dayyan until two colleagues were appointed to share his labors. He officiated up to 1879, when he resigned. Freund wrote: "Zera' Ḳodesh," a commentary on the treatises Berakot, Peah, and Demai (Prague, 1827); "Musar Ab," a commentary to Proverbs (Vienna, 1839); "Ḳeren Shemu'el," a responsum regarding the eating of leguminous plants on Passover (Prague, 1841); "'Et le-Ḥenenah," a treatise on the Mishnah division Mo'ed and its commentaries (*ib.* 1850); "Hesped," a funeral oration on the death of Joseph Lieben (*ib.* 1857); "'Ir ha-Ẓedeḳ," a compendium of the "Sefer Miẓwot ha-Gadol" (SeMaG), with notes and glosses of his own (*ib.* 1863); "Amarot Ṭohorot," glosses and corrections to the commentaries on the Mishnah division Ṭohorot (*ib.* 1867); "Ketem Paz," a commentary to Abot (*ib.* 1870).

S. S. M. SEL.

FREUND, WILHELM: German philologist and lexicographer; born Jan. 27, 1806, at Kempen, province of Posen; died June 4, 1894, at Breslau. He studied in Berlin and Breslau from 1824 to 1828, when he opened a Jewish religious school in the latter city, but was forced to close it on account of the opposition of the Orthodox. From 1848 to 1851 he was provisional director of the gymnasium of Hirschberg, Silesia, and from 1855 to 1870 of the school of the Jewish community of Gleiwitz, which he organized according to plans of his own. He then devoted himself exclusively to literary labors in the field of philology.

Freund's principal work, "Wörterbuch der Lateinischen Sprache" (4 vols., Leipsic, 1834-45), supplemented by his "Gesammtwörterbuch der Lateinischen Sprache" (2 vols., Breslau, 1844-45) and the "Lateinisch-Deutsche und Deutsch-Lateinisch-

Griechische Schulwörterbuch" (2 parts, Berlin, 1848–55), was the foundation of all the Latin-English dictionaries now in existence, and the standard book of reference of its kind for a generation of scholars. It was translated and edited by E. A. Andrews in 1850, and has been from that time in extensive use throughout England and America. Its competitors in the schools and colleges of both countries are substantially reprints or abridgments of Freund's work.

Besides his magnum opus, Freund has published Cicero's "Pro Milone," with a facsimile of the "Codex Erfurtensis," Breslau, 1838; the "Präparationen zu den Griechischen und Römischen Schulklassikern," in small-sized and cheap instalments, which proved a very popular auxiliary handbook for many generations of German and Austrian students. Together with Marx he attempted, but with less success, a similar work on the Old Testament, 7 parts, Leipsic, 1862–93.

His "Prima," a collection of essays in letter form; "Wie Studiert Man Philologie?" 5th ed., Leipsic, 1885; and "Triennium Philologicum, oder Grundzüge der Philologischen Wissenschaften," 6 vols., 2d ed., 1878–85, place Freund among the most eminent educators in the department of classical philology. Mention should also be made of his "Tafeln der Griechischen, Römischen, Deutschen, Englischen, Französischen, und Italienischen Litteraturgeschichte," *ib.* 1873–75; "Cicero Historicus," *ib.* 1881; and "Wanderungen auf Klassischem Boden," 5 parts, *ib.* 1889–92.

Freund took an active share in the inner struggle of the Jewish community of Breslau, as well as in the movement for the emancipation of the Jews of Prussia. He was the most influential factor in bringing Abraham Geiger to Breslau. He also edited (1843–44) a monthly under the title "Zur Judenfrage in Deutschland," which contains many important contributions by prominent writers, and is of permanent value for the history of both the movements with which Freund identified himself. The "Preussisches Judengesetz" of July 23, 1847, which still to-day forms the basis of the legal status of the Jewish communities in Prussia, was one of the consequences of Freund's activity.

S. A. R.

FREUND, WILHELM ALEXANDER: German gynecologist; born at Krappitz, Silesia, Aug. 26, 1833. He studied medicine at the University of Breslau, where he received his degree in 1855, engaging in practise as gynecologist in that city in the same year. In 1857 Freund became privat-docent and in 1874 assistant professor in the medical faculty of his alma mater. Since 1879 he has been professor at and director of the obstetrical-gynecological hospital at Strasburg University.

Freund is one of the leading gynecologists of Germany, and has published many essays in the medical journals. Among his works may be mentioned: "Beiträge zur Histologie der Rippenknorpel," Breslau, 1858; "Der Zusammenhang Gewisser Lungenkrankheiten mit Primären Rippenknorpelanomalien," Erlangen, 1858; "Eine Neue Methode der Exstirpation des Uterus," in Volkmann's "Sammlung Klinischer Vorträge," 1885, No. 133; "Die Gynäkologische Klinik," with a map, Strasburg, 1891.

S. F. T. H.

FRIARS: Before the institution of the mendicant friars the monastic orders did not play a prominent part in Jewish persecutions. The Cistercian Bernard of Clairvaux actively supported the Jews at the time of the Crusaders' massacres in 1147. On the other hand, it was the Cistercian Arnold who led his Crusaders to the massacre of the Toledo Jews in 1212. The establishment of the Dominicans and Franciscans early in the thirteenth century changed the whole aspect of affairs; the former order constituted themselves the sword of the Church, and from that time Dominicans were in the forefront of nearly every persecution for four hundred years. Even the Franciscans, who were not so aggressive, showed in many ways their antipathy to Jews. Thus on first going to Cambridge they obtained possession of the synagogue (Brewer, "Monumenta Franciscana," pp. 17, 18). But it was the Dominicans who came more often in conflict with the Jews, to procure whose conversion Gregory IX. arranged for a distinctive propaganda on the part of the Dominicans.

Dominican Raymund de Peñaforte.

The chief agent of Gregory IX. in Aragon and Castile was the Dominican general Raymund de Peñaforte, the confessor to James I. of Aragon; he began by erecting seminaries for the teaching of Hebrew, in the hope of subduing his adversaries with their own weapons. Among his disciples was a baptized Jew named Pablo Christiani, who held a public disputation with Moses Naḥmanides at Barcelona in 1263. Naḥmanides was afterward banished for publishing an account of the disputation, and the consequence was that Christiani was appointed a traveling missionary to the Jews at their own expense. His efforts meeting with small success, in the following year a commission of Dominicans and Franciscans was appointed by the papacy to examine the Talmud. On this commission were Peñaforte, Pablo Christiani, and three other Dominicans, one of whom, Raymund Martin, was the author of several anti-Jewish works, the "Pugio Fidei" being the most important. The result of this commission was the censorship and extirpation of offending parts of the Talmud, and holocausts of copies.

Action of Franciscans.

In every country subject to Rome the Dominicans were entrusted with the execution of her policy. In England the Dominicans had equal malice but less power. Ever since the time of the first Norman kings the English monarchs had resisted papal aggression, and, furthermore, the Franciscans, elsewhere ready to assist the Dominicans in their zealous works, appear to have been in a state of rivalry toward the latter. When a number of Jews were imprisoned in the Tower of London in 1255, awaiting execution for the supposed murder of Hugh of Lincoln, the Franciscans ("for a consideration," says Matthew Paris) interceded for them; nevertheless eighteen were hanged (the "An-

nals" of Burton, however, attribute this intervention to the Dominicans). A few years later the Franciscans figure again in the history of the English Jews, this time in opposition to them. In the year 1270 the Jews petitioned the king and council that they might retain the right of advowson with their estates. This request was being favorably considered when one of the Franciscans cried out that it was contrary to the honor of God that Christians should be subject to Jews, at the same time accusing the Jews of plotting secretly against the Church. The result of this was that fresh anti-Jewish legislation was adopted (see ENGLAND).

The English Dominican Robert de Reddinge, studying Hebrew for the purpose of better opposing Judaism, became converted, took the name of "Haggai," and a few years afterward married a Jewess. Edward I. handed him over to the Archbishop of Canterbury for punishment, but in some manner he escaped. Enraged at this, the Dominicans persuaded the queen-mother to inaugurate a series of persecutions and expulsions of Jews from various cities under her influence, notably Cambridge.

In France and England the persecutions came mainly from the crown, in Germany from the populace, but in Spain it was the papacy that directed the attack. The rise of the Flagellants had been attended by Jewish massacres. Among these fanatics was the Dominican Vicente FERRER (since canonized), who had given up a life of ease to wander through Europe with his bands of ascetics. The Spanish Jews, then at the height of their power, he completely humbled by compelling the issue of humiliating restrictions. In the years 1412 and 1413 he caused the conversion of about 20,000 Jews in Aragon and Castile. Don John I. of Portugal, however, stood out resolutely against him and threatened him with death should he cross the frontier.

In Bohemia the crusade against the Hussites was made the excuse for a fresh attack upon the Jews by the Dominicans. The alleged crucifixion of a Moor in Majorca was the excuse for the persecution of the large Jewish community in that island. A mixed court of Franciscans and Dominicans investigated the affair, and the Jews saved themselves from death only by going over in a body to Catholicism (1391).

But the Dominicans were not the only fanatics. In the later years of the fifteenth century BERNARDINUS OF FELTRE, a Franciscan, went up and down Italy denouncing the Jews. In Holy Week of 1475 the body of a child was found caught in a grating in the River Adige, close to a Jew's house. The usual story of ritual murder was set afloat, and all the Jews were burned, except four who accepted Christianity; this was brought about by Bernardinus, aided by the Franciscans and Dominicans. In other parts of Italy he was not so fortunate. The Duke of Milan forbade him to preach. In Florence and Pisa, and then in Venice and Padua, he was also prohibited, and ordered out of the country.

Another Franciscan who devoted his life to Jewish persecution was John of CAPISTRANO, a man of the same type and life as Ferrer. He visited all the provinces of Germany, and incited the fanatical dukes Louis and Albert of Bavaria to the issue of fresh laws against the Jews. Even in Ratisbon, where the Jews had long been almost on a footing with their fellow citizens, his influence was felt. Bishop Godfrey of Würzburg, who had granted the Jews most favorable treatment, was constrained to expel them from his diocese. Capistrano thence went to Silesia. A host-tragedy was immediately bruited abroad; all the Jews of Breslau were imprisoned, of whom forty-one were burned and the rest banished (1454). Even in Poland, where the Jews had long enjoyed exceptional privileges, they were degraded to the level of their coreligionists in the rest of Europe, through the influence of Capistrano. For the part taken by the Dominicans in Spain after the capture of Granada see INQUISITION. The chief Dominican actors were Alfonso de Ojeda, one of the chief agents in its establishment; Miguel Morillo, the inquisitor of Roussillon; and Thomas de Torquemada. For the share of the Dominicans in the Reuchlin-Pfefferkorn controversy see PFEFFERKORN, JOHN; REUCHLIN, JOHN.

FRIDAY. See SABBATH.

FRIEDBERG, ABRAHAM SHALOM ("HAR SHALOM"): Russian Hebraist; born at Grodno Nov. 6, 1838; died in Warsaw March 21, 1902. At the age of thirteen he was apprenticed to a watchmaker; three years later he went to Brest-Litovsk, and afterward to southern Russia, spending two years in Kishinef. On returning to Grodno in 1858 he acquired a knowledge of German and Russian, and became a teacher in wealthy families. Later he engaged in business, but was financially ruined in 1881–82. He then devoted himself exclusively to literary work. In 1883 he became associate editor of "Ha-Meliz" in St. Petersburg; in 1886 he accepted a similar position on "Ha-Zefirah," and settled in Warsaw; in 1888 he became editor of "Ha-Eshkol," a Hebrew encyclopedia, of which only a few instalments appeared. In the same year he became government censor of Hebrew books in Warsaw, which position he retained until 1891.

Friedberg's first Hebrew work was "'Emek ha-Arazim" (Warsaw, 1875; 2d ed., *ib.* 1893), an adaptation of Grace Aguilar's "Vale of Cedars." His "Rab le-Hoshia'" (Warsaw, 1886), which was first published in "Ha-Zefirah," is a translation of Sammter's "Rabbi von Liegnitz." In the year-book "Keneset Yisrael" for 1886 appeared his "'Ir u-Behalot," a translation of L. Lewanda's humorous story "Gnev i Milost Magnata"; and in the "Ha-Asif" of the same year his translations of three short stories by Daudet, Turgenef, and D. Levy respectively. His "Korot ha-Yehudim bi-Sefarad" (Warsaw, 1893) is a history of the Jews in Spain, compiled after Grätz, Kayserling, and other authorities. His "Zikronot le-bet Dawid" (3 vols., *ib.* 1893–95) is an adaptation of Rekkendorf's "Geheimnisse der Juden." His last work was "Ha-Torah weha-Hayyim," a translation of Güdemann's "Geschichte des Erziehungswesen," with notes, additions, and a preface (3 vols., *ib.* 1896–99). He also wrote a pamphlet of memoirs, and an interesting article on

his experiences with J. L. Gordon and Zederbaum in St. Petersburg, besides numerous articles, feuilletons, and translations.

H. R. P. WI.

FRIEDBERG, BERNARD: Austrian Hebraist; born at Cracow Dec. 19, 1876. Besides numerous contributions to Hebrew and other periodicals, he has published the following works, most of them being written in Hebrew: "Rabbi Joseph Karo" (1895); "Epitaphien von Grabsteinen des Israelitischen Friedhofes zu Krakau, Nebst Biographischen Skizzen" (1897; 2d ed., 1903); "Abraham Braude und Seine Nachkommenschaft" (1897); "Shabbethai Kohen: ש"ך" (1898); "Nathan Spira of Grodno" (1899); "History of Hebrew Typography in Cracow" (1900); "Contributions to the History of Hebrew Typography in Lublin" (1900); "History of the Family Schorr" (1901); "Die Raszower Rabbinen" (1903).

S.

FRIEDBERG, HEINRICH VON: German statesman; born at Märkisch-Friedland, West Prussia, Jan. 27, 1813; died at Berlin June 2, 1895. Friedberg studied law at the University of Berlin, taking his degree in 1836. He was attached to the Kammergericht at Berlin, where he became district attorney in 1848. Transferred to Greifswald, he was appointed (1850) attorney, and became privatdocent at the university. In 1854 he was called to the Prussian Department of Justice in Berlin. He became member of the Prussian Upper House (1872); assistant secretary of the Prussian Department of Justice (1873); and "Kronsyndikus" (treasurer of the crown of Prussia 1875;) was appointed (1876) German secretary of justice ("Reichsjustizminister), and received (1879) the same portfolio for Prussia. In 1888 he was knighted and decorated with the Prussian Order of the Black Eagle. He resigned from his official positions in 1889.

Early in his career Friedberg became a Protestant. Among his works may be mentioned "Entwurf einer Deutschen Strafprozessordnung," Berlin, 1873

S. F T. H.

FRIEDBERG, HERMANN: German physician, born at Rosenberg, Silesia, July 5, 1817, died at Breslau March 2, 1884 He studied at the universities of Berlin, Vienna, Prague, Paris, and Breslau, receiving from the last-named the degree of doctor of medicine in 1840 From 1849 to 1852 he was assistant at the surgical hospital of the University of Berlin, and in 1852 was admitted as privatdocent in surgery and pharmacology to the medical faculty of the Berlin University, at the same time conducting a private hospital for the treatment of surgical and ophthalmological diseases. In 1866 he was appointed professor of pharmacology at the University of Breslau

Friedberg wrote many essays on surgical and pharmacological topics, but latterly devoted himself especially to medical jurisprudence He was a collaborator on Eulenberg's "Handbuch des Oeffentlichen Sanitätswesens" and a contributor to the "Vierteljahresschrift für Gerichtliche Medizin und Oeffentliches Sanitätswesen" and to Virchow's "Archiv für Pathologische Anatomie und Physiologie und für Klinische Medizin." He is also the author of: "Pathologie und Therapie der Muskellähmung," Vienna, 1858 (2d ed., Leipsic, 1862); "Die Vergiftung Durch Kohlendunst," Berlin, 1866; "Gerichtsärztliche Gutachten, Erste Reihe," Brunswick, 1875; "Gerichtsärztliche Praxis. Vierzig Gutachten," Vienna and Leipsic, 1881.

S. F. T. H.

FRIEDENTHAL, KARL RUDOLPH: Prussian statesman; born in Breslau Sept. 15, 1827; died on his estate, Giesmannsdorf, near Neisse, March 7, 1890. He was a nephew of Markus Bär Friedenthal, the author, and later became a convert to Christianity. He attended the gymnasium at Neisse (1839–44), studied law at Breslau, Heidelberg, and Berlin, and became (1854) "Kammergerichtsassessor." He also made himself practically acquainted with agriculture in the management of his property.

In 1856 Friedenthal was elected district deputy from Neisse, and in 1857 deputy to the Prussian Landtag. In 1860 he published the pamphlet "Salus Publica Suprema Lex," urging the reorganization of the army. Elected to the Reichstag of North Germany in 1867, he joined the "Altliberalen," but after the following election he became a "Freiconservative" ("Reichspartei"). Successively member of the Zollparlament and of the imperial Reichstag, Friedenthal was prominent in the proposal and passage of many bills. During the Franco-Prussian war he took part, on Bismarck's invitation, with Blankenburg and Bennigsen in the deliberations at Versailles on the constitution of the empire. He was elected to the Prussian Chamber of Deputies in 1870, and became in 1873–74 its second vice-president. In 1874 he was appointed minister of agriculture; and in 1879 the Department of Domains and Forests, till then under the minister of finance, was put in his charge. From Oct., 1877, to March, 1878, during the absence of Eulenberg, he was head of the Ministry of the Interior. In 1879, being unable to accept Bismarck's new economical policy, he resigned, declining a patent of nobility. The same year he was elected member of the Upper House, but in 1881 resigned, and retired to the management of his estate. Besides his doctor dissertation, "De Rerum Litigiosarum Alienatione ex Jure Romano," 1845, Friedenthal published "Reichstag und Zollparlament"

FRIEDENTHAL, MARKUS BÄR: German banker and scholar; born in 1779; died at Breslau Dec. 3, 1859. Although one of the leading bankers at Breslau, he devoted much time to study and to communal affairs. His special interest lay in the field of religious philosophy and dogma, which he treated rather in an apologetic than in a purely scientific manner. His works nevertheless betrayed great sagacity, and had the merit, coming as they did from a conservative, of opening to the Talmudists the field of modern critical studies. Friedenthal

wrote: "'Iḳḳare Emunah," on the dogmas of Jewish religion, proving that Mosaism is in accordance with the aims of humanity (Breslau, 3 vols., 1816–1818); "Yesod ha-Dat," a characterization of Jewish law (*ib.* 7 vols., 1821–23); "Mishpaṭ ha-Aḥizah we-Mishpaṭ ha-Zekiyyah," on the law of property, a summary of the preceding work (*ib.* 1838); "Miktab le-Ḥakme Yisrael," an open letter to Jewish scholars concerning Jewish dogmas (*ib.* 1825); "Ma'amar Mordekai," a defense of the institutions of the great synagogue at Breslau, with notes on the use and form of the prayers (*ib.* 1834); "Ha-Ḥokmah, ha-Tebunah, weha-Dat," on intelligence, comprehension, and religion, in 4 parts (*ib.* 1843–46). Several of these works were translated into German by R. J. Fürstenthal and by Wilhelm Freund. Friedenthal was also the author of many pamphlets written in German, dealing with the communal affairs of Breslau.

S. I. BR.

FRIEDENWALD: An American Jewish family, established in Baltimore, Md., by Jonas Friedenwald. His children were Bernard Stern, stepson (1820–73); Betzy Wiesenfeld (1820–94); Joseph (1826–); Isaac (1830–), who established a well-known printing-press in Baltimore; Moses (1838–89); and Aaron Friedenwald (1836–1902).

Aaron Friedenwald: Physician; youngest son of Jonas Friedenwald; born in Baltimore Dec. 20, 1836; died there Aug. 26, 1902. He early entered upon a business career, but devoted his spare time to the study of mathematics, general literature, and German, French, and Hebrew. At the age of twenty-one he began the study of medicine at the University of Maryland. He graduated in the spring of 1860, and soon afterward sailed for Europe to continue his studies at Berlin, Prague, Vienna, and Paris. He devoted himself especially to ophthalmology throughout his professional life. In July, 1862, he returned to Baltimore, and entered upon the practise of medicine. In 1873 he was elected to the professorship of diseases of the eye and ear in the College of Physicians and Surgeons in Baltimore, which chair he held until his death. He soon became a prominent member of the local medical societies and president of the Medical and Chirurgical Faculty of Maryland (1889–90); and was a member of the medical staffs of a number of hospitals

One of his most important medical achievements was the calling into being of the influential Association of American Medical Colleges in 1890 He was among the most active workers in all the local and national Jewish charities and other associations, was a founder, and for thirty-three years a director, of the Baltimore Hebrew Orphan Asylum, chairman of the Baron de Hirsch committee in Baltimore, president of the Baltimore branch of the Alliance Israélite Universelle, one of the founders and vice-president of the Jewish Theological Seminary Association, of the Jewish Publication Society, of the Federation of American Zionists, of the Union of Orthodox Congregations of America, etc. In 1898 he visited the Holy Land to study the conditions of the Jewish colonies. He was a successful lecturer, and made important contributions to medical literature. His publications of general interest are a number of addresses on the study of medicine, the history of hospitals, Jewish immigration, and the Jewish colonies in Palestine; the most important of them is "Jewish Physicians and the Contributions of the Jews to the Science of Medicine" ("Publications, Gratz College," vol. i., 1897).

Harry Friedenwald: Physician; son of the preceding; born in Baltimore 1864. He was educated at Johns Hopkins University, and graduated (M.D., 1886) from the College of Physicians and Surgeons, Baltimore, at which he became professor of ophthalmology and otology. He has contributed numerous articles to medical literature, and is prominent in Jewish communal work.

Herbert Friedenwald: Son of Moses Friedenwald; born in Baltimore 1870. He was educated at Johns Hopkins University and at the University of Pennsylvania (Ph.D., 1893). He was the first superintendent of the manuscript department of the Library of Congress after its reorganization, and has edited a separate calendar of the Washington papers in the National Library. He has devoted himself specially to the study of the early history of the United States, his writings being chiefly upon the history of the Continental Congress He has been one of the secretaries of the American Jewish Historical Society since its organization, and has made numerous contributions to its publications.

Jonas Friedenwald: Born 1801, died Sept 2, 1893. He emigrated to America during the winter of 1831–32, from Altenbusick, near Giessen, Germany, accompanied by his aged father, Ḥayyim, his wife, a stepson, and his three children In Baltimore he soon entered actively upon the communal work of the small Jewish community, devoting the latter half of his life entirely to philanthropic and congregational work. He was among the most active in founding the Hebrew Benevolent Society (for many years he was its treasurer), the Hebrew Hospital and Asylum, and the Hebrew Orphan Asylum. Seceding from the Baltimore Hebrew Congregation because of innovations introduced into the service, he founded the Orthodox congregation Chizuk Emunah (1871), and was for many years its president.

Julius Friedenwald: Physician, son of Aaron Friedenwald, born in Baltimore 1866. He was educated at Johns Hopkins University, and graduated from the College of Physicians and Surgeons, Baltimore (M.D., 1890). He is clinical professor of diseases of the stomach, and director of the clinical laboratory, at the College of Physicians and Surgeons. His writings are limited to subjects concerning internal and experimental medicine.

A. H FR.

FRIEDJUNG, HEINRICH: Austrian journalist and author, born at Rostschin, Moravia, Jan. 18, 1851; studied at Prague, Berlin, and Vienna (Ph.D.). In 1874 he was appointed professor at the Vienna Handelsakademie, but was obliged to resign in 1881 for political reasons. In 1883 he became editor of "Die Deutsche Wochenschrift," founded by himself; and in 1886 was editor-in-chief of "Die Deutsche Zeitung," organ of the German club of the Austrian Chamber of Deputies. From 1891 to 1895

he was a member of the Vienna municipal council. He has been a regular contributor to the Munich "Allgemeine Zeitung," and a correspondent of other influential journals. His chief publications have been: "Kaiser Karl IV. und Sein Antheil am Geistigen Leben Seiner Zeit" (Vienna, 1876); "Der Ausgleich mit Ungarn" (Leipsic, 1877); "Ein Stück Zeitungsgeschichte" (2d ed., Vienna, 1887); "Der Kampf um die Vorherrschaft in Deutschland" (2 vols., 1896; 5th ed., Stuttgart, 1902). He has besides edited "Benedek's Nachgelassene Papiere" (Leipsic, 1901).

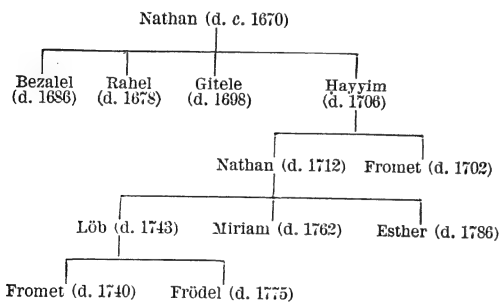
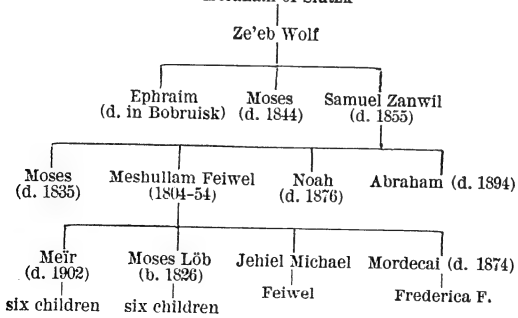
S. N. D.

FRIEDLAND: A family which came presumably from Friedland in the German duchy of Mecklenburg-Strelitz (or perhaps from the Bohemian town of that name), and settled in Prague. Nathan Friedland, "head of the ḳahal and of the country of Bohemia," was the earliest known member of the Prague branch of the family, of which the following is the genealogy:



All these belong to Prague. Meïr of Zülz had a son, Mordecai (d. 1742), and a daughter, Rebecca, who married the dayyan Lipman Ḳadish (d. 1736); both lived in Prague. Israel Issar, son of Phinehas of Zülz, was a prominent man in Frankfort-on-the-Oder in 1708, as is narrated in the last note of Eliezer b. Joseph's "Mishnat de-Rabbi Eliezer," which was printed there in that year.

There is also a Friedland family of Russia, whose geneaology is as follows:



It is supposed that the founders of this family, and Meïr and Phinehas Friedland of Zülz, Silesia (end of seventeenth and first half of eighteenth century), were related to the Bohemian branch of the Friedlands. The most prominent members of the Russian branch were the philanthropist Meïr and his brother Moses Aryeh Löb Friedland; the earliest known member was Abraham of Slutzk (government of Minsk). Meshullam Feiwel Friedland settled at Dwinsk in 1846, but his sons removed to St. Petersburg.

Bibliography: Eisenstadt-Wiener, *Da'at Ḳedoshim*, pp. 233-245, St. Petersburg, 1897-98.

J. P. Wi.

FRIEDLAND, MOSES ARYEH LÖB: Russian philanthropist; born at Dünaburg, government of Vitebsk, Jan. 8, 1826; died at St. Petersburg Nov. 21, 1899. He was for more than thirty years general army-contractor for the Russian government; he was an honorary citizen of St. Petersburg, and received several medals from the government. An orphan asylum, to which a school of handicrafts is attached, was founded at St. Petersburg by Friedland, as well as a home for aged Jews (Moshab Zeḳenim) at Jerusalem. But his name is chiefly connected with the Bibliotheca Friedlandiana, a large library of Hebrew books, which Friedland presented (1890) to the Asiatic Museum of the Imperial Academy of Sciences. It contains three hundred volumes in manuscript, most of them on parchment, and more than ten thousand printed volumes, representing altogether 14,000 works, a great many of which are incunabula. The catalogue was compiled by Samuel Wiener; at present (1903) only the first four fascicles (through the letter ṗ, Nos. 1–3711), printed at the expense of Friedland, and under the title of "Ḳehillat Mosheh," have appeared.

Bibliography: *Ḳehillat Mosheh*, Preface to part ii., St. Petersburg, 1896; *Jew. Chron.* Dec. 8, 1899.

H. R. M. Sel.

FRIEDLÄNDER, CAMILLA: Austrian painter; born in Vienna Dec. 10, 1856; daughter and pupil of Friedrich Friedländer. She has devoted herself to still-life subjects, producing many pictures of church and house interiors, etc. Her oil-painting "Orientalische Gegenstände," exhibited at the twentieth annual exposition of the Künstlerhaus in Vienna, was bought by the Emperor of Austria.

Bibliography: Singer, *Künstler-Lexikon*, i., *s.v.*; Eisenberg, *Das Geistige Wien*, i., *s.v.*

S. N. D.

FRIEDLÄNDER, DAGOBERT: Member of the Prussian Upper House; born in Kolmar, Posen, Feb. 19, 1826. From 1846 to 1857 he conducted a book business in Wollstein; in the latter year he removed to Bromberg, exchanging his former occupation for that of a banker. He was a member of the Prussian Upper House from 1874 to 1881. During his term of membership the law concerning the withdrawal of members from the Jewish communities in Prussia, to which he offered an amendment, was passed. Since 1882 Friedländer has resided at Villa Breitenstein, near Ermatingen, in Switzerland.

S.

FRIEDLÄNDER, DAVID: German writer and communal leader; born at Königsberg Dec. 6, 1750; died Dec. 25, 1834, at Berlin, where he had settled in 1771. As the son-in-law of the rich banker Daniel Itzig, and the friend and pupil, and subse-

quently the successor, intellectually, of Moses Mendelssohn, he occupied a prominent position in both Jewish and non-Jewish circles of Berlin. His endeavors in behalf of the Jews and Judaism included the emancipation of the Jews of Berlin and the various reforms connected therewith. Frederick William II., on his accession, called a committee whose duty was to acquaint him with the grievances of the Jews, Friedländer and Itzig being chosen as general delegates. But the results of the conference were such that the Jews declared themselves unable to accept the reforms proposed, and not until after the French Revolution did the Jews then living on Prussian territory succeed in obtaining equal rights from Frederick William III. (edict of March 11, 1812).

David Friedländer.
(From Breza, "Gallerie der Ausgezeichnetsten Israeliten.")

Friedländer and his friends in the community of Berlin now turned their attention to the reform of worship in harmony with modern ideas and the changed social position of the Jews. The proposition in itself was perfectly justified, but the propositions of Friedländer, who had meanwhile been called (1813) to the conferences on the reorganization of the Jewish cult held in the Jewish consistory at Cassel, were unacceptable to even the most radical members, as they tended to reduce Judaism to a mere colorless code of ethics.

Friedländer was more successful in his educational endeavors. He was one of the founders of a Jewish free school (1778), which he directed in association with his brother-in-law, Isaac Daniel Itzig. In this school, however, exclusively Jewish subjects were soon crowded out. Friedländer also wrote text-books, and was one of the first to translate the Hebrew prayer-book into German. But in spite of all these labors he was not filled with the true Jewish spirit, being more concerned with endeavors to facilitate for himself and other Jews entry into Christian circles. This disposition was evidenced by his anonymous petition to the "Oberconsistorialrat" Teller "in the name of many Jewish heads of families," who agreed to accept Christianity and even baptism, if they were not required to believe in Jesus and might evade certain ceremonies. Teller, who did not even suspect Friedländer of this lack of character, answered with due severity. This "Sendschreiben an Seine Hochwürden Herrn Oberconsistorialrath und Probst Teller zu Berlin, von einigen Hausvätern Jüdischer Religion" (Berlin, 1799), called forth many replies. In 1816, when the Prussian government decided to improve the situation of the Polish Jews, Malziewsky, Bishop of Kujawia, consulted Friedländer. Friedländer gave the bishop a circumstantial account of the material and intellectual condition of the Jews, and indicated the means by which it might be ameliorated.

Friedländer displayed great activity in literary work. Induced by Moses Mendelssohn, he began the translation into German of some parts of the Bible according to Mendelssohn's commentary. He translated Mendelssohn's "Sefer ha-Nefesh," Berlin, 1787, and "Ḳohelet," 1788. He wrote a Hebrew commentary to Abot and also translated it, Vienna, 1791; "Reden der Erbauung Gebildeten Israeliten Gewidmet," Berlin, 1815–17; "Moses Mendelssohn, von Ihm und über Ihn," *ib.* 1819; "Ueber die Verbesserung der Israeliten im Königreich Polen," *ib.* 1819, this being the answer which he wrote to the Bishop of Kujawia; "Beiträge zur Geschichte der Judenverfolgung im XIX. Jahrhundert Durch Schriftsteller," *ib.* 1820.

Friedländer was assessor of the Royal College of Manufacture and Commerce of Berlin, and the first Jew to sit in the municipal council of that city. His wealth enabled him to be a patron of science and art, among those he encouraged being the brothers Alexander and Wilhelm von Humboldt.

FRIEDLÄNDER, FRIEDRICH: Genre painter; born Jan. 10, 1825, at Kohljanowitz, Bohemia. He studied at the Vienna Academy, and later under Professor Waldmüller, and visited Italy in 1850, Düsseldorf in 1852, and finally Paris. He devoted himself at first to historical pictures, creating a genuine sensation with his painting entitled "The Death of Tasso." Since 1854 he has painted genre pictures exclusively, taking his subjects chiefly from military life and the local life of Vienna. His scenes from Swabian folk-life are also justly celebrated.

The following are a few of Friedländer's best pro-

ductions: "People Pouring out of a Public Building into the Street," 1859 (Imperial Gallery, Vienna); "The Politician in the Workshop," 1863; "The Incendiary Caught in the Act," 1864; "The Evening Hour," 1865; "The Pawnbroker's Shop," 1866 (now in the possession of the Duke of Coburg); "The Wine-Test," 1866; "The New Comrade," 1868; "The Invalids," 1871; "The Declaration of Love," 1872; and "The Strawberry-Venders," 1872 (Imperial Gallery, Vienna). Since 1866 he has been a member of the Vienna Academy; in 1865 he received the Order of Francis Joseph and the Bavarian Order of Michael, and in 1867 the gold medal with crown for merit. He has recently been elevated to the nobility with the suggestive title of "Von Mahlheim." Many of his paintings are in the Imperial Gallery at Vienna.

FRIEDLÄNDER, JOSEPH ABRAHAM: German rabbi; born at Kolin, Bohemia, 1753; died at Brilon, Westphalia, Nov. 26, 1852. He was the nephew of David Friedländer, from whom he imbibed a great enthusiasm for progressive Judaism. After attending the Talmud school of Ezekiel Landau at Prague, he went to Presburg. In 1784 he became chief rabbi of Westphalia and the principality of Wittgenstein, retaining this office until his death.

Friedländer was one of the first German rabbis to advocate through speech and pen the reform of Judaism. He abolished in his district the second day of the festivals; openly and decisively opposed many obsolete Jewish mourning customs; and declared, in his responsum on "Die Verträglichkeit der Freien Forschung mit dem Rabbineramte," that the dicta of the Mishnah and the Talmud are not binding for all time. He published "Shoresh Yosef," on abolishing the second day of the festivals (in Hebrew and German; Hanover and Brilon, 1834), and "Mahadura Bathra," a supplement to the foregoing, and containing a correspondence with Aaron Chorin on questions of Reform (Hanover, 1835).

FRIEDLÄNDER, JULIUS: German numismatist; born in Berlin June 25, 1813; died there April 4, 1884. After studying at the universities of Bonn and Berlin, and traveling in Italy (1838–39), he obtained a position at the Königliche Sammlung der Antiken-Münzen in Berlin (1840). In 1868 he became director of the numismatic section of the Berlin Museum. In 1872 he was elected a member of the Berlin Academy of Sciences. Besides numerous papers in numismatic journals, he wrote: "Die Münzen des Johanniterordens auf Rhodos," Berlin, 1843; "Die Münzen Justinians" (with Pinder), 1843; "Die Münzen der Ostgothen," *ib.* 1844; "Die Münzen der Vandalen," *ib.* 1849; "Die Oskischen Münzen," Leipsic, 1850; "Das Königliche Münzkabinet" (with Von Sallet), 2d ed., Berlin, 1877; Supplement, 1882; "Die Italienischen Schaumünzen des 15. Jahrhunderts," *ib.* 1880–82; "Verzeichnis von Griechischen Münzen, Welche aus Modernen Stempeln Geprägt Sind," *ib.* 1883. He edited G. Schadow's "Aufsätze und Briefe," Düsseldorf, 1864; 2d ed., Stuttgart, 1890. From his literary remains Weil published "Repertorium zur Antiken Numismatik," a supplement to Mionnet's "Description des Médailles Antiques," Berlin, 1885.

Friedländer's entire family embraced Christianity in 1820.

FRIEDLÄNDER, LUDWIG: German philologist; born at Königsberg July 16, 1824. He studied at the universites of Königsberg and Leipsic from 1841 to 1845. In 1847 he became privat-docent of classical philology at Königsberg, in 1856 assistant professor, and in 1858 professor. He retired in 1892 to Strasburg, where he is honorary professor at the university. His chief work is "Darstellungen aus der Sittengesch. Rom's in der Zeit von August bis zum Ausgang der Antonine" (3 vols., 1862–71; 6th ed., 1889–90). This work is considered one of the most noteworthy philological productions of the nineteenth century (translated into French by Ch. Vogel, Paris, 1865–74, and into Italian and Hungarian). Friedländer's other publications include: "Nicanoris περὶ Ἰλιακῆς Στιγμῆς Reliquiæ Emendatiores" (1850); "Ueber den Kunstsinn der Römer in der Kaiserzeit" (1852); "Aristonici Alexandrini περὶ Σημείων Ἰλιάδος Reliquiæ Emendatiores" (1853); "Die Homerische Kritik von Wolf bis Grote" (1853). He edited and annotated Martial (2 vols., 1886); Petronius' "Cena Trimalchionis" (with translation, 1891); and Juvenal (1895). Friedländer has embraced Christianity.

S.

FRIEDLÄNDER, LUDWIG HERMANN: German physician; born April 20, 1790, at Königsberg, Prussia; died 1851 at Halle, Saxony. He entered the Königsberg University at the age of fifteen, and studied medicine (M.D. 1812), evincing at the same time a predilection for philological, literary, and esthetical studies which led to a lifelong friendship with Max von Schenkendorf. He took part in the campaign of 1813 and went with the army to Paris, where he was promoted to the office of chief physician of a camp-hospital. In 1814 he resigned from military service and went to Carlsruhe; there, through the intervention of his friend Schenkendorf, he became acquainted with Jung-Stilling, John Ludwig Ewald, and Mme. Krüdener, whose mystical tendencies exercised a deep influence upon his mind. After a short stay in Carlsruhe he went to Vienna, and in 1815 to Italy, through his companion, the painter Philipp Veit, where he associated chiefly with artists. He described the impressions of his journey in a book published 1818–20 in Leipsic ("Ansichten von Italien Während einer Reise in den Jahren 1815–1816").

Upon his return to Germany (1817) Friedländer was admitted as privat-docent in medicine at Halle. In 1819 he was appointed assistant professor, and in 1823 professor, of theoretical medicine; he held this chair till his death.

Friedländer wrote: "De Institutione ad Medicinam Libri Duo," a methodology of medicine, Halle,

1823; "Fundamenta Doctrinæ Pathologicæ sive de Corporis Animique Morbi Ratione Atque Natura," a text-book of general pathology, 3 vols., Leipsic, 1828; "Guilielmi Heberdeni Opera Medica Recognovit; Vitam Auctoris Adjecit Atque Edidit," Leipsic, 1831; "Vorlesungen über die Geschichte der Heilkunde," 2 vols., Leipsic, 1838–39; "Historiæ Ord. Medic. Halensis ante Hos Centum Annos Brevis Expositio," Halle, 1840. Friedländer embraced Christianity at an early age.

S. B. B.

FRIEDLÄNDER, MAX: Journalist; born June 18, 1829, at Pless, Prussian Silesia; died April 20, 1872, at Nice. After studying law at the universities of Berlin, Breslau, and Heidelberg, he became assessor at the city court of Breslau, and while holding this position he published his book on copyright, "Der Ausländische und Einheimische Rechtsschutz Gegen Nachdruck und Nachbildung," Leipsic, 1857. He began his journalistic career in 1856 by contributing to the Vienna "Presse," and soon afterward moved to Vienna to become a member of the editorial staff of that paper, his articles on political economy and finance attracting the attention of influential statesmen and financiers.

After the Italian war Friedländer conducted a successful journalistic campaign against the policy of Schmerling, and advocated strongly the granting of a liberal constitution. In Sept., 1864, he founded the "Neue Freie Presse," of which publication he remained editor-in-chief until his death.

H. R. S.

FRIEDLÄNDER, MAX: German writer on music and bass concert-singer; born in Brieg, Silesia, Oct. 12, 1852. A pupil of Manuel Garcia (London) and Stockhausen (Frankfort-on-the-Main), he made his début at the London Monday Popular Concerts in 1880. From 1881 to 1883 he lived at Frankfort-on-the-Main; since then his home has been in Berlin, where he is (since 1894) lecturer on music at the university. In 1887 he received the Ph.D. degree from the University of Rostock, his dissertation being "Beiträge zu einer Biographie Franz Schubert's." He edited the Peters collection of Schumann's and Schubert's songs (1884–87). He also published the following: "Gluck's Klopstocksche Oden" (1886); "Ein Hundert Deutsche Volkslieder" (1886); "Beethoven's Schottische Lieder" (1889); "Chorschule" (1891); "Wiegenlieder" (1894); "Gesänge von Beethoven" (1896); "Goethe's Gedichte in der Musik" (1896); "Haydn's Canons" (1899); "Beethoven's Klavier-Rondo" (1900).

S. N. D.

FRIEDLÄNDER, MICHAEL: Principal of Jews' College, London; born at Jutroschin, Prussia, April 29, 1833. He studied at the universities of Berlin and Halle (Ph.D. 1862), and concurrently with his university studies he read Talmud. Settling in Berlin, he was appointed principal of the Talmud school, which position he resigned in 1865 to accept that of principal of Jews' College, London, in succession to Barnett Abrahams. In 1867 he published a German commentary upon the Song of Songs. He has since taken an active part in the educational progress of the community at large.

Friedländer has displayed considerable literary activity. As a member of the Society of Hebrew Literature he has published under its auspices: (1) "The Commentary of Ibn Ezra on Isaiah"; (2) "An Essay on the Writings of Ibn Ezra"; and (3) a translation from the original Arabic, with notes, of Maimonides' "Guide of the Perplexed." He has also edited a "Jewish Family Bible" in English and Hebrew; compiled a "Handbook of the Jewish Religion," and a larger work, "The Jewish Religion"; made calculations on the Jewish calendar; and contributed articles to the "Jewish Quarterly Review," the "Dictionary of National Biography," and other publications. Numerous papers read by him at Jews' College and elsewhere have been published.

BIBLIOGRAPHY: *Jewish Year Book*, 1899; *Jewish Chronicle*, May 8, 1903.

J. G. L.

FRIEDLÄNDER, MORITZ: Austrian theologian; born in Bur Szt. Georgen, Hungary, 1842; now (1903) residing in Vienna. He was educated at the University of Prague, where he also attended the Talmudic lectures of Chief Rabbi Rapoport. His liberal views kept him from the rabbinical career. For a short period he filled the position of religious instructor in a gymnasium in Vienna; in 1875 he became secretary of the Israelitische Allianz zu Wien. In 1881–82, sometimes in company with Charles Netter, he made frequent journeys to Brody to cooperate with the delegates of the Alliance Israélite Universelle of Paris in assisting exiled Russian Jews to the United States. The wretchedness and misery he witnessed on these occasions he described in "Fünf Wochen in Brody." As secretary of the Allianz he succeeded, in spite of vehement opposition of the ultra-Orthodox party (Ḥasidim), in establishing in Galicia the first Jewish public school. Friedländer's memoir on his second journey to Galicia fell into the hands of Baron de Hirsch; the latter's munificent foundation (Baron de Hirsch Fund), enabling the Jewish youth in Galicia to secure an education and to acquire a trade, was a direct expression of his sympathy for his unfortunate coreligionists. Friedländer became the secretary of this fund, and established personally fifty schools in those localities of Galicia where there were large numbers of Jews. It was at his instance also that the baroness Clara de Hirsch established a fund of five million francs to found technical schools for girls and to clothe poor school-children in Galicia.

Friedländer wrote: "Patristische und Talmudische Studien" (1878); "Lessing's Nathan der Weise" (1880); "Apion: ein Culturbild aus dem Ersten Christlichen Jahrhundert" (1882); "Zur Entstehung des Christenthums" (1894); "Die Drei Belfer: ein Culturbild aus Galizien" (under the pseudonym "Marek Firkowitz": 1894); "Das Judenthum in der Vorchristlichen Griechischen Welt" (1897); "Der Vorchristliche Jüdische Gnosticismus" (1898); "Reiseerinnerungen aus Galizien" (1900); "Der Anti-

christ" (1902); "Geschichte der Jüdischen Apologetik" (1903); and "Der Freiwellige des Ghetto: Kulturbilder aus Vergangenheit und Gegenwart." He has also contributed to the "Nation," "Die Zeit," the "Revue des Etudes Juives," the "Jewish Quarterly Review," and to various Jewish weeklies.

S.

FRIEDLÄNDER, SOLOMON: Preacher and physician; born at Brilon, Westphalia, Oct. 23, 1825; died in Chicago Aug. 22, 1860. He studied in Bonn and Heidelberg, and graduated (Ph.D.) in 1844. In 1847 he was elected associate preacher to Dr. Holdheim of the Reform Congregation of Berlin, and later accepted a professorship in the Jewish Teachers' Seminary at Münster, in which city he also officiated as preacher. He remained there for three years. He wrote: "Geschichte des Israelitischen Volkes," of which only the first three volumes appeared (Leipsic, 1847); "Sermons," delivered in the Temple of the Jewish Reform Congregation at Berlin (1847); "Samuel," twenty-five sermons, the first volume of a projected series entitled "Das Leben der Propheten" (1850); "Gesch. der Münsterschen Seminars" (1850). Friedländer next studied medicine, won the degree of M.D., and emigrated to America in 1855. Finding the medical profession uncongenial, he accepted (1860) the position of teacher and (shortly after) preacher to the Congregation (Kehillath) Anshe Maarab, Chicago.

S. E. Schk.

FRIEDMAN, AARON ZEBI: Shoḥeṭ; born in Stavisk, Poland, March 22, 1822; died in New York city May 17, 1876. At the age of seventeen Friedman became shoḥeṭ for the city of Stavisk and the neighboring country. He removed to Bernkastel-on-the-Moselle, Germany, where he became rabbi and shoḥeṭ in 1844. Four years later he went to New York, where he was chosen as shoḥeṭ of one of the largest abattoirs in the city. Friedman held this position until his death. Owing to charges of cruelty made by Henry Bergh, president of the American Society for the Prevention of Cruelty to Animals, Friedman wrote (1874) a defense of shehiṭah entitled "Ṭub Ṭa'am," translations of which were two years later made from the Hebrew into English, French, and German. His strict Orthodoxy and learning caused him to be widely known as the "Ba'al Shem" of America.

Bibliography: Drachman, *Neo-Hebraic Literature in America*, in the *Seventh Biennial Report of the Jewish Theological Seminary Association*, pp. 65, 96; *Harper's Monthly*, Oct., 1878, pp. 768, 769.

A.

FRIEDMAN, LÖB BEHR (Aryeh Dob): Author and pedagogue; born in 1865 at Suwalki, Russian Poland. He was educated at Boskowitz, Moravia, afterward removing to Warsaw, where he became one of the promoters of Zionism, founding there, in conjunction with R. Samuel Mohilever, a Zionist society. In 1892 he went to America and became the editor of "Ha-'Ibri." Friedman has written a considerable number of school-books and other works, among which may be mentioned: "Ha-Padegug ha-'Ibri"; "Allufe Yisrael," biographies of the Talmudists; "Shulḥan 'Aruk li-Bene ha-Ne'urim," a book on rabbinic law for the young, in Judæo-German; "Likḳuṭim Nifla'im," stories from the Talmud; "Talmudische Perlen"; "Rabbis of Ancient Times" (in collaboration with Fromenson); "Maxims and Proverbs of Bible and Talmud." He has written also various novels and articles for Hebrew journals.

A. H. Ma.

FRIEDMANN, ALFRED: German poet and author; born at Frankfort-on-the-Main Oct. 26, 1845. Brought up as a goldsmith, he renounced that occupation and studied at the universities of Heidelberg and Zurich (Ph.D. 1870). Friedmann resided in Vienna until 1886, when he moved to Berlin. His works include: "Savilia" (1873); "Aus Hellas" (songs, 1874); "Merlin-Orpheus" (songs, 1874); "Biblische Sterne" (three idyls, 1875); "Die Feuerprobe der Liebe Angioletta" (3d ed., 1879); "Leichtsinnige Lieder" (1878); "Gedichte" (1882); "Lieder des Herzens" (1888). Besides these lyrical productions Friedmann wrote the drama "Don Juan's Letztes Liebesabenteuer" (1891), and numerous novels, among which are: "Zwei Ehen" (3d ed., 1880; this has been translated into Italian); "Schnell Reich" (1891); "Die Heckenrose" (1893); "Die Danaiden" (1893); "Der Todesring," "Falsche Freundschaft," "Der Letzte Schuss," and "Russische Rache" (all four published in Reclam's "Universalbibliothek").

Bibliography: *Meyers Konversations-Lexikon.*

S.

FRIEDMANN, BERNÁT: Hungarian jurist and criminal lawyer; born in Grosswardein Oct. 10, 1843; studied law at the "Rechtsakademie" there and at the University of Budapest. He won general sympathy through his manly conduct in connection with the notorious Tisza-Eszlár trial. He wrote: "Hazai Bányászatunk Nemzetgazdasági és Statisztikai Szempontból," Budapest, 1866; "A Népbirák és Esküdtszèkek Intezménye," *ib.* 1876 (which won the grand academical prize); "A Felebbvitel Bünügyekben Tekintettel a Közvetlen Szóbelisègre," *ib.* 1878; "Eszrevètelek a Mágyar Bünvádi Eljarási Javaslat Iranyeszméi Felett," 1889.

S. M. W.

FRIEDMANN ("ISH SHALOM"), MEÏR BEN JEREMIAH: Austrian scholar; born at Kraszna, in the district of Kashau, Hungary, July 10, 1831. At the age of thirteen he entered the yeshibah at Ungvar, where he was attracted to Ḥasidism and the Cabala. Fortunately, however, at the age of sixteen he was led by the "Bi'ur" of Mendelssohn to the study of the Bible, and became deeply interested in Hebrew poetry, especially in Wassely's "Shire Tife'ret." At twenty, while living at Miskolcz, where he earned his livelihood by giving instruction in Talmudical literature, he took up secular studies. In 1858 he entered the University of Vienna. When, in 1864, the Vienna bet hamidrash was founded he was chosen as teacher of the Bible and Midrash; that office he still (1903) holds. Later he was elected a professor in the Israelitisch-Theologische Lehranstalt.

Friedmann has devoted himself chiefly to the

editing of old Midrashim, to which he has added critical notes and valuable introductions. These notes, written in classical rabbinical style, are models of precision and are of great value. Friedmann has published the following works in Hebrew: The Sifre, Vienna, 1864; the Mekilta, *ib.* 1870; "Eshet Ḥayil," a commentary on Prov. xxxi. *ib.* 1878; the Pesiḳta Rabbati, *ib.* 1880; "Ha-Ẓiyyon," a rational interpretation of Ezek. xx. *ib.* 1882; "Dabar 'al Odot ha-Talmud," on the question whether the Talmud can be accurately translated, *ib.* 1885; "Masseket Makkot," a critical edition of the Talmudical treatise Makkot, with a commentary, *ib.* 1888; "Sefer Shofeṭim," notes to Judges, *ib.* 1891; "Me'ir 'Ayin," a commentary on the Passover Haggadah, *ib.* 1895; "Tanna debe Eliyahu," *ib.* 1900. Friedmann's German publications are: "Worte der Erinnerung an Isaac Noa Mannheimer," *ib.* 1873; "Die Juden ein Ackerbautreibender Stamm," *ib.* 1878; "T. G. Stern, Gedenkrede," *ib.* 1883; "Zerubabel," German explanation of Isa. lii. 19 and liii. *ib.* 1890; "Worte zur Feier des 100 Jahrigen Geburtstages des Seligen Predigers Isaac Noa Mannheimer," 1893; "Onkelos und 'Aḳylos," *ib.* 1896. From 1881 to 1886 Friedmann published, together with Isaac Hirsh Weiss, the monthly "Bet Talmud," devoted to rabbinical studies. To this periodical Friedmann contributed, under the signature "Ish Shalom," many valuable essays, of which the most noteworthy are on the arrangement of the Pentateuch and on Samuel.

BIBLIOGRAPHY: Brainin, in *Luaḥ Ahiasaf*, pp. 343 *et seq.*, 1901; *Ha-Shiloaḥ*, p. 573, 1901; S. Schechter, in *Jew. Chron.* p. 17, June 28, 1901.

S. I. BR.

FRIEDMANN, MORITZ: Hungarian cantor; born in Hrabócz, Hungary, March 7, 1823; died in Budapest Aug. 29, 1891. Up to 1848 he filled several positions in minor provincial congregations. At the outbreak of the revolution in that year he enlisted in the Hungarian army, and participated in the campaign against Austria.

Upon his return to civil life Friedmann became a member of the choir of Solomon Sulzer in Vienna, and in 1850 was elected cantor, teacher, and secretary of the congregation at Fünfhaus, a suburb of the Austrian capital. Seven years later he became chief cantor of the Jewish congregation of Budapest, a position which he retained until his death. In 1875 Emperor Francis Joseph conferred upon him the decoration of the Golden Cross. In 1882 he founded a union of Jewish congregation officials, of which he remained president till his death. In 1877 he was appointed professor of vocal instruction at the rabbinical seminary at Budapest. Friedmann published a song-book, "Izraelita Vallásos Énekek," which is in use in most congregations of Hungary.

S. A. KAI.

FRIEDMANN, PAUL: German philanthropist; born at Berlin in the middle of the nineteenth century. Friedmann is of Jewish descent, and is connected with the family of Moses Mendelssohn. Much exercised over the fate of the Russian Jews after the persecutions of 1882–90, in 1890 he visited the land of Midian and resolved to found a colony there. He had a steam-yacht ("Israel") built in Scotland, and went to Cracow personally to select the first immigrants. Twenty-four of these, under the leadership of Friedmann, Baron von Seebach, and Lieutenant Thiele, with a doctor, a chemist, and a builder, left Cairo in the middle of November, 1891.

A landing was made at Sharm al-Moza on the east side of the Gulf of Akabah; but the new colony did not last for more than two months. Internal dissensions broke out between the leaders, who were all Christians, and the Jews. The Egyptian government also feared complications with the Turkish soldiers encamped not far off, and ordered the undertaking to be abandoned. Friedmann, who had sunk 170,000 marks in the project, brought suit against the Egyptian government for £25,000. The Russian consul in Cairo also opened an investigation, and violent denunciatory articles appeared in the Egyptian press, especially in connection with the death of one of the settlers who had been forced to leave the encampment because of insubordination. In connection with the venture, Friedmann privately published "Das Land Madian," Berlin, 1891.

D. G.

FRIEDMANN, SIEGWART: German actor; born at Budapest April 25, 1842. He was a pupil of Dawison, who not only educated him for the stage, but took him into his own home and family. He made his début at Breslau Oct. 18, 1863, as *Ferdinand* in "Egmont," which was not successful.

In 1864 he made his reentry, with Dawison, at the Königliche Schauspielhaus, Berlin, where he remained until 1871. The next year was spent in Schwerin; from 1872 to 1876 he worked with Laube, at the Stadttheater, Vienna, and soon ranked as one of the best actors on the German stage. In 1876 he went to Hamburg, returning three years later to Vienna. His most important work in behalf of the stage was the founding of the Deutsche Theater, at Berlin, with Ludwig Barnay, Adolf l'Arronge, and Friedrich Haase (1883). In 1888 he went on a starring tour through Germany and Austria, retiring from the stage in 1892.

Friedmann's best rôles were those of modern writers, though he was excellent as *Charles IX.* (Lindner's "Die Bluthochzeit"), and in several of Shakespeare's male characters.

FRIEDRICHSFELD, DAVID B. ZEBI HIRSCH: German and Hebrew author; born about 1755 in Berlin; died Feb. 19, 1810, in Amsterdam. In the Prussian capital he absorbed the scholarship and ideas of the contemporaneous Meassefim. In 1781 he went to Amsterdam, where he was one of the leaders in the fight for the emancipation of the Jews, writing in the promotion of this cause his "Beleuchtung . . . das Bürgerrecht der Juden Betreffend," Amsterdam, 1795, and "Appell an die Stände Hollands," etc., *ib.*, 1797. Besides contributing to the "Ha-Meassef," he wrote "Ma'aneh Rak," on the pronunciation of Hebrew among the Sephar-

dim (being also a defense of Moses Leman's "Imrah Ẓerufah)," Amsterdam, 1808; and "Zeker Ẓaddiḳ," a biography of Hartwig Wessely, *ib.* 1809. Some of his works are still in manuscript (comp. Steinschneider, "Verzeichnis der Hebr. Handschriften der Königl. Bibliothek zu Berlin," ii., No. 255, pp. 110 *et seq.*).

S. H. B.

FRIEDRICHSTADT: Town in the government of Courland, Russia, with a population (1897) of 5,223, of whom 3,800 were Jews. With the admission of Jews into Courland toward the close of the seventeenth century a Jewish community was established there, chiefly by settlers from neighboring Lithuanian towns and from White Russia. The latter found Friedrichstadt, owing to the rapids in the River Düna some miles above the town, a convenient halting-place in their voyages down the river, which was the main channel for a considerable trade in lumber, grain, and other merchandise between White Russia and Riga, a city below Friedrichstadt.

The archives of the city of Riga for the eighteenth century show that in the opinion of its burghers the commercial prosperity of their city depended largely on the trade brought there by way of Friedrichstadt through the Jews of White Russia (Buchholz, "Geschichte der Juden in Riga," pp. 29, 44–48). The Jewish community of Friedrichstadt is mentioned in Russian documents of the year 1742, when a ukase dated Dec. 14 ordered the expulsion of the Jews from Russia. When this ukase was enforced the burghers of Riga petitioned the government to grant the Jews permission to reside at least temporarily in their city, saying that unless this permission was granted they would be commercially ruined. As this petition proved ineffective, new conditions arose that gave impetus to the commerce of the Jewish community of Friedrichstadt. Barges and rafts sailing down the Düna laden with cargoes for Riga were detained at Friedrichstadt, and thus the trade of the Riga merchants was so seriously hampered that they feared it might eventually be diverted into other channels; and to obviate this danger they sent a special commissioner to Friedrichstadt for the purpose of obtaining relief (*ib.* p. 47).

In 1771 the Jewish community of Friedrichstadt suffered severely from floods due to a sudden breaking of the ice in the Düna. On this occasion the greater part of the town was swept away. Another flood equally disastrous to them occurred there in 1837 (see "Mittheilungen aus der Geschichte Liv-Est's und Courland's," i. 360). By the beginning of the nineteenth century the town had become an important commercial center. A number of prominent Jewish firms were engaged there in foreign trade as middlemen between German importers and Russian merchants of the interior. The chief articles of commerce were hides, furs, and bristles, which were collected from over all Russia and exported to England, Germany, and the United States. Local industry also received an impetus, and factories for the manufacture of cigars, soap, needles, chocolate, etc., were started; but with the opening of the Riga-Düna-burg Railroad in 1862 the commercial importance of the town began to wane. Nevertheless, its population, which in 1850 aggregated 1,483 inhabitants, steadily increased. A government school was established there in 1858. Among the most prominent Jewish families of this town are the following: Kahn, Birkhahn, Rosenthal, and Heyman.

H. R.

FRIEND, FLORENCE. See Mannering, Mary.

FRIENDSHIP (אהבה, רעות, אחוה, ידידות): Personal attachment to an individual. The historical books of the Bible furnish several instances of genuine friendship; and the pithy sayings of the Wisdom literature, of Talmud, and of Midrash contain a philosophy of friendship. The Bible endows friendship with a peculiar dignity by making it symbolical of the intimacy that exists between God and man. "And Yhwh spoke unto Moses face to face, as a man speaketh unto his friend" (Ex. xxxiii. 11; comp. Num. xii. 8). Also the prophet Isaiah makes God speak of Abraham as his friend (Isa. xli. 8; comp. II Chron. xx. 7).

The essential characteristic of genuine friendship is disinterestedness. The service one renders his friend must be prompted by the sole desire to be of use to him, and not for the sake of furthering one's own interests. Selfishness destroys friendship. This is tersely expressed in Ab. v. 16: "Friendship dictated by a selfish motive comes to an end together with its speculations; but friendship which is not based on any selfish motive comes never to an end."

Friendship of the selfish type is often referred to in Bible and Talmud; *e.g.*, "Every man is a friend to him that giveth gifts" (Prov. xix. 6b; comp. *ib.* xix. 4); "Ye would . . . make merchandise of your friend" (Job vi. 27b); "At the door of the rich all are friends; at the door of the poor there are none" (Shab. 32a); "A friend loveth at all times" (Prov. xvii. 17); "A friend that sticketh closer than a brother" (*ib.* xviii. 24b).

Historical Examples.

As historical examples of friendship have high value in determining the characteristics of the national soul, the following may be cited from Jewish history: The relations between Jonathan and David have become typical of true friendship. Jonathan's friendship for David is put to a severe test. Against his friendship there are arrayed filial duty and the personal interests of a prince; but friendship conquers (I Sam. xviii. 3, xix. 2–7, xxiii. 17–18). David is kind to the unfortunate Mephibosheth, a scion of the house of Saul, whom he befriends on account of Jonathan, his friend (II Sam. ix.). Barzillai's disinterested kindness for David is another instance (II Sam. xix. 31–39).

Because friends, owing to their intimate relation, influence each other, the utmost care should be exercised in the choice of a friend. "Iron sharpeneth iron; so a man sharpeneth the countenance of his friend" (Prov. xvii. 17; comp. *ib.* xxviii. 7); "Make no friendship with a man that is given to anger" (*ib.* xxii. 24a).

The Talmud furnishes many beautiful examples of friendship. An illustration of friendship as an ideal of spiritual fellowship is found in the relation

between rabbis Johanan bar Nappaḥa and Simeon ben Laḳish (Yer. Beẓah v. 63d; Yer. Ta'an. 5a; see, also, Horodezky, "Ha-Goren," p. 22, on רמ"א and מהרש"ל).

The value set on friendship is shown by the following observations:

"It is easy to make an enemy; it is difficult to make a friend" (Yalḳ., Deut. 845); "If thou wouldest get a friend prove him first, and be not hasty to credit him" (Ecclus. [Sirach] vi. 7). "For some man is a friend for his own occasion, and will not abide in the day of thy trouble. And there is a friend who, being turned to enmity and strife, will discover thy reproach. Again, some friend is a companion at the table, and will not continue in the day of thine affliction. But in thy prosperity he will be as thyself. . . . If thou be brought low he will be against thee and will hide himself from thy face" (*ib.* verses 8–12). "A faithful friend is a strong defense: And he that hath found such a one hath found a treasure" (*ib.* verse 14; comp. verses 15–18).

That misplaced confidence gives cause for sorrow may be learned from many Biblical quotations. "Yea, mine own familiar friend, in whom I trusted, which did eat of my bread, hath lifted up his heel against me" (Ps. xli. 9). "All her friends have dealt treacherously with her, they are become her enemies" (Lam. i. 2a). "And one shall say unto him, What are these wounds between thine arms? Then he shall answer, Those with which I was wounded in the house of my friends" (Zech. xiii. 6, R. V.).

Not to forsake one's friend, but to aid and to assist him in every possible way, is the tenor of many sayings. "Thine own friend, and thy father's friend, forsake not" (Prov. xxvii. 10). "Change not a friend for any good, by no means" (Ecclus. [Sirach] vii. 18). "Do good unto thy friend before thou diest, and according to thy ability stretch out thy hand, and give to him" (*ib.* xiv. 13).

The highest office of friendship, the most thorough test of its genuineness, is justly reckoned to be the desire of friends to improve the moral and intellectual conditions of each other by frankness of reproof and counsel. "Thou shalt warn thy neighbor" (Lev. xix. 17a). "Better is open rebuke than love that is hidden. Faithful are the wounds of a friend, but the kisses of an enemy are profuse" (Prov. xxvii. 5–6). "Love him who corrects thee, and hate him who flatters thee" (Ab. R. N. ch. xxix.).

FRIES, JAKOB FRIEDRICH: Christian writer against the Jews; born at Barby, Saxony, Aug. 23, 1773; died at Jena Aug. 10, 1843. In 1801 Fries lectured on philosophy at the University of Jena, and in 1805 was appointed professor of philosophy, and in 1812 of physics, at Heidelberg. Here his anti-Semitic opinions began to color his utterances; and when, in 1816, he returned as professor to Jena, he published, first in the "Heidelberger "Jahrbücher" (1816, pp. 241–264) and afterward in book form, his "Ueber die Gefährdung des Wohlstandes und Charakters der Deutschen Durch die Juden," a review of two pamphlets by Rühs against the Jews. This review, of which Goethe speaks with a certain delight, is very rude in its tone, recommending (p. 23) the princes to deal with the Jews as Pharaoh had done.

D. A. M. F.

FRIESENHAUSEN, DAVID BEN MEÏR: Bavarian mathematician; born at Friesenhausen about the middle of the eighteenth century; lived at Berlin, and later at Hunfalu and Ujhely, Hungary; died at Gyula-Fehérvár March 23, 1828. Till the age of thirty he occupied himself with the study of the Talmud. Then he spent ten years in studying algebra, astronomy, mechanics, and optics, and wrote essays on these sciences. He wrote: "Kelil ha-Ḥeshbon," a Hebrew manual of algebra and geometry, Berlin, 1796; "Mosedot Tebel," a treatise on astronomy, in which he explains the Copernican system. This work, published in Vienna, 1820, contains also a proof for the eleventh axiom of Euclid and a testament to his children. Friesenhausen was the first to advocate the establishment of a rabbinical seminary in Hungary, and for this purpose prepared a plan which he submitted to the prince palatine Josef as early as 1806.

FRIM, JAKOB: Hungarian educator; born in Körmend May 1, 1852. On his return from a prolonged journey abroad, where he had studied the organization of various asylums for the insane, he opened in Rákospalota, near Budapest, a model institution, named "Munka," for the education of feeble-minded children. This institution was later transferred to Ofen, and was taken over by the state in 1898. His brother, **Anton Frim,** is known as the founder of an asylum for the deaf and dumb, which receives pecuniary support from the city of Budapest.

S. M. W.

FRINGES (Hebr. "ẓiẓit"): Threads with a cord of blue entwined, fastened to the four corners of the Arba' Kanfot and the Ṭallit and pendent, like a tassel, in conformity with Num. xv. 38–40 and Deut. xxii. 12.

The ẓiẓit consisted, according to Bet Shammai, of four threads of white wool and four threads of blue, but according to Bet Hillel of two threads of each (Men. 41b). The "arba' kanfot," or "ṭallit ḳaṭon," was worn by day as an undergarment. The regular ṭallit, as an overgarment, was used only during the morning prayer.

A relaxation of the ẓiẓit observance has been noticeable since the Jews adopted the costumes of their Gentile neighbors, exceptions being readily made in the case of modern outer garments (Shulḥan 'Aruk, Oraḥ Ḥayyim, 10, 12). Indeed, it appears from the Tosafot that the wearing of ẓiẓit was not general even in the thirteenth century (see Shab. 32b; B. B. 74a; Ḳid. 61b).

To the wearer the ẓiẓit were a reminder of the duty of the Jew toward the Law. Like the phylacteries on the head and arm, and the mezuzah on the

door-post, the ẓiẓit on the garment was a token of God's love for His people Israel (Men. 43b). In fact, they served as the Jew's uniform, whereby he was recognized and distinguished from the Gentile. Hence a Jew must not sell a fringed garment to a non-Jew unless the fringes are removed.

Resh Laḳish, picturing the future reward of the pious, declares that no less than 2,800 servants will attend every Jew who has observed the ẓiẓit regulation, quoting Zech. viii. 23: "In those days . . . ten men . . . out of all languages of the nations, even shall take hold of the skirt [Hebr. "a corner"] of him that is a Jew, saying, We will go with you." By calculating seventy standard languages, and multiplying the four corners by ten, the number 2,800 is obtained (Shab. 32b). It is narrated that the ẓiẓit once saved a ḥasid from sensuality, having appeared as living witnesses and "slapped him in the face" as a reproach (Men. 44a).

Blue and White.

The blue cord entwined in the fringe was its principal attraction and distinction. R. Meïr asked, "Why blue?" The answer was, "Because this color resembles the sea, the sea resembles the sky, and the sky resembles the "Chair of Glory," of which it is said, "Under His feet . . . a sapphire stone" (Men. 43b).

The Ḥalzun.

The blue cord of the ẓiẓit was dyed with the blood of the "ḥalzun" (snail), which appeared but once in seventy years (Men. 44a). The ḥalzun was scarce even in Mishnaic times; hence the authorities agreed that the blue cord might be dispensed with, and that white-wool threads alone need be inserted (Men. iv. 1). R. Meïr remarks that the punishment for dispensing with the white threads is greater than for dispensing with the blue, inasmuch as the latter is difficult to obtain, whereas the former is within everybody's reach. He uses the illustration of a king commanding one of his servants to procure a seal of clay, and another to procure a seal of gold; both having failed to comply, the king punishes the former more severely for neglecting such a simple and easy task (*ib.* 43b).

Some suppose that "ḥalzun" was another name for Haifa or the Bay of Acre. Haifa was known, in the Greek-Roman periods, as "Purpureon," from the purple-dye industry, which, with the extensive fishing of the ḥalzun, made the city famous. The area for ḥalzun-fishing, according to the Talmud, extended to the Phenician border (Shab. 26a; see Rashi). It was also found on the mountains, as appears from Sanh. 91a. Doubtless there were various species of ḥalzun; some identify the *Helix jointhina* as one. It appears certain, however, that the genuine ḥalzun was found only in the land apportioned to the tribe of Zebulun, whose descendants were mostly engaged in this traffic (Meg. 6a; comp. Sifre, § 354 [ed. Friedmann, p. 147a]).

The Zohar is authority for the statement that the ḥalzun was found also in the Sea of Galilee (Zohar, Ex. Beshallaḥ, p. 48b; Lev. Beha'aloteḳa, p. 150a, ed. Wilna, 1882). The city of Luz is mentioned as the place where the tekelet was dyed (Soṭah 46b). Maimonides explains that the blood of the ḥalzun is red, and was chemically prepared to produce the tekelet-color ("Yad," Ẓiẓit, ii. 2). As the traditional color of tekelet is sky-blue, the ordinary purple ḥalzun of Haifa was probably not the genuine tekelet ḥalzun, although its dye may have been chemically changed to sky-blue. Perhaps there was also a rare blue species, such as is mentioned in the Talmud.

R. Gershon Enoch, in his "Sefunc Ṭemune Ḥol" and "Petil Tekelet," recently published, attracted considerable notice by advocating the restoration of the blue cord in the ẓiẓit; he declared that the ḥalzun dye is obtainable in Italy, which place, he says, is referred to in Ezek. xxvii. 7 as the "isles of Elishah" (see Targ. Jonathan). He even secured there a specimen of the blue-blooded "fish-snail," and had some wool dyed, which he sold to the Ḥasidim at an exorbitant price, for use in their fringes. Mordecai Rabinovitz, in "Oẓar ha-Sifrut" (vol. iii.), criticized Gershon Enoch's innovation, and disputed his claim that he had found the ḥalzun, principally because the dyed material did not retain its color, and because the ḥalzun proper is found only in Palestine.

J. D. E.

FRISCHMAN, DAVID BEN SAUL: Russian Hebraist; born in Lodz 1863; now (1903) residing in Warsaw. Frischman began very early to write both poetry and prose in Hebrew periodicals, and his style and the originality of his views soon attracted attention. He was assistant editor of "Ha-Yom," in St. Petersburg (1886–87), and afterward editor of the weekly "Ha-Dor."

Frischman has contributed a large number of poems, short stories, and articles to the Hebrew periodicals during the last twenty years. His earlier writings are to be found in "Ha-Boḳer Or," "Ha-Shaḥar," "Ha-Asif," etc. His works include: the short story "Be-Yom ha-Kippurim," Warsaw, 1881; his successful translation of Aaron Bernstein's "Aus dem Reiche der Natur," under the title "Yedi'ot ha-Ṭeba'" (The Perceptions of Nature) (1882–85); "Tohu wo-Bohu," a scathing criticism of Hebrew journalistic methods, especially directed against "Ha-Meliẓ," with an appendix, "'Al ha-Nes," in which I. L. Lewin's translation of Disraeli's "Tancred" is severely criticized (*ib.* 1883); "Miktabim 'al Debar ha-Sifrut" (Notes on the History of Literature), a criticism against contemporary Hebrew literature (Warsaw, 1895). He also translated Julius Lippert's "Kulturgeschichte," under the title "Toledot Hashlamat ha-Adam," in three parts (*ib.* 1894–1901). A collection of his scattered articles and feuilletons is at present (1903) being published in Warsaw under the title "Ketabim Nibḥarim."

Frischman has also written considerably for Yiddish periodicals. The poem "Ophir" in the "Yiddische Volksbibliothek" deserves to be mentioned. He has done much to introduce Western methods into Neo-Hebrew literature.

H. R. P. Wi.

FRIZZI, BENEDETTO (BENZION RAPHAEL KOHEN): Italian physician and writer; born at Ostiano, Mantua, in 1756; died there May 30, 1844. In his youth he was instructed by Jesuits at Mantua, where he was the first Jew to attend a public school; there he showed a special predilection for mathematics. Later he took the degree of M.D. at Pavia. He was especially noticed by Emperor Joseph II. on the latter's visit to the University of Pavia. In 1789 he settled as a physician in Triest, and in 1831 returned to his native city.

Frizzi's works include: "Dissertazione di Polizia Medica sui Riti e Cerimonie del Pentateuco," a large work in six volumes on the Mosaic law: the first and second volumes dealing with forbidden food; the third with marital laws; the fourth with laws on pregnancy, birth, and education; the fifth with diseases, mourning, and burial; and the sixth with streets and houses (Pavia, 1787–90); "Sulla Lebbra degli Ebrei," Triest, 1795; "Difesa contro gli Attacchi Fatti alla Nazione Ebrea nel Libro Intit. 'Della Influenza del Ghetto nello Stato,'" appearing anonymously in answer to an anonymous book attacking the Jews, Pavia, 1784. This polemic led Frizzi to further studies of Jewish life and law, resulting in the following works: "Dissertazione in cui si Esaminano gli Usi ed Abusi degli Ebrei nei Luoghi ed Effetti Sacri," Milan, 1809; "Dissertazione sulle Leggi Mosaiche Relative al Publico Diritto," Venice, 1811. He finally devoted himself to the Talmud, writing Hebrew notes thereto to show the extent and importance of its information, covering all branches of knowledge, and the correctness of its views. This work appeared under the title "Petaḥ 'Enayim" (1st ed., Leghorn, 1815; complete in 8 parts, *ib.* 1878–1880). Frizzi was also the author of a number of important works on medicine, mathematics, and music.

FROG (צְפַרְדֵּעַ): The Hebrew term generally occurs in the plural; twice only in the singular as collective, once with (Ex. viii. 2) and once without (Ps. lxxviii. 45) the article. Frogs are mentioned in the Bible only in connection with the plagues of Egypt (Ex. vii. 27–viii. 9; Ps. lxxviii. 45, cv. 30). The common frog of Egypt is the edible frog (*Rana esculenta*), essentially a water-frog. It abounds in all the streams of that land, and is quite common in Palestine also. It is probably the species which the author of the narrative of the plagues had in view. There is also in Palestine and in Egypt a small species of tree-frog (*Hyla arborea*), only one and a half inches long. Like the common frog of Egypt, it is edible, and its color is green, a feature common to all edible batrachians. As coming under the category of "sheres" (Lev. xi. 10), the frog must have been held by the Hebrews as unclean for food (see ANIMALS; DIETARY LAWS). According to the Talmud, contact with frogs does not defile (Ṭoh. v. 1). On the singular with article ("ha-ẓefardea'," Ex. viii. 2) see Sanh. 67b.

E. G. H. H. H.

FROHBERG, REGINA: German writer; born at Berlin Oct. 4, 1783; date of death not known. She was the daughter of a very wealthy merchant by the name of "Salomo" (Kayserling gives it as "Saaling"). When only eighteen years of age (1801) she married a certain Friedländer, but the marriage proved unhappy, and she soon procured a divorce. She then became a Christian, and took the name "Frohberg." She lived for a short time after this in Berlin, and moved in 1813 to Vienna, where she resided until her death.

She has published: "Louise, oder Kindlicher Gehorsam und Liebe im Streit," Berlin, 1808; "Schmerz der Liebe," Berlin, 1811, 2d ed. Vienna, 1815; "Erzählungen," Dresden, 1811, new ed. Vienna, 1817; "Das Opfer," Amsterdam and Leipsic, 1812, 2d ed. Vienna, 1815; "Das Gelübde," Vienna, 1816; "Stolz und Liebe," Brünn, 1820; "Der Liebe Kämpfe," Leipsic, 1826; "Eigene und Fremde Schuld," *ib.* 1837; "Vergangenheit und Zukunft," Gera, 1840; "Gedankenfrüchte auf dem Pfade des Lebens," Vienna, 1842, 2d ed. 1845.

Frohberg's adaptation of French dramas appeared under the collective title of "Theater," Wiesbaden, 1817 and 1818.

BIBLIOGRAPHY: *Jüdischer Plutarch*, 1848; *Jüdisches Athenäum*, 1851; Wurzbach, *Biog. Lex.* iv. 379–380 (giving an exact list of her works and a complete bibliography); Kürschner, in *Allg. Deutsche Biographie*, s.v., Leipsic, 1878; Kayserling, *Die Jüdischen Frauen in der Geschichte, Literatur und Kunst*, pp. 232–234, Leipsic, 1879.

S. F. T. H.

FROHMAN, CHARLES: American theatrical manager; born at Sandusky, Ohio, about 1858. He began his theatrical career as advance agent for Haverley's Mastodon Minstrels. Afterward he held a similar position with Collender's Georgia Minstrels, with whom he went to the Pacific coast. Here disaster overtook them, and Frohman had to travel East as best he could. Arriving in New York city, he obtained the road rights to plays produced at Wallack's (afterward the Star) Theater, but was not particularly successful until 1895, when he conceived the idea of a theatrical trust to control playhouses throughout the country. Interested with him were Nixon and Zimmerman, who owned two theaters in Philadelphia and several in other towns in Pennsylvania and Ohio; Klaw and Erlanger, who controlled a chain of theaters from Washington, D. C., to New Orleans; and Alfred Hayman, a capitalist who controlled playhouses throughout the West.

The syndicate began with thirty-seven theaters, and at once forced its weaker rivals to the wall. Frohman obtained a monopoly of the English, German, and French dramatic output to such an extent that producers formerly independent were forced to play into his hands. His partners, controlling all the first-class houses, refused to book any attraction which was not directly or indirectly managed by the syndicate.

In 1898, however, Nat Goodwin revolted, and organized an opposition to Frohman, in which he was joined by Francis Wilson, Richard Mansfield, James A. Herne, James O'Neill, and Mrs. Fiske. Augustin Daly and Joseph Jefferson were hearty supporters of this movement; and Frohman's supremacy was temporarily endangered. Frohman, however,

maneuvered until Goodwin seceded from the opposition. He was followed at intervals by all save Mrs. Fiske and Daly. The death of the latter left Mrs. Fiske to battle alone with Frohman, who was so absolutely in control of the situation that she was not able to play in New York city during 1900–01.

Frohman owns or leases five theaters in New York city, and three in London.

FROHMAN, DANIEL: American theatrical manager; brother of Charles FROHMAN; born at Sandusky, Ohio, 1853. He went to New York city in 1866, and became office-boy of the "New York Tribune." He worked his way upward for five years, when he abandoned journalism for theatrical work. After considerable experience as a road-manager, Frohman became manager of the Madison Square Theater, New York, then owned by the Mallorys. Here he remained (1879–85) until he leased the Lyceum. His stock company at this house, headed by Georgia Cayvan and Herbert Kelcey, became renowned for its clever work, notably in "The Wife," "The Charity Ball," and "Squire Kate."

Shortly after the death of Augustin Daly, Frohman became manager of Daly's Theater. He is also manager for several American and English stars.

FROSOLONI, ISAAC ḤAYYIM: Italian poet of the eighteenth century; born at Sienna; died at Leghorn 1794. On the completion of his Hebrew and secular studies at Sienna he went to Leghorn, where he became a member of the yeshibah. He formed an intimate friendship with the family of the wealthy merchant Eliezer Shealtiel Recanati, and continued his Talmudic studies in the school founded by the latter. His poems are included in Piperno's "Ḳol 'Ugab."

G. I. E.

FRUG, SEMION GRIGORYEVICH: Russian writer and poet; born 1860 in the Jewish agricultural colony of Bobrovy-Kut, government of Kherson. In 1880 there appeared in the "Razsvyet" his first poem, which attracted the attention of the reading public. In 1881 he removed to St. Petersburg, and published poems in the "Voskhod," "Russki Yevrei," "Yevreiskoe Obozryenie," and other periodicals. He used the pseudonyms "Ben-Zvi," "Bobrovokutski," "S. F.," "G. S.," "Sluchainy Felyetonist," "F.," "S.," and very rarely wrote under his full name. His first volume of poetry, "Stikhotvoreniya," appeared in 1885; the second, entitled "Dumy i Poesii," in 1887; second and third editions of the first volume in 1890 and 1897 respectively. Most of Frug's critics attribute to his work a high lyric quality. Leon Gordon dedicated to Frug a poem in which he calls himself a "dead leaf" and Frug a "living leaf" ("Ha-Asif," 1884).

Semion Frug.

In 1886 Frug's Yiddish poems, which had been published singly in Spektor's "Hausfreund," Rabbinovitch's "Volks-Bibliothek," the "Volks-Blatt," and other periodicals, were collected and published under the title "Lieder und Gedanken." In 1898 there were printed in St. Petersburg sketches of people he had met, entitled "Vstrechi i Vpechatleniya" and "Eskizy i Skazki." Somewhat later his fable "Palma" appeared. In 1897 a three-volume collection of his poems was published in St. Petersburg (Hebrew translation by Jacob Kaplan, Warsaw, 1898). In 1902 his "Zionidy," Zionistic songs, were printed in St. Petersburg. Frug is one of the most sympathetic of the Russo-Jewish poets. He is essentially a lyricist. His epic poems are not marked by distinct originality.

Frug lives (1903) in St. Petersburg, where he is associated with the weekly paper "Budushchnost," in which most of his poems now appear.

FRUMKIN, ISRAEL DOB (BÄR): Hebrew author; born in Dubrovna, Russia, Oct. 29, 1850. His father, Alexander Frumkin, when sixty years old emigrated to Jerusalem (1860). In 1869 Frumkin edited the Hebrew semi-monthly newspaper "Ḥabaẓẓelet," which had been founded in Jerusalem by his father-in-law, Israel Back, a printer, a few years before, and a few years later he edited a Judæo-German weekly called "Die Rose." The latter, owing to lack of support, was soon discontinued. "Ḥabaẓẓelet" was changed to a weekly with a literary supplement; it is still being issued. Its publication was spasmodically interrupted through the intrigues and machinations of the zealots of Jerusalem, whom Frumkin constantly denounced for the lack of reform in the "ḥalukḳah" system. Recently, however, he became reconciled to the management.

In 1883, for reflecting upon Gen. Lew Wallace, the American minister to Turkey, in an editorial in "Ḥabaẓẓelet" (xiii. No. 6), headed "An American and yet a Despot," "Ḥabaẓẓelet" was suspended, and Frumkin was imprisoned for forty-five days, by order from Constantinople directed to the pasha of Jerusalem. The incident which caused the editorial was the dismissal of Joseph Kriger, the Jewish secretary and interpreter to the pasha of Jerusalem, at the request of Wallace, who complained that Kriger

had failed to receive him with the honor due to his rank, and who refused to accept any apology for the alleged shortcoming. Frumkin claimed that the proceeding was instigated by the missionaries, whom Wallace strongly supported. After his release Frumkin organized the society 'Ezrat Niddahim in honor of Sir Moses and Lady Judith Montefiore and to counteract the influence of the missionaries.

Frumkin is the author of several books, mostly translations of no special value. His grandfather was AARON HA-LEVI BEN MOSES OF STAROSELYE. His brother **Michael Levi,** who assumed the name **Rodkinson,** has published translations of portions of the Talmud in New York. His son **Abraham Frumkin** is a contributor to the daily "Yiddische Welt," of New York.

FUBINI, SIMONE: Italian physiologist; born May 26, 1841, in Casale Monferrato, Piedmont; died Sept. 6, 1898, at Turin. After finishing his course at the college he entered the University of Turin as student of medicine, receiving his doctorate in 1862, and going in the same year to Paris to take a post-graduate course, where he became assistant to Hiffelsheim in his electrotherapeutic clinic. Returning to Turin, he assisted Moleschott in the physiological department of the university. In 1881 he was appointed professor of physiology at the University of Palermo, and in 1888 professor of materia medica and pharmacology at Pisa, which position he held until his death.

Fubini was one of the leading physiologists of Italy. After the death of Moleschott in 1893 he became editor of the "Untersuchungen zur Naturlehre des Menschen und der Thiere," and in 1897 of the "Trattato di Farmacoterapia." He was a diligent contributor to Moleschott's above-mentioned "Untersuchungen" and other medical journals. Among his many essays and works may be mentioned: (with Moleschott) "Sulla Condrina," in "Giornale della R. Accademia di Medicina di Torino," 1872, ii. 274 *et seq.*; "Sulla Presenza di Sostanza Condrogena nella Cornea di Varie Specie di Animali," Turin, 1874; "Influenza degli Occhi Sopra Alcuni Fenomeni della Vita," *ib.* 1875; (with Mosso) "Gemelli Xifoide Juncti," in "Giornale della R. Accademia di Medicina di Torino," Turin, iii. 1878, xxiii. 13; "Peso del Sistema Nervoso Centrale Paragonato al Peso del Corpo dell' Animale," *ib.* 1879; "Influenza di Alcuni Alcaloidi dell' Oppio sul Chimismo della Respirazione," *ib.* 1880; "Uno Sguardo Alle Principali Questioni di Metalloterapia," *ib.* 1881; "Ueber die Inhalationen von Defibrinirtem Blute," in "Centralblatt für die Medizinischen Wissenschaften," 1885; "Sur la Fonction des Corpuscules de Vater-Pacini du Chat," in "Archives Italiens de Biologie," 1888, ix. 44; (with P. Pierini) "Absorption Cutanée," xix. 357, *ib.* 1893; "Influenza dell' Eccitamento Elettrico sul Trofismo Nervoso," 1894; (with P. Pierini) "Della Cataforesi Elettrica," in "Archives d'Electricité Médicale," 1897.

FUCHS, ISIDOR: Austrian journalist; born in Leipnik, near Biala, Galicia, Sept. 25, 1849. He has been active most of his life in journalism as a feuilletonist and dramatic editor, beginning on "Die Bombe" (in which his translations from the Italian were especially noticed), and joining in turn the staffs of "Das Illustrirte Wiener Extrablatt" (during his engagement on which he was also coeditor of "Der Junge Kikeriki"), "Die Vorstadt Zeitung," and "Das Wiener Tagblatt." For some time he was a regular contributor to the "Montags Revue." He has published for the stage (with Bauer and Zell): "Die Wienerstadt in Wort und Bild"; "Der Bleiche Zauberer" (music by Ziehrer); "Auf der Zweiten Galerie des Fürst-Theaters"; "Die Kopirschule" (2d ed., Vienna, 1890); "Lieder und Romanzen" (Vienna and Leipsic, from Mascagni); and many humorous and sarcastic topical verses.

FUEL: Mineral coal was unknown to the ancient Hebrews, who used instead wood, manure, and grass for fuel. Wood was never abundant in Palestine, though there was not such a dearth in ancient times as exists at the present day. Various tree-like kinds of shrubs were also much used for fuel; for in ancient times, as to-day, the trees (holm-oak, oak, larch; comp. Isa. xliv. 14) were not allowed to attain to full growth, but were cut down when quite young, the foliage being given to the goats, and the wood being cut into sticks or made into charcoal. In Ps. cxx. 4 are mentioned coals of "rotem," a desert plant, probably the broom; they give great heat, and are still much in demand (comp. Robinson, "Researches," i. 226, iii. 683). This shrubbery ("ḥoresh"), which grew especially in waste places, as well as the low growth of the forests, was generally on unclaimed land, every one being free to take what he needed. Notwithstanding the comparative scarcity of wood, therefore, fuel, like water, could generally be obtained free (comp. the complaint in Lam. v. 4 that the foreign masters demanded payment for wood and water). The poor could easily procure their modest supply of fuel; the widow of Zarephath gathered her few sticks outside of the gates of the city (I Kings xvii. 11). This daily gathering of fuel was evidently a general custom; it was forbidden by law on the Sabbath (Num. xv. 32 *et seq.*; see FIRE).

Charcoal was always much in demand for baking, for cooking, for heating houses by means of braziers, and for artisans' fires (see COAL).

As undergrowth or other fuel was not easily obtainable in some localities, and charcoal was an expensive fuel, especially if brought from a distance, substitutes were employed, as smaller plants, grasses, and weeds growing in the fields, and the brown dry grass of the desert, which wither quickly, producing a hot if not a lasting fire; and these were evidently frequently used (comp. Matt. vi. 30). Another substitute—used even to-day—was dung, especially that of the camel, which, when dried, burns like charcoal. Cow-dung, which quickly dries and is odorless, is still carefully gathered from the village streets. At the present day the fresh

dung is generally mixed with chopped straw ("tibn") raked up from the thrashing-floor, formed into flat cakes, and dried. One can often see such cakes on the walls of houses. Passages such as Ezek. iv. 12 *et seq.* and Matt. iii. 12 indicate that the Hebrews also used this kind of fuel.

E. G. H. I. Be.

FUENN, BENJAMIN: Russian physician; son of Samuel Fuenn; born at Wilna in 1848; died there Aug. 12, 1901. Educated at the rabbinical seminary of his native city, Fuenn taught for two years, and then studied medicine, being graduated as M.D. from the University of St. Petersburg. He settled at Wilna, and devoted his professional skill to the healing of the poor.

Fuenn was very active in interesting the Jews in agriculture, and for three years was a trustee of a society for the assistance of the Jewish colonists in Palestine and Syria. In 1898 he was one of the three elders elected to administer the affairs of the Jewish community of Wilna. He left the greater part of his fortune to charitable institutions and for the furtherance of Jewish colonization in Palestine.

Among Fuenn's numerous papers in scientific journals the most noteworthy is that on the Jewish laws concerning the slaughtering of animals considered from a medical standpoint, contributed to the periodical "Keneset Yisrael" (i. 910 *et seq.*).

Bibliography: *Ha-Asif*, 1900-01, p. 387.

H. R. I. Br.

FUENN, SAMUEL JOSEPH: Russian scholar; born at Wilna Sept., 1819; died there Jan. 11, 1891. He received the usual Talmudic education, and also acquired an extensive general knowledge of the profane sciences. In 1848 the government appointed him professor of Hebrew and Jewish history in the newly founded rabbinical school of Wilna. Fuenn filled this position with great distinction till 1856, when he resigned. The government then appointed him superintendent of the Jewish public schools in the district of Wilna, in which he introduced instruction in the secular sciences and modern languages. Fuenn also took an active part in the administration of the city and in its charitable institutions, and was for many years an alderman. In acknowledgment of his services the government awarded him two medals.

Samuel Joseph Fuenn.

Fuenn was a prolific writer, devoting his activity mainly to the fields of history and literature. He published the following works: "Imre Shefer," two lectures (one delivered by the author; the other translated from the German), Wilna, 1841; (with L. Hurwitz) "Pirḥe Ẓafon," a review of history, literature, and exegesis, 2 vols., *ib.* 1841–44; "Shenot Dor we-Dor," a chronology of Biblical history, Königsberg, 1847; "Nidḥe Yisrael," a history of the Jews and Jewish literature from the destruction of the Temple to 1170, Wilna, 1850; "Ḳiryah Ne'emanah," a history of the Jews of Wilna, *ib.* 1860; "Dibre ha-Yamim li-Bene Yisrael," a history of the Jews and their literature, in two volumes (the first dealing with the period extending from the banishment of Jehoiachin to the death of Alexander the Great; the second from Alexander's death to the installation of Simon Maccabeus as high priest and prince), *ib.* 1871–77; "Sofre Yisrael," selected letters of Hebrew stylists from Ḥasdai ibn Shaprut (915–970) to modern times, *ib.* 1871; "Bustanai," a narrative of the time of the Geonim, translated from the German, *ib.* 1872; "Ma'amar 'al ha-Hashgaḥah," a Hebrew translation of Moses Mendelssohn's "Die Sache Gottes," *ib.* 1872; "Ha-Ḥilluf," a Hebrew adaptation of Lehmann's "Graf und Jude," *ib.* 1873; "Ḥukḳe 'Abodat ha-Ẓaba," Russian laws relating to the conscription, *ib.* 1874; "Ya'aḳob Tirado," a Hebrew translation of a German novel by Philippson, *ib.* 1874; "Ha-Tefillin," a Hungarian village tale translated from the German into Hebrew, *ib.* 1874; "Le-Toledot R. Sa'adyah Gaon," materials for the biography of Saadia, published in "Ha-Karmel" (vol. ii., 1871); "Ḥakme Yisrael bi-Krim we-Gedole Yisrael be-Ṭurḳiya," biographies of Jewish scholars in the Crimea and in Turkey in the fourteenth and fifteenth centuries, published in "Ha-Karmel" (1861); "Safah le-Ne'emanim," an essay on the value and significance of the Hebrew language and literature in the development of culture among the Russian Jews, Wilna, 1881; "Ha-Yerushshah," Hebrew adaptation of Honigmann's "Die Erbschaft," *ib.* 1884; "Ha-Oẓar," a Hebrew and Chaldaic dictionary giving Russian and German equivalents for the words of the Bible, Mishnah, and Midrashim, vol. i. (from א to ו), Warsaw, 1884; "Keneset Yisrael," biographical lexicon of Jewish scholars and other prominent men arranged in alphabetical order, vol. i. (from א to י), *ib.* 1886–90.

His Works.

For twenty-one years (1860–81) Fuenn directed the paper "Ha-Karmel" (at first a weekly, but since 1871 a monthly), devoted to Hebrew literature and Jewish life, with supplements in Russian and German. The paper contained many scientific articles by the leading Jewish scholars of Europe, besides numerous contributions from Fuenn's own pen.

FUGITIVE. See Asylum; Outlaw; Slaves and Slavery.

FULD, AARON B. MOSES: German Talmudist; born at Frankfort-on-the-Main Dec. 2, 1790; died there Dec. 2, 1847. Being both a man of means and very retiring, he refused to accept the office of rabbi, and referred to the local rabbi any halakic questions submitted to him. He took, however, a very active part in the religious movements of his time. All that appeared in German in behalf of Orthodoxy under the name of Rabbi Solomon Trier was written by Fuld, the former, owing to his great

age and want of secular education, being unable to cope with the Reform movement. Fuld was no doubt the proposer as well as the author of the letter of thanks to Zacharias Frankel for leaving the rabbinical convention of Frankfort with a protest. As a result, when Frankel planned a convention of conservative rabbis at Dresden, he asked for Fuld's participation. In spite of the many points which Frankel had in common with the old Orthodoxy of Germany, it did not escape Fuld that he had as many differences; therefore, as the representative of the old school, he declined the invitation. Nevertheless, Fuld understood his time, as may be seen from his highly interesting letter to Akiba Eger in regard to the compulsory education of Jewish children ("Bet Aharon," pp. v.–vi.). In this letter he proposed that Eger should prepare for the Jewish schools a curriculum which would include both Hebrew and secular subjects.

Fuld was a thorough Talmudist, not wanting in the gift of criticism; he was a sincere adherent of conservative Judaism, but free from fanaticism. He also had a keen appreciation of historical and linguistic questions. The municipal library of Frankfort possesses many of his manuscripts. He wrote notes on Azulai's "Shem ha-Gedolim," Frankfort, 1844–47, and published "Bet Aharon," *ib.* 1820, containing annotations to the Talmud, the 'Aruk, and Elijah Levita's "Tishbi" and "Meturgeman."

BIBLIOGRAPHY: M. Horwitz, *Toledot Aharon*. The introduction to Fuld's *Bet Aharon* contains biographical data.

FULD, LUDWIG: German lawyer and juridical author; born at Mayence Dec. 23, 1859. He received his education at the gymnasium of his native town and at the universities of Heidelberg, Berlin, and Giessen (LL.D., 1881). He was admitted to the bar in 1884, and engaged in the practise of his profession at Mayence in the same year.

Of his numerous juridical works may be mentioned: "Einfluss der Lebensmittelpreise auf die Bewegung der Strafbaren Handlungen," 1881; "Entwicklung der Moralstatistik," 1884; "Das Jüdische Verbrechertum," 1885; "Die Sozial-Reform im Deutschen Reich," 1887; "Die Aufhebung des Socialistengesetzes," 1889; "Die Regelung des Militärischen Strafverfahrens," 1892; "Das Recht der Handlungsgehilfen," 1897; "Das Miethrecht," 1898; "Pachtvertrag," 1900.

S. F. T. H.

FULDA: District town, on the right shore of the River Fulda in the Prussian province Hessen-Cassel. The Jews settled at Fulda at an early period; a community existed there in the twelfth century. The district is chiefly known on account of the series of massacres which it underwent during the thirteenth and fourteenth centuries. The first took place on Dec. 28, 1238, when the Crusaders, assembled at that time in Fulda, joined by the inhabitants of the town, attacked the Jews and killed 34 men, women, and children. The immediate cause of the massacre was a blood accusation; five boys of a miller having been killed on Christmas-Day, the Jews were charged with the crime. Had not some broad-minded citizens and the magistrate of the town interfered on behalf of the Jews, not one Jew would have remained in Fulda. The Jews complained of the massacre to Emperor Frederick IV., and the latter, compelled to defend the Jews who were considered his "Kammerknechte," held Abbot Conrad de Mulcoz responsible for it. But the abbot, wishing to exculpate the murderers, sent the bodies of the miller's boys to Hagenau for the purpose of convincing the emperor of the culpability of the Jews of Fulda. Among the martyrs there were several prominent men, some being refugees from France. The names of the victims are given by Isaac b. Nathan in his seliḥah beginning "Attah behartanu," and by Pesaḥ ha-Kohen in the first of the three seliḥot which he composed in commemoration of his friends and relatives. In 1309, the plague having ravaged Fulda, the inhabitants of the town, impelled by fanaticism, ascribed its origin to the Jews and killed 600 of them (Trithemius, "Chronicon Hirsaugensis," fol. 566). A third massacre occurred in 1349, at the time of the Black Death. Once again, in the seventeenth century, a Jewish community flourished in Fulda. In 1671 the Jews were expelled from the district, but they were readmitted soon afterward. Fulda was the home of several Talmudists, Meïr b. Baruch ha-Levi, who introduced rabbinical ordination into Germany (1379), being a native of the district. Among its rabbis were: Meïr Schiff, a Talmudic commentator (1622–41); Jacob b. Mordecai Fulda, one of the exiles of 1671; Elijah b. Judah Löb Fuld, author of a commentary on the Mishnah (close of the seventeenth century), and Elijah Loans. Since 1878 Michael Cohn has occupied the office.

The number of the Jews in Fulda in 1890 was 525 in a total population of 13,125; in 1903, 650. A Jewish school was established in 1900.

FULDA, LUDWIG: German author; born at Frankfort-on-the-Main July 15, 1862. He studied German philology and philosophy at the universities of Berlin, Leipsic, and Heidelberg (Ph.D. 1883). After a short stay in Frankfort, he went in 1884 to Munich, where he became acquainted with Paul Heyse, who exercised a strong influence over his writings. Since 1888 Fulda has lived in Berlin.

Ludwig Fulda.

Among Fulda's writings may be mentioned: "Christian Weise," 1883 (doctoral thesis); "Satura: Grillen und Schwänke," 1884; "Neue Jugend," 1887;

"Lebensfragmente," 1892, 2d ed. 1896; "Lästige Schönheit," 1897; "Neue Gedichte," 1900; the comedies: "Die Aufrichtigen," 1883; "Das Recht der Frau," 1884; "Unter Vier Augen," 1886; "Frühling im Winter," 1887; "Die Wilde Jagd," 1888; "Wunderkind," 1892; "Die Kameraden," 1892 (2d ed.); "Robinson's Eiland," 1895 (2d ed.); "Jugendfreunde," 1897 (2d ed.); "Ein Ehrenhandel," 1898; "Die Zwillingsschwester," 1901; the social dramas: "Das Verlorene Paradies," 1890, 2d ed. 1898; "Die Sklavin," 1892, 2d ed. 1893; "Die Zeche," 1898; the tragedy, "Herostrat," 1898, 4th ed. 1899; and the dramatic fables: "Der Talisman" (which has gained well-deserved fame), 1893, 16th ed. 1900; "Der Sohn des Kalifen," 3d ed. 1896; and "Schlaraffenland," 3d ed. 1899.

Fulda's translations are well known; they include Molière's "Meisterwerke," 1892; Beaumarchais's "Figaro," 1894; Cavallotti's "Das Hohe Lied," 1895; and Rostand's "Cyrano von Bergerac," 1898, 12th ed. 1900.

FULLANA, NICOLAS DE OLIVER Y: Chartographer; born on the island of Majorca; lived there as "Capitan" or "Cavallero Mallorquin" as late as 1650. On Oct. 1 of that year he wrote a Latin epigram of eight lines to Vicente Mut's "Historia del Reyno de Mallorca." Fullana went to Brussels, where he entered the Dutch army as colonel, subsequently fighting against France. At Amsterdam he openly espoused Judaism, taking the name of "Daniel Judah." After the death of his wife, Johanna, he married Isabella Correa. According to the testimony of Thomas de Pinedo, "litteris et astrologia eruditus," Fullana was cosmographer to His Catholic Majesty in 1680 and had written excellent cosmographical works. He edited Blaew's "Atlas del Mundo," to which he also contributed. Fullana eulogized the "Coro de las Musas" of his friend D. L. de Barrios in a poem, and a drama of Joseph Penso in a Portuguese and Latin poem.

G. M. K.

FULLER: A cloth-finisher or -cleaner. The Hebrew term is מכבס (Mal. iii. 2) or כבס (II Kings xviii. 17; Isa. vii. 3, xxxvi. 3), denoting one engaged in either of two occupations: (1) the cleaning of soiled garments or cloth, and (2) the finishing of newly woven cloth.

1. The cleansing of cloth or garments may have developed into a distinct trade at an early time, as the operation involved too much work and consumed too much time (for colored materials one day; for white garments three days) to be done at home. The soiled garments were soaked in water to which various soapy, corrosive substances (such as alkaline salts) were added. Then they were stamped with the feet or beaten with wooden billets. This work is referred to in Mal. iii. 2 and Mark ix. 3, where the term might be rendered "washer."

2. In order to remove the fatty particles adhering to newly woven cloth, and especially the matted wool entangled therein, and to give the fabric firmness and proper texture, it was steeped in hot water and then stamped and worked over with the fulling-billet. The cloth had to be scraped repeatedly during the process, and the wool evenly trimmed off.

Fuller's Field: On account of the offensive smells attending the business, the fullers' shops were located outside of the city in the vicinity of large ponds or springs, where the water-supply was abundant, the cisterns within the city being reserved for domestic use. The "fuller's field" of Jerusalem (Isa. vii. 3, xxxvi. 2 = II Kings xviii. 17: שדה כובס) is described as near the "upper pool." The site is a moot point. In any case it was, like the pool itself, near the wall (Isa. xxxvi. 2; comp. *ib.* v. 11). Here Sennacherib's ambassadors stopped on their way from Lachish (*ib.*). Hence a spot west of the city, in the Birkat Mamilla, corresponding perhaps to Josephus' "snake pool," has been assumed for the location of the pool and the field. But this is too far from the wall. Stade ("Geschichte des Volkes Israel," i. 592) places the pool to the southeast of the city; but this conflicts with Isa. vii. 3, which points to a site to the north or northwest of Jerusalem. Josephus ("B. J." v. 4, § 2) mentions a "fuller's monument" near the northeast corner of the third wall. Compare JERUSALEM.

FÜLLHORN, DAS. See PERIODICALS.

FULVIA: A Roman lady of high station, converted to Judaism through the teachings of a Jew who had sought refuge in Rome to escape punishment. This impostor, together with three others, persuaded her to contribute purple and gold for the Temple at Jerusalem, which contributions they kept for themselves. The discovery of this fraud by the emperor Tiberius through his friend Saturninus, Fulvia's husband, caused the banishment of the Jews from Rome (19 C.E.; Josephus, "Ant." xviii. 3, § 5; comp. Philo, "In Flaccum," § 1; *idem*, "Legatio ad Caium," § 24; Tacitus, "Annales," ii. 85; Suetonius, "Tiberius," § 36).

FUNDÃO: Chief town in the district of the same name, province of Beira, Portugal. Of the

27,000 inhabitants of the entire "conselho" more than one-third are of Jewish origin. For more than two centuries the Inquisition decimated this population, the first victim being Gracia Henriques, wife of Manuel de Almeida, who was burned at the stake at Lisbon April 1, 1582. Many Maranos emigrated from Fundão at the beginning of the seventeenth century, several of whom, among them Antonio Fernandez Carvajal, were in London about 1656.

Judaism has not entirely disappeared from Fundão, the fast of Yom Kippur being even now observed by some families officially classed as Catholics.

G. C. de B.

FUNERAL ORATION (הספד): The expression of grief over the dead body of a relative or friend in words of lamentation or of praise is of very early origin among the Jews (Gen. xxiii. 2; I. 10, 11). In the Bible specimens are found of such lamentations, the most famous of which are the dirges delivered by David over Saul and Jonathan (II Sam. i. 17-27) and over Abner (*ib.* ii. 33-34). In the case of the death of an important personage, it seems that there were special refrains which signified the station of the dead, *e.g.*: "Wo my brother!" (I Kings xiii. 20); "Wo the master!" (Jer. xxxiv. 5); "Wo the master and wo his glory!" (Jer. xxii. 18). See Funeral Rites and Ḳinot.

The funeral oration proper, however, was not known until a later period. In Talmudic times it appears to have been a well-established custom, and the Rabbis laid special stress upon its delivery, particularly at the death of a scholar (Shab. 105b). The oration was considered to be an honor to the dead rather than a consolation for the living, and therefore the heirs were obliged to defray the expense of its delivery. If the deceased signified in his will that he wished no funeral oration, his request must be heeded (Sanh. 46b; Shulḥan 'Aruk, Yoreh De'ah, 344, 9, 10; comp. Piṯḥe Teshubah *ad loc.*). The sages believed that before the grave was closed the deceased had a knowledge of the words spoken in his honor (Shab. 152b, 153a; Yer. 'Ab. Zarah iii. 1; comp. Ber. 19a). It was considered a commendable act for the preacher to raise his voice while delivering the oration so as to arouse the listeners to weeping (Ber. 6b; Ket. 72a; comp. Yer. Ber. iii. 1). Ze'era fainted while delivering a funeral oration (see "Mar'eh ha-Panim" *ad loc.*).

A number of specimens of funeral orations are found scattered throughout the Talmud and the Midrashim, most of which are based on Scriptural texts and embellished with parables and similes. It is noteworthy that some of these fragments are couched in pure Hebrew, quite distinct from the general phraseology of the Talmud

Examples. (M. Ḳ. 25b; Meg. 6a; Ket. 104a). In Palestine it was customary to begin the oration with the following words, "Weep with him, ye who are of distressed heart" (M. Ḳ. 8a). Some beautiful funeral orations are presented in Sem. viii.; Yer. Ber. ii. 8; Meg. 28a; Yer. Kil. ix. 3; Gen. R. xci. 11; Lev. R. xxx. 1; Tosef., Soṭah, xiii. 5, 6; *et al.*

Along with the funeral oration delivered over the body of the deceased at a funeral, there developed, in later times, the custom of reciting an oration in the synagogue for some honored person, even though considerable time had elapsed since the day of his death. In such a case the life of the deceased was taken as an object-lesson for the instruction of the congregation. When a great and important personage died the Jewish communities of distant lands were frequently aroused, through the eloquent addresses delivered by the rabbis, to an appreciation of the great loss the race had sustained. Very often on such an occasion the congregation showed its participation in the general mourning by sitting down upon the ground for a few moments. In almost every collection of sermons there may be found some such addresses. Adolph Jellinek prepared a bibliography of Hebrew funeral orations delivered during the last few centuries, which was published in the Hebrew section of the "Zunz Jubelschrift," Berlin, 1884.

E. C. J. H. G.

FUNERAL RITES: Ceremonies attending the burial of the dead. After the body had been cleansed ("ṭohorah") and placed on the bier (see Burial), the funeral procession began, with the accompaniment of trumpets (Ket. 17a; M. Ḳ. 27b), and of dirges and lamentations chanted by wailing women (Jer. xx. 16; comp. II Chron. xxxv. 25). Wherever this custom prevailed it was the duty of the relatives to provide the professional mourners (Maimonides, "Yad," Ebel, xii. 1). A husband was obliged to defray the expenses of the burial of his wife in accordance with his position, and even the poorest had to provide two flute-players ("ḥalilin") and one professional mourner ("meḳonenet"); if he refused to do so, the wife's relatives or friends could supply them themselves, and then collect the cost from the husband through the court (Ket. 46b, 48a; Shulḥan 'Aruk, Eben ha-'Ezer, 89, 1, 2; Yoreh De'ah, 344, 3). This custom was modified in later times, so that, instead of songs and music, addresses were delivered at the bier of a deceased person, and it was considered a commendable act to shed tears while the virtues of the pious dead were declaimed (Shab. 105b, *et al.*; see Funeral Oration).

The body of a learned and pious man was occasionally brought into the synagogue, where the address was delivered (Meg. 28b). The opinion of later authorities is against bringing the body of any person into the synagogue ("Ḥokmat Adam," 155, 18), so that at present the address is usually delivered either in the synagogue court ("Schulhof") or in the cemetery. The speaker must be careful not to exaggerate the praises of the deceased (Sem. iii. 6; Ber. 62a). Funeral addresses should be delivered over children who have attained their sixth year (the fifth year, if they are the children of poor or old parents), and if a child has developed no particu-

lar qualities of his own, the merits of the parents may be mentioned (Sem. iii. 4, 5). Although it is not permitted to study the Law in the presence of a corpse (Ber. 3b; comp. Rashi, *ad loc.*), the speaker may quote Biblical or Talmudic passages illustrative of his remarks (Yoreh De'ah, 344, 17). No address should be delivered over the body of a suicide or an excommunicate, nor should the other funeral rites be observed in these cases, except such as are for the honor of the living (Sem. ii. 1; Yoreh De'ah, 345; see SUICIDE).

Order of Procession.

The order of the procession varies with local custom. In some places the mourners precede the bier, and the rest of the people follow it (Yoreh De'ah, 345, 3, Isserles' gloss); but more commonly the mourners follow the bier with the rest of the people ("Ḥokmat Adam," 155, 25). The place of women in the procession also depends on custom (see BURIAL). Among the Sephardim, as well as among the Ashkenazim in England, women do not join in any funeral procession, while among most of the Ashkenazim in other countries they follow the bier, but must keep apart from the men (Yoreh De'ah, 359, 1, 2). To accompany the dead to their last resting-place ("halwayat ha-met") is one of the important duties of the Jew. If there is no burial society in a town, all the people must leave their work on the occasion of a funeral and take part in the ceremonies. While the procession is in progress everybody must join it, even if he follow a short distance only ("four cubits," Yoreh De'ah, 361, 3). Even the scholar, if there is not a sufficient number of followers (Ket. 17b), must cease from study and follow the procession; but at no time should the teacher of young children be disturbed in his sacred profession (Yoreh De'ah, 361, 1).

The Bearers.

While carrying the bier, the "kattafim" (bearers), who walk barefoot so that they be not tripped up by the strings of their shoes ("Yad," *l.c.* iv. 3), recite the Ninety-first Psalm several times. Charity-boxes are passed among the followers with the cry, "Righteousness shall go before him, and shall set us in the way of his steps" (Ps. lxxxv. 13). On arriving at the graveyard, the bier is placed on the ground once every four cubits until the grave is reached, when the "Ẓidduḳ ha-Din" is recited. After the body is lowered into the grave, all bystanders say, "May he [or she] come to his [or her] place in peace." Then the grave is closed, and the same psalm is again recited, after which the mourners repeat the long "Ḳaddish." On returning from the cemetery the relatives are made to sit down, and some passages from Lamentations are recited before them. These are repeated seven times—as many times as the word "hebel" (vanity) and its plural occur in Eccl. i. 2 (B. B. 100b; "Yad," *l.c.* xii. 4). It is the custom for the people to stand in two parallel rows while the mourners pass between them, and to say, "May God console you together with all those who mourn for Zion and Jerusalem." Among the Sephardim seven circuits are made around the grave before the recital of the "Ẓidduḳ ha-Din." The ceremony is much simplified on semi-holidays, when no "Taḥnum" is said; so also in the case of a child less than thirty days old. See also BURIAL; COFFIN; CONSOLATION; ḲADDISH; MOURNING.

FUNES: Town in Navarre, in the district of Olite; received a fuero (charter) in 1120, containing several clauses in restraint of the Jews there. In case of a bill amounting to more than five solidos, the Jew had to take an oath on a coffin "sobre hum feretro." A Christian might recover a pledge only on taking an oath. A note or deed of a Jew in favor of a Christian had to be drawn up by a Jewish notary, and that of a Christian in favor of a Jew, by a Christian notary. The murder of a Jew or a Moor was punished by a fine of 500 solidos; the wounding of the same by 60 solidos. In 1171 the Jews of Funes were granted the same rights as those of Tudela, and were permitted to settle within the fortifications. During the persecution of 1328 many were killed and plundered. See NAVARRE.

FÜNFKIRCHEN. See PACS.

FURNACE: Three kinds of structures or apparatus for baking, smelting, etc., were known to the ancient Hebrews: (1) the oven for baking bread; (2) the potters' kiln for firing earthen vessels; and (3) the furnace for smelting metals and ore. The modern heating-stove was unknown to the Hebrews, who used braziers and fire-pots instead.

1. The oven for baking ("tannur") was a necessity in every household, the trade of baking not being developed till later, and probably then only in the large cities. Several families may have used a common oven, a practise that still obtains. Pictures found on Egyptian monuments indicate that the ovens which were formerly used in the Orient resembled, on the whole, those now in use (see Erman, "Aegypten," p. 269; Wilkinson, ii. 34). The tannur is a large clay cylinder or jug, standing upright, with a small mouth at the bottom, the fire being lighted on the ground beneath. The dough, as nowadays, was always kneaded into flat, round cakes, and was put on the cylinder as soon as the latter was hot. Among the ancient Egyptians the cakes were placed on the outside of the cylinder. In Palestine at the present day the fire is allowed to burn low, and the dough is then placed on the inside of the cylinder while the coal and ashes are still glowing. This may also have been the custom among the ancient Hebrews. Such ovens have been found at Tell al-Ḥasi (comp. Bliss, "A Mound of Many Cities," pp. 114 *et seq.*). For illustrations of modern ovens see Benzinger, "Arch." p. 86.

2. The potters' kiln is mentioned only in later times (Ecclus. [Sirach] xxvii. 8, xxxviii. 34). This

tardy mention, however, is merely accidental. The firing, probably also the glazing, of earthenware was practised very early by the Phenicians, who perhaps taught the handicraft to the Hebrews at an early time. Nothing is known of the arrangement of this kiln, or of that of the large kiln ("malben") used for firing bricks (II Sam. xii. 31; Jer. xliii. 9; Neh. iii. 14).

3. The Hebrews never practised smelting, as their country produced no ore; but they were acquainted with the process through their neighbors in Lebanon, where ore was mined. The large furnace for smelting was well known to them, and is frequently used as a metaphor. The Hebrew metal-workers, however, had smaller furnaces and crucibles; but, although various names have been handed down, it is not possible to distinguish between the different kinds referred to. "Kibshan" (Gen. xix. 28; Ex. ix. 8, 10; xix. 18) seems to designate the large furnace belching forth volumes of smoke. "Mazref" is the goldsmiths' crucible (Prov. xvii. 3, xxvii. 21). "Kur" is likewise used for melting and refining gold (Prov. xvii. 3, xxvii. 21; comp. Wisdom iii. 6) and silver (Ezek. xxii. 18-22; Isa. xlviii. 10), but the same term is also used to designate the "iron furnace" ("kur ha-barzel"); *i.e.*, the furnace used for smelting iron ore (comp. METALS), always metaphorically employed to describe great trouble and misery (Deut. iv. 20; I Kings viii. 51; Jer. xi. 4). The term "attun" occurs only in a single passage, in the story of Daniel (Dan. iii. 6 *et seq.*), and is used to denote the large furnace into which Daniel's friends were cast. It was a furnace for smelting, open at the top to admit of the ore being thrown in (comp. verse 23), with a mouth at the bottom for the escape of the molten material (comp. verse 26). "Attun" is probably adopted from the Assyrian. Finally, following the Targum, the expression "'alil" (Ps. xii. 7) is generally interpreted as meaning an oven or a crucible for smelting.

E. G. H. I. BE.

FURNITURE, HOUSEHOLD.—Biblical Data: In the East the house is not as important as in northern countries, since the climate permits an outdoor life in the widest sense of the term. The house is used chiefly as a shelter for the night and for sleeping, and during meals generally; but business of any kind is transacted on the street. The furniture, therefore, has always been very simple, a few pieces only being necessary to furnish the Hebrew home. According to II Kings iv. 10, four pieces were required in a room for a guest of honor: a bed, a chair, a table, and a lamp.

The Bed ("mishkab," "'eres," "mittah"): The Palestinian of to-day, whether townsman or peasant, knows in general nothing of movable beds such as are used in the West. The poor man, wrapped in his mantle, lies on the floor like the Bedouin in his tent. The more wealthy spreads thin woolen quilts on the floor at night, rolling them up by day. The divan or bench spread with silken bolsters, which runs along one or more walls of the room, is also used as a couch at night. The same custom may have obtained in antiquity. It is known, however, that the ancient Hebrews were acquainted with the movable bed. Saul, for example, ordered David to be brought to him in his bed (I Sam. xix. 15; comp. II Kings iv. 10). Og's bedstead was made of iron (Deut. iii. 11); bedsteads of wood, ivory, and gold (*i.e.*, wooden bedsteads inlaid with ivory and gold), sent to the King of Egypt from Palestine either as gifts or as tribute, are mentioned as early as the El-Amarna tablets (thirteenth century B.C.). Hence also the Canaanites had such articles of luxury; and although the ancient Hebrews probably at first knew nothing of them, they were introduced among them later on. The prophet Amos censures the nobles and the wealthy for using beds inlaid with ivory (Amos vi. 4). Many kinds of coverings were spread upon these bedsteads; the poor contenting themselves with a coarse cloak or a goat-skin, and the rich indulging in pillows and bolsters of Egyptian linen, damask, purple embroidered coverings, or costly rugs (*ib.* iii. 12; Prov. vii. 16; Cant. iii. 10), upon which, as is still customary in the East, the sleepers lay without removing their clothing.

This resting-place, therefore, was not a bed in the accepted sense of the word, but a couch, on which the old and the sick reclined in the daytime (Gen. xlvii. 31; I Sam. xix. 13 *et seq.*), and which served also at times as a seat during meals (Ezek. xxiii. 41). Such a couch-like seat may be referred to in I Sam. xx. 25. As it is not known whether it was customary to sit with the legs crossed under the body according to the Oriental fashion of to-day, or whether the legs were allowed to hang down as when one sits in a chair, no accurate idea can be formed as to the height or breadth of these couches. Later on, the custom of reclining during meals (Amos iii. 12, vi. 4) was introduced.

The simplest form of bed is represented by that used by the modern Egyptians, consisting of a latticed frame made of the ribs of palm-leaves and about 1½ feet high, or by the Sudanese angareb, with wooden frames 1½ feet in height, with ropes stretched lengthwise and crosswise, on which a mattress is laid. The pictures of Egyptian beds that have been preserved may give an idea of the beds used. Mosquito-netting (κωνωπεῖον) was probably introduced into Palestine during the Hellenistic period (Judith x. 4, xiii. 9, xvi. 19). As the bed took the place of the modern sofa, there was no other comfortable piece of furniture for sitting in or reclining upon except chairs.

The Chair: Nothing is known of the form of the chair ("kisse"). It may be assumed that, like the bed, it was similar to the Egyptian, although it may have resembled the small, low stools on which modern Orientals squat in the cafés. In any case chairs were necessary pieces of furniture among the ancient Hebrews, who sat during meals, and did not recline like the Greeks and Romans.

The Table: As its Hebrew name, "shulhan," indicates, the table in its primitive form consisted of a round piece of leather spread on the ground. Along the edge were rings through which a rope was drawn, and by means of which, on the march, the table was hung like a bag from the saddle of the camel. When the Hebrews were settled in fixed abodes the piece of leather was superseded by a

round mat woven of more substantial material, or was made of metal, and it was laid upon a low stool. Such tables are still in general use. With this kind of table, chairs were not used, but the people squatted on the ground, with the legs crossed. It is interesting to note that the table of showbread represented on the triumphal arch of Titus is only a little over a foot high (comp. I Macc. iv. 49). Higher tables necessitating chairs were, however, also used (I Sam. xx. 25; I Kings xiii. 20; comp. II Kings iv. 10).

The Lamp: Regarding lamps or candlesticks ("ner," "menorah") the discoveries at Tell al-Ḥasi, probably the ancient Lachish, furnish ample information (comp. the reports on the same, and the numerous illustrations in Flinders-Petrie, "Tell el-Hesy," London, 1891). As was the case in Greece and Rome, open bowls with beaks or earthen vessels with beaks were used, a lighted wick being placed in the beak ("pishtah"; Isa. xlii. 3, xliii. 17). Many current expressions—as, for example, "his lamp shall be put out" (Prov. xx. 20), meaning that he and his whole house shall perish (comp. Jer. xxv. 10; Prov. xiii. 9; Job xviii. 5, xxi. 17; I Kings xi. 36)—indicate that it was customary in ancient times to keep the lamp burning perpetually ("ner tamid"). The same custom still obtains among the fellaheen of Palestine. The phrase "he sleeps in the dark" is equivalent to saying that a person is ruined, not having even the smallest coin wherewith to buy oil.

The brazier, for warming apartments in the winter ("aḥ"; Jer. xxxvi. 22 *et seq.*), was perhaps not used in remote antiquity, but it was considered in later times a necessity in the houses of the nobles. The brazier is still used in the East.

See also Baking; Cookery.

E. G. H. I. Be.

——In Talmudic Times: The dining-room in Talmudic times was usually provided with two tables: the dining-table ("shulḥan"), and a side-table ("delfiḳe," δελφική) on which the servants placed the dishes. The dining-table had three legs and a square base and probably a square top (Kil. xxii. 2). It was usually of wood; but sometimes it was made of pottery, marble, or metal (Tosef., Oh. xvi. 2; Kil. ii. 3, xii. 2, xiv. 1; Yer. Ber. 12a). Wooden tables were often provided with marble tops; occasionally the top was partly of wood, partly of marble (Kil. xxiii. 1). In later times it was customary to provide a small table for each person (Ber. 46b, end). Sometimes the tables were suspended by rings (B. B. 57b). Some tables could be taken apart ("shulḥan shel peraḳim"); in that case the parts were joined by hinges. The side-table had three carved legs, and was usually placed on a stand.

Tables.

There were other pieces of furniture which occasionally served as tables. To these belong the "ṭabla" (Shab. 143a), a slab of wood, pottery, marble, metal, or glass; the "ṭarkas" (Tosef., Kelim, B. M. iii. 3), on which, it seems, the drinks were prepared ("ṭarkas" was used also to designate a sideboard, attached to the wall by hinges in order that it might be put up and down); and the "daḥwinah" (Tosef., Kelim, B. M. v.), a board used to improvise a table at a wedding. Round pieces of leather or leather covers occasionally served as tables; they are still in use for this purpose among the Bedouins, who call them "sufrah."

In rabbinical literature chairs are designated by the three terms "kisse," "safsal," "ḳatedrah." "Kisse" designates usually a chair on a square framework, without arms or back, the seat consisting of several bars, usually three (Kelim xxii. 6). The "kisse ṭeraskal" (Num. R. xii. 49) was a three-legged chair having a seat of wood, or sometimes of leather (Kelim xxii. 7), which could be folded. "Safsal" designates a bench capable of seating several persons. It was especially adapted to public places, and was used in schools, baths, and hostelries. Usually it was made of wood, but sometimes also of stone, pottery, or glass. The ḳatedrah in certain cases had a reclining form, so that the occupant when seen from a distance seemed to be standing (comp. Ex. R. xliii. 11). To the ḳatedrah was attached a footstool ("sherafraf," "ipofodin," "kisse she-lifne ḳatedrah"; Kelim xxii. 3; Targ. Yer. Ex. xxiv. 10; Yer. Ḥag. ii. 77). The ḳatedrah was used mostly by women (comp. Ket. 59b). Mention may also be made of the night-chair ("asla"; Kelim xx. 10) and of litters and sedans, which constituted a part of the furniture. To these latter belonged the "appiryon" (φορεῖον), especially designed to carry the bride to the house of her husband. It was covered and closed by curtains. Its sides were made of large boards which were provided with four legs, sometimes with more (Tosef., Kelim, B. M. viii. 3).

Chairs.

The term "miṭṭah" is used in rabbinical literature to denote both a bed and a couch for reclining at meals (Beẓah 22b; Tosef., Ber. v. 5; and many other passages). The beds were usually so wide that they could be occupied by three persons (comp. Nid. 61a). They were of wood, pottery, or glass. The bedstead consisted of four boards supported by four legs. At its head there were sometimes two poles from which curtains were suspended ("kilah"; Suk. 10b). Similar poles were also fixed at the foot. The bedding of the poor consisted usually of a mat ("maḥẓelet") of reeds or bulrushes (Suk. 19b). The rich used costly hides ("kaṭbulya"; Tosef., Shab. iii. 17; Kelim xxvi. 5). The beds were often so high that they could be reached only by footstools. There were also state beds, with footstools which are designated as "dargash" (Ned. 56a; see Maimonides' commentary on the Mishnah *ad loc.*). The couch for reclining at meals, called sometimes "aḳḳubiṭun" (= "accubitum"; Lev. R. vii. 11; Yalḳ., Num. 777), was provided with a back. Children's beds ("'arisah") were not essentially different from those of adults.

Beds.

Household articles were usually kept in a chest ("tebah") of wood, glass, or horn. The chests were either provided with eight legs or had projecting bases. The lid sometimes was fitted with a smaller lid through which small articles could be withdrawn (Kelim xvi. 7). The chest itself was often divided into compartments ("megirot"; Kelim xix. 7). Of the same material and dimensions was the "shiddah," which seems to have opened at the side. Its compartments were either fixed or in the form of drawers (Tosef., Kelim, B. M. viii. 1). The shiddah was fit-

Chests.

ted with wheels ("mukeni"; Kelim xviii. 2). The "migdal" was similar to the modern closet. The "ḳamṭara" was a receptacle for books and clothes, as was also the "kupsa," though it differed from the former in that it could be locked (Kelim xvi. 7).

Besides these boxes and chests there was a great variety of baskets, barrels, and casks in which the different articles of the household were kept.

Mirrors and Lamps.

Mirrors ("ma'rah," or "re'i") were usually made of metal (Tosef., Kelim, B. M. iv. 2); in later times there were also glass mirrors ("ispaḳlarya," "spaḳlarya"). There were hand-mirrors and wall-mirrors (Shab. 149a; Tosef., Shab. xviii. 6).

The primitive lamp was the "lappid," which consisted of a pot of clay or metal in which any kind of light was carried (Kelim ii. 8). A commoner and more complicated one was the "ner," which consisted of an earthen pot provided with an opening at the top into which the oil was poured. On the edge of the pot was a wick-holder. The wick was made of flax, or of the fibers of other plants (Shab. ii. 3; Tosef., Shab. ix. 5). Occasionally utensils such as mugs, plates, etc., were used as lamps; but a special glass utensil called "'ashashit" was in more general use. Lamp-holders ("pamoṭ") were occasionally used. A holder which could support several lamps was called "menorah." Mention is made in the Mishnah of lamp-holders whose parts could be separated ("menorah shel ḥulyot"; Beẓah 22a). The term "menorah" designated also a candelabrum. The "puḳṭi" is sometimes mentioned as a lamp-holder (Tosef., Kelim, B. M. ii. 6) and sometimes as a lamp (Tosef., Shab. x. 7).

S. S. I. Br.

FÜRST, ALEXANDER: German physician; born at Braunsberg April 15, 1844; died in Berlin May 25, 1898. He studied medicine at Königsberg, and took his degree at Berlin (1867). An assistant first in a private hospital at Schöneberg, near Berlin, and afterward in Dr. Schneller's ophthalmic institute at Danzig, he became a practising physician in Memel (1869). He served through the Franco-Prussian war as military physician, returning at its conclusion (1871) to Memel, where he was one of the founders of a small hospital, and where he also engaged in scientific work. Patients even from the interior of Russia came to him for ophthalmic treatment. He was the first to discover leprosy in East Prussia, and among the first there to treat granular inflammation of the eyes. The measures taken by the government to oppose the spread of these diseases were due to him. In 1884 he removed to Berlin, where he became a "people's doctor" in the best sense of the term.

S. N. D.

FÜRST, JULIUS: German rabbi; born at Mannheim Nov. 14, 1826; died there Sept. 5, 1899. He received his secular education at the University of Heidelberg, and became rabbi at Endingen (1854), at Merchingen (1857), and district rabbi at Bayreuth (1858). In 1873 Fürst received a call as rabbi to Mayence, but in June of the same year returned to his native city, where for twenty years he was active as rabbi of the Klaussynagoge. His principal literary activity was in the province of Hebrew lexicography, and he has published on this subject many valuable essays in Rahmer's "Jüd. Lit.-Blatt," in the "Zeitschrift der Deutschen Morgenländischen Gesellschaft," in the "R. E. J.," in the "Monatsschrift," etc. He contributed to Winter and Wünsche's "Die Jüdische Literatur" the account of the Midrashim, Mekilta, Sifra, Sifre, Tanḥuma, and Yelammedenu. Beside many sermons Fürst published "Das Peinliche Rechtsverfahren im Jüdischen Alterthum: Ein Beitrag zur Entscheidung der Frage über Aufhebung der Todesstrafe" (Heidelberg, 1870), and "Glossarium Græco-Hebræum" (Strasburg, 1890). In the "Glossarium" Fürst treated of the Greek words in midrashic literature, showing a marked tendency toward ascribing to them a Greek origin.

S.

FÜRST, JULIUS (pseudonym, **Alsari: אלשרי, אקזאדי**): German Hebraist and Orientalist; born May 12, 1805, at Zerkowo, Prussia, where his father, Jacob, was darshan; died at Leipsic Feb. 9, 1873. Fürst studied at Berlin (where Hegel and Neander were among his teachers), Breslau, and Halle (at the latter place under Gesenius), taking his degree in 1832. He settled in Leipsic as privat-docent, lecturing on Chaldaic, Syriac, Hebrew grammar and literature, Biblical exegesis, etc. In 1864, on the completion of his twenty-fifth year as privat-docent, he received the title of "professor" from the Saxon state, and was honored by election to several scientific societies. Fürst wrote:

Julius Fürst.

Lehrgebäude der Aramäischen Idiome, oder Formenlehre der Chaldäischen Grammatik, Leipsic, 1835.

Ḥaruze Peninim. Perlenschnüre Aramäischer Gnomen und Lieder, oder Aramäische Chrestomathie, *ib.* 1836 (published as a text-book to the "Lehrgebäude").

Ozer Leshon ha-Ḳodesh. Concordantia Librorum Veteris Testamenti Sacrorum, etc., *ib.* 1837–40 (in collaboration with Franz Delitzsch; a revision of Buxtorf's concordance). See CONCORDANCE.

Pirḳe Abot. Die Sprüche der Väter, *ib.* 1839.

Ari Nohem. Polemic on the genuineness of the Zohar, etc., *ib.* 1840.

Hebräisches und Chaldäisches Schulwörterb. über das Alte Testament, *ib.* 1842 (translated into English, Swedish, and Dutch).

Maggid Emet. Die Mission des Dr. Lilienthal in Russland Beleuchtet und in Ihren Unseligen Folgen Dargestelt, *ib.* 1843. Fürst only edited the book, written by the modern Hebrew scholar Mordecai Aaron Günzburg, as a response to Lilienthal's מגיד ישועה.

Urkunden zur Gesch. der Juden, part 1, *ib.* 1844.

Emunot we-De'ot, oder Glaubenslehre und Philosophie von Sa'adja Fayyûmi (German transl.), *ib.* 1845.

Cultur- und Litteraturgesch. der Juden in Asien, part 1, *ib.* 1849.

Hebräisches und Chaldäisches Handwörterb. über das Alte Testament, 2 vols., *ib.* 1857–61 (with a supplement: Zur Gesch. der Hebräischen Lexicographie, translated into English by S. Davidson).

Gesch. des Karäerthums, 3 vols., Leipsic, 1862–69.

Bibliotheca Judaica: Bibliographisches Handbuch, Umfassend die Druckwerke der Jüdischen Litteratur, etc., 3 vols., *ib.* 1863.

Gesch. der Biblischen Litteratur und des Jüdisch-Hellenistischen Schriftthums, 2 vols., *ib.* 1867–70.

Der Kanon des Alten Testaments nach den Ueberlieferungen in Talmud und Midrasch, *ib.* 1868.

Illustrierte Prachtbibel, comprising twenty-four books of Holy Scripture, with German translation and explanatory notes, Leipsic, 1874.

Fürst was the founder (1840) and editor of the weekly "Der Orient," the supplement of which, the "Literaturblatt," possesses great scientific value. In this and other periodicals he published many essays, criticisms, and scientific treatises. He also edited for some years the "Sabbathblatt," founded 1842. In addition he contributed to various works by other authors. Thus, for Zunz's Bible he translated the books of Daniel and Ezra (1838), and for Goldenthal's ראשון לציון (1845) wrote a treatise on the Talmudic explanation and interpretation of proper names. Franz Delitzsch's "Zur Gesch. der Jüdischen Poesie" (Leipsic, 1836) was largely inspired by Fürst.

The scientific value of Fürst's works has been disputed; some of them have become obsolete. The "Geschichte des Karäerthums" and the "Bibliotheca Judaica," however, are still indispensable reference-books.

Bibliography: Delitzsch, *Zur Gesch. der Jüdischen Poesie*, p. 124, where a didactic poem of Fürst's, "Ḥok we-Emunah," composed "from his 14th–22d year," is mentioned, and which is not otherwise known; Fürst, *Bibl. Jud.* i. 306 *et seq.*; Hilberg, *Illustrierte Monatshefte*, i. 133 *et seq.*; Steinschneider, *Hebr. Bibl.* xiii. 140.

S. H. B.

FÜRST, LIVIUS: German physician; born at Leipsic May 27, 1840; son of the Orientalist Julius Fürst. Livius Fürst studied at the universities of Jena and Leipsic, graduating as doctor of medicine in 1864. After a postgraduate course at the universities of Prague and Vienna he returned to Leipsic, where he established himself as a physician, making a specialty of pediatrics. From 1865 to 1886 he was director of the children's dispensary of the university of that city. He took part in the wars of 1866 and 1870–71, during the first as department surgeon in a hospital in his native town, and during the latter as field-surgeon. In 1871 he became privat-docent in the University of Leipsic, lecturing on gynecology, pediatrics, and vaccination. He received the title of "Sanitätsrat" in 1877. After a prolonged tour of study through Germany, Belgium, Holland, and Italy he founded (1878) in Leipsic a laboratory for animal lymph. Resigning his position at the university in 1889, he moved some years later to Berlin, where he is still (1903) practising.

Fürst is a prolific writer on pediatrics, gynecology, vaccination, and hygiene, and has published numerous essays in the medical journals. Among them may be mentioned: "Die Maass- und Neigungsverhältnisse des Männlichen und Weiblichen Beckens," Leipsic, 1875; "Die Häusliche Krankenpflege mit Besonderer Berücksichtigung des Kindes," *ib.* 1892; "Die Künstliche Ernährung des Kindes im Ersten Lebensjahre," 2d ed., Berlin, 1895; "Das Kind und Seine Pflege im Gesunden und Kranken Zustande," 5th ed., Leipsic, 1897; "Die Pathologie der Schutzpockenimpfung," Berlin, 1896; "Taschenbuch der Harnanalyse," Basel and Leipsic, 1897; "Vademecum der Weiblichen Gesundheitspflege," Würzburg, 1898; "Lexikon der Kinderkrankheiten und der Kindererziehung" (the latter part by Hans Suck), Berlin, 1900. In 1879 he published in Leipsic a book of fairy-tales, entitled "Märchendichtungen."

His two daughters, **Else Fürst** (born at Leipsic June 25, 1873) and **Helene Fürst** (born at Leipsic Nov. 25, 1877), have become prominent in artistic circles, the former as a sculptress and the latter as a violinist.

FÜRSTENFELD: Town in Styria, Austria. Jews began to settle there in 1278, Rudolph of Habsburg having granted (1277) to its inhabitants the usual franchises and rights of trade, and confirmed to the Jews the letter of privileges granted them on July 1, 1244, by Duke Frederick. The Jews enjoyed these privileges but a short time, for in 1312 a persecution occurred at Fürstenfeld, the report having been spread that the Jews had butchered Christian children and had desecrated the host. When the additional report was published that the Jews of Judenburg had decided to murder all the Christians on Christmas night, the mob fell upon the Jews and massacred them, many being burned at the stake and but few escaping. In 1496 all Jews were expelled from Styria. Only a few are now living at Fürstenfeld.

G. S. Mu.

FÜRSTENTHAL, JACOB RAPHAEL (or **RAPHAEL JACOB**): German poet, translator, and Hebrew writer; born in Glogau 1781; died at Breslau Feb. 16, 1855. Fürstenthal's attention was directed chiefly toward the modernization of Jewish religious services, both in and out of the synagogue, and to this end he translated into German the most important liturgical books. These versions became very popular among the German Jews; and, in spite of many subsequent translations, they have retained their popularity to the present time. To some of them, as, for instance, the Penitential Prayers, he added excellent Hebrew commentaries. Furthermore, he did much creditable work in philosophical and exegetical literature. His German translations of and Hebrew commentaries to the "Morch Nebukim" of Moses Maimonides and the "Ḥobot ha-Lebabot" of Baḥya ibn Paḳuda, and especially his large Hebrew commentary to the whole Bible, evidence his great versatility in Talmudic and Midrashic literature.

As Translator.

Fürstenthal's main importance, however, lies in his activity as a national Hebrew poet. His poetic productions have a genuine classic ring, and are distinguished by elegance of diction, richness of thought, and true, unaffected national feeling. His power shows itself at its height in his "Song on Zion" ("Ha-Meassef," 1810, iv. 37), which is considered the best of his numerous

National Hebrew Poet.

poems. In German, too, Fürstenthal has shown remarkable poetic talent in his rhythmical translations of various piyyuṭim, as, for example, his translation of the "pizmon" לך ד' הצדקה וכו' in the minḥah prayer for the Day of Atonement.

The following is a complete list of Fürstenthal's writings in their chronological order: various contributions to "Ha-Meassef," 1810–11; contributions to "Resise ha-Meliẓah," a collection of poems and epigrams, Breslau, 1820–22; "Paradigmen der Hebräischen Conjugationen und Declinationen," *ib.* 1826; Seliḥot, translated into German together with a Hebrew commentary ("Meṭib Safah"), to which is added a description (in German) of the service of the high priest in the Sanctuary on the Day of Atonement, *ib.* 1826; "Ha-Meassef," containing Hebrew and German poems, mostly his own, *ib.* 1829, 1832; "Dabar be-'Itto," an ode in German and Hebrew written on the cessation of an epidemic of cholera, *ib.* 1832; "Das Judenthum in Staatsbürgerlicher Beziehung," *ib.* 1832; "Rabbinische Anthologie," *ib.* 1834; "Die Männer Gottes, oder Biblische Charakteristik," a translation of M. B. Friedenthal's "Yesod ha-Dat," Berlin, 1835; German translation of the "Ḥobot ha-Lebabot," with a Hebrew commentary ("Or la-Yesharim"), Breslau, 1835; "Ebel Yaḥid," an elegy on the death of Akiba Eger, *ib.* 1838; German translation of the "Moreh Nebukim," with a Hebrew commentary (first part only), Krotoschin, 1839 (an appendix to this work was published by Fürstenthal, Leipsic, 1839); Bible, under the general title "Or le-Yisrael," with Hebrew commentary ("Bi'ur we-Som Sekel"), Krotoschin, 1839-43; German translation of "Ḳol Sason," liturgies for Purim and the fast of Esther, containing also a supercommentary ("Pittuḥe Ḥotam") to the commentary of Abraham ibn Ezra on the Book of Esther, *ib.* 1840 (2d ed., *ib.* 1845); "Mazkeret Ahabah," poem by B. Schweitzer, metrically translated into German, Breslau, 1841; "Tenubot Sadeh," poems and epigrams by S. N. Rosenfeld, translated into German, *ib.* 1842; "Das Jüdische Traditionswesen," a translation of Maimonides' introduction to the Mishnah, with explanatory annotations, *ib.* 1842; German translation of "Ma'anch Lashon," Krotoschin, 1844; "Menorat ha-Ma'or" by Isaac Aboab, German translation (completed by Benzion Behrend), 3 vols., *ib.* 1844–48; German translation of "Ḳol Beki," liturgy for the Ninth of Ab, with a history of the destruction of the Temple, 2d ed., *ib.* 1845; German translation of Maḥzor for all festivals, under the general title "Minḥah Ḥadashah," 3 vols., *ib.* 1845.

Works.

H. M. S.

FÜRSTENTHAL, JOHANN AUGUST L.: German jurisconsult of the first half of the nineteenth century; a brother of Jacob Raphael Fürstenthal. He embraced Christianity. He was the author of numerous works and monographs on Roman and commercial law, and jurisprudence in general, of which the following may be mentioned: "Realencyclopädie des Gesammten in Deutschland Geltenden Allgemeinen Rechtes" (Berlin, 1826–27); "Lehrbuch des Preussischen Civil- und Criminalprocesses" (Königsberg, 1827–28); "Corpus Juris Civilis, Canonici et Germanici Reconcinnatum," etc. (Berlin, 1828); "Corpus Juris Academicum" (Berlin, 1829); "Handbuch über die Departements-, Kreis- und Communal-Verwaltung der Neumark und der Dazu Incorporirten Lande" (Berlin, 1831).

Bibliography: Fürst, *Bibliotheca Judaica*, i. 308 *et seq.*

A. M. F. S.

FURTADO, ABRAHAM: French politician; born at London 1756; died at Bordeaux Jan. 29, 1816. His parents were members of a Portuguese Marano family, and resided first in Lisbon. During the earthquake which destroyed that city in 1755 his father was killed, but his mother escaped and went to London, where she openly embraced Judaism. A year after the birth of Abraham she removed to Bayonne, and later to Bordeaux, where Furtado was educated. For a short time he followed a mercantile career, but soon turned his attention to the sale of land. His leisure hours he applied to scientific researches. When in 1789 Malesherbes convened a commission of Jews to consider proposals for the improvement of their condition, Furtado and Gradis were called as members from the south of France, Cerf-Berr and Isaac Berr from the north. Furtado's friendship with the Girondists caused his exile (1793) and the confiscation of his property. The fall of the terrorists made it possible for him to return to Bordeaux.

Abraham Furtado.

When in 1806 Napoleon summoned to Paris one hundred of the leading Jews for consultation, Furtado was among them, and was elected president of this body, which became known as the "Assembly of Notables." Its deliberations led to the convening of the Sanhedrin, which opened Feb. 9, 1807; on this occasion Furtado acted as speaker for the committee appointed to draw up resolutions.

When the Sanhedrin was suddenly dissolved, and the Assembly of Notables reconvened, Furtado acted as its secretary, but eventually returned to Bordeaux. When Napoleon's power was overthrown in 1814, Furtado joined the royalists, but refused a political position during the Hundred Days. In 1815 he was appointed treasurer of the city of Bordeaux by Louis XVIII., and held the position until his sudden death in the following year.

The works he left were incomplete. Furtado was the founder of a well-known French family.

F. T. H. E. C.

FURTADO, AUGUSTE: French banker; born at St. Esprit April 11, 1797; died at Bayonne May 20, 1883. He was a descendant of a Portuguese family, and a nephew of Abraham Furtado, president of Napoleon's Assembly of Jewish Notables. From 1831 to 1871, with but little interruption, he was a member of the municipal council of Bayonne (1831–51 and 1855–71), serving twice as mayor (1851 and 1869). He was a member of the chamber of commerce (1859-78), and its vice-president in 1878; and was administrator of the Bayonne branch of the Bank of France from 1861 up to the time of his death. In 1851 he became chevalier of the Legion of Honor; in 1879 officier de l'Académie, and officier de l'Instruction Publique. He took an active share in Jewish matters, and was president of the Jewish consistory of Bayonne from 1846 to the end of his life. With him the family of Furtado, which had taken so prominent a part in the history of France, and especially in French Judaism, became extinct.

S. A. R.

FURTADO-HEINE, CÉCILE CHARLOTTE: French philanthropist; born at Paris 1821; died at Rocquencourt (Seine-et-Oise) 1896. Her ancestors on both sides were prominent in French politics. She married Charles Heine, the cousin of the poet, and at her husband's death inherited his large fortune.

Jewesses of Fürth in 1705.
(After an old engraving.)

Among the more important of her numerous charitable works were the equipment and maintenance of an ambulance service in Paris during the Franco-Prussian war and the establishment of a dispensary for children in one of the Jewish quarters. She was a most liberal supporter of the Pasteur Institute. In 1896 she established a hospital with accommodations for one hundred children. She also endowed at Nice a sanitarium for convalescent officers of the French army.

In 1896 the president of the French republic conferred upon her the order of the Legion of Honor.

E. C. F. T. H.

FÜRTH: City of Bavaria, Germany. On April 17, 1528, George the Pious, Margrave of Ansbach, permitted two Jews, Perman and Uriel Wolff, to settle under his protection at Fürth, which was in his territory; and in 1553 the Prince Bishop of Bamberg permitted three Jewish families—probably emigrants from Old Bavaria—to settle at Fürth on a piece of property belonging to the provost of the Bamberg cathedral. The free imperial city of Nuremberg, which had expelled its Jews in 1499, vainly protested against the settlement of a Jewish community in its vicinity; Jews continued to come to Fürth; and after their expulsion from Vienna in 1670, the Bavarian city became more and more a place of refuge for the banished. The two communities which gradually developed in Bamberg and Ansbach were bound together by common internal interests, and tended more and more to fuse into one, especially after 1690.

Early Settlements.

Owing to the rivalry between Bamberg and Ansbach, which manifested itself in part in the granting of privileges to the Jews, the condition of the latter at Fürth was better than elsewhere in the country. Moreover, on March 2, 1719, the cathedral provost of Bamberg confirmed the Jews in all their privileges, and in addition allowed them to send two Jewish representatives to the city council. For these privileges the Jews paid protection-money amounting in the aggregate to 2,500 florins yearly, which sum by 1754 was increased to 4,500 florins. The few Jews who belonged to the Margrave of Ansbach, and who in 1719 passed under the rule of the cathedral provost of Bamberg, paid their lord a yearly protection-tax of 10 florins per family.

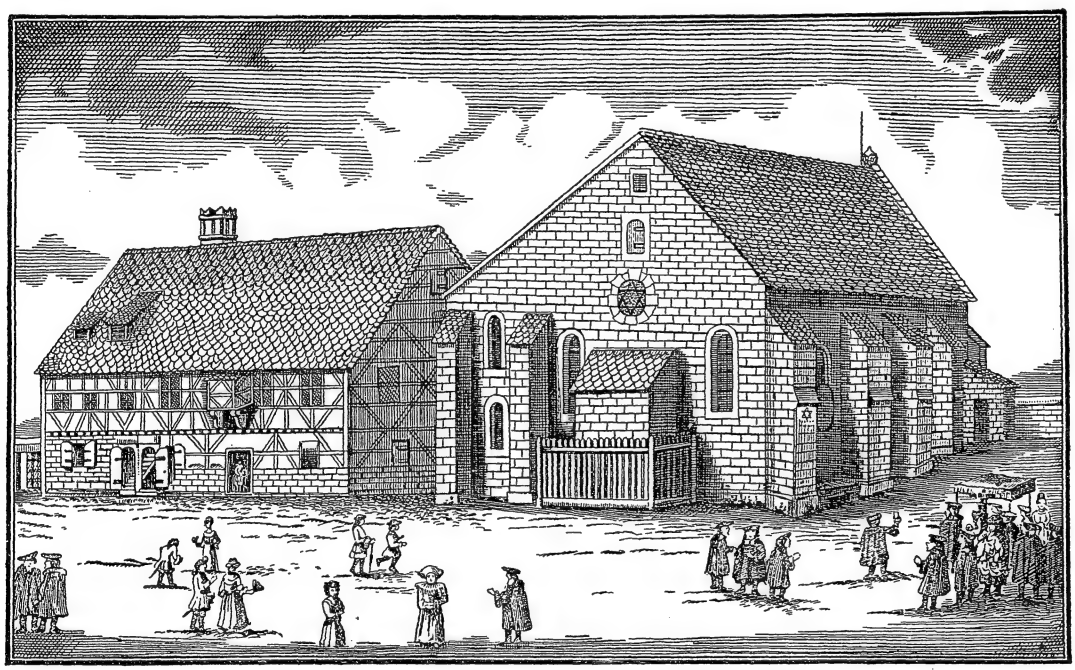
Internal Affairs.

The Jewish community of Fürth formed an independent body with a republican constitution. It was governed by a senate consisting of twenty-one men, from among whom were chosen the "barnossen" (= "parnasim")—that is, the heads of the congregation—who alternated every month in occupying the honorary position of president of the congregation. For policing and in all matters of discipline the senate had to draw upon the support of the civil government. A foreign Jew was admitted to the body only with the consent of the members, but the community was not limited to a certain number, as was elsewhere the case (see FAMILIANTEN-GESETZ). The judicial organization, at the head of which was the chief rabbi, was distinguished from that in other communities by the fact that an appeal from a decision of a Jewish court was not carried to the superior Christian government, but to other rabbinical courts of the second or even third instance. In 1728 the senate passed a set of laws which regulated not only the religious but even the social life of the community.

The happy condition of the Jews caused the rapid growth and prosperity of the community and city. At the beginning of the eighteenth century there were from 350 to 400 taxable Jewish families, of whom 100 were house-owners; while at the end of the century the community probably numbered 3,000

members. These Jews had commercial relations with many German courts, were engaged to a great extent in manufactures, and monopolized banking. Dohm, in his "Ueber die Bürgerliche Verbesserung der Juden," cites the Jewish community of Fürth as an instance of the fact that those localities are prosperous where Jews are not oppressed.

Some Jews became the financial agents of the princes, and COURT JEWS acquired political influence with the margraves of Ansbach. The most famous of the court Jews was Elkan **Fränkel,** son of Enoch Levi of Vienna; he was the victim of a court intrigue and of his own ambition, dragging with him in his fall his brother, the cabalist Hirsch Fränkel (1712). In the eighteenth century the family of Gabriel Fränkel—court purveyor and banker—at Fürth carried on very extensive commercial transactions with the Margrave of Ansbach. A favorite of this same prince and a resident of his court was Isaac Nathan, who met with a fate similar to Elkan Fränkel's. Among the later court agents who were preferred by the margraves as financiers and business agents, mention may be made of Meïr Berlin, great-grandfather of Samuel Berlin, the privy councilor at Fürth.



THE OLD AND NEW SYNAGOGUES AT FÜRTH IN 1705.
(After an engraving by J. A. Boener.)

The community at Fürth was a center of Jewish learning. Young men came from all quarters to study at its Talmudic school; and numerous works issued from the printing-press established there in 1690. The fame of Fürth rests chiefly upon its learned rabbis, of whom a list follows, as nearly as possible in chronological order:

Rabbis and Institutions.

Simson ben Joseph; Menahem Man Ashkenazi (d. 1655); Aaron Samuel Kaidanower (c. 1660); Meïr ben Asher ha-Levi (d. 1683); Wolf ben Meïr of Buczacz; Samuel of Wodzislaw (1691-94); Eliezer ben Mordecai Heilprin (d. 1700); Bärmann Fränkel (1700-08); Baruch Rapoport (1710-46); David Strauss (d. 1762); Joseph Steinhart (d. 1776); Hirsch Janow (d. 1785); Meshullam Zalman Cohn (d. 1819); Isaac Löwi (1830-73); Dr. Neubürger, who entered office in 1875, and who is still (1903) officiating.

The chief synagogue ("Altschul"), which stands in a venerable courtyard, was built in 1616–17 and entirely renovated in 1865. It contains many valuable memorials of the Viennese exiles who settled at Fürth. The other principal synagogue ("Kaalschule") was founded in 1697; besides there are a number of smaller synagogues. The cemetery is mentioned as early as 1604, and contains many interesting tombstones; further burials therein will, it is thought, soon be prohibited. The old hospital, dating from the middle of the seventeenth century, was replaced by a new one in 1846. The orphan asylum, founded by Israel Lichtenstadt of Prague in 1763, is the oldest institution of its kind in Germany, and has received a number of rich endowments. The Jewish high school ("Bürgerschule") was opened in 1863. There are funds for the support of small congregations and poor students.

In the course of the first half of the nineteenth century, when the community of Fürth made great advances in trade and manufacturing—especially in the production and export of toys, mirrors, and bronzes—Fürth was called "Little Jerusalem." Among its many prominent Jewish citizens are the following:

Simon Königswarter, banker, and his son Dr. Wilhelm Königswarter, honorary freemen of the city, both of whom liberally endowed institutions of all sects; Dr. Grünsfeld, who became a lawyer in 1834, and was the first Jew to follow this profession

in Bavaria; Dr. David Morgenstern, first Jewish deputy (1849) to the Bavarian Diet; Solomon Berolzheimer, the first Jew to hold a position in the municipal administration of Fürth, and, later on, member of the county board ("Landrath"); David Ottensoser, a well-known Hebraist; Dr. Ortenau, notary and auditor for the militia; Dr. Brentano, principal of the royal commercial and industrial school. In 1878 there were no less than four Jewish members of the magistracy and eleven Jewish representatives of the city. Dr. Landmann was for several sessions president of the entire body of representatives.

Prominent Citizens.

Recently Nuremberg has developed into a powerful commercial rival of Fürth; and, in consequence, the community which about 1870, when it had reached its highest development, numbered 3,300 souls, has been reduced to about 3,000. Nevertheless the Jewish community of Fürth still occupies a prominent place among the German congregations.

D. A. E.

FÜRTH, MEYER B. ELHANAN: German writer and teacher, who belonged only in a restricted sense to the school of the Meassefim, for he was a conservative and wrote against Reform and reformers. He annotated a mathematical work by Abraham Joseph Mentz (Mayence) that had appeared in Berlin in 1775, and wrote the following Hebrew and German works: "Anfangsgründe der Algebra," Leipsic, 1806–08; "Entwurf zur Selbstverständniss Eines Immerwährenden Kalenders," *ibid.*, 1810; "Parpera'ot la-Ḥokmah," a commentary on the "Sefer 'Ibronot" (first published by Seb. Münster), with German transl., Dessau, 1811; "Shelemut we-Ẓurat ha-Nefesh," Moses Mendelssohn's "Ueber die Seele," with a commentary in refutation of Mendelssohn's views, *ib.* 1810; "Kebod Elohim," a polemic against the Reform movement, German ed., *ib.* 1812; "Dibre Yosher," a polemic against I. Wolf and G. Salomon's book "Der Charakter des Judenthums," and against the latter's "Selimas Stunden der Weihe," in Judæo-German, *ib.* 1818; "Freimüthige Gedanken," a portion of the preceding work in German, *ib.* 1818; "Yir'at Shamayim," a commentary to Maimonides' "Yad," Ḳiddush ha-Ḥodesh, together with Scriptural comments and novellæ, *ib.* 1820–21.

G

GABBAI (lit. "receiver"): Tax-collector; in modern usage, treasurer of a synagogue. In Talmudic times the alms of the congregation appear to have been collected by two persons (B. B. 8b), but the term "gabbai" seems to have been restricted to publicans or tax-gatherers. A pious man who became gabbai or tax-gatherer was expelled from the company of other students of the Law (Yer. Dem. ii. 23a). According to E. Hatch ("Organization of the Christian Church," Oxford, 1888), the office of bishop in the Christian Church was derived from the treasurer of the synagogue, whose duties are now performed by the person known as "gabbai." Certain persons in the Middle Ages adopted the term as a surname, as Azan del Gabay at Tudela (1367; Jacobs, "Sources," p. 90), and Abraham Gabbai at Bristol (1194; *idem*, "Jews of Angevin England," pp. 347, 371).

In more recent times the chief function of the gabbai among the Sephardim was to apportion the FINTA among the seat-holders of a congregation.

E. C. J.

GABBAI: A family the members of which were found in Spain in the fifteenth century, and in Italy and the Levant from the seventeenth onward.

Abraham Gabbai (Ysidro): Ḥakam in Amsterdam, later in Surinam; died before 1757. He wrote a cabalistic poem on the azharot entitled "Yad Abraham," which his wife, Sarah Ysidro, had printed, and which Abraham J. Basan published (Amsterdam, 1757). Gabbai-Ysidro also wrote "Sermon Predicado Neste K. K. de Talmud Torah . . . em Sab. Wajikra é Ros Hodes" (Amsterdam, 1724).

K. M. K.

Abraham ben Jedidiah Gabbai: Printer of Smyrna in the seventeenth century; probably born at Leghorn, where his father opened a printing establishment about 1650. From there the latter removed to Florence, and then to Smyrna, where Abraham directed the business from 1659 to 1680. During these twenty-one years he published thirteen works, the last of which was "Gufe Halakot," by Solomon Algazi (1680).

J. M. SEL.

Ezekiel Gabbai: Turkish official and author; grandson of Ezekiel Gabbai; born at Constantinople 1825; died there 1848. He was at first an official at the Ministry of Public Instruction, and subsequently president of the Criminal Court. As founder and editor of "El Jornal Israêlith" (1860), one of the first Judæo-Spanish papers of Constantinople, he introduced many reforms into the community of that city. He is the author of "The Organic Statute of the Jewish Nation in Turkey" (in Turk-

ish), a work that has been incorporated in the Ottoman Civil Code. He also translated the Ottoman Penal Code into Judæo-Spanish. One of his sons, **Isaac Gabbai,** continues the publication of "El Jornal Israélith" under the title "El Telegrafo."

Bibliography: M. Franco, *Essai sur l'Histoire des Israélites de l'Empire Ottoman.*

S. M. Fr.

Isaac ben Solomon ibn Gabbai: Talmudic scholar; flourished at Leghorn in the seventeenth century. He was the author of a commentary on the Mishnah, entitled "Kaf Naḥat," published, together with the text, at Venice in 1614. Gabbai drew most of his explanations from Rashi and Maimonides. He also wrote a commentary of the same name on Pirḳe Abot (Altona, 1779).

Bibliography: Wolf, *Bibl. Hebr.* i. 652, iii. 559; Steinschneider, *Cat. Bodl.* col. 1110; Fürst, *Bibl. Jud.* i. 311; Bartolocci, *Bibl. Rab.* iii. 893.

D. M. Sel.

Jedidiah ben Isaac Gabbai: Italian printer of the seventeenth century. In 1650 Gabbai established a printing-press at Leghorn under the name "La Stampa del Caf Naḥat," in honor of his father's work entitled "Kaf Naḥat." The first work to issue from his press was the "azharot" of Ibn Gabirol and Isaac b. Reuben of Barcelona (1650). The title-page bears the device of three crowns with the inscription "Sheloshah Ketarim." In 1658 he printed the "Keneset ha-Gedolah" on the Shulḥan 'Aruk, Oraḥ Ḥayyim. In 1659 Gabbai removed to Smyrna, where, in partnership with his son **Abraham Gabbai,** he published Manasseh b. Israel's "Miḳweh Yisrael" and "Apologia por la Noble Nacion de los Judios," a Spanish translation of Edward Nicholas' work. Thereafter he left the business entirely in the hands of his son.

J. M. Sel.

Meïr b. Ezekiel ibn Gabbai: Cabalist; born in Spain toward the end of 1480; lived probably in the East. He complained in his twenty-seventh year that he had to work hard to support himself and his family (see end of "Tola'at Ya'aḳob"). He was an enthusiastic cabalist, noted for thorough mastery of the whole cabalistic lore, the most important points of which he, as far as can be judged now, was the first of his generation to treat systematically. He must be regarded, therefore, as the precursor of Moses Cordovero and Isaac Luria. His first work, completed in 1507 and held in high regard, was "Tola'at Ya'aḳob," a cabalistic exposition of the prayer ritual. His chief work, which he finished Dec. 22, 1530, after having spent eight years on it, was "Mar'ot Elohim," in which he expounds in detail his cabalistic system, making a close study of Maimonides in order the better to refute him. In 1539 he wrote an exposition and defense of the Sefirot under the title "Derek Emunah," in answer to his pupil Joseph ha-Levi, who had questioned him in regard to his doctrine of the Sefirot, Gabbai basing his work on Azriel's "Perush 'Eser Sefirot."

Gabbai regarded the Zohar as the canonical book of the Cabala. His system is tinged with pantheism. God Himself, as the first cause of all causes, can neither be conceived nor cognized, and can not even be mentioned; the name "En Sof" (Infinite) is a mere makeshift. Even the Keter Elyon, the first Sefirah, can not be conceived or imagined; it is coeternal with the En Sof, although only its effect; it is what is called in Scripture "His Name." By means of it the other sefirot emanated from God, being the various manifestations through which the Godhead makes Himself cognizable. To them the prayers are addressed, and they are intended in the different designations of God, whose relation to them is the same as that of the soul to the body.

The other emanations are the seven "hekalot," which proceed from the sefirot, and represent in a way the feminine world as contrasted with the masculine world of the sefirot; they are the real vessels of the further development of the world. This emanation of the world from God constitutes the "glory of God." The consciousness of dependence on God, with the striving toward Him in order to be united and become one with Him, and thereby to acknowledge His unity and effect its realization, is the "yiḥud," "the conscious union with God," which is the final aim of the world. Man, a reflection of the highest "hekal," unites in his soul the rays of all the sefirot, and in himself in general as microcosm all the basic elements of being. His soul therefore is in connection with the upper world, which it is able to influence and stimulate by its actions and aspirations; for everything that happens in this world reaches in wave-like circles to the uppermost regions. By recognizing and fulfilling the religious and moral precepts man advances the harmony and union of the various grades of creatures, and succeeds in performing his task in life—the bringing about of the "yiḥud."

Gabbai's son **Ḥayyim** was also a cabalist: and his son-in-law Senior ben Judah Falcon published Gabbai's first two books after his death, the "Tola'at Ya'aḳob" with the aid of Abraham Reyna at Constantinople in 1560, and "Mar'ot Elohim" at Venice in 1567.

K. P. B.

Mordecai Gabbai: Italian physician; born at Rome 1651. Mordecai and his whole family were baptized on Feb. 14, 1683.

Nathan Gabbai of Tudela: Farmer-general of the taxes and tolls of the kingdom of Navarre from 1391 to 1407, for a time together with Juze Orabuena and Judah Levi of Estella. In 1391 they paid 72,000 livres for their privilege, the king remitting 2,000 livres of this sum on account of the poor returns. In 1392 the king empowered Gabbai and Orabuena to apportion the taxes of the Jewish communities of the country. Like other tax-farmers, Gabbai supplied the king with grain, etc.

Bibliography: Jacobs, *Sources*, Nos. 1532, 1545, 1560, 1586; Kayserling, *Gesch. der Juden in Spanien*, i. 59.

To the same family belong **David Gabbai,** who in 1423 leased the estate of Camarati from Nuno Alvares Pereira, one of the greatest Portuguese generals ("Elucidario," i. 307); and **Moses Gabbai,** who was related by marriage to Simeon Duran, and

who left Navarre in 1391, and went to Honein (Simeon Duran, Responsa, i. 26b).

Samuel Gabbai: Italian physician of the seventeenth century; father of Mordecai Gabbai and a descendant of the Spaniard Isaac Gabbai. During the plague which raged at Rome in 1656–57 Gabbai and his father showed extraordinary self-sacrifice in tending the afflicted.

G. M. Fr.

Solomon ben David Gabbai: Turkish scholar; lived at Constantinople in the seventeenth century. He was the author of an unpublished philosophical work entitled "Ta'alumot Ḥokmah," consisting of six treatises: (1) on the knowledge of God; (2) on abstract ideas; (3) on the spheres; (4) on the elements; (5) on the immortality of the soul; and (6) on the unity of God. Joshua Benveniste in his "Ozne Yehoshua'" quotes Gabbai frequently.

M. Sel.

GABBATHA or **GABATHA: 1.** Town corresponding to the Biblical "Gibeah," mentioned in the Septuagint (I Chron. xii. 3), in Josephus ("Ant." v. 1, § 29; vi. 4, §§ 2, 6), and in the "Onomastica Sacra" of Eusebius and of Jerome. In the last-named it answers to "Geba" and "Gibbethon" also. Both "Onomastica" (ed. Lagarde, 128, 17; 246, 53) mention a town named "Gabbatha" existing in their time in the district of Sepphoris near Legeon in the great plain. They also refer to another east of the Daroma, and to a third about twelve miles from Eleutheropolis, southwest of Judea (*ib.* 128, 32; 246, 67). Near the last-named Gabbatha the tomb of the prophet Habakkuk used to be pointed out. This, according to the same "Onomastica" (109, 19; 120, 15; 256, 3; 270, 35), was situated near Keilah—a statement which corresponds with the foregoing one, considering the relative positions of Eleutheropolis and Keilah. The frontier town Gebath, mentioned several times in the Talmud in connection with Antipatris (Sanh. 94b; Yeb. 62b; Yer. Meg. i. 70a; Ḳid. 57b), is probably identical with Gabbatha near Eleutheropolis.

BIBLIOGRAPHY: Buhl, *Geographie des Alten Palästina*, p. 199; Boettger, *Top.-Hist. Lex. zu Josephus*, p. 120.

2. According to John xix. 13, the Hebrew (properly the Aramaic) name of the place called Λιθόστρωτον ("the Pavement"), situated in front of the pretorium in Jerusalem, where Pilate delivered the final judgment upon Jesus. According to Philo ("Legatio ad Caium," § 38, ed. Mangey, ii. 589 *et seq.*) and Josephus ("B. J." ii. 14, § 8; 15, § 5), Herod's palace served as the pretorium for the procurator during his stay in Jerusalem. "The Pavement" was perhaps the only paved place in the city (it was constructed under Agrippa II.; see Josephus, "Ant." xx. 9, § 7), and may have received its name for this reason. "Gabbatha," however — derived either from גבעה ("hill") or from גבתא ("back")— does not correspond to the Greek name, and may have designated another part of the upper city, near the royal palace.

GABISHON, ABRAHAM BEN JACOB: Algerian physician and scholar; descended from a Granada family; died at Tlemçen in 1605. He established himself as a physician in 1574 at Algiers, where he acquired a large practise. Gabishon was the author of a commentary on Proverbs, entitled "'Omer ha-Shikḥah," in which Meiri and Levi ben Gershon are chiefly quoted. Well versed in Arabic literature, Gabishon often cites Arabic proverbs which materially elucidate the Biblical text. Appended to this work are some of his didactic poems, annotated by his son Jacob, and some poems by his grandson Abraham. Gabishon is very highly praised by Solomon ben Ẓemaḥ Duran in the approbation to the work. It was published at Leghorn in 1748 by a descendant of his (also named "Abraham"), in fulfilment of a vow made in 1740 on the death of his two sons by the plague.

G. I. Br.

GABRIEL (גבריאל, Γαβριήλ, "man of God"): With Michael, Gabriel is mentioned by name in the Book of Daniel, where he explains to Daniel his visions (Dan. viii. 16–26, ix. 21–27). He appears to Zacharias, and announces to Mary that she is about to have a son whose name shall be "Jesus" (Luke i. 19–31). Gabriel is one of the four angels that stand at the four sides of God's throne and serve as guardian angels of the four parts of the globe (Enoch, ix. 1; comp. Kautzsch, "Die Apokryphen und Pseudepigraphen des Alten Testaments," ii. 240, note). The four angels, Michael, Gabriel, Uriel, and Raphael, who are still invoked in the evening prayer, are often mentioned together (Enoch, xl. 6, liv. 6; Sibyllines, ii. 214 *et seq.*; "Legend of Zechariah," vi. 2–6, in Lüken, "Michael: Eine Darstellung und Vergleichung der Jüdischen und Morgenländisch-Christlichen Tradition vom Erzengel Michael," p. 122, Göttingen, 1898). The four names also occur on a golden tablet found in the tomb of the wife of Emperor Honorius (Kopp, "Palæographia Critica," iii., § 158; "Apocryphische Fragen des Bartholomeus," in Lüken, *l.c.* p. 114; "Zauberpapyri," in Lüken, *l.c.* p. 71). In other passages seven archangels are mentioned, among them Gabriel (Tobit xii. 15, and elsewhere). But he is most often mentioned together with Michael, whom he follows in rank. A Gnostic gem bears the inscription in Greek: "Michael the

highest, Gabriel the mightiest" (Kopp, *l.c.* iv., § 766). The three angels that appeared to Abraham (Gen. xviii.) were Michael, Gabriel, and Raphael; Michael, as the greatest, walked in the middle, with Gabriel to his right and Raphael to his left (Yoma 37a). Michael stands at the right hand of God, Gabriel at His left (Jellinek, "B. H." v. 166). Throughout Jewish literature Michael appears as an angel of a higher degree, as may be seen in the passages quoted below. Gabriel has the form of a man (Dan. viii. 15, ix. 21), and is, according to the Talmud, the "man clothed with linen" mentioned in Ezek. ix. 3 and x. 2 (Yoma 77a).

Represents Fire.

Michael is snow, Gabriel is fire (Lüken, *l.c.* p. 55; comp. Yoma 21b, bottom). Nevertheless, it is the prince of fire and not the prince of ice that is commissioned to rescue Abraham as well as Hananiah, Mishael, and Azariah from the fiery furnace (Pes. 118a; Ex. R. xviii. and parallel passage). In a single passage only (Targ. Job xxv. 2), Michael is called the prince of fire, and Gabriel the prince of water. As prince of fire Gabriel is also prince of the ripening of fruits (Sanh. 95b). As an angel representing an element of nature he is also connected with the metals: Gabriel is gold (the color of fire), Michael is silver (snow), Uriel is copper (Yalḳ., Ḥadash, *s.v.* "Gabriel," No. 75). Gabriel, girded like a metal-worker, shows Moses how to make the candlestick (Men. 29a). He has wings, like all the angels, but while Michael reaches the earth in one flight, Gabriel requires two (Ber. 4b, bottom).

Activities and Qualities.

Michael and Gabriel often work together (see Pes. 55a; Lüken, *l.c.* p. 86, note 1; *ib.* p. 109, bottom; Origen, "Contra Celsum," viii. 13; and elsewhere), but while Michael, as the guardian angel of Israel and high priest of heaven, is more occupied in heaven, Gabriel is the messenger of God, who executes God's will on earth. In heaven Gabriel is set over the serpents, and over paradise and the cherubim (Enoch, xx.). Each of the four divisions of the twelve tribes of Israel had its guardian angel, namely, Michael, Gabriel, Uriel, and Raphael respectively (Num. R. ii. 10). Michael and Gabriel defend Israel against its accusers (Yalḳ., Ḥadash, 67b), and pray in general for the human race and for Israel's deliverance from captivity ("Apoc. Pauli," in Lüken, *l.c.* p. 86, note 4; Jellinek, *l.c.* v. 127). They defend Israel when God orders the Temple to be burned (Yalḳ. ii., No. 1009). Gabriel destroys the bastards (Enoch, x. 9); with the other three archangels he seizes Semyaza and his companions and casts them into the fire (Enoch, liv. 6). He will make war upon the leviathan (B. B. 74b). He leads the soul into the body of the pious (Yalḳ., Ḥadash, 68b, No. 65).

Gabriel in Legend.

In addition to the cases mentioned above, Gabriel frequently acts as God's instrument. After appearing to Abraham with the other two angels, he went to destroy Sodom and save Lot (B. M. 86b). Satan (Samael), desiring that Tamar might be burned and that David might not be her descendant, removed the signs by means of which she afterward proved her innocence (Gen. xxxviii.); Gabriel having restored them (Soṭah 10b). Gabriel taught Joseph the seventy languages of the world (*ib.* 36b); he led Jochebed to Amram (Yalḳ., Ḥadash, *s.v.* משה, No. 60); when the handmaidens of Pharaoh's daughter wished to dissuade her from saving Moses, Gabriel struck them down (*ib.* 12b). When Solomon married a daughter of one of the Pharaohs Gabriel thrust a reed into the sea; mud gathered around it, and Rome was built on that site (Shab. 55b). He closed the gate behind the Shebna mentioned in Isa. xxii. 15 (Sanh. 26a), and slew Sennacherib (*ib.* 95b). Fortunately for Israel, he hindered Nebuchadnezzar from worshiping God (*ib.* 96a). Taking fire from the hand of the cherub, he threw it upon the Temple and city (Yoma 77a). He put an ink-mark upon the forehead of the pious, and one of blood upon that of the impious (Shab. 55a; comp. Ezek. ix. 4). He prevented Queen Vashti from appearing before Ahasuerus, and rewrote the story of the services rendered by Mordecai to the king, the record of which Shimshai had destroyed (Meg. 12b, 16a). He struck down the judges who refused to side with Simon b. Shetaḥ against King Alexander Jannai (Sanh. 19b).

The foregoing description of Gabriel shows no details that need be regarded as having been borrowed from Parseeism or other sources. Gabriel disputes like a scribe with Michael as to the stone indicated by "kadkod" (Isa. liv. 12; B. B. 75a; comp. Yalḳ., Ḥadash, 67a, No. 27: Michael and Gabriel are like the Shammaites and Hillelites). "Pray not to Michael nor to Gabriel, but to Me, and I will immediately answer" (Yer. Ber. 13a): in contrast to later Christianity, Judaism entirely forbade the worship of angels, though this view was modified in the Middle Ages. Gabriel also plays an important rôle on Basilidian gems, in the magic papyri, among the Christians, and among the Mohammedans. "In Christianity, as in Judaism, Gabriel stands nearest to Michael, but does not equal him in rank" (Lüken, "Michael," pp. 32, 111 *et seq.*). Gabriel still lives in the imagination of the Jewish, the Christian, and the Mohammedan people.

S. S. L. B.

—In Arabic Literature: Gabriel, under the name of "Jibril" (for variants in spelling and vocalizations see Baiḍawi), is mentioned by name in only two passages of the Koran: suras ii. 91, 92; lxvi. 4. But according to the commentators, he is alluded to elsewhere in the words "Ruḥ al-Ḳuds" = "Holy Spirit" (ii. 81, 254; v. 109; vi. 104); in "al-Ruḥ al-Amin" = "Faithful Spirit" (xxvi. 193); in "Shadid al-Ḳuwwah" = "the Terrible in Power" (liii. 5); and in "Rasul Karim" = "Noble Messenger" (lxxxi. 19).

According to Baiḍawi, the name signifies "servant of God." Gabriel revealed the Koran to Mohammed, and, according to Arabic writers (Bukhari, Baiḍawi, Zamakhshari), was therefore considered by the Jews to be their enemy, a conception resented by the Prophet in the declaration (ii. 91) that Gabriel's enemies are God's enemies. The three letters "alef," "lam," "mim," which precede many of the suras, are explained by Ibn 'Abbas (see Baiḍawi on sura ii. 1) as indicating that Gabriel is the medium of revelation between God and Mohammed, the "alef" standing for "Allah," the "lam" for "Gabriel," and the "mim" for "Mohammed." It was Gabriel who brought to Mohammed the command "Iḳra" (recite) as recorded in sura xcvi. For this reason the angel is regarded by the Arabs as the "keeper of the heavenly treasures [of revelation]". He is one of the "al-Muḳarrabin," the angels that approach God. With three other angels, he will survive on the last day, death overtaking all other creatures.

Messenger of God.

As "messenger of God" Gabriel assisted in the creation of Adam by gathering under divine orders all the kinds of clay from which the first man's body was fashioned. After their expulsion from paradise, it was he who took pity on Adam and Eve; bringing to them a small sack of wheat, he taught them how to sow and cultivate the grain. He also gave Adam an ox wherewith to plow (see 21st treatise of Ikhwan al-Ṣafa [ed. Dieterici], Ṭabari, and Ibn al-Athir). Ṭabari further ascribes to him the transmission to Adam of the knowledge of making fire by striking stone and iron together. When Abraham was to be thrown into the fierce fire prepared for him by Nimrod (in the Midrash it is a hot furnace: Gen. R. xxxviii.) Gabriel intervened. Abraham, who was shot into the air by a catapult or ballista, would have fallen into the flames had the angel not held him in mid air (Zamakhshari and Baiḍawi).

Visits Abraham.

As in Jewish accounts (Midr. Leḳaḥ Ṭob, ed. Buber, i. 82; B. M. 86b), Gabriel is in Arabic stories one of the three angels, Gabriel, Michael, and Israfil (the Jewish Uriel), that visited Abraham (comp. the commentaries to sura xi. 72). Ṭabari amplifies the account. Asked by the patriarch why they would not eat of the food placed before them, they declared that they must first be told the price of the meal. Abraham replied, "For this meal the price consists in your praising God," whereupon Gabriel nodded approvingly, saying, "In very truth this man deserves to be styled the friend of God." Commenting on sura xi. 83, the account of Lot and the angels that came to him at Sodom to announce its punishment, Baiḍawi and Zamakhshari state that Gabriel struck the Sodomites with his wing (described at some length by Zamakhshari) so that they lost their sight. With the same wing, they report, referring to the next verse (xi. 84), Gabriel lifted the whole city to such a height toward the sky that the barking of the dogs and the crowing of the cocks were distinctly heard by the dwellers in heaven, and then, turning it upside down, dashed it to the earth.

Abraham, according to Ibn al-Athir, had begged Gabriel to save the city if but ten believers (Mohammedans) were discovered among the inhabitants. Gabriel had promised Abraham at least to accomplish the escape of Lot and his family with the exception of his wife. But finding in Lot's admissions the confirmation of God's indictment of the city as corrupt to the core Gabriel achieved Sodom's ruin in the manner before stated (see also Abulfeda, "Historia Ante-Islamitica," p. 24). In the story of Moses' mission to Pharaoh (sura xxviii.) Gabriel is assigned an important part by Arabic commentators. Zamakhshari, reverting to the tower which the Egyptian king had built to ascend to the God of Moses (xxviii. 38), reports that Gabriel struck it with his wing and split it into three parts, one falling on Pharaoh's army, killing one thousand times one thousand men, another sinking in the sea, and the third crashing to earth in a westerly direction, so that none of the builders escaped alive. When Pharaoh was about to drown he would have professed his belief in the God of Moses, but Gabriel took a handful of mud from the sea and stopped his mouth (Ṭabari and Ibn al-Athir). Gabriel boasted later of this act of his while talking to Mohammed, alleging as his motive his fear lest God might have been moved to have pity on Pharaoh.

In suras ii. 60, 87; iv. 153; and vii. 170 God is said to have threatened to overturn the mountain upon the Israelites if they did not accept the Law (comp. 'Ab. Zarah 2b; Shab. 88a). The Arabic commentators expand the incident. Israel proved refractory, whereupon Gabriel was bidden to lift up the mountain and hold it suspended over the heads of the people. Gabriel appeared to Moses to inform him that Og the giant (see GIANTS) had been rendered helpless by being caught in his own trap (a huge stone), and encouraged him to slay the king (Ṭabari, "Chroniques," transl. Zotenberg, i. 391). Gabriel was also the messenger that announced to David, who would not be consoled on account of his sin, that God had forgiven him. It was Gabriel who gathered all the demons from their various haunts, bringing them to Solomon, their new master (Ḳazwini, i. 351 *et seq.*).

In another account (Al-Kisa'i's "Histories of the Prophets") the birds are assembled by Gabriel to do homage to Solomon. It was he who brought Solomon's magic signet-ring from paradise, with the inscription "La Allah illa Allah wa-Muḥammad Rasul Allah"; the ring had once belonged to Adam. This event took place on a Friday, the 27th day of Muḥarram. Gabriel's feats are also preserved in the popular literature of the Moriscos (see Grünbaum, "Gesammelte Aufsätze zur Sprach- und Sagenkunde"). Gabriel acted as notary at the wedding of Adam and Eve (comp. Gen. R.). He induced Abraham to take Hagar to wife. He substituted the ram for Isaac on Moriah, and bade Abraham desist from his purpose of sacrificing his son. He announced to Sarah the birth of Isaac. Joseph, while in prison, was instructed by Gabriel that in the absence of water he might use sand to perform his ritual ablutions. In the "Legendas de José, Hijo de Jacob" (1888) Gabriel is mentioned as protecting Joseph when tempted by Potiphar's wife, the angel assuming the guise of Joseph's father. This occurs also in the works of Arabic authors (Ṭabari, Zamakh-

Intercedes for Isaac.

shari). Joseph's coat, according to Zamakhshari and Baiḍawi, was a present from Gabriel, who had woven it of celestial silk for Abraham when he was about to be thrown into the furnace; Abraham had given it to Isaac; Isaac to Jacob, who bound it like an amulet round Joseph's neck. Gabriel appeared before Joseph, unrolled it, and clothed him with it. Gabriel, by telling a little child in a cradle to arise and testify in Joseph's favor, established the latter's innocence when accused by Potiphar's wife. Joseph was in prison so long because, as Gabriel informed him, he had put more faith in men than in God. According to the commentators, Gabriel prevented Joseph from writing to his father because Jacob was to be punished for a former trifling sin (comp. B. Ḳ. 50a).

GABRIEL B. JUDAH LÖW. See ESKELES GABRIEL BEN JUDAH LÖW.

GABRIEL BEN JUDAH OF VITRY: Italian physician; flourished in the sixteenth century. His name seems to indicate that he was a native of Vitry, France, but Gross ("Gallia Judaica," p. 197) thinks that "Vitry" here stands for "Vittoria" in Italy. In 1530 he lived at Sienna, in 1552–63 in Castro. Gabriel ben Judah translated into Hebrew several medical works. The "Liḳḳuṭe Refu'ot," translated by Gabriel ben Judah of Vitry (see Benjacob, "Oẓar ha-Sefarim," p. 266), is supposed by Steinschneider ("Hebr. Uebers." p. 782) to be identical with the מבוא ארנבט, a Hebrew translation of Arnauld of Villanova's "Tabula Super Vita Brevis," credited (erroneously?) to Gabriel of Milhaud. A manuscript in the Bodleian Library (Neubauer, "Cat. Bodl. Hebr. MSS." No. 2316, 3) contains the following extracts from Gabriel's translations and notes: (1) on the polishing of precious stones; (2) 299 from the "Sefer ha-Eḥad" of Ibn Ezra; (3) from the work of the Roman physician Nicolao; (4) from the book "Ya'ar Ḥadash" and from Hieronymus Cardan; (5) on the diseases of the inner parts of the body, quoting Dioscorides, Galen, Al-Razi, and Ibn Zuhr.

BIBLIOGRAPHY: Gross, *Gallia Judaica*, pp. 197, 345; Steinschneider, *Hebr. Uebers.* pp. 782, 843, 965.

G. M. SEL.

GABRIEL OF MILHAUD: French physician and translator; flourished in the second half of the sixteenth century. He translated, in 1583, under the title "Mebo Arnabat," Arnauld of Villanova's dissertation on Hippocrates' maxim "Ars longa, vita brevis" (Neubauer, "Cat. Bodl. Hebr. MSS." No. 2133, 7.) It was annotated by the translator, extracts from the notes being given by Steinschneider in the Munich Catalogue (p. 95). Steinschneider (Cat. Munich, p. 206) identifies Gabriel with Gabriel Cohen of Lunel, who is mentioned in a medical work (Neubauer, *ib.* No. 2285), an identification doubted by Neubauer and Gross.

BIBLIOGRAPHY: Neubauer, in *R. E. J.* ix. 216; Steinschneider, in Virchow's *Archiv*, xl. 93, 97; idem, *Hebr. Uebers.* p. 782; Gross, *Gallia Judaica*, p. 344.

G. I. BR.

GABRIEL B. REUBEN ISRAEL HA-KOHEN. See KOHN, GABRIEL.

GABRILOVITCH, OSSIP: Russian pianist; born in St. Petersburg Feb. 7, 1878. When only four years old he evinced a remarkable talent for music, and before he had reached the age of ten he entered the St. Petersburg Conservatorium, his first master being Anton Rubinstein. When about eleven he played a Mozart concerto with orchestral accompaniment, and at sixteen had taken all the Conservatorium prizes for which he was eligible. He then (1894), at Rubinstein's suggestion, went to Vienna to study under Leschetizky, with whom he remained for two years, performing at concerts in Gratz, Vienna, and Berlin. Later he studied composition under Navratil.

In the winter of 1900–01 Gabrilovitch visited the United States, and on his return to Europe performed in London (Richter concerts), Germany, Austria (Vienna Philharmonic concerts), Switzerland, and Holland. He then made several tours in Russia, and subsequently spent six months in Paris, where he appeared with all the principal orchestras. In the autumn of 1902 he again went to the United States, inaugurating his tour by a performance at the Worcester (Mass.) musical festival.

Gabrilovitch possesses a fine technique, and produces a tone remarkable for its breadth and volume. But he has his powers well under control; and while traces of the influence of his mentor, Rubinstein, are naturally to be found in his playing, he renders with equal ability and feeling such widely differing compositions as Tschaikowski's concerto in B-flat minor and that of Liszt in E-flat. Among Gabrilovitch's compositions are: "Caprice-Burlesque"; a gavot; "Petite Serenade"; and "Melodie Orientale."

H. R. A. P.

GAD: 1. The seventh of Jacob's sons, the first-born of Zilpah, himself the father of seven sons (Gen. xxx. 10, 11; xlvi. 16; Num. xxvi. 15 *et seq.*). The name means "[good] fortune."

2. Biblical Data: Tribe descended from Gad, the seventh son of Jacob. In the desert it was credited with 40,000 men able to bear arms (Num. i. 24 *et seq.*, ii. 15, xxvi. 18). Rich in flocks, it occupied, with Reuben and half of Manasseh, the district east of the Jordan once belonging to the kings of Heshbon and Bashan and partly settled by Ammonites (Num. xxxii. 1, 29, 33; Deut. iii. 12, 18; Josh. xiii. 25). Hence the "land of Gad" (I Sam. xiii. 7), on the Jabbok (= "brook of Gad"; II Sam. xxiv. 5; see GILEAD). Among its cities were Ramoth, Jaezer, Aroer, Dibon (Num. xxxii. 34 *et seq.*; Deut. iv. 43; Josh. xx. 8). Gad was a warlike tribe, and took part in the conquest of the trans-Jordanic regions (Gen. xlix. 19; Deut. xxxiii. 20, 21; Num. xxxii. 6 *et seq.*). Among David's men at Adullam, Gad was well represented (I Chron. xii. 8; I Sam. xxii. 1, 2). Though Gad at first remained loyal to Ish-bosheth, it later transferred its allegiance to David (II Sam. ii. 8 *et seq.*, xvii. 24 *et seq.*). Jeroboam built the fortress Penuel to keep the men of Gad in check (I Kings xii. 25). Later, under Uzziah and Jotham, Gad was joined to the kingdom of Judah (I Chron. v. 16; comp. Schrader, "K. B." ii. 27). The Ammonites

seem to have ultimately reconquered the territory of Gad (Jer. xlix. 1). E. G. H.

——**In Rabbinical Literature:** Gad was born on the tenth of Ḥeshwan, and lived 125 years (Ex. R. i. 5; Yalḳ., Ex. 1). He was called "Gad" after the manna, which was like coriander (גד; Ex. R. *l.c.*). Because of his great strength he was not presented by Joseph to Pharaoh, lest the latter should appoint him one of his guards (Gen. R. xcv. 4). Foreseeing that the children of Gad would devote themselves to the breeding of cattle, Jacob ordered that in carrying his bier Gad should walk on the southern side, whence came the beneficent rains and fructifying dew (Num. R. iii. 12). The tribe of Gad occupied the southern side of the camp also (Num. R. *l.c.*). They were neighbors of Korah because, like him, they were quarrelsome. Their standard was of red and black, with a camp painted on it (Num. R. ii. 6). According to some, the name of Gad was inscribed on the agate in the breastplate of the high priest ("Shalshelet ha-Ḳabbalah," p. 13), according to others on the ligure (Samuel Ẓarẓa, "Meḳor Ḥayyim" to Ex. xxviii.), while others declare it to have been cut on the amethyst, which has the virtue of infusing martial courage (Ex. R. xxxviii.; Baḥya ben Asher's commentary, *ad loc.*). The tribe of Gad is blamed for having chosen the "other side" of the Jordan, the verse "Riches kept for the owners thereof to their hurt" (Eccl. v. 12) being applied to them (Gen. R. l. 11). When they arrived at the Jordan and saw the fertility of the land, they said: "One handful of enjoyment on this side is better than two on the other" (Lev. R. iii. 1). However, because they crossed the river to help their brethren in the conquest of Palestine, just as Simeon did when he took his sword and warred against the men of Shechem, they were found worthy to follow the tribe of Simeon at the sacrifices on the occasion of the dedication of the Tabernacle (Num. R. xiii. 19). Moses was buried in the territory of Gad (Soṭah 13b; Yalḳuṭ, Wezot ha-Berakah, p. 961). According to some, Elijah was a descendant of Gad (Gen. R. lxxi.). The tribes of Gad and Reuben were the first that went into exile (Lam. R. i. 5).

E. G. H. I. Br.

——**Critical View:** The inscription on the Moabite Stone, l. 10, reports that "the man of Gad had dwelt since days of old in the land of Ataroth; then the King of Israel built for himself Ataroth." According to this, the Moabites distinguished between Gad and Israel, regarding the former as old inhabitants of the parts east of the Jordan. The same notion that Gad is not of pure Israelitish stock underlies the Biblical genealogy of the tribe's eponym. He is the son of Zilpah, Leah's handmaid, not a full brother to Reuben and the other northern tribes. The geographical notes on Gad are for the same reason diverse and divergent. The city of Dibon is designated in Num. xxxiii. 45 as belonging to Gad (with Ataroth and Aroer in Num. xxxii. 34 *et seq.*), but in Josh. xiii. 15 *et seq.* this same territory, north of the Arnon, belongs to Reuben. The boundaries of Gad in Josh. xiii. 24–27 (P) are also different. These and other discrepancies show a wide latitude and indefiniteness in the use of "Gad" as a territorial designation. Gilead sometimes includes Gad (among other passages see Judges v. 17), though at times it denotes a country north of Gad, and again a country south of Jaazer (II Sam. xxiv. 5; Josh. xiii. 24 *et seq.*). These facts seem to indicate that "Gad" was originally the name of a nomadic tribe, and was then applied to the territory which this tribe passed over and settled in. The gradual extension of the use of the name shows on the whole that the tribe coming from the south pushed on steadily northward (II Sam. xxiv. 5; comp. I Chron. v. 11, 16). The territory was never secure from invasion and attacks. To the south it was exposed to the Moabites, to the north to the Arameans from Damascus, and later to the Assyrians. Tiglath-pileser III. annexed this region about 733–732 B.C., and enslaved a part of the inhabitants (II Kings xv. 29; I Chron. v. 26). Ezekiel assigns to Gad the southern boundary in his territorial scheme (Ezek. xlviii. 27, 28). The suggestion has been made that the name of the tribe is derived from Gad, the god of luck.

E. G. H.

3. A prophet, "the seer of David." The first appearance of Gad occurred when David took refuge from Saul in a stronghold in Mizpeh of Moab (I Sam. xxii. 5). Gad advised him to leave it for the forest of Hareth. He reappeared late in the life of David, after the latter's numbering of the people, giving him the choice of one of three punishments, one of which God was about to inflict upon the Jews (II Sam. xxiv. 11–14; I Chron. xxi. 9–13). Attached to the royal house, Gad was called "David's seer" (II Sam. xxiv. 11; I Chron. xxi. 9). He also wrote a book of the acts of David (*ib.* xxix. 29), and assisted in arranging the musical service of the house of God (II Chron. xxix. 25). M. Sel.

4. Name of the god of fortune, found in Isa. lxv. 11, along with Meni, the name of the god of destiny. The passage refers to meals or feasts held by Hebrews in Babylonia in honor of these deities. Nothing is known of any Babylonian divinity of the name of Gad, but Aramean and Arabic equivalents show that the same god was honored among the other leading Semitic peoples. The root-verb means "to cut" or "to divide." Thence comes the idea of portioning out, which is also present in the word "Meni," the name of the kindred deity.

"Gad" is perhaps found also in Gen. xxx. 11, where the ketib reading means "by the help of Gad!" the exclamation of Leah at the birth of Zilpah's son. Indeed, it is quite possible that this narrative arises from a tradition connecting the tribal eponym with the Deity Himself. How wide-spread the cult of Gad, or Fortune, was in the old Canaanitish times may be inferred from the names "Baal-gad," a city at the foot of Mount Hermon, and "Migdal-gad," in the territory of Judah. Compare also the proper names "Gaddi" and "Gaddiel" in the tribes of Manasseh and Zebulun (Num. xiii. 10, 11). At the same time it must not be supposed that Gad was always regarded as an independent deity. The name was doubtless originally an appellative, meaning "the power that allots." Hence any of the greater gods supposed to favor men might be thought of as the giver of good fortune and be worshiped under that appellative. It is possible that Jupiter may have been the "Gad" thus honored.

Among the Arabs the planet Jupiter was called "the greater Fortune," while Venus was styled "the lesser Fortune." If the same usage prevailed in earlier Semitic days Meni should perhaps also be identified with Venus.

Gad, the god of fortune, is frequently invoked in Talmudic (magic) formulas of good will and wishes; for instance, in Shab. 67b ("Gad eno ella leshon 'abodat kokabim"; comp. Targ. Pseudo-Jonathan to Gen. xx. 10, 11). The name is often synonymous with "luck" (Yer. Ned. iv. 38d; Yer. Shab. xvi. 15d). Gad is the patron saint of a locality, a mountain (Ḥul. 40a), of an idol (Gen. R. lxiv.), a house, or the world (Gen. R. lxxi.). Hence "luck" may also be bad (Eccl. R. vii. 26). A couch or bed for this god of fortune is referred to in Ned. 56a.

GADARA.—Biblical Data: A Hellenistic city, situated southeast of the Sea of Gennesaret. It was rebuilt by Pompey, and afterward given to Herod the Great. After his death it became a free city under Roman sovereignty (Josephus, "Ant." xiv. 4, § 4; xv. 7, § 3; xvii. 11, § 4). At the beginning of the war of liberation the Jews attacked the heathen population, which act was soon afterward fiercely revenged (Josephus, "B. J." ii. 18, §§ 1, 5). The site of this city is marked by the ruins of Muḳes, among which are found remains of theaters and a temple. This Gadara is often identified with the Gadara referred to by Josephus ("B. J." iv. 7, § 3) as the capital of Peræa. Schlatter, however, is right in declaring the identification unfounded, and referring the description in Josephus ("B. J." iv. 7, §§ 3 *et seq.*) to the southern valley of the Jordan.

——**In Rabbinical Literature:** The Talmudic equivalent of "Gadara" is "Gadar" (גדר); situated on a mountain, it was one of the stations on which fires were lighted to announce the new moon. At its base below were thermal springs. It was supposed to have been fortified by Joshua ('Ar. ix. 6), and it was the seat of an important school (Ta'an. 20a). According to Midr. Esth. i. 2, it was also the seat of a tribunal. The place is mentioned in certain decisions on the Sabbath, its inhabitants having been permitted to walk on that day to Ḥamtan ("the springs") and to return, while those of Ḥamtan were not allowed to visit Gadar ('Er. v. 7).

GADARENES: Inhabitants of Gadara, known from an alleged miracle of Jesus (Matt. viii.; Mark v.; Luke viii.) in which he transferred the demons afflicting a man to a number of swine, that thereupon rushed down a steep hill and perished. From the readings of the best texts and from the unsuitability of the locality around Gadara it appears that the proper reading should be "Gerasenes" and the place located at Karsa, on the left bank of the Wadi Samak, near the sea of Galilee. A discussion occurred between Professor Huxley and Mr. Gladstone in "The Nineteenth Century" for 1892 as to the morality of the act, the critical questions being whether (1) Gerasenes were Jews; and (2) if so, was it lawful for them to keep swine? As regards the first question, it would appear that that section of the country was chiefly inhabited by pagans in the first century, and Gerasa is at any rate included by Schürer among the Hellenistic cities ("Geschichte," ii. 141–144). As to the second question, there is no doubt of the illegality, from a ritual point of view, of Jews keeping swine (B. B. vii. 7). The Gemara on the passage gives a historical foundation for the practise in the times of Aristobulus.

GADEN, STEPHAN (DANIEL) VON (known also as **Danila Yevlevich, Danila Ilyin,** and **Danilo Zhidovinov**): Russian physician at the court of Moscow under the czars Alexis Mikhailovich and Feodor Alekseyevich; born in Poland, of Jewish parents, in the first quarter of the seventeenth century; killed at Moscow during the first uprising of the Stryeltzy ("sharpshooters") in 1682. Von Gaden was sent to Moscow from Kiev by the boyar Vassili Vassilyevich Buturlin in 1657. Here he began (1659) his career as a barber-surgeon ("feldscher"). He was soon advanced to the position of surgeon, with a salary of forty rubles per annum and a monthly allowance of five rubles for board. Owing to his popularity he was appointed by the czar as assistant physician (April 1, 1667), and as physician in ordinary (April 4, 1672). Though he had not studied medicine at any foreign university, he received a doctor's diploma from the czar, with an increase of salary to one hundred and thirty rubles per annum and a monthly allowance of fifty rubles. The different names under which he is mentioned are explained by the fact that he repeatedly changed his religion—from the Jewish to the Roman Catholic, from the Roman Catholic to the Lutheran, finally entering the Greek Orthodox Church.

According to Kilburn, Von Gaden was the most popular physician at the court of Moscow: "In Moscow befinden sich itziger Zeit 5 Aerzte und Doctor Daniel Jeflowitz, dieser wird bei Hofe am meisten gebraucht, ist ein Jude von Geburt, wurde hernach Papistisch, alsdann Evangelisch und itzo ist er Griechischer Religion." Besides the diploma, Czar Alexis granted Von Gaden many favors. In 1669 he was permitted to travel to Smolensk (then belonging to Poland) to see his mother, a privilege which was seldom granted to foreigners. On this occasion the czar presented him with sable for his wife. In 1670 his brother-in-law, Judah (Egor Isayev), arrived in Moscow, and in 1674 his mother. Owing to Von Gaden's influence the number of Jews in Moscow increased considerably. They settled in the German suburb. Samuel Collins, another physician at the court of the czar, relates that "the Jews have for some time spread very rapidly in Moscow and at the court, enjoying the protection of the court physician of Jewish birth."

Among Von Gaden's friends was the boyar Matveyev (the only enlightened boyar of that time, with whom Von Gaden used to read books). It was probably owing to this friendship that he shared the terrible fate of his protector. After the death of Czar Feodor Alekseyevich (May 7, 1682) the Stryeltzy rose against the boyars, killing among others Naryshkin, Yazykov, and Matveyev, who were accused of a conspiracy against the life of the czar, and the physicians Von Gaden and Gutmensch, who were accused of having poisoned the czar. Both physicians and Gutmensch's son were killed in a terrible manner. According to Sumarokov, they were taken by the Stryeltzy to the "Red Place," spitted on lances, and hewed to pieces with axes. He thinks that the physicians fell victims to the hatred against foreigners, especially Germans.

H. R. M. R.

GADFLY: Marginal rendering in the Revised Version of the Hebrew "ḳerez" (Jer. xlvi. 20), where "destruction" is given in the texts of both English versions. For arguments in favor of the former rendering, now generally adopted, see the various Hebrew lexicons and Bible commentaries, and Field, "Origenis Hexaplorum quæ Supersunt sive Veterum Interpretum Græcorum in Totum Vetus Testamentum Fragmenta." The Septuagint has *ἀπόσπασμα*; the Vulgate "stimulator." Some, comparing Micah ii. 13, have suggested "porez" (invader) instead of "ḳerez" (Cheyne and Black, "Encyc. Bibl." ii. 1588), but there seems to be no sufficient reason for a textual emendation.

E. G. H. H. H.

GAFFAREL (GAFFARELLUS), JACOB: French Christian rabbinical scholar; born at Mannes, Provence, 1601; died at Sigonce 1681. He devoted himself to the study of mysticism, especially of Hebrew cabalistic works, though his own in that field are unreliable. He wrote "Yom YHWH: Dies Domini, sive de Fine Mundi ex Hebr. Eliha ben David in Lat. Conversi" (1629); and "Index Codicum Cabbalisticorum MSS., Quibus Joann. Pic. Mirandulanus Comes Usus Est" (1651). During one of his numerous journeys he met at Venice (1633) Leon Modena, whose "Historia Dei Riti Ebraici," etc., he published at Paris (1637), without the consent of the author, and for which he wrote a preface.

GAGIN: Rabbinical family of Castilian origin which emigrated to Morocco in 1492, and in the eighteenth century to Palestine. The oldest known member of this family is **Ḥayyim Gagin,** who about 1492 left Castile and settled in Morocco. He was the author of "'Eẓ Ḥayyim," in which work he recounts his dissensions from his rabbinical contemporaries. The following are the more important members living in the nineteenth and present centuries:

Abraham Gagin: Son of Solomon Moses Hai Gagin; now living in Jerusalem. With his brother Isaac he is joint author of "El Cuento Maravilloso" (Jerusalem, 1886), a collection of moral stories in Judæo-Spanish, with rabbinic characters.

BIBLIOGRAPHY: Ḥazan, *Ha-Ma'alot li-Shelomoh*, pp. 32, 37; Kayserling, *Bibl. Esp.-Port.-Jud.* p. 48.

M. FR.

Ḥayyim Abraham Gagin: Chief rabbi of Jerusalem; died in that city May 10, 1848. He wrote: "Minḥah Ṭehorah," novellæ on the treatise Menaḥot (Salonica, 1825); "Ḥukḳe Ḥayyim," responsa (Jerusalem, 1842). He edited and wrote the prefaces to "Sefer ha-Taḳkanot" (*ib.* 1842); the "Dibre Shalom" of R. A. Mizraḥi (*ib.* 1843); the "Ḳedushat Yom-Ṭob" of Yom-Ṭob Algazi (*ib.* 1843); "Ḳontres Emet me-Ereẓ Tizmaḥ," a defense, by Z. H. Lehren of Amsterdam, of the Amsterdam committee at Jerusalem against charges of mismanagement in the distribution of the "halukkah" (Amsterdam).

Ḥayyim Palagi wrote a dirge on Gagin's death.

M. SEL.

Isaac Gagin: Son of Solomon Moses Hai Gagin; now residing in Jerusalem. Joint author with his brother Abraham Gagin of "El Cuento Maravilloso."

Solomon Moses Hai Gagin (known also under his initials ש"ק"ח): Son of Ḥayyim Abraham Gagin; he lived at Jerusalem in the middle of the nineteenth century. He published two Hebrew works: (1) "Yismaḥ Leb," responsa, and (2) "Samaḥ Libbi," sermons (Ḥazan, "Ha-Ma'alot li-Shelomoh, p. 32).

D. M. FR.

GAGNIER, JOHN: French Christian Orientalist; born at Paris about 1670; died at Oxford March 2, 1740. Gagnier devoted himself early to the study of Oriental languages, particularly of Hebrew and Arabic. For a short time a priest of the Roman communion, he later embraced Protestantism, and wrote a violent denunciation of the Roman Church under the title "L'Eglise Romaine Convaincue de Dépravation, d'Idolatrie et d'Antichristianisme" (The Hague, 1706). In 1717 Gagnier became professor of Hebrew and Arabic in the University of Oxford. Among his writings were: a paper on Samaritan medals, in "Journal de Trévaux," 1705; a Latin translation of "Yosippon," Oxford, 1706; and tables for the conjugation of Hebrew verbs, *ib.* 1710. He contributed much information about Bodleian Hebrew manuscripts to Wolf for his "Bibliotheca Hebræa."

J. M. SEL.

GAI, SOLOMON: Italian scholar and Hebraist; born at Mantua 1600; died there Aug., 1638. Gai is chiefly known as the correspondent and friend

of Johannes Buxtorf the Younger. In a letter which he wrote to Buxtorf from Mantua (Nov. 6, 1637), Gai declared that, owing to the war, he had emigrated to Botzen, a town in Tyrol, where he had become the tutor of the two sons of a rich man named Jacob Moravia. At Botzen he studied German, and after a stay of five years and a half returned to Mantua. It was Buxtorf's Latin translation of the "Morch" which won Gai's admiration. Attributing the translation to Buxtorf the Elder, Gai wrote to the son a Latin letter (Aug. 6, 1637) full of expressions of admiration for the father. Buxtorf undeceived Gai, telling him that he himself was the translator, and sent him his dissertation "Diatribe" as a present. Gai wrote to him another letter in Latin, with a Hebrew introduction (Nov. 6, 1637), drawing his attention to certain works which had not come to Buxtorf's knowledge. Buxtorf subsequently commissioned Gai to purchase Hebrew books for him. Gai insisted particularly on obtaining from Buxtorf his lexicons, as he himself contemplated writing a lexicon in collaboration with a cleric to whom he was giving Hebrew lessons.

GAILLAC (Latin, **Galliacum**): Small town in the department of Tarn, France; mentioned as גאלק in the Responsa (No. 47) of Nissim ben Reuben Gerundi. Jews were living there as early as the thirteenth century, being under the jurisdiction both of Count Alphonse of Poitiers and of the Abbot of Gaillac. In 1266 a dispute arose between the count and the abbot regarding the taxes paid by the Jews, the abbot as seignior claiming a part of them. On July 19, 1269, Alphonse of Poitiers renewed the regulations of the Lateran Council, under which the Jews within his territory were obliged to wear the badge (a wheel) on the outside of their garments. Some, however, could purchase exemption therefrom. In 1291 King Philip the Fair fixed the sum to be paid by each of the prominent Jews in the seneschal's dominions of Carcassonne and Béziers. The Jews of Gaillac, "Abbraye [Abraham] and his brother," were taxed 20 livres, as "the king's Jews." The community of Gaillac was wiped out at the time of the persecutions of the Pastoureaux (1320).

G. S. K.

GAJO, MAESTRO (ISAAC BEN MORDECAI): Physician to Pope Nicholas IV. or Boniface VIII. at the end of the thirteenth century. For him Nathan of Cento translated into Hebrew an Arabic work by 'Ammar ibn Ali al-Mauṣili on the cure of diseases of the eye. Gajo was held in great esteem by the physicians Zerahiah ben Shealtiel Ḥen and Hillel b. Samuel of Verona. The latter wrote to Gajo two long letters (see "Ḥemdah Genuzah," pp. 18–22) on the dispute concerning Maimonides' doctrines, which Gajo followed with interest.

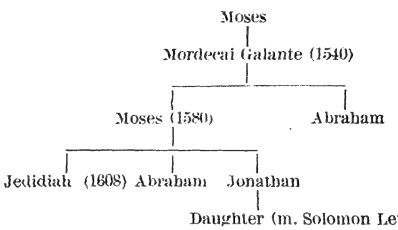
GALANTE: Jewish family which flourished at the beginning of the sixteenth century in Rome, and the head of which, Mordecai, was a Spanish exile of the Angel family. His courteous manners won for him from the Roman nobles the surname "Galantuomo" (gentleman), a name which the family retained. About this time the family settled in Palestine, where it produced authors and other celebrities. M. FR.

The Galante pedigree is as follows:



Abraham ben Mordecai Galante (Angelo): Italian cabalist; born at Rome at the beginning of the sixteenth century; died 1560. Abraham, like his father and his brother Moses, rabbi of Safed, is represented by his contemporaries as a man of high character who led a holy life (comp. "Ḳab ha-Yashar," ch. xv.). He was the author of the following works: "Ḳin'at Setarim," a commentary on Lamentations, based upon the Zohar; it was edited by his son Samuel in the collection "Ḳol Bokim" (Venice, 1589); "Yeraḥ Yakar," a commentary on the Zohar, the first part of which (Genesis) was abbreviated by Abraham Azulai and included in his "Zohore Ḥammah"; "Zekut Abot," a commentary on the sayings of the Fathers, mentioned by Hananiah of Monselice in his commentary on the "Pirḳe Shirah." Galante was also the author of halakic decisions, which are still extant in manuscript. Being wealthy, he erected a splendid mausoleum over the tomb of Simon ben Yoḥai at Meron, which is still admired.

BIBLIOGRAPHY: Azulai, *Shem ha-Gedolim*, s.v.; Michael, *Or ha-Ḥayyim*, p. 89; *Orient. Lit.* vi. 211; Vogelstein and Rieger, *Gesch. der Juden in Rom*, p. 86.

K. I. BR.

Mordecai Galante: Chief rabbi of Damascus; died in 1781; author of "Gedullat Mordekai," a collection of sermons preserved in manuscript at Damascus (Ḥazan, "Ha-Ma'alot li-Shelomoh," p. 50).

M. FR.

Moses Galante (the Elder): Son of Mordecai; born about the middle of the sixteenth century; died at Safed 1608. He was a disciple of Joseph Caro, and was ordained by him when but twenty-two years of age. He wrote: sermons for a wedding, for Passover, and for a thanksgiving service, printed with the younger Obadiah Bertinoro's commentary on Esther (Venice, 1585); "Miftaḥ ha-Zohar," index of Biblical passages found in the Zohar and additions from old manuscripts (*ib.* 1566); "Ḳehillat Ya'aḳob," cabalistic commentary on Ecclesiastes (*ib.* 1577–78); Responsa, with additions by his son **Jedidiah** (*ib.* 1608).

BIBLIOGRAPHY: Steinschneider, *Cat. Bodl.*; Azulai, *Shem ha-Gedolim*.

Moses Galante (the Younger): Son of Jonathan and grandson of Moses Galante the Elder; born 1621; died at Jerusalem Feb. 4, 1689. He wrote: "Zebaḥ ha-Shelamim," a harmonization of contradictory Biblical passages and of Biblical with Talmudical statements (edited by his grandson Moses Ḥagis, Amsterdam, 1707–08), and "Ḳorban Ḥagigah," halakic and cabalistic novellæ (Venice, 1714). He was called מגן with reference to the initials of his name. Some of his responsa are found in the works of contemporaries, and a volume of his responsa exists under the title "Elef ha-Magen," but has never been published. Hezekiah da Silva was among his disciples.

Moses Galante: Chief rabbi of Damascus; died 1806; son of Mordecai Galante. He was the author of "Berak Mosheh," responsa, Leghorn, 1789 (Ḥazan, "Ha-Ma alot li-Shelomoh").

D. M. Fr.

GALATIA: An inland district of Asia Minor, and, after 25 B.C., a province of the Roman empire. There was a Jewish settlement there, which may have been founded by Antiochus the Great, who sent many Jewish families to Asia Minor as colonists. A proof of the existence of Jews in Galatia, according to many, is given by an edict of Augustus, which, according to Josephus ("Ant." xvi. 6, § 2), was published in Ancyra, the metropolis of Galatia. But the reading of the word "Ancyra" is doubtful. A better proof may be had from some inscriptions found in Galatia relating to Jews ("C. I. G." No. 4129; "Bulletin de Correspondance Hellénique," vii. 1883; comp. "R. E. J." x. 77). R. Akiba, who is said to have been a great traveler, speaks of "Galia" (גליא), which is generally identified with "Galatia" (R. H. 26a). A teacher named Menahem is said to have come from "Galia" (Tosef., 'Er. viii.; Tosef., Ber. iv. 4; Ket. 60a). The chief proof, however, of the existence of Jews in Galatia is the fact that St. Paul sent thither a general epistle known as the "Epistle to the Galatians." There is a strong disagreement among scholars as regards the parts of Galatia where these correspondents of St. Paul lived. The older opinion was that they were to be found in the northern cities of Galatia, but recent scholars, especially Professor Ramsay, hold that they lived in cities of South or New Galatia, which are actually mentioned in the Acts of the Apostles. The progress of Christianity in Galatia, however, may explain the fact that the Jews of this province are never heard of in later history. It remains to be stated that the "Galatians" of I Macc. viii. 2 and II Macc. viii. 20 were Gauls.

GALEN (GALENUS CLAUDIUS): Greek physician and philosopher; born at Pergamus, Mysia, about 131; died about 200. Eclipsed by those of Aristotle, Galen's philosophical works were not held in high esteem by the Jews. Maimonides cites them only when they are in accordance with his own views, as, for instance, with regard to the impossibility of proving the eternity of matter ("Moreh Nebukim," ii. 15). Once he severely criticizes Galen, declaring that outside the field of medicine he is no authority ("Pirḳe Mosheh," xxv.), this stricture being called forth by the following utterance by Galen concerning the Mosaic conception of the omnipotence of God: "The difference between the Greek philosophers and Moses is this: In order that matter may be put in order it suffices for Moses that God should wish matter to be arranged. He believes that everything is possible with God, even the conversion of ashes into a horse or an ox; while we believe that there exist things with which, being naturally impossible, God does not interfere; He chooses only the best between possibilities" ("De Substantia Facultatis Naturæ," ed. Kuhn, iv. 760). Falaquera also shows slight respect for Galen's philosophy, affirming that in his later years the great physician wrote a work betraying ignorance of physics ("Mebaḳḳesh," p. 33).

His Philosophy Criticized by Maimonides.

But if in the domain of philosophy Galen's authority was contested, he reigned supreme in the field of medicine. Maimonides himself helped largely to propagate Galen's medical works by publishing a summary of sixteen of them, which were, so to speak, canonized by the Alexandrian school and by the Arabs. Maimonides was followed by many other Jewish physicians who paraphrased or translated Galen's works from Arabic versions (chiefly made by Ḥunain ibn Isḥaḳ) and from the Latin. These paraphrases and translations, the greater part of which are still extant in manuscript in various European libraries, are as follows:

חכמה קטנה ("Ars Parva"), with a commentary by Ali ibn Riḍwan, translated, according to Paris MS. No. 1114, by Samuel ibn Tibbon in 1199. The same work was translated anonymously, under the title המאסף לכל המחנות, between 1197 and 1199.

הדולאים והמקרים, a paraphrase by Zerahiah ben Isaac ben Shealtiel of Rome (1277–94), in four books: (1) on the diversity of maladies; (2) on their causes; (3) on the variety of symptoms; and (4) on the causes of the symptoms.

קטאגנים, three treatises on the compounded medicaments according to their species, by the same.

ס'בחראן, on the crisis, by Solomon Bonirac of Barcelona (1300–1350).

On bleeding, by Kalonymus ben Kalonymus, in 1308.

בחקנא ובקולנג ("De Clysteriis et Colica"), by the same.

בהנהגת הנער הנכפה, on the regimen of the epileptic boy.

ס'רוץ מזג מההלך ("De Malitia Complexionis Diversæ"), by David ben Abraham Caslari (1280–1337).

הקבוצים לאכסנדריים, summaries of the Alexandrian school, by Simson ben Solomon. These summaries contain the following treatises: כתות הרפואה, on the medical sects; מלאכת הרפואה or מלאכה קטנה ("Ars Parva"); ברדפק, on the pulse; פרקים מס' הישהן, chapters from the treatise on the urine; הצמוק, on marasmus; אל אגלוקן בטבע, on nature; ביסודות, on the elements according to Hippocrates; במזג, on the temperament; בכחות חטבעיות, on the faculties of nature; הנהוח, on anatomy; העלו והמקרים, on maladies and their symptoms; האברים הכואבים, on a knowledge of diseases of the internal organs; במיני הקדחות, on the various kinds of fevers; בבחראן, on crisis; בימי הבחראן, on critical days; בהחבולות הרפואה, on the art of healing; הנהגת הבריאות, on hygiene; and במרה השחורה, on melancholy.

Translations of His Medical Works.

The following supposititious works of Galen were also translated into Hebrew:

ס' האם, on the uterus ("gynæceas").
ס' אסור הקבורה, against speedy interment, by Judah al-Ḥarizi.
ס' הנפש, on the soul, by the same.
A medico-astrological treatise ("Prognosticum de Decubitu ex Mathematica Scientia"), paraphrased by Leon Joseph.
פישיאונארי ("Passionarios").
A summary of various maladies, their natures and symptoms, and the remedies for them, by Abraham ben Shem-Ṭob.
ליקוטי סגולות ורפואות, a collection of remedies.

Of Galen's commentaries to the works of Hippocrates the following were translated into Hebrew: on the aphorisms, by Nathan ha-Meati; on three treatises of the Pronostics, probably by the same; on air, water, and countries, by Solomon ha-Meati.

In the twenty-sixth chapter of the "Healing of the Soul," by Joseph ibn Aknin of Barcelona (12th cent.), Galen's works are mentioned as forming a part of the regular school curriculum (Güdemann, "Das Jüdische Unterrichtswesen," etc., p. 100). He is also cited as an authority on ritual responsa; *e.g.*, by Isaac b. Abraham Laṭif (13th cent.; see "Sammelband," i. 51, 53; Mekize Nirdamim, 1885).

G. I. Br.

GALICIA, Austria: Province of Austria; acquired at the partition of Poland, 1772, and which, except for some small territorial changes, has remained such since the Vienna Congress of 1815.

Statistics.

The census of 1900 showed the number of the Jews in Galicia to be 811,371 in a total of 7,315,939 inhabitants, or about 11 per cent. Notwithstanding heavy emigration, their number has increased steadily in proportion to the total population. The census of 1850 showed 317,227 Jews among 4,734,427 inhabitants, in 1827 there were 246,147 among 4,382,383, and the first census made by the Austrian government in 1789 showed 178,072 among 3,039,391 inhabitants. Most of the Jews live in cities, and in seven of these they form the majority of the population—in Brody, about three-quarters.

While the great masses receive no other education than that which the ḥeder affords, the number of Jews in the high schools, in the universities, and in the professions is far above their proportion to the population. Thus in 1890, Jewish scholars in the gymnasiums aggregated 18 per cent; in the realschools, 21 per cent. Among the physicians there were 25 per cent Jews, and among the lawyers 48 per cent. Even among the veterinary surgeons and the druggists the number of Jews is somewhat above their proportion to the population, notwithstanding the fact that the opportunity to practise these professions depends largely on governmental appointments, to which comparatively few Jews are assigned.

History.

The oldest history of Galicia is identical with that of the Jews in the kingdom of Poland, of which this province formed part up to its occupation by Austria in 1772. Upon the annexation of Poland, the empress Maria Theresa pursued the policy of not interfering with the customs and habits of the population in order to reconcile them to the new government. This policy was followed also in the treatment of the Jews. As under Polish dominion, the Jews formed a separate body and enjoyed a liberal measure of autonomy; the congregations formed a political community, and were combined into a district, over which an elder ("Kreisaeltester") presided; the elders of the six districts together with six representatives at large ("Landesaeltester") formed a board of trustees ("Generaldirektion"), over which the chief rabbi ("Oberlandesrabbiner") presided. The last was selected by the empress from three candidates presented by the trustees. Maria Theresa selected Ezekiel Landau for this office, but he declined (see "Noda' bi-Yehudah," part ii.; "Oraḥ Ḥayyim," No. 36; Buber, "Anshe Shem," Cracow, 1895, p. xxi.), whereupon Löbush Bernstein of Brody was selected in his place, but he failed to make his office effective. The office was abolished by Joseph II., and Bernstein died in retirement in 1789. The power of excommunication was vested in the chief rabbi, who exercised it under the supervision of the government, which made use of it in punishing evaders of taxes, smugglers, or deserters from military service. The school system was organized in three grades along traditional lines: in the lowest grade elementary branches and Bible were taught; in the second the Talmud was studied; while in the third or highest grade rabbinical instruction was given. Maria Theresa applied paternal government in its most minute details to the internal life of the Jews. She devised the rules for bestowing the titles of ḥaber and morenu and for granting the licenses for the reader and the shoḥeṭ. Different from the practise pursued in the older provinces, the empress decreed no limitation to the number of marriages, except in so far as affected the taxes which had to be paid before a marriage license could be issued. Severe penalties were devised for persons who baptized Jewish children without the consent of their parents, but these were not enforced, as the canonical law which declared such a baptism valid was respected, and children baptized against the will of their parents were taken from them and handed to some Christian institution for custody and education. A serious restriction placed on Jewish artisans was the provision of Maria Theresa's "Judenordnung," which did not permit them to work for Christian customers, except in places where no Christian was working at the same trade. This provision was incorporated in the constitution of the Galician gilds of May 9, 1778, which contains the requirement that no Christian master mechanic should "aid or abet any charlatan ["Pfuscher"], disturber, quack, or Jew, nor should any such charlatan or Jew be permitted to work at any trade, except that Jews might work for Jews." The taxes were originally levied according to the traditional Polish system, which demanded a per capita tax of two florins, Polish (about 23 cents); but soon after the annexation this tax was increased to one florin ("Conventionsmuenze"), which was almost double the original amount. This system was changed by the law of 1776, which provided that every family should pay a tax of four florins ($1.60) for right of residence, and another tax of the same amount for license to trade, and an income tax, for the payment of which the community

was held responsible. Thus the community assessed the individual congregations, which in turn assessed the individual members. Aside from these taxes, special licenses were required for every marriage, for the building of a new synagogue or the repairing of an old one, for holding services in a private house and for similar ceremonies.

During the eighteenth century ideas of humanitarianism found their way into the Austrian empire; and Joseph II., imbued with a commendable desire, wished to establish in his domains the principle of the equality of all mankind. As he improved the condition of the rest of his Jewish subjects, so he proclaimed for the Jews of Galicia a policy which was a departure from that of his mother. The "Patent" of May 27, 1785, and the "Judenordnung" of May 7, 1789, regulated their legal condition ("Pillerische Sammlung der Patente und Verordnungen fuer die Koenigreiche Galizien und Lodomerien," 1785, p. 89; and Koefil's "Systematischer Auszug der Galizischen Gesetze und Verordnungen," ii. 391). The purpose of the law-giver is clearly defined in the preamble to the "Judenordnung" of 1789, which says: "It is both in accordance with the accepted principles of toleration as well as conducive to the general good to abolish the discrimination which legislation has hitherto made between Jewish and Christian subjects, and to grant to the Jewish inhabitants of Galicia all the rights and privileges which the Christian subjects enjoy." Previous to the publication of these general laws individual laws had established the principle of toleration. A law of Feb. 4, 1782, stated that Jewish physicians should have the right of practising medicine among Christians, and on June 28 of the same year the schools were declared to be open to Jewish children and students. The restriction which prohibited Jewish mechanics from working for Christians was abolished Sept. 16, 1784; and in order to encourage manual labor Jews who lived exclusively by farming were exempted from paying taxes, while artisans and factory employees enjoyed certain privileges in the matter of taxation. The "Patent" of 1785 had abolished the "Generaldirektion," so that the Jews should not form a separate body politic; the special Jewish checks ("Mameras"; see MAMRAN) were declared void; rabbinical civil law was abolished 1785; early burial was prohibited April 10, 1787. In the same year an order was issued that the Jews must serve in the army, and that before Jan. 1, 1788, all Jews must adopt fixed and hereditary family names. Further, in bookkeeping they were ordered to use the language of the country; books kept in Yiddish were not accepted as evidence in court. Joseph II. ruled in that spirit of paternalism which regulated all the internal affairs of the citizens. Though his policy would sometimes clash with religious practises, the general spirit of his legislation was benevolent. Once he prohibited the stringing of the wires which marked the Sabbath boundary ("Sabbathschnüre"), but permitted it later on the condition that it would not interfere with public traffic (see ERUB). He ordered that itinerant preachers and hazzanim should be treated as vagabonds. The pamphlet "Ruah Ḥayyim" (Brünn, 1785), in which the driving out of a devil is minutely described, afforded the emperor an opportunity of admonishing the censor and of directing him to withhold permission to publish such literature as "tended only to retard the enlightenment of the Jews, as there were enough old books of this type extant" (Nov. 2, 1785), but he was sufficiently broad-minded to declare himself opposed to any alterations in the text of the Talmud, because such a work belonged to literature, and should be kept intact for the sake of historical study (Sept. 19, 1789).

Joseph II.

The reign of Leopold II. (1790–92) was of too short duration to have had any influence on the development of Jewish affairs. However, it should be mentioned that shortly after the death of Joseph II. personal service in the army was abolished, and the old Polish exemption-tax ("Rekrutengelder") was introduced (Nov. 24, 1790); but with the provision that it should never be reintroduced, it was finally repealed in 1796. The general principle of Francis II. (1792–1835) and of Ferdinand I. (1835–48), who ruled through Metternich, was that of restricting all liberal thought; hence it was opposed to the emancipation of the Jews. In those days the government hoped that by closely regulating the internal affairs of the Jews it would succeed in assimilating them with the rest of the population. The temper of the new emperor was made manifest by an order (Sept. 7, 1792) which declared that the right of the Jews to participate in municipal elections should be so regulated that they would not inconvenience the Christian citizens ("die Christlichen Buerger nicht beeintraechtigen"). This law decreed that only such Jews as enjoyed municipal franchise might be electors. The granting of the franchise was in the hands of the municipal council, and might be granted only to property-holders and master mechanics. From the inner city of Lemberg the Jews were excluded, with the exception of such proprietors of large business houses as could prove that the volume of their business amounted at least to 30,000 florins ($12,000) per annum; as a rule strangers were not admitted, and even the residents were not permitted to marry women from other cities. If a Jew from another city wished to move to Lemberg, he had to prove that he had induced two other Jews to leave the latter city. Foreign Jews could come to Galicia for only a limited time, and from July 18, 1811, a poll-tax ("Geleitzoll") was introduced in the case of Jews coming from the kingdom of Poland, which amounted to 4.45 florins for men, 3.15 florins for women and servants, and 1.45 florins for children. Jewish importers of cattle and provisions fared better, having to pay but 1.06 florins. It must be admitted, however, that this reactionary step was introduced only as a reprisal against Saxony, which levied a similar poll-tax on Austrian Jews, while those of the then existing dukedom of Warsaw were exempted from paying it. This strange relic of mediævalism survived until March 7, 1851, when it was abolished by an imperial edict. The business of druggist, like the medical profession, which in Polish times was generally followed by the Jews, was prohibited to them under Austrian rule, at first only in

Benevolent Despotism, 1790–1848.

West Galicia (1802), then in the entire province (1829). The strong attachment that Francis II. formed for the Catholic Church is responsible for repeated orders (1806, 1820) that Jews must not deal in ecclesiastical furniture, crucifixes, or vestments.

The system of taxation was very burdensome. Joseph II., while filled with the noblest of intentions and desirous of carrying the principle of equal rights into practise, was hindered by financial needs. The always depleted treasury of the empire made it impossible to forego the income derived from special Jewish taxes. So, while in civil law and in their municipal affairs Joseph II. placed the Jews on a level with the Christians, he retained in Galicia, as well as in the older provinces, a system of special Jewish taxes. Besides the taxes introduced by his mother, which he retained with slight changes, he introduced a special tax on kasher meat, which, when additional revenue was required, was often increased. The original tax of 1¾ kreuzer (a little more than a cent) on every pound of meat was later increased to 3 kreuzer, while that of 5 kreuzer on a goose was advanced to 17 kreuzer. The "Schutzsteuer" of four florins for every family, to which one florin was added for the benefit of the landlord ("Domesticalsteuer"), was abolished in 1797, because it did not yield the expected revenue and also because it gave the authorities a great amount of trouble in dealing with the numerous delinquents. In its place a light tax was introduced which was levied on every light burned for religious purposes (as on Sabbath and holy days), on every oil-lamp burned at the anniversaries of the deaths of relatives (see JAHRZEIT), on every candle used in the synagogues on the Day of Atonement, on every Ḥanukkah light, and on every candle lighted at a wedding. This tax ranged from one-half a kreuzer for every Ḥanukkah light to one florin for a torch at a wedding, and was a great source of annoyance. As a rule, it was farmed out and levied with absolute indifference to the hardship which it caused. But when it failed to yield the expected revenue, a direct tax was imposed upon all the Jews of the province in order to make up for the deficiency, and this had to be paid by the congregations as a body. With regard to this, it must, however, be admitted that in general Francis II. was averse to taxing religious rites and ceremonies. When some Jews offered to pay 150,000 florins for the privilege of collecting a tax on every ETROG used on the festival of Sukkot, he declared himself strongly opposed to it, although Maria Theresa had established a precedent by levying 4,000 florins on the Jews of Moravia for the privilege of importing that fruit ("Oest. Wochenschrift," 1901, p. 727; "Israel. Familienblatt," Hamburg, Oct. 10, 1901). While on the one hand discrimination against the Jews in civil and political affairs was frequent, on the other hand, owing to the system of taxation, the traditional policy of constant interference with their religious practises and other internal affairs could not be avoided. In order to maintain the revenue of the treasury it became necessary to compel every Jew to kindle lights on Sabbath and holy days and to eat none but kasher meat. Paternalism, however, did not stop here. An imperial order of Dec. 14, 1810, decreed that no one should marry unless he had passed an examination in religion based on Herz Homberg's catechism "Bene Zion." While this law was in force over the whole monarchy, it was particularly exasperating for Galicia, where only a very small fraction of the population could read German, and where Homberg, whom the government had sent there as inspector of the schools, had made himself universally hated by his irreligious conduct and by his proneness to inform against the Jews. The consequences were that the educational movement inaugurated by Joseph II. was abandoned, and the special Jewish school fund, formed from Jewish taxes, was merged into the general tax-fund of the country. The various attempts to raise the status of the rabbis fared no better, and the government decree (1836) that after ten years no rabbi should be appointed who had not taken an academic course at a university became a dead letter. The meddlesomeness of the government was noticeable in an order of 1812 which prohibited the collecting of gifts for the poor in Palestine. It threatened to treat as a vagabond a solicitor of such alms. Inspired, as was the demand for a higher education of the rabbis, by higher motives was an attempt to encourage secular education and the assimilation of Jews and Christians by privileges offered to such as would acquire school education and would discard their peculiar dress. Since the time of Joseph II. repeated laws prohibited the Jews from dealing in alcoholic liquors, but these remained ineffective, chiefly on account of the power of the landowners, who possessed the exclusive privilege of distilling, and who, from the time of the earliest settlement of the Jews in Poland, farmed out this privilege to Jews (see Solomon Luria's Responsa, No. 34). Finally, on March 24, 1841, the government promulgated a law which permitted such Jews as would abandon their distinctive dress, and who would acquire an elementary-school education, to live in villages and to engage in the liquor traffic. This law also remained a dead letter. A new order, dated Sept. 9, 1847, required all Jewish liquor-dealers to qualify by Jan. 1, 1847. Even this law did not have the desired effect, for in 1847 the trustees of the congregation of Lemberg were asked to assist the government in its attempt to enforce the law. A decided step in advance was the abolition of the limitation of marriages in Lemberg (1846); but the general status of the Jews remained unchanged until 1848, and even the constitutions of 1848 and 1849 did not have any immediate effect, as the national movement among the Poles, who considered the Jews as strangers, and the hostility of the cities, which were unwilling to give up the privileges which they possessed of limiting the business activity of the Jews, were strong factors in making it impossible for the Jews to avail themselves of the privileges which the new order of things conferred upon them.

The principle of full equality, introduced by the constitution of 1848, was not long enforced. Two Jews from Galicia, Berish Meisel, rabbi of Cracow, and Abraham Halpern, a merchant of Stanislau, were members of the Reichstag of Kremsier, and Isaac N. Mannheimer, a Vienna preacher, was elected for Brody; but with the interruption of parliamentary

government certain restrictions were reintroduced, while others were enforced by the local authorities contrary to law, but with the connivance of the government. The only permanent improvement was the abolition, March 7, 1851, of the poll-tax levied on Jews from Russian Poland who came to Galicia on business, but a number of other disabilities were reenforced. With the rest of the Austrian Jews those of Galicia lost the right of acquiring land by the law of Oct. 2, 1853; but while for the other provinces inhabited by Jews this right was restored by the imperial order of Feb. 18, 1860, the restrictions were enforced in Galicia and in the Alpine provinces until the constitution of Dec. 21, 1867, was proclaimed. Jewish merchants of Lemberg who had opened stores in the inner part of the city were forced to close them within two months, and the landlords who had rented stores to Jews were punished. The same regulation was enforced in Sambor; and when the Jews appealed to the provincial government against these illegal proceedings, the latter referred the case to the district authorities ("Kreisamt"), who decided against the Jews. As late as 1859 the city of Tarnow demanded the enforcement of a decree made by the King of Poland in 1765 which restricted the Jews to a ghetto. The law which prohibited the employment of Christian domestics by Jews, while never strictly enforced, was used from time to time as a vexatious measure, even where a Jewish tenant of farm-land employed Christian laborers. Under this law a Jew of Wadowice was fined on Sept. 11, 1859. Afterward the Bishop of Przemysl in a pastoral letter of Jan. 20, 1860, declared that such a law, conflicting with that of the Church, and could never be valid. In some instances the police arrested Christian domestics who served in Jewish houses, and brought them to the priest, who ordered them to leave their places under penalty of whipping. The law was formally abrogated on Nov. 20, 1860.

Constitution and Reaction Since 1848.

Lemberg, the capital of the province, continued to disregard the constitution. In drawing up the municipall statutes (1863 and 1866), the city council demanded that Jewish members should be limited to fifteen per cent of the total number, and that the property of the city should belong exclusively to the Christians. By the constitution of 1867 Jews were admitted to the municipal boards, to the provincial diet, and to the Parliament; but while the letter of the constitution was maintained, the local laws were often framed so as to discriminate against the Jews in fact. A notable instance of this kind is the school law of 1883, which declared that every school principal must be of the same religion which the majority of the school-children professed, but as in that case a great number of Jewish school principals would have to be appointed for Galicia, the Galician members of the Reichsrath insisted on the introduction of a clause which made an exception in the case of Galicia. Another instance which proves that the laws granting the Jews full civil liberty are merely theoretical is the case of Michaline Araten, who was taken to a convent Dec. 30, 1899, all efforts of her father to rescue her proving futile. Neither the courts nor the administrative authorities would render a verdict against the convent; a mayor who at the request of the father searched the convent was punished with arrest for breach of peace, and even an audience which the father obtained with the emperor proved abortive. Similar instances of the abduction of Jewish girls into convents against the will of their parents, and their retention against their own will, have happened quite frequently, although none made such an impression as that of Michaline Araten because the relatives in the other cases did not have the means to exhaust all legal resources. Another instance showing how the law is often a dead letter in Galicia is found in the fact that a Jewish government official who in 1895 rented a room in Saybusch was forced to quit the town because the municipal authorities claimed on the basis of a governmental decision of 1809 that they could not be compelled to tolerate any Jews among them. That under such conditions nothing is done by the government to alleviate the great misery which exists among the Jewish population, especially in the country districts, is self-understood, notwithstanding the fact that a recently appointed governor, Count Potocki, admitted to a Jewish committee who waited on him that it was necessary that something be done ("Oest. Wochenschrift," 1902, p. 434). The Baron de Hirsch fund, formed from a legacy of $4,000,000, and the Hilfsverein for the Galician Jews in Vienna, formed 1902, are making noble efforts to alleviate misery and to encourage education.

The great majority of the Galician Jews, especially those in the eastern part of the province, are still in a condition similar to that which prevailed among the western Jews in the first half of the eighteenth century: their education is limited to Hebrew and the Talmud. From the time when the Jews of Poland entered into the field of Hebrew literature Galicia has been a seat of learning. About the middle of the sixteenth century Moses Isserles spread over western Europe the fame of Polish Talmudists. Since the sixteenth century Lemberg has been the seat of an important yeshibah, and many of its rabbis have been called to occupy prominent rabbinical positions in Germany. When that part of Poland was annexed by Austria the intellectual life of the Jews remained unchanged. Maria Theresa made no attempts to improve it, and the efforts of Joseph II. were without permanent results. Herz Homberg, who was appointed inspector of the Jewish schools in Galicia, 1787, was recalled in 1794, because he could effect no improvement. The Galician Jews constantly petitioned the emperor to repeal the law of compulsory education, and they were finally successful, so that even now, after the new school law for Austria has been in existence for more than thirty years, it is still a dead letter for the Galician Jews. (On the Galician school question see Wolf in "Allgemeine Zeitung des Judenthums," 1887, p. 231.) Galicia produced a great number of prominent Talmudists in the latter part of the eighteenth and in the nineteenth century. Of this number may be mentioned the various representatives of the Ettinger and Orenstein families, who furnished Lemberg with the rabbis Jacob (died 1837) and Hirsch Orenstein (died 1888), Marcus Wolf Ettinger (died

Intellectual Culture.

1863), Isaac Aaron Ettinger (died 1891), Solomon Klueger of Brody (died 1869), A. M. Taubes (at the end of his life rabbi of Jassy), and Joseph Saul Nathansohn, rabbi of Lemberg (died 1875).

A more modern course was pursued by Hirsch Ḥagis, rabbi of Zolkiev (died 1855), who contributed to scientific periodicals and wrote on historical and dogmatic topics. By the end of the eighteenth century the Mendelssohnian movement had also taken root in Galicia. Its pioneer was Nachman Krochmal (1785–1840), who gathered about himself a circle of sympathizers, among whom S. L. Rapoport (1790–1867), Joseph Perl (1777–1839), Isaac Erter, and Isaac Mieses were prominent. The younger Haskalah had also quite a number of prominent representatives, among whom may be mentioned Osias H. Schorr (died 1895), Hillel Kahane, Alexander Langbank, Naphtali Keller, Ḥayyim Nathan Dembitzer, Joseph Kohen Ẓedeḳ, Solomon Rubin, and the two assiduous workers in the field of the history of literature, Solomon H. Halberstamm and Solomon Buber. The ghetto novel has two representatives from Galicia, Leo Herzberg-Fränkel and Karl Emil Franzos. In connection with this ought to be mentioned the fact that Leopold von Sacher-Masoch, a Christian, drew the inspiration for his beautiful idyls of Jewish life from scenes in Galicia. Numerous also are those who have made a name in general literature and in science, among whom may be mentioned David Heinrich Müller, the Orientalist, and Marcus Landau, the essayist.

Attempts made to introduce modern ideas into the life of the Jews by means of modern schools and a reformed synagogue service have been successful in only a small measure. The greatest merit in this direction belongs to Joseph Perl, who established the first German school in Tarnopol, Galicia (1815), and introduced into it a modern synagogue service. In the same year a Jewish high school was established in Brody. Very slight reforms were introduced in Lemberg, where Abraham Kohn was elected rabbi in 1843. He fell a victim to fanatics, who poisoned him Sept. 6, 1848. Reforms, restricted to a certain decorum in ritual practises, were introduced in Cracow. They are still a rare phenomenon, for the Ḥasidim have gained a strong foothold in Galicia, especially since the immigration of Israel of Raisin, who fled from Russia in 1842 and established himself in Sadagora, where his grandson continues to gather a large number of devoted followers around him. Hillel Lichtenstein, a native of Hungary, fostered Ḥasidism through his numerous works in Hebrew and Yiddish, while Moses Teitelbaum, a native of Galicia, introduced Ḥasidism into northern Hungary.

D.

GALICIA, Spain: An ancient province in the northwestern part of Spain; a barren, mountainous region where Jews settled sparsely in the eleventh century. There were Jewish communities at Allariz, Coruña, Orense, Monforte, Pontevedra, Rivadavia, and Rivadeo, besides individual Jews scattered here and there. D. Menendez Gonzalez, a rich and powerful nobleman, received Jewish merchants, probably from Allariz, in his domain, not far from Orense, and when they were attacked by Arias Oduariz in 1044, he led an armed force against the latter, and recovered the silks and other goods that had been taken from the Jews. When John of Gaunt, Duke of Lancaster, invaded Spain (1385), and Rivadavia was taken by Sir Thomas Percy, the English soldiers attacked the Jews, who were supposed to be rich, and plundered them, killing several. The ghetto, however, was not destroyed.

Eighteen years before the expulsion, the Jews of Coruña, Betanzos, and Rivadeo paid an annual tax of 1,800 maravedis, and those of Orense, Monforte, and Rivadavia one of 2,000 maravedis. A rich Jew of Rompusa, a tawer, was baptized in 1414, taking the name "Juan Esteban." His sons obtained seats in the Parliament.

G. M. K.

GALILEE. — Biblical and Post-Biblical Data: In the Greek period the customary name for the northern division of western Palestine. The name is formed from "ha-Galil," in the Old Testament (Josh. xx. 7, xxi. 32, LXX.; I Kings ix. 11; II Kings xv. 29; I Chron. vi. 61), or from "Gelil ha-Goyim" (circle of the heathens; Isa. viii. 23; comp. I Macc. v. 15), and designates the mountainous country which rises east of the plain of Jezreel, and extends as far as Lebanon and Antilebanon. Galilee was divided into two sections, Lower or South Galilee, and Upper or North Galilee, which were separated by the plain of Ramah (comp. Josh. xix. 36).

Politically a Jewish country, Galilee, according to Josephus ("B. J." iii. 3, § 1), was bounded north and west by the Tyrian territory, south by Samaria and Scythopolis, and east by the trans-Jordanic country and the Lake of Gennesaret. Josephus also divides the Galilean mountain-range into two sections, Upper and Lower Galilee, which division corresponds to the natural division of the country as just stated. According to the same author, Upper Galilee was bounded on the south by Bersaba (perhaps the ruined Abu Sheba south from the plain of Ramah; on the west by Meroth (the position of which can not be positively determined); on the north by Baca (also unknown); and on the east by Thella on the Jordan. Lower Galilee extended in the west to Chabulon near Ptolemais; in the south to Exaloth, that is, Chisloth (Josh. xix. 12, 18); and in the east to Tiberias. From other passages in Josephus it appears that the Jewish section of Galilee did not extend far north; for Kadesh was already in Tyrian possession ("B. J." ii. 18, § 1, and often elsewhere). On the other hand, in the specification of the boundary-lines according to the Talmud (see Hildesheimer, "Beiträge zur Geographie Palästinas," 1886), the northeastern boundary of Galilee extends farther west and north, namely, from Ptolemais through Ga'ton (now Ja'ṭun), Bet Zenita (Zuwenita), Ḳastra de-Gelil (Gelil), Kur (Al-Kura), Yatir (Ya'ṭir), and Tafnit (Tibnin) to Marj 'Ayun.

Galilee, a beautiful and very fertile country, is

justly praised by Josephus ("B. J." iii. 3, § 2). According to his statement, it included a number of cities and many villages, the smallest of which had not fewer than 15,000 inhabitants. This is doubtless an exaggeration, though the density of the population is beyond question. As early as Old-Testament times the population of this region was greatly mixed; and it became more so after the downfall of the Ephraimitic kingdom. During the Maccabean struggle the Jews of Galilee constituted such a small number that they could all be brought to Jerusalem (I Macc. v. 23).

It is not expressly stated when Galilee was taken by the Maccabees, but Schürer's suggestion ("Geschichte," 3d ed., i. 275 *et seq.*), that the section of the Iturean territory which Aristobulus I. conquered (Josephus, "Ant." xiii. 11, § 3) was Galilee, is probably correct. Undoubtedly many Jews subsequently emigrated to that blessed land, so that the population became predominantly Jewish, as is described in the New Testament and by Josephus. Upon the death of Herod the Great, Galilee was apportioned to Herod Antipas; and after his deposition it was incorporated into the province of Syria, a part of which it continued to form, except under the short rule of Agrippa (40–44).

After the fall of the Jewish state a new period of prosperity set in for Galilee; and it gradually became the center of Jewish life in Palestine.

E. G. H. F. Bu.

——**In Rabbinical Literature:** Galilee is enumerated mainly for religio-legal purposes in the Talmud (B. B. iii. 2; Ket. xiii. 9; Tosef., Ket., end; Sanh. 11b; *et al.*). It comprised the northern territory east of the Jordan, which river constituted the frontier. Kefar 'Awtanai (Giṭ. vii. 8) was at its southern boundary (see Josephus, "B. J." iii. 3, § 1). According to Sheb. ix. 2, Galilee was divided into three parts: Upper Galilee (above Kefar Ḥananyah, where no sycamores are found), Lower Galilee (land of sycamores), and the plain (the Teḥum, or territory of Tiberias). In the letter addressed to his "brethren" of Galilee by R. Gamaliel (Tosef., 'Eduy. ii.; Sanh. ii.; *ib.* 77a) the plain is not specified.

This province is praised for the fertility of its fields and vineyards (Meg. 6a); its fruits are very sweet (Ber. 44a). Olive-oil was one of its chief products (Sifre, Deut. 33, in blessing of Asher). "It is easier to raise a legion of olive-trees in Galilee than one child in Palestine" (Ber. R. xx.). Special Galilean jars were manufactured for the storing of oil (Kelim ii. 2). Wine, on the other hand, was scarce (Nazir 31b). Linen was abundant, and the women were famous for the fineness of their homespun (B. Ḳ. 119).

The inhabitants, partly pagan, partly Jewish, are said to have been quarrelsome and of a disobliging disposition (Ned. 48a; Tosef., Giṭ. vi.). Still one exception showing delicate appreciation of the true implications of charity is mentioned (Tosef., Peah, viii.): an impoverished old man was served the delicacies he had indulged in in his prosperous days. The Galileans were more solicitous of their honor than of their property (Yer. Ket. iv. 14). Widows were treated with consideration (Ket. iv. 14). Young married people were not permitted to be alone immediately after the nuptial ceremony (Ket. 12a). At funerals the preacher of the funeral oration preceded the bier; in Judea he followed (Shab. 153a). It is said in the Talmud that Jose b. Joezer of Zeredah and Jose b. Johanan of Jerusalem declared the country of the nations ("Erez ha-'Ammim") unclean (Shab. 14b, 15a). Rashi understands by "Erez ha-'Ammim" the country of the Gentiles—that is, the country outside of Palestine; but Kaminka concludes that Galilee is meant, the name being similar to the Biblical "Gelil ha-Goyim." Thus there is an essential difference with regard to ritual observance of cleanliness between Judea and Galilee.

Characteristics of Galileans.

On the whole, the Galileans are said to have been strict in their religious observances (M. Ḳ. 23a; Pes. 55a; Yer. R. H. iv. 6; Yer. Soṭah ix. 10). Measures and weights were peculiar in Galilee: 1 Judean se'ah = 5 Galilean se'ah; 5 Judean sela = 10 Galilean sela (B. B. 122b; Ḥul. 137b). The Galilean Sicarii were dreaded (Tosef., Giṭ. ii.). Study of the traditions was not one of the Galilean virtues, neither was their dialectic method very flexible ('Er. 53a). But it is for their faulty pronunciation that the Galileans are especially remembered: 'ayin and alef, and the gutturals generally, were confounded, no distinction being made between words like "'amar" (= "ḥamor," ass), "ḥamar" (wine), "'amar" (a garment), "emar" (a lamb: 'Er. 53b); therefore Galileans were not permitted to act as readers of public prayers (Meg. 24b). Still, according to Geiger ("Orient," iv. 432), to the Galileans must be ascribed the origin of the Haggadah. Galilee was very rich in towns and hamlets (Yer. Meg. i. 1), among which were Sephoris (צפורי or צפירין), Asha, Shephar'am, Bet-She'arim, Tiberias, Magdala, Kefar Ḥananyah, 'Akbara, Acco, Paneas, Cæsarea. On Galil, a place of the same name as the province, see Hildesheimer, "Beiträge zur Geographie Palästinas," p. 80.

S. S. E. G. H.

GALINA, MOSES BEN ELIJAH: Greek scholar and translator; lived at Candia in the fifteenth century. His best known work is "Toledot Adam" (Constantinople, 1515), a treatise on chiromancy and physiognomy, drawn chiefly from 'Ali ibn 'Abbas' "Kamil al-Ṣina'ah" and the pseudo-Aristotelian "Secretum." Galina's work was abridged and published later with a Judæo-German translation as "Ḥokmat ha-Yad." The author's name is erroneously given as Elijah ben Moses Galina. Still, Joseph ibn Kaspi, in his "Ṭirat Kesef," quotes a work entitled "Dibre Ḥakamim," a treatise on the properties of stones, as by "Elijah ben Moses Galina." Moses Galina translated from Arabic into Hebrew: (1) An astronomical treatise by Omar ibn Mohammed Meṣuman, "Sefer Mezuḳḳaḳ"; (2) an astrological treatise, "Mishpaṭ ha-Mabbaṭim"; (3) "Sefer ha-Goralot," a treatise on geomancy, bearing

the author's name as Moses Galiano, identified by Steinschneider with Moses Galina.

D. M. SEL.

GALIPAPA, ELIJAH: Rabbi of Rhodes in the seventeenth and eighteenth centuries; probably born in Bulgaria. He emigrated to Palestine, but later removed to Rhodes. He was the author of "Yede Eliyahu," a work on the rabbinical institutions ("takḳanot"), in which the order adopted by Maimonides is followed (Constantinople, 1728).

BIBLIOGRAPHY: Azulai, *Shem ha-Gedolim*; Benjacob, *Ozar ha-Sefarim.*

D.

GALIPAPA (not **Gallipapa** nor **Galeppa**), **ḤAYYIM:** Spanish rabbi; son of Abraham Galipapa; born at Monzon about 1310; died about 1380. He was rabbi at Huesca, and later at Pamplona, where he directed a Talmud school. Galipapa belonged to the liberal school, setting aside the strictly orthodox rabbinical authorities, and following even in advanced years those that inclined to a more lax discipline. He permitted the combing of hair on the Sabbath, and allowed children to accept cheese from Christians; he also introduced some ritual and liturgical changes at Pamplona. In some of his views he differed from the opinions then current; he saw, for instance, in the Book of Daniel a revelation of the crimes of Antiochus Epiphanes. Because of his reforms, R. Ḥasdai ben Solomon of Tudela made a complaint against him to Isaac ben Sheshet, whereupon the latter seriously but gently reproved him, urging him to avoid henceforth all cause for offense and to preserve peace (Isaac b. Sheshet, Responsa, Nos. 394 *et seq.*). Galipapa wrote a polemical treatise "'Emeḳ Refa'im," in which the massacre of the Catalonian Jews of 1348 is described; the work is contained in his commentary on Semaḥot, an extract of which is given in Joseph ha-Kohen's "'Emeḳ ha-Bakah." He wrote also a commentary on 'Abodah Zarah and an epistle on salvation quoted by Joseph Albo ("'Iḳḳarim," iv. 42).

G. M. K.

GALIPAPA, ḤAYYIM MEBORAK: Bulgarian rabbi; lived and taught at Sofia about 1650 (Conforte, "Ḳore ha-Dorot," p. 52a).

G. M. K.

GALLAḤ (גלח = "the shaved one"; in German often printed as **Gallach**): Epithet originally applied to Catholic priests on account of their tonsure. Later the same epithet was extended to Greek Orthodox priests. "Gallaḥ," with its plural "gallaḥim," occurs very often in Hebrew medieval literature. Thus R. Tam says: "Do not be hasty in thy answer like priests ["gallaḥim"], who discuss in a sophistical way" ("Sefer ha-Yashar," 81a, col. b). Latin writing was sometimes called "the writing of gallaḥim" ("Or Zarua'," ii. 42). In Russo-Jewish folk-lore it is unlucky to meet a gallaḥ; to prevent the ill luck various expedients are recommended, such as throwing straw behind the back, or turning the back and walking away four paces (see FOLK-LORE). A popular saying is that "A fat rabbi and a lean gallaḥ are not as they should be: the one does not apply himself sufficiently to the study of the Law, the other as a rule is a fanatic" (Tendlau, "Sprüchwörter und Redensarten," 1860, p. 311).

K. M. SEL.

GALLEGO (GALIGO; sometimes erroneously **Galliago, Galiago,** or **Galliano), JOSEPH SHALOM DE SHALOM:** Neo-Hebraic poet; died in Palestine Nov. 25, 1624. He was the first ḥazzan of the first synagogue erected in Amsterdam, and occupied the position fourteen years, then removed to Palestine. He edited the work "Imre No'am," containing religious poems, hymns, and elegies (Amsterdam, 1628). Several of his Hebrew poems are to be found in the manuscript collection "Ḳol Tefillah we-Ḳol Zimrah" of David Franco Mendes. Gallego translated from Hebrew into Spanish the ethical writings of Jonah de Gerona, entitled "Sendroe [Sendero] de Vidas" (*ib.* n.d.; 2d ed., *ib.* 1640).

G. M. K.

GALLERY: An elevated floor, or a balcony, in the interior of a church, synagogue, or other large building, resting on columns, and surrounded by a balustrade. In the Orthodox synagogues it is reserved for women; for the modern usage see FRAUENSCHUL.

The Temple had galleries in the shape of winged or bay chambers, variously described as "ẓela'," "gizrah" or "attiḳ" (attic), and "'aliyyah" (I Kings vi. 5; Ezek. xli. 13–15; I Chron. xxviii. 11). But these, it appears, were either private chambers or passages, or merely architectural ornamentation. A gallery used for public gatherings was constructed in the women's apartment ("'ezrat nashim") in the Temple for the libation celebration at Sukkot.

The Mishnah relates that "On the eve following the first day of the festival they went down fifteen steps to the women's 'azarah, and prepared a great improvement" (Suk. v. 2), which R. Eleazar explains was the gallery erected above for the accommodation of the women, enabling them to witness the men below celebrating the "water libation" to the accompaniment of music, song, dances, and illuminations. The Tosefta says there were galleries on the three sides of the 'azarah, so that women could observe the celebration separately (Tosef., Suk. iv. 1). "The house of David apart, and their wives apart," is quoted against the mingling of sexes in public gatherings (Zech. xiii. 12; see Maimonides, "Yad," Lulab, viii.).

In the Reform synagogues the galleries are used for the accommodation of non-members of both sexes. See ARCHITECTURE, JEWISH: FRAUENSCHUL.; JERUSALEM; REFORM; TEMPLE.

A. J. D. E.

GALLICO, ELISHA BEN GABRIEL: Palestinian Talmudist; died at Safed about 1583. He was a pupil of Joseph CARO. After the death of his master, Gallico was nominated chief of the yeshibah of Safed. He is frequently mentioned in the responsa collection "Abḳat Rokel," in which re-

sponsum No. 84 belongs to him. Ḥayyim Benvenisti quotes Gallico's responsa in his "Keneset ha-Gedolah." Gallico wrote homiletic-allegorical commentaries on Ecclesiastes (published during the author's lifetime, Venice, 1577), on Esther (Venice, 1583), and on Song of Songs (Venice, 1587).

K. M. SEL.

GALLICO, SAMUEL: Italian Talmudist and cabalist; lived in the sixteenth and seventeenth centuries. He was a pupil of Moses Cordovero and the teacher of Menahem Azariah di Fano. Gallico was the compiler of "'Asis Rimmonim," consisting of extracts from Cordovero's "Pardes Rimmonim," with notes by Mordecai Dato (Venice, 1601). This work was afterward revised by Fano, who added a commentary entitled "Pelaḥ ha-Rimmon," and by Mordecai b. Jacob, whose commentary is entitled "Pa'amon we-Rimmon."

K. M. SEL.

GALLIPOLI (the ancient **Callipolis**): Seaport town in European Turkey, at the northeast end of the Dardanelles and about 135 miles from Constantinople. It has a population of about 20,000, of whom 1,200 are Jews. The latter probably lived in Gallipoli from the first centuries of Byzantine rule. About 1162 Benjamin of Tudela found in the town 200 Jews, who had a yeshibah under the care of R. Elia Kapid and R. Shabbethai Zuṭra. The Ottoman Turks, who acquired Gallipoli in 1365, protected the community, according to their custom. In 1469 there lived at Gallipoli a rabbi named Daniel bar Hananiah, whose manuscript of the Bible commentary of Levi ben Gershom has been preserved. In 1492 a great number of Spanish exiles found refuge in Gallipoli, and several families bearing the name of "Saragoss" still celebrate a "Purim of Saragossa" in the month of Ḥeshwan. The Ben Ḥabib family of Portugal is said to have furnished Gallipoli with eighteen chief rabbis, the most prominent of them being Jacob ibn Ḥabib, the author of the "'En Ya'aḳob." In 1853 Ḥadji Ḥasdai Varon represented France, Italy, Austria, Portugal, Denmark, and the United States as consular agent. Gallipoli has two synagogues, one built in 1721 and rebuilt in 1852; the other is quite recent. It has also a Jewish school containing 250 boys, as well as six benevolent societies. The community is administered by a council of ten; its revenue comes mostly from taxes on kasher meat, wines, and heads of families. Ḥayyim Franco, a native of Melas, has been chief rabbi since January, 1903.

Several of the Jews of Gallipoli are government employees. The Spanish vice-consul and nearly all the dragomans are Jews, who are also represented in nearly every commercial and mechanical pursuit. The native costume is now giving way to the European. Among the antiquities of the city are the old cemetery, a marble basin set up in 1670 by a certain Johanan Halio, the above-mentioned copy of the commentary on the Bible by Levi ben Gershom, the Megillah of Saragossa, and many old manuscripts. There are many Jewish families in the neighborhood of Gallipoli, especially at Lampsacus, on the opposite Asiatic shore, at Charkeui, and elsewhere.

D. M. FR.

GALLOWS: A framework consisting of one or more upright posts supporting a cross-beam, and used for executing those sentenced to death by hanging. In the Hebrew Bible עץ (= "tree") is the word used for "gallows" (Gen. xl. 19; Deut. xxi. 22; Josh. viii. 29, x. 26; Esth. ii. 23, v. 14, vi. 4). The "tree" or gallows erected by Haman, and upon which he himself died, is described as fifty cubits high (Esth. vii. 9, 10); probably it was a stake on which the culprit was impaled (see Haley, "Esther," pp. 123 *et seq.*), corresponding to the "zeḳifa" of the later Hebrew (comp. Meg. 16b; B. M. 83b), which was certainly a simple stake. In the Mishnah (Sanh. vi. 3) the gallows is described as in two parts: קורה, the upright, which was firmly fixed in the ground; and עץ, the transverse beam (כמין יתד in the commentaries), from which the condemned was suspended by the hands. This contrivance was not employed to kill by strangulation. According to R. Jose, the post must not be fixed in the ground, but must be rested obliquely against a wall, and be buried immediately with the body of the executed. The consensus of authorities does not favor Jose's interpretation of the law, but holds that the gallows may rest in the ground, though it must not be permanently fixed, a new post being erected on each occasion (see CRUCIFIXION).

E. G. H.

GALLUS, CAIUS CESTIUS: Consul "suffectus" in 42 C.E. Pliny ("Historia Naturalis," xxxiv. 48) calls him "consularis," *i.e.*, "retired consul." According to a dubious passage in Tacitus ("Annales," xv. 25), he was appointed successor to Corbulo as legate of Syria (63); but his coins date only from the years 65 and 66 (Mionnet, v. 169, No. 189; Supplement, Nos. 190, 191). When the Jewish war broke out in the twelfth year of Emperor Nero (Oct., 65–66; see Josephus, "Ant." xx. 11, § 1), Gallus was already governor ("B. J." Preface, § 7; *ib.* ii. 14, §§ 3, 4). Gallus appears to have been favorably inclined toward the Jews ("B. J." ii. 14, § 3).

Actions During the War.

When Florus left Jerusalem and his troops were defeated, Gallus (Josephus, "Vita," § 5), the officer holding the highest military command in that region, had to take action. Opposing ambassadors from Florus and from the Jews had already appeared before him. Gallus, however, did not at once intervene with arms, but sent his tribune Neapolitanus to Jerusalem, who, together with Agrippa II., vainly tried to quiet the people ("B. J." ii. 16, § 1). When hostilities actually commenced Gallus advanced from Antioch upon Palestine. Along the seacoast he executed a bloody vengeance on the Jews, burning the city Chabulon to the ground, killing 8,000 Jews in Jaffa, and arriving during the Feast of Tabernacles at Lydda, which was almost forsaken by its inhabitants. He pitched his camp in Gabao (Gibeon); but even here he was violently attacked by the Jews from Jerusalem, and came very near being completely defeated

(*ib.* ii. 19, § 2; "Vita," § 7). Gallus then advanced nearer to Jerusalem upon the so-called Scopus; occupied and burned the suburb Bezetha, which was wholly undefended by the Jews ("B. J." ii. 19, § 4); stormed the inner wall for five days; and had already undermined the northern wall protecting the Temple (*ib.* § 6) when he withdrew pursued by the Jews. The latter fell upon him suddenly at Gabao, and forced him to beat a hasty retreat, leaving his valuable war materials behind. His best men, whom he had left as a cover, were cut down in the narrow pass at Beth-horon. Nero, who was at Achaia, heard of the defeat (*ib.* ii. 20, § 1; iii. 1, § 1), and Gallus' career as a general was at an end. He seems to have died soon after (Tacitus, "Hist." v. 10).

GALUT. See Diaspora; Exile.

GALVESTON: Chief commercial city of the state of Texas; on Galveston Bay and the Gulf of Mexico. It was founded in 1836, and has a population (1903) of 32,745. Jews settled in Galveston in 1840. In 1852 the Jewish Cemetery Association was organized, a plot of ground for burial-purposes being donated by the late Isadore Dyer. In 1856 the first Jewish services were held at the home of Isadore Dyer in a room dedicated to that purpose. In 1866 the Hebrew Benevolent Society of Galveston, Texas, was organized and chartered. A burial-plot was purchased in 1867, and another in 1897. The charter members of the Benevolent Society were J. W. Frank, J. Rosenfield, I. C. Levy, I. Fedder, Isadore Dyer, Leon Blum, J. Lieberman, and L. Block, the last three of whom are still (1903) living.

Congregation B'nai Israel (Reform) was organized in 1868 and chartered in 1870. The temple was dedicated in the latter year, and has been enlarged twice, now having a seating capacity of 764 persons. The congregation has had four rabbis: Alexander Rosenspitz, 1868–71; Abraham Blum, 1871–85; Joseph Silverman, 1885–88; Henry Cohen, 1888.

The Ladies' Hebrew Benevolent Society was organized in 1870, Mrs. Caroline Block (d. 1902) serving as president for thirty years; the Harmony Club was organized in 1870, Zacharias Frankel Lodge I. O. B. B. in 1874, and the Ladies' Auxiliary Society in 1887.

In 1894, under the title of "Young Men's Hebrew Association," the Orthodox Jews, the large majority of whom settled there after the Russian persecution of 1891, established a congregation. Orthodox services have been held since 1887, first in private houses and later in a building acquired for the purpose. The Y. M. H. A. has a charitable society —Bikur Cholim—and a Ladies' Auxiliary (established 1903). B'nai Zion Lodge (founded 1898) represents the local Zionists.

Galveston was visited by a terrific storm on Sept. 8, 1900, which left destitution, wide-spread misery, and death in its wake. The dead numbered about 8,000, and property to the value of many million dollars was swept away. Forty-one members of the Jewish community perished. Of the twenty-eight places of worship in the city, but five remained standing, and two of these were very badly damaged. Of the other three, Temple B'nai Israel was one. The sum of $26,427.33 was contributed by Jewish organizations and individuals for distribution among the Jewish sufferers, and was disbursed by a local committee made up of representatives of each of the communal institutions.

The Jews of Galveston have always been prominent in civic as in business life. A number of them have served as aldermen, and in 1853 Michael Seeligson was elected mayor, resigning a few months thereafter. Upon the commission controlling the affairs of the city at the present time the governor of the state appointed former City Treasurer I. H. Kempner. I. Lovenberg has been a member of the Galveston school board for seventeen years, and one of its most active workers. He is also president of the Galveston Orphans' Home, a non-sectarian institution, and for fourteen years was president of the Hebrew Benevolent Society.

Prominent Citizens.

A. H. C.

GAMA, GASPARD DA: German-Jewish mariner of the fifteenth century. According to his own story, Gaspard da Gama was born in Posen, and while still young had to leave the country (1456) on account of oppression. He followed his family to Jerusalem, and from there to Alexandria. He traveled thence to India by way of the Red Sea, was taken captive, and sold into slavery.

When Vasco da Gama had left the coast of Malabar and was returning to Europe (1498) he stopped at the little island of Anchediva, sixty miles from Goa. During his stay there his fleet was approached by a small boat containing among the native crew a tall European with a flowing white beard. This European was Gaspard da Gama, who had persuaded his master Sabayo, the viceroy of Goa, to treat the strangers kindly, and who was now bent on inducing them to land. Gaspard was evidently highly esteemed by Sabayo, for the latter had made him admiral ("capitao mór"). Approaching the Portuguese ships, he hailed the crew in Castilian, who were rejoiced to hear a familiar speech so far from home. Being promised by the Portuguese complete safety, he allowed himself to be taken aboard Vasco da Gama's ship, was received with respect, and entertained the crew with narrations of his experiences. Vasco da Gama suspected treachery, however, and had Gaspard bound, flogged, and tortured, prolonging the torture until the victim consented to become baptized, and to pilot the Portuguese ships in the Indian waters. Gaspard told Vasco da Gama that the viceroy of Goa was a generous man, who had treated him with great kindness and whom he was loath to desert, but since he found himself compelled to do so in order to save his life, he was willing to serve the Portuguese faithfully. The name Gaspard da Gama was given to him in baptism after Vasco da Gama, who had acted as his godfather. After a prolonged voyage in the Indian waters Gas-

pard accompanied Vasco da Gama to Portugal. In Lisbon Gaspard soon became a favorite with King Emanuel, who made him many valuable gifts and granted him a charter of privileges, and had him called "Gaspard of the Indies."

Gaspard also accompanied Cabral (1502) on his voyage to the East, and proved of great value to him by his knowledge of this region. At the king's desire Cabral was to consult with Gaspard on all important matters.

Having visited Melinde, Calicut, and Cochin, Cabral started on his return voyage, and at Cape Verde met the fleet of Amerigo Vespucci, which was then starting for the exploration of the eastern coast of South America. Vespucci hastened to avail himself of Gaspard's wide knowledge, and speaks of him in terms of praise as "a trustworthy man who speaks many languages and knows the names of many cities and provinces . . ."

Later, Gaspard accompanied Vasco da Gama to India (1502) and found his wife in Cochin, who could not be persuaded to abandon Judaism. On his return to Lisbon in 1503 the title "cavalleiro de sua casa" was conferred by the king on Gaspard for his valuable service to the country.

G. M. K.

GAMALA: City in Palestine, opposite Tarichеæ, beyond Lake Tiberias. It had an unusually strong position on the side of a mountain with a protruding spur, which gave it its name (גמלא = "camel"). It was accessible only from the south, on which side, however, a transverse moat had been made. There was likewise on the south a high hill which served the city for a defense. Within the wall there was a well (Josephus, "B. J." iv. 1, § 1). Alexander Jannæus captured the fort from a certain Demetrius who ruled in that vicinity (Josephus, *ib.* i. 4, § 8; "Ant." xiii. 15, § 3), and from that time Gamala became a possession of the Jews (*ib.*, ed. Niese, § 4; earlier editions have "Gabala"; the same name occurs in "B. J." i. 8, § 4). The region surrounding Gamala, called Gamalitis in "Ant." xviii. 5, § 1, was a territory in dispute between Herod Antipas and the Nabatæan king Aretas. Elsewhere Josephus calls the district in which Gamala was situated "Gaulanitis"; and the rebel Judah, who was born in Gamala, is called "the Gaulanite" ("Ant." xviii. 1, § 1).

When the great war broke out against Rome, Gamala at first remained true to the Romans (Josephus, "Vita," § 11), the oppressed inhabitants of Bathyra finding refuge there (*ib.*); but later it also revolted, and was fortified by Josephus ("B. J." ii. 20, § 16). King Agrippa sent Equiculus Modius thither to conquer the fortress, but he was too weak to do so ("Vita," § 24), and it was not till later that it fell into the hands of the king. Joseph, the midwife's son, persuaded the inhabitants, against the will of the aristocracy, to revolt against the king (*ib.* § 37), and Gamala thus became a support of the Zealots. Vespasian marched against it, but the Romans, though they made a way through the walls, were finally driven back. At last, on the 23d of Tishri, 68 C.E., the Romans again entered the city, conquered it, and killed all the inhabitants ("B. J." iv. 1, §§ 2–10; Suetonius ["Titus," § 4] says Titus conquered it).

The Mishnah counts Gamala among the cities which had been surrounded by a wall since the time of Joshua ('Ar. ix. 6), and the Talmud (*ib.* 32a) places it incorrectly in Galilee. Josephus states its position correctly in placing it in Lower Gaulanitis, from which district it obtained its name Γαμαλιτική ("B. J." iii. 3, § 5; 4, § 1).

Ritter ("Erdkunde," xv. 349, 353) identifies the city with the present Khan al-Araba. Furrer ("Tarichеæ und Gamala," in "Z. D. P. V." xii. 145–151) opposes those who incorrectly find it in Al-Ḥuṣn, since that is ancient Hippos. It should rather be identified with the modern village of Jamli on the River Rukḳad. Schumacher, who suggests Al-Aḥsun ("Northern Ajlûn," p. 116, London, 1890), objects to its identification with Jamli on the ground that the form of the mountain was caused by inundations of the Rukḳad ("Z. D. P. V." xv. 175); but this objection does not seem well taken.

G. S. KR.

GAMALIEL: Name which occurs in the Bible only as a designation of the prince of the tribe of Manasseh (Num. i. 10; ii. 20; vii. 54, 59; x. 23). In post-Biblical times the name occurs with special frequency in the family of Hillel. In a story in connection with a proselyte made to Judaism by Hillel, and which is supported by reliable tradition, it is said that the proselyte had two sons born to him after his conversion, whom he named in gratitude "Hillel" and "Gamaliel" (Ab. R. N. xv. [ed. Schechter, p. 62]; Midr. ha-Gadol, ed. Schechter, to Ex. xxviii.; see note *ad loc.*). Perhaps Hillel's father was called "Gamaliel," in which case the usual custom would have required the giving of this name to Hillel's first-born son. Besides the six patriarchs of the name of Gamaliel, tradition knows of others of the same name who lived in Palestine in the third and fourth centuries, and who are reckoned among the Palestinian amoraim.

BIBLIOGRAPHY: Frankel, *Mebo Yerushalmi*, pp. 71a–73b.

S. S. W. B.

GAMALIEL I.: Son of Simon and grandson of Hillel; according to a tannaitic tradition (Shab.

15a), he was their successor as nasi and first president of the Great Sanhedrin of Jerusalem. Although the reliability of this tradition, especially as regards the title of "nasi," has been justly disputed, it is nevertheless a fact beyond all doubt that in the second third of the first century Gamaliel (of whose father, Simon, nothing beyond his name is known) occupied a leading position in the highest court, the great council of Jerusalem, and that, as a member of that court, he received the cognomen "Ha-Zaḳen." Like his grandfather, Hillel, he was the originator of many legal ordinances with a view to the "tiḳḳun ha-'olam" (= "improvement of the world": Giṭ. iv. 1-3; comp. also Yeb. xvi. 7; R. H. ii. 5). Gamaliel appears as the head of the legal-religious body in the three epistles which he at one time dictated to the secretary Johanan (account of Judah b. 'Illai: Tosef., Sanh. ii. 6; Sanh. 11b; Yer. Sanh. 18d; Yer. Ma'as. Sh. 56c). Two of these letters went to the inhabitants of Galilee and of the Darom (southern Palestine), and had reference to the tithes; the third letter was written for the Jews of the Diaspora, and gave notice of an intercalary month which Gamaliel and his colleagues had decided upon. That part of the Temple territory—a "stairway of the Temple mount"—where Gamaliel dictated these letters is also the place where he once ordered the removal of a Targum to Job—the oldest written Targum of which anything is known (report of an eye-witness to Gamaliel II., grandson of Gamaliel I.: Tosef., Shab. xiii. 2; Shab. 115a; Yer. Shab. 15a).

His Correspondence.

Gamaliel appears also as a prominent member of the Sanhedrin in the account given in Acts (v. 34 *et seq.*), where he is called a "Pharisee" and a "doctor of the law" much honored by the people. He is there made to speak in favor of the disciples of Jesus, who were threatened with death (v. 38-39): "For if this counsel or this work be of men, it will come to naught: but if it be of God, ye can not overthrow it." He is also shown to be a legal-religious authority by the two anecdotes (Pes. 88b) in which "the king and the queen" (Agrippa I. and his wife Kypris; according to Büchler, "Das Synhedrion in Jerusalem," p. 129, Agrippa II. and his sister Berenice) go to him with questions about the ritual. Tradition does not represent Gamaliel as learned in the Scriptures, nor as a teacher, because the school of Hillel, whose head he undoubtedly was, always appears collectively in its controversies with the school of Shammai, and the individual scholars and their opinions are not mentioned. Hence Gamaliel is omitted in the chain of tradition as given in the Mishnah (Abot i., ii.), while Johanan b. Zakkai is mentioned as the next one who continued the tradition after Hillel and Shammai. Gamaliel's name is seldom mentioned in halakic tradition. The tradition that illustrates the importance of Johanan b. Zakkai with the words, "When he died the glory of wisdom [scholarship] ceased," characterizes also the importance of Gamaliel I. by saying: "When he died the honor [outward respect] of the Torah ceased, and purity and piety became extinct" (Soṭah xv. 18).

His Relative Position.

Gamaliel, as it appears, did most toward establishing the honor in which the house of Hillel was held, and which secured to it a preeminent position within Palestinian Judaism soon after the destruction of the Temple. The title "Rabban," which, in the learned hierarchy until post-Hadrianic times, was borne only by presidents of the highest religious council, was first prefixed to the name of Gamaliel. That Gamaliel ever taught in public is known, curiously enough, only from the Acts of the Apostles, where (xxii. 3) the apostle Paul prides himself on having sat at the feet of Gamaliel. That the latter paid especial attention to study is shown by the remarkable classification of pupils ascribed to him, for which a classification of the fish of Palestine formed a basis (Ab. R. N. xl.). In this arrangement Gamaliel enumerates the following kinds of pupils: (1) a son of poor parents who has learned everything by study, but who has no understanding; (2) a son of rich parents who has learned everything and who possesses understanding; (3) a pupil who has learned everything, but does not know how to reply; (4) a pupil who has learned everything and knows also how to reply. These correspond to the following varieties of fishes: (1) an unclean, *i.e.* ritually uneatable fish; (2) a clean fish; (3) a fish from the Jordan; (4) a fish from the great ocean (Mediterranean).

His Classification of His Pupils.

Besides this dictum of Gamaliel's, which is no longer wholly intelligible, only that saying has been preserved which is related in the Mishnah Abot (i. 16) under the name of Gamaliel; for, in spite of Hoffmann's objections ("Die Erste Mischna," p. 26), it is probably right to hold with Geiger ("Nachgelassene Schriften," iv. 308) that Gamaliel I. is intended. The saying is in three parts, and the first clause repeats what Joshua b. Perahyah had said long before (Abot i. 5): "Secure a teacher for thyself." The other two parts agree very well with the impression which the above-mentioned testimonial gives of Gamaliel as a thoroughly conscientious "Pharisee": "Hold thyself [in religious questions] far from doubt, and do not often give a tithe according to general valuation." Tradition probably contains many sayings of Gamaliel I. which are erroneously ascribed to his grandson of the same name. Besides his son, who inherited his father's distinction and position, and who was one of the leaders in the uprising against Rome, a daughter of Gamaliel is also mentioned, whose daughter he married to the priest Simon b. Nathanael (Tosef., 'Ab. Zarah, iii. 10).

As a consequence of being mentioned in the New Testament, Gamaliel has become a subject of Christian legends (Schürer, "Geschichte," ii. 365, note 47). A German monk of the twelfth century calls the Talmud a "commentary of Gamaliel's on the Old Testament." Gamaliel is here plainly the representative of the old Jewish scribes (Bacher, "Die Jüdische Bibelexegese," in Winter and Wünsche, "Jüdische Literatur," ii. 294). Even Galen was identified with the Gamaliel living at the time of the Second Temple (Steinschneider, "Hebr. Uebers." p. 401). This may be due to the fact that the last patriarch by the name of Gamaliel was also known as a physician (see GAMALIEL VI.).

S. S. W. B.

GAMALIEL II. (called also **Gamaliel of Jabneh,** to distinguish him from his grandfather, Gamaliel I.): The recognized head of the Jews in Palestine during the last two decades of the first and at the beginning of the second century. He continued with great energy and success the work of restoration begun by Johanan b. Zakkai. The tradition of the meeting between Johanan and Vespasian (Giṭ. 56b) relates that the former obtained the pardon of Gamaliel's family from the Roman emperor; and this part of the story may rest on a historical basis. Johanan probably retired from his position as president of the learned assembly at Jabneh, which took the place of the Sanhedrin at Jerusalem; and the office was given to Gamaliel, under whose leadership even those pupils of Johanan who excelled Gamaliel in scholarship willingly placed themselves. One of the greatest of these pupils, Eliezer b. Hyrcanus, married Gamaliel's sister, Imma Shalom (Shab. 116a; B. M. 59b). Perhaps it was Gamaliel II. to whom the title of "nasi" (prince; later replaced by "patriarch") was first given to raise him in public estimation and to revive the Biblical designation for the head of the nation. This title later became hereditary with his descendants. Gamaliel was officially recognized by the Roman authorities; and he journeyed to Syria for the purpose of being confirmed in office by the governor (*ἡγεμών*; 'Eduy. vii. 7; Sanh. 11b).

Appointed "Nasi."

The guiding principle in all of Gamaliel's actions is set forth in the words which he spoke on the occasion of his quarrel with Eliezer b. Hyrcanus (B. M. 59b): "Lord of the world, it is manifest and known to Thee that I have not done it for my own honor nor for that of my house, but for Thy honor, that factions may not increase in Israel." The ends which Gamaliel had in view were the abolition of old dissensions, the prevention of new quarrels, and the restoration of unity within Judaism. To attain these objects he consistently labored to strengthen the authority of the assembly at Jabneh as well as his own, and thus brought upon himself the suspicion of seeking his own glory. His greatest achievement was the termination of the opposition between the schools of Hillel and Shammai, which had survived even the destruction of the Temple. In Jabneh, says tradition (Yer. Ber. 3b; 'Er. 13b), a voice from heaven ("bat ḳol") was heard, which declared that, although the views of both schools were justifiable in principle (as "words of the living God"), in practise only the views of Hillel's school should be authoritative.

Gamaliel took care that the decisions reached by the assembly under his presidency should be recognized by all; and he used the instrument of the ban relentlessly against obstinate opposers of these decisions. He even placed his own brother-in-law, Eliezer b. Hyrcanus, under the ban (B. M. 59b). Gamaliel forced Joshua b. Hananiah, another famous pupil of Johanan b. Zakkai, to recognize the authority of the president in a most humiliating way, namely, by compelling Joshua to appear before him in traveler's garb on the day which, according to Joshua's reckoning, should have been the Day of Atonement, because Gamaliel would suffer no contradiction of his own declaration concerning the new moon (R. H. ii. 25a, b). Gamaliel, however, showed that with him it was only a question of principle, and that he had no intention of humiliating Joshua; for, rising and kissing him on the head, he greeted him with the words: "Welcome, my master and my pupil: my master in learning; my pupil in that thou submittest to my will." A story which is characteristic of Gamaliel's modesty is told of a feast at which, standing, he served his guests himself (Sifre to Deut. 38; Ḳid. 32b). But he manifested the excellence of his character most plainly upon the day on which he harshly attacked Joshua b. Hananiah, in consequence of a new dispute between them, and thereby so aroused the displeasure of the assembly that he was deprived of his position. Instead of retiring in anger, he continued to take part, as a member of the assembly, in the deliberations conducted by the new president, Eleazar b. Azariah. He was soon reinstated in office, however, after asking pardon of Joshua, who himself brought about Gamaliel's restoration in the form of a joint presidency, in which Gamaliel and Eleazar shared the honors (Ber. 27b-28a; Yer. Ber. 7c, d).

Controversies.

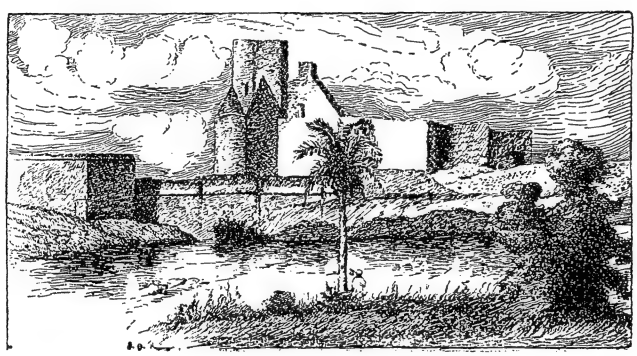
Shares the Presidency.

The most important outward event in Gamaliel's life that now followed was the journey to Rome, which he undertook in company with his colleague Eleazar and the two leading members of the assembly in Jabneh, Joshua b. Hananiah and Akiba. This journey was probably made toward the end of Domitian's reign (95), and had for its object the prevention of a danger which threatened on the part of the cruel emperor (Grätz, "Geschichte," 3d ed., iv. 109). This journey, together with the stay of the scholars in Rome, left many traces in both halakic and haggadic tradition (see Bacher, "Ag. Tan." i. 84). Especially interesting are the accounts of the debates which the scholars held with unbelievers in Rome, and in which Gamaliel was the chief speaker in behalf of Judaism (*ib.* p. 85). Elsewhere also Gamaliel had frequent opportunities to answer in controversial conversations the questions of unbelievers and to explain and defend the teachings of the Jewish religion (*ib.* p. 76). At times Gamaliel had to meet the attacks of confessors of Christianity; one of these was the "min," or philosopher, who maliciously concluded from Hosea v. 6 that God had completely forsaken Israel (Yeb. 102b; Midr. Teh. to Ps. x., end; most completely reproduced from the old source in Midr. ha-Gadol to Lev. xxvi. 9, in Bacher, "Ag. Tan." 2d ed., i. 83). There is a satirical point in a story in which Gamaliel with his sister brings a fictitious suit concerning an inheritance before a Christian judge and convicts him of having accepted bribes; whereupon Gamaliel quotes Jesus' words in Matt. v. 17 (Shab. 116a, b). The sect of believers in Jesus, which was ever separating itself more distinctly from all con-

Controverts Christianity.

nection with Judaism, and which with other heretics was classed under the name of "minim," led Gamaliel, because of its tendencies dangerous to the unity of Judaism, to introduce a new form of prayer, which he requested Samuel ha-Ḳaṭon to compose, and which was inserted in the chief daily prayer, the eighteen benedictions (Ber. 28b; Meg. 17b). This prayer itself, which together with the Shema' forms the most important part of the Jewish prayer-book, likewise owes its final revision to Gamaliel (*ib.*). It was Gamaliel, also, who made the recitation of the "eighteen prayers" a duty to be performed three times a day by every Israelite (see "Monatsschrift," xlvi. 430).

Still another liturgical institution goes back to Gamaliel—that of the memorial celebration which takes the place of the sacrifice of the Passover lamb on the first evening of Passover. Gamaliel instituted this celebration (Pes. x. 5), which may be regarded as the central feature of the Pesaḥ Haggadah, on an occasion when he spent the first Passover night with other scholars at Lydda in conversing about the feast and its customs (Tosef., Pes. x. 112). The memory of the lost sanctuary, which the celebration of the Passover evening also served to perpetuate, was especially vivid in Gamaliel's heart. Gamaliel and his companions wept over the destruction of Jerusalem and of the Temple when they heard the noise of the great city of Rome, and at another time when they stood on the Temple ruins (Sifre, Deut. 43; Mak., end; Lam. R. v. 18).



Traditional Tomb of Gamaliel II. at Jamnia.
(After Sepp, "Jerusalem und das Heilige Land.")

Gamaliel's appreciation of the virtue of mercy is well illustrated by a saying of his in allusion to Deut. xiii. 18: "Let this be a token unto thee! So long as thou thyself art compassionate God will show thee mercy; but if thou hast no compassion, God will show thee no mercy" (Tosef., B. Ḳ. ix. 30; Yer. B. Ḳ. *l.c.*; comp. Shab. 151a). Gamaliel was touchingly attached to his slave Ṭabi (Suk. ii. 1), at whose death he accepted condolences as for a departed member of the family (Ber. ii. 7).

In his intercourse with non-Jews Gamaliel was unconstrained, for which he was sometimes blamed. A friendly conversation is recorded ('Er. 64b) which he had with a heathen on the way from Acre to Ecdippa (Achzib). On the Sabbath he sat upon the benches of heathen merchants (Tosef., M. Ḳ. ii. 8). Various details have been handed down by tradition concerning the religious practises of Gamaliel and his house (see the following Tosefta passages: Dem. iii. 15; Shab. i. 22, xii. [xiii.], end; Yom-Ṭob i. 22; ii. 10, 13, 14, 16). In Gamaliel's house it was not customary to say "Marpe'!" (Recovery) when any one sneezed, because that was a heathenish superstition (Tosef., Shab. vii. [viii.] 5; comp. Ber. 53a). Two concessions were made to Gamaliel's household in the way of relaxing the severity of the rules set up as a barrier against heathendom: permission to use a mirror in cutting the hair of the head (Tosef., 'Ab. Zarah, iii. 5; comp. Yer. 'Ab. Zarah 41a), and to learn Greek (Tosef., Soṭah, xv. 8; Soṭah, end). In regard to the latter, Gamaliel's son Simon relates (Soṭah 49b) that many children were instructed in his father's house in "Greek wisdom."

Aside from his official position, Gamaliel stood in learning on an equal footing with the legal teachers of his time. Many of his halakic doctrinal opinions have been handed down. Sometimes the united opinion of Gamaliel and Eliezer b. Hyrcanus is opposed to that of Joshua b. Hananiah (Ket. i. 6–9), and sometimes Gamaliel holds a middle position between the stricter opinion of the one and the more lenient view of the other (Sheb. ix. 8; Ter. viii. 8). Gamaliel assented to certain principles of civil law which have been transmitted in the name of Admon, a former judge in Jerusalem, and which became especially well known and were authoritative for ensuing periods (Ket. xiv. 3–5). Many of Gamaliel's decisions in religious law are connected with his stay in some place in the Holy Land. In Ecdippa the archisynagogue Scipio (שנביון) asked him a question which he answered by letter after his return home (Tosef., Ter. ii. 13). There are also records of Gamaliel's stay in Kafr 'Uthnai (Giṭ. i. 5; Tosef., Giṭ. i. 4), in Emmaus (Ḥul. 91b), in Lydda (Tosef., Pes. ii. 10, x., end), in Jericho (Tosef., Ber. iv. 15), in Samaria (Tosef., Dem. v. 24), and in Tiberias (Tosef., Shab. xiii. 2).

In the field of the Haggadah should be especially mentioned the questions relating to biblical exegesis which Gamaliel liked to discuss in a circle of scholars, as had also his predecessor, Johanan b. Zakkai. There are records of four such discussions (on Prov. xiv. 34, see B. B. 10b; on Gen. xl. 10, see Ḥul. 92a; on Gen. xlix. 4, see Shab. 55b; on Esth. v. 4, see Meg. 12b), which all end with Gamaliel's expressed desire to hear the opinion of the eminent haggadist Eleazar of Modi'im.

Textual Criticism. A part of Gamaliel's textual exegesis is found in the controversial conversations mentioned above. He portrays the distress and corruption of the times in a remarkable speech which concludes with an evident reference to the emperor Domitian. He says:

"Since lying judges have the upper hand, lying witnesses also gain ground; since evil-doers have increased, the seekers

of revenge are also increasing; since shamelessness has augmented, men have lost their dignity; since the small says to the great, 'I am greater than thou,' the years of men are shortened; since the beloved children have angered their Father in heaven, He has placed a ruthless king over them [with reference to Job xxxiv. 20]. Such a king was Ahasuerus, who first killed his wife for the sake of his friend, and then his friend for the sake of his wife" (Introduction to Midr. Abba Gorion, beginning; Esther R., beginning).

Gamaliel uses striking comparisons in extolling the value of handiwork and labor (Tosef., Ḳid. i. 11), and in expressing his opinion on the proper training of the mind (Ab. R. N. xxviii.). The lament over his favorite pupil, Samuel ha-Ḳaṭon, which he made in common with Eleazar b. Azariah, is very touching: "It is fitting to weep for him; it is fitting to lament for him. Kings die and leave their crowns to their sons; the rich die and leave their wealth to their sons; but Samuel ha-Ḳaṭon has taken with him the most precious thing in the world—his wisdom—and is departed" (Sem. 8).

The Roman yoke borne by the Jewish people of Palestine weighed heavily upon Gamaliel. In one speech (Ab. R. N. *l.c.*) he portrays the tyranny of Rome that devours the property of its subjects. He reflects on the coming of the Messiah, and describes the period which shall precede His appearance as one of the deepest moral degradation and direst distress (Derek Ereẓ Zuṭa x.). But he preaches also of the fruitfulness and blessing which shall at some time distinguish the land of Israel (Shab. 30b). Gamaliel probably lived to see the beginning of the great movement among the Jews in Palestine and in other lands, under the emperors Trajan and Hadrian, which led to a final attempt under Bar Kokba to throw off the Roman yoke. Gamaliel's death, however, occurred in a time of peace. The pious proselyte Aquila honored his obsequies by burning valuables to the extent of seventy minæ, according to an old custom observed at the burial of kings (Tosef., Shab. vii. [viii.] 18; 'Ab. Zarah 11a); and Eliezer b. Hyrcanus and Joshua b. Hananiah, the aged teachers of the Law, arranged the ceremonies for his funeral (M. Ḳ. 27a; Yer. M. Ḳ. 82a). Gamaliel insured the perpetuation of his memory by his order to be buried in simple linen garments, for the example which he thus set put an end to the heavy burial expenses which had come to be almost unbearable; and it subsequently became the custom to devote to the memory of Gamaliel one of the goblets of wine drunk in the house of mourning (Ket. 8b).

His Death.

Of Gamaliel's children, one daughter is known, who answered in a very intelligent fashion two questions addressed to her father by an unbeliever (Sanh. 34a, 90b). Two of Gamaliel's sons are mentioned as returning from a certain feast (Ber. i. 2). Of these, Simon was called long after the death of Gamaliel to occupy his father's position, which became hereditary in his house. It can not be regarded as proved that the tanna Ḥaninah ben Gamaliel was a son of Gamaliel II. (Büchler, "Die Priester und der Cultus," p. 14); this is more likely to be true of Judah ben Gamaliel, who reports a decision in the name of Ḥaninah ben Gamaliel (Tosef., 'Ab. Zarah, iv. [v.] 12; 'Ab. Zarah 39b).

S. S. W. B.

GAMALIEL III.: Son of Judah I., who before his death appointed him his successor as nasi (Ket. 103a). Scarcely anything has been handed down concerning his deeds or concerning the whole period of his activity (within the first third of the third century). The revision of the Mishnah, begun by his father, was without doubt concluded under him. Three sayings of Gamaliel III. are incorporated in the Mishnah (Abot ii. 2–4). The first deals with the study of the Torah and with devoting oneself to the general welfare of the public. The second warns against the selfishness of the Roman rulers: "Beware of the government, because rulers attach a man to themselves for their own interests; they seem to be friends when it is to their advantage, but they abandon him when he is in need." The third saying recommends submission to the will of God: "Make His will thy will, so that He may make thy will like His own; make thy will of no account beside His, so that He may make the will of others of no account before thine." The Tosefta contains but one saying of Gamaliel (Soṭah vi. 8), a paraphrase of Num. xi. 22, in which Moses complains of the unreasonableness of the people's wishes; a baraita (Men. 84b) contains a halakic exegesis of Gamaliel. Hoshaiah asks Gamaliel's son, Judah II., concerning a halakic opinion of his father's (Yer. Ber. 60d). Johanan tells of a question which Gamaliel III. answered for him (Ḥul. 106a). Samuel, the Babylonian amora, tells of differences of opinion between Gamaliel and other scholars (Niddah 63b; B. B. 139b; Yer. B. B. 10d).

S. S. W. B.

GAMALIEL IV.: Son and successor of the patriarch Judah II., and father of the patriarch Judah III. The period of activity of these patriarchs can not be determined. Grätz puts Gamaliel IV. in the last third of the third century. According to Halevy, he was a contemporary of Hoshaiah, of whom it is related that he prevented Gamaliel from introducing into Syria an ordinance referring to tithing the fruits of the field (Yer. Ḥal. 60a). In the Jerusalem Talmud ('Ab. Zarah 39b) is mentioned a question of religious law addressed to Gamaliel by Abbahu. In answering it the teacher describes himself as an unimportant person and of little learning ("adam ḳaṭon") in comparison with Abbahu.

S. S. W. B.

GAMALIEL V.: Son and successor of the patriarch Hillel II.; celebrated in connection with the perfecting of the Jewish calendar in 359. From geonic sources ("Seder Tanna'im we-Amora'im") only his name and those of his two successors are known. But in a letter written in 393, Jerome mentions that the emperor Theodosius I. (379–395) had condemned to death the former consul Esychius,

for obtaining by fraud important papers belonging to the patriarch Gamaliel, who was much incensed against the culprit.

S. S. W. B.

GAMALIEL VI.: The last patriarch. The decree of the emperors Honorius and Theodosius II. (Oct. 17, 415) contains interesting data concerning him. By this decree the patriarch was deprived of all the higher honors which had been given him, as well as of the patriarchate, because he had permitted himself to disregard the exceptional laws against the Jews, had built new synagogues, and had adjudged disputes between Jews and Christians. With his death the patriarchal office ceased, and an imperial decree (426) diverted the patriarchs' tax ("post excessum patriarchorum") into the imperial treasury. Gamaliel VI. appears to have been a physician. Marcellus, a medical writer of the fifth century, mentions a remedy for disease of the spleen which had been discovered not long before by "Gamalielus Patriarcha."

GAMALIEL BEN PEDAHZUR: The pseudonym of the unknown author of a work on the Jewish ritual, the title-page of which reads. "The Book of Religion, Ceremonies, and Prayers of the Jews as Practised in Their Synagogues and Families on All Occasions; on Their Sabbath and Other Holy Days Throughout the Year. . . . Translated Immediately from the Hebrew, London, J. Wilcox, 1738." This work contains, in addition to the first English translation of the Jewish prayer-book and a guide to the same, an elaborate account of Jewish ceremonies as they were observed by strictly orthodox Jews in former times. It is an exceedingly quaint compilation, evidently written by a Jew, but the identity of the author has never been discovered.

J. I. H.

GAMBLING: Playing at games, especially games of chance, for money. Among the ancient Israelites no mention is made of games of chance, and no provision was made against them until the period of the Mishnah. With the introduction of foreign customs and amusements in the latter period of the Second Temple, playing with dice ("ḳubya," *κυβεία*), the popular game of antiquity, was adopted by the Jews. The Rabbis were bitterly opposed to these imported fashions, and looked upon them with intense aversion (see Midr. Teh. to Ps. xxvi. 10, which speaks of "those that play at dice, who calculate with their left hand, and press with their right, and rob and wrong one another"). The Mishnah disqualified the gambler from testifying before a court of justice (Sanh. 24b). Since robbery was defined in Jewish law as the act of violently appropriating something belonging to another against his will (B. Ḳ. 79b), the Rabbis could not make gambling a capital crime. They did, however, forbid gambling of any kind, and considered it a form of robbery; but since it was not actual robbery, money lost in games of chance could not be collected through the courts of justice (Giṭ. 61b; Maimonides, "Yad," Gezelah, vi. 7–11, 16; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 370).

The games mentioned in the Mishnah in connection with the laws of witnesses are playing at dice and betting on pigeons. The reason for denouncing men who engaged in either of these games was, according to some, that they were guilty of robbery; according to others, that they wasted their time in idleness and were not interested in the welfare of humanity (see BETTING). The Gemara included all games of chance under these two headings, such as draughts (פסַפְסִים, *ψῆφος*), races, etc. (Sanh. 24b, 25b). The term "ḳubya," used in this connection to signify dice (Shab. 149b), was later applied by the Rabbis indiscriminately to any kind of gambling game. Dice, lotteries, betting, cards, and other games were commonly indulged in by the Jews of medieval Europe, and many decrees ("takḳanot") were passed in the various communities against them. So wide-spread were these games that even scholars and prominent leaders of the synagogue were seized with an uncontrollable passion for them. Leo da Modena (an eminent scholar who lived in Venice at the close of the sixteenth century) was known as an inveterate card-player, so that the rabbis of Venice, fearing the pernicious results of such an example, issued a decree (1628) excommunicating any member of the congregation who should play cards within a period of six years therefrom. Such communal enactments had been very frequent in Italy, a typical instance being preserved in a decree of the community of Forli dated 1416 (S. Halberstamm in "Grätz Jubelschrift" [Hebr. section], p. 57).

These enactments were stringent, and equally so was the punishment for their violation; yet they were not always heeded by the people. The eve of Christmas ("Nittal Nacht"), when the students of the Law refrained from study, was considered most favorable for card-playing. The restrictions were also disregarded on new moons and the week-days of Passover and of the Feast of Tabernacles, at weddings, on Purim, and especially on Ḥanukkah, when even pious and scholarly men indulged in card-playing. In spite of the strenuous objections of the Rabbis, the custom still prevails in many cities of eastern Europe of playing cards on Ḥanukkah soon after the candles are lighted ("Ḥawwot Ya'ir," p. 126).

While the general tendency of the Rabbis was to forbid all manner of gambling games, they were careful to distinguish between those who played for pastime and those who made gambling their profession (Sanh. 24b). Games for pastime were allowed, especially for women and children, even on the Sabbath day (Shulḥan 'Aruk, Oraḥ Ḥayyim, 338, 5, Isserles' gloss). The complaint that games, including chess, entailed a waste of time ("Shebeṭ Musar," xlii.; see CHESS), failed to influence the people. The Jews of all lands have usually followed the amusements in which their neighbors indulge. See GAMES AND SPORTS, and, for the legal aspect of gambling, ASMAKTA.

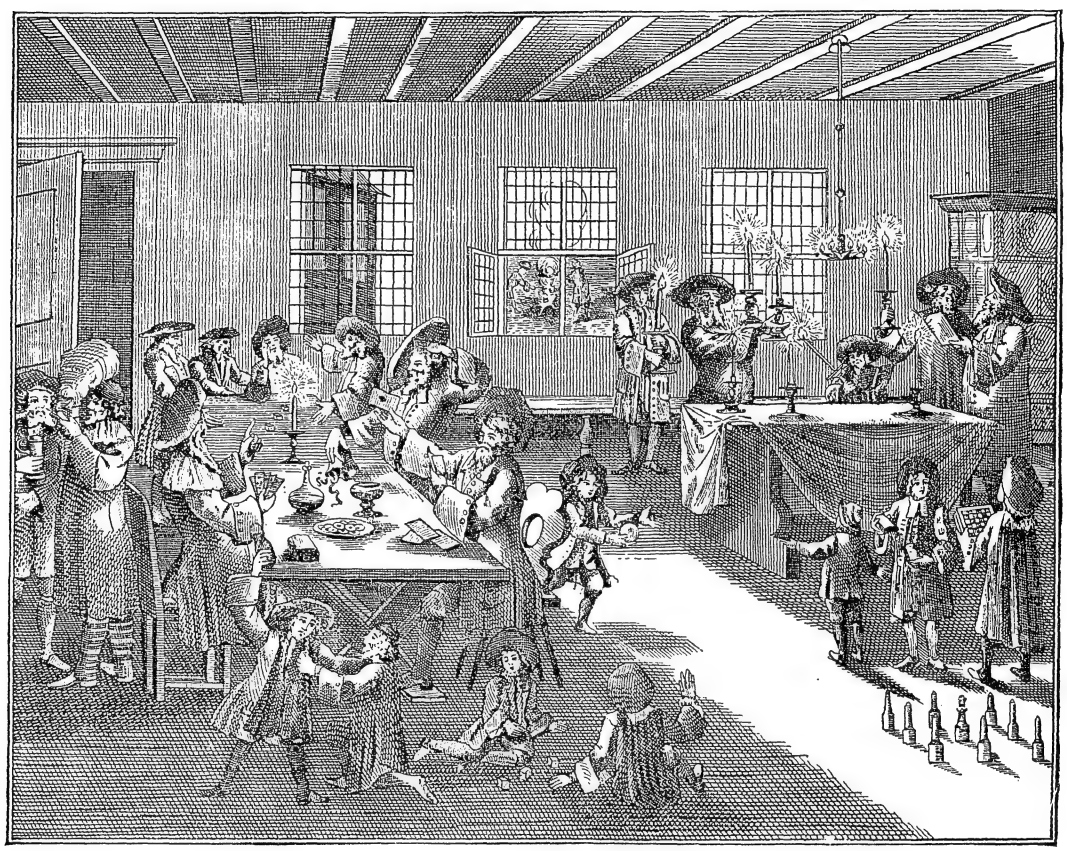
S. S. J. H. G.

GAMES AND SPORTS: Playful methods of enjoying leisure moments. The ancient Hebrews practised target-shooting with arrows (I Sam. xx. 20; Job xvi. 12; Lam. iii. 12; comp. also Bacher in "R. E. J." xxvi. 63), or with slings and stones (Judges xx. 16; I Sam. xvii. 40; Zech. ix. 15). Mention is also made of lifting heavy stones (Zech. xii. 3; Jerome, *ad loc.*), foot-racing (Ps. xix. 6 [A. V. 5]), and jumping (Ps. xviii. 30 [A. V. 29]). As these games were intended to strengthen the body and make the participants fit for war, so guessing-games (Judges xiv. 14; I Kings x. 1–3; Josephus, "Ant." viii. 5, § 3; 6, § 5; comp. Wünsche, "Die Räthselweisheit bei den Hebräern," Leipsic, 1883) were intended to sharpen the intellect. See RIDDLES. In the Hellenic period Greek games were introduced into Judea (II Macc. iv. 9 *et seq.*; I Macc. i. 14), and were cultivated especially by the Herodians (Josephus, *l.c.* xv. 8, § 1; 9, § 6; xvi. 5, § 1; xix. 7, § 5; 8, § 2; *idem*, "B. J." i. 21); but they were offensive to the pious (Levy, "Neuhebr. Wörterb." *s.v.* טיאטרון and קרקס). See also ATHLETES, ATHLETICS, AND FIELD SPORTS; CIRCUS; GLADIATOR.

The Mishnah, the Talmud, and the Midrash mention dice (קוביא, *κύβος*; Shab. xxiii. 2), checkers (פסיפס, *ψῆφος*, *ψηφίς*, the stones or the polished pieces of wood used being so called; see Levy, *l.c.*, *s.v.*), and pigeon-racing (the participants being called מפריחי יונים). These amusements, however, were considered disreputable, and indulgence in them disqualified a person as a witness (Sanh. iii. 3; Tosef., Sanh. v. 2; comp. Tosef., Yom-Ṭob to Shab. xxiii. 2).

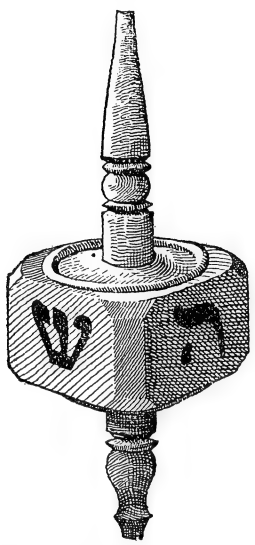
The increasing seriousness of the conception of life banished games and diversions, only those being permitted that stimulated thought, as riddles and questioning of Bible passages (פסוק לי פסוקיך; Ḥag. 15a, etc.). In the Middle Ages, when the Jews came into more frequent contact with other peoples, they adopted the games of the latter, especially CHESS, which has produced an extensive literature (Steinschneider, in Van der Linde's "Geschichte und Litteratur des Schachspiels," i. 155 *et seq.*, Berlin, 1874). Other games, such as "straight or crooked" and "back or blade," were acquired in the same way. The Jewish synods, rabbinates, and magistrates, like the Christian municipal authorities, issued ordinances against the increase of games of hazard (Güdemann, "Geschichte des Erziehungswesens der Abendländischen Juden," i. 259 *et seq.*; Halberstamm, in "Grätz Jubelschrift," pp. 57–63; Rosenthal, "Einiges über die תקנות ש"ום," in "Monats-

In the Middle Ages.



GAMES PLAYED ON EVE OF PURIM.
(From Kirchner, "Jüdisches Ceremoniel," 1726.)

schrift," 1902, p. 254). See GAMBLING. They were permitted as an exception on the intermediate holidays and on Ḥanukkah, on condition that they were not played for money. It was considered wanton to walk on stilts; ball- and nut-games (a nut being thrown against a pile of nuts) were permitted to boys and women (Güdemann, *l.c.* i. 60, ii. 210 *et seq.*, iii. 139 *et seq.*). Games that called for ingenuity and incited thought were preferred ("Sefer ha-Ḥasidim," No. 644), especially the so-called "Ḥanukkah ketowaus" (Güdemann, *l.c.* iii. 87, 88). In Germany, Austria, and Poland "trendel" (from the German "drehen") is still in vogue, being played with a revolving die, on the four sides of which the letters נ (= "ganz" = "all"), ה (= "halb" = "half"), ג (= "nichts" = "nothing"), and ש (= "stell" = "put" or "add") are marked, indicating the result of each play. See also ḤANUKKAH; PURIM. M. G.



Ḥanukkah "Trendel," or Tee-Totum.

Other games found among the Jews at an early date are such as were played with apples, eggs, and marbles, as well as "riemenstechen," "knight and robbers," "shilach shik," "pani roizi," "quittlach," "robber caravan," "head and eagle," "Abraham's horse," "David ha-Malech," "rime-counting," etc. (see Ulrich, "Juden in der Schweiz," pp. 140, 142). In dancing, the sexes were strictly separated (this was a rule even for the children in the street); exceptions were made only in the case of father and daughter, married couples, and brothers and sisters. Every large community, as those of Eger, Augsburg, Rothenburg, and Frankfort-on-the-Main, had its dance-house ("bet ḥatanot"), used also for weddings, the dwelling-houses being too small for such occasions. The "Totentanz" and "Dr. Faustus" are of non-Jewish origin, as probably also the "fish-dance" of the Sephardim in Sarajevo. Letter-games, in which corresponding words or phrases are found, the numerical values of the letters in each when added being equal (see GEMAṬRIA), are as old as Old Testament times. Thus "baruk Mordekai" = "arur Haman" = 502. In another game one child cites a verse, and the next child recites a second one that begins with the letter with which the first verse closed. In the "samek and pe" game, one child chooses samek and the other pe; a copy of the Pentateuch is then opened, and according as there are more sameks or pes on the page the child who has so chosen wins. In the "Moshe" game, one chooses a right-hand page and the other a left-hand page of a Ḥumash; whoever is the first to find the letters "mem, shin, he" in this sequence among the four end letters of a page wins. As children were not allowed to be punished in the period between the 17th of Tammuz and the 9th of Ab, they took full advantage of this opportunity to mock the teacher; hence the "rabbi game."

The Jews became acquainted with cards in the fifteenth century. Leon da Modena was ruined by them. It was a Jewess who wrote the most pointed pamphlet against cards, and the gematria "cards = 259 = Satan" was intended to warn against them. Many vowed never to touch cards again, or at least to play only for harmless stakes. One Jew was even willing to have his hand cut off as punishment. Finally, the communities, as at Hamburg, Forli, and Bologna, took up the matter in their "taḳkanot" (statutes). Nevertheless cards were allowed at Christmas, Purim, Ḥol ha-Moed, Sukkot, on the eve of Ḥanukkah, and in the lying-in room.

GAN SHA'ASHU'IM. See PERIODICALS.

GANGANELLI, LORENZO. See CLEMENT XIV.

GANS, DAVID BEN SOLOMON BEN SELIGMAN: German historian; astronomer; born at Lippstadt, Westphalia, 1541; died at Prague Aug. 25, 1613. After having acquired a fair knowledge of rabbinical literature at Bonn and Frankfort-on-the-Main, he went to Cracow, where he studied under Moses Isserles. Later he attended the lectures of the brothers Löwe ben Bezalel of Prague and of R. Sinai. They introduced philosophy, mathematics, and astronomy into the circle of their studies, and from them Gans received the impulse to devote himself to these branches of science. He lived for a time at Nordheim (where he studied Euclid), passed several years in his native city, and about 1564 settled at Prague. There he came into contact with Kepler and Tycho Brahe, and took part for three consecutive days in astronomical observations at the Prague observatory. He also carried on a scientific correspondence with Johann Müller (Regiomontanus), and was charged by Tycho Brahe with the translation of the Alphonsine Tables from Hebrew into German.

Among Gans's works the most widely known is his history entitled "Ẓemaḥ Dawid," published first at Prague, in 1592. It is divided into two parts, the first containing the annals of Jewish history, the second those of general history. The author consulted for the second part of his work the writings of Spangenberg, Laurentius Faustus, Hubertus Holtzius, Georg Cassino, and Martin Borisk. Though Gans's annals are very dry and have no great intrinsic value, they are memorable as the first work of this kind among the German Jews, who at that time appreciated historical knowledge but slightly. Indeed, in his preface to the second volume the author deemed it necessary to justify himself for having dealt with so profane a subject as the annals of

His History.

general history, and endeavored to demonstrate that it was permitted to read history on Saturdays. The "Zemaḥ Dawid" passed through many editions. To the edition of Frankfort-on-the-Main, 1692, David ben Moses Rheindorf added a third part containing the annals of that century, which addition has been retained in later editions of the "Zemaḥ." The first part of Gans's work, and extracts from the second, were translated into Latin by Wilhelm Heinrich Vorst (Leyden, 1644). It was translated also into Judæo-German by Solomon Hanau (Frankfort-on-the-Main, 1692).

Gans was also the author of: "Gebulat ha-Erez," a work on cosmography, which is in all probability identical with the "Zurat ha-Erez," published at Constantinople under the name of "David Abzi" ("Auza" = אוזא = "Gans"); "Magen Dawid," an astronomical treatise, a part of which is included in the "Neḥmad we-Na'im," mentioned below; the mathematical works "Ma'or ha-Ḳaṭan," "Migdal Dawid," and "Prozdor," which are no longer in existence; "Neḥmad we-Na'im," dealing with astronomy and mathematical geography, published with additions by Joel ben Jekuthiel of Glogau at Jessnitz, 1743. This work is divided into 12 chapters and 305 paragraphs. In the introduction the author gives a historical survey of the development of astronomy and mathematical geography among the nations. Although acquainted with the work of Copernicus, Gans followed the Ptolemaic system, attributing the Copernican system to the Pythagoreans. He also ventures to assert that the prophet Daniel made a mistake in computation. A Latin translation of the introduction, and a résumé made by Hebenstreit, are appended to the "Neḥmad we-Na'im."

J. I. Br.

GANS, EDUARD: German jurist; born at Berlin March 22, 1798; died there May 5, 1839. He was the son of the banker Abraham Gans, and received his early education at the Gymnasium zum Grauen Kloster; in 1816 he entered the Berlin University to study jurisprudence, continued his studies at Göttingen, and finally, in 1818, went to Heidelberg, where he devoted himself to philosophy and jurisprudence under Hegel and Thibaut, the former of whom was to have so important an influence upon his life. To Thibaut's "Archiv" he contributed a number of legal essays, and published in 1819 a pamphlet, "Ueber Römisches Obligationenrecht." In the following year he became docent at Berlin University, soon attracting an extraordinarily large number of hearers. The most forceful manifestation of his attitude toward the historical school of jurisprudence is embodied in the introduction to his "Scholien zum Gajus," Berlin, 1821.

Gans was also a leader in another movement. Even the scholars in Germany at that time were accustomed to revile the Jews, and accordingly Jews with aspirations toward preferment in social and professional life sought the panacea of baptism. To combat these evils, three young men founded, Nov. 27, 1819, the Verein für Kultur und Wissenschaft der Juden, the three being Gans, Zunz, and Moses Moser, the bosom friend of Heinrich Heine, who himself later on became a zealous member of the society. The society's chief purpose was to prevent the wholesale conversion of Jews to Christianity and to promote among them the cultivation of agriculture, trade, science, and the fine arts. To aid in carrying out the purposes of the society Gans founded a scientific institute, in which lectures were delivered by the members. He discussed, in a cycle of lectures, "the laws concerning the Jews in Rome as derived from ancient Roman law"; he delivered a lecture on the history of the Jews in the north of Europe and in the Slavonic countries, and wrote an essay on the principles of the Mosaic-Talmudic hereditary law, which constituted a chapter of his volume on "Erbrecht." All these treatises appeared in a periodical entitled "Zeitschrift für die Wissenschaft des Judenthums" (vol. i., 1822), published by the society and edited by Zunz.

But this movement met with little appreciation, and Gans among others was sorely disappointed. With a treatise on the suspension of the "ḳahals" (the communal boards) in Poland through an imperial ukase of Jan. 1, 1822, the society's periodical was discontinued; and the society itself soon went out of

existence in consequence of lack of interest on the part of its members.

In 1825, despite the crusade which he himself had inaugurated against religious disloyalty, Gans adopted Christianity. He was shortly thereafter (1826) appointed associate professor in the juridical faculty of the Berlin University; in 1828 he became professor. He was a singularly attractive teacher. The largest lecture-hall in the university was not capacious enough to accommodate the number of his hearers, particularly at his lectures on modern history, which were delivered in such a spirit of freedom that the government authorities frequently suppressed them. They were, however, as often resumed on the representations of Kultusminister von Altenstein.

Eduard Gans.

Gans's principal works are: "Das Erbrecht in Weltgeschichtlicher Entwickelung" (vols. i.–iv., 1824–35); "System des Römischen Zivilrechts," 1827; "Beiträge zur Revision der Preussischen Gezetzgebung," 1830–32; "Vermischte Schriften Juristischen, Historischen, Staatswissenschaftlichen, und Aesthetischen Inhalts," 1834, 2 vols.; "Vorlesungen über die Geschichte der Letzten 50. Jahre," in "Historisches Taschenbuch" (1833–34); "Rückblicke auf Personen und Zustände," 1836; "Ueber die Grundlage des Besitzes," 1839. He was one of the founders of the "Jahrbücher für Wissenschaftliche Kritik," and editor of Hegel's "Vorlesungen über die Philosophie der Geschichte," 1837.

GANS, SOLOMON PHILIP: German jurist; born 1788; lived at Celle, Hanover. He was the author of: "Das Erbrecht des Napoleonischen Gesetzbuches für Westphalen," Hanover, 1810; "Ueber die Verarmung der Städte und des Landmannes," Brunswick, 1831; "Entwurf einer Criminal-Processordnung," Göttingen, 1836. He also edited the "Zeitschrift für die Civil- und Criminalrechtspflege im Königreich Hanover," of which only four numbers appeared.

S. L. La.

GANZFRIED, SOLOMON: Hungarian rabbi and author; born at Ungvar about 1800; died there July 30, 1886. He frequented the yeshibah of Hirsch Heller at Bonyhad (see Jew. Encyc. i. 472), and entered upon a business career first at Homona, then at Ungvar; but being unsuccessful in business, he accepted a call to the rabbinate of Brezovica (1830), which he held until 1849, when he became dayyan in his native city; he remained in that office until his death. In 1869 he was a delegate to the Jewish congress at Budapest.

Ganzfried was a very voluminous writer, chiefly in the domain of ritual law; his abridged Shulḥan 'Aruk became very popular, being frequently reprinted in Hebrew and in Yiddish. His works are: "Pene Shelomoh," novellæ on Baba Batra, Zolkiev, 1846; "Torat Zebaḥ," on the laws of sheḥitah, Lemberg, 1848; Ungvar, 1869; "Appiryon," homilies on the Pentateuch, Ungvar, 1864 and 1877; "Ḳeset ha-Sofer," on the laws of writing scrolls, tefillin, and mezuzot, Ungvar, 1871; "Ḳiẓẓur Shulḥan 'Aruk," Warsaw, 1870 (republished fourteen times); "Ohole Shem," on the orthography of Jewish names in bills of divorce, Ungvar, 1878; "Leḥem we-Simlah," on menstruation and the ritual bath; a prayer-book, also many times reprinted. He left in manuscript novellæ on various Talmudic treatises, notes on Abraham ben Jehiel Danzig's "Ḥayye Adam," and responsa. Heinrich Brody is a grandson of Ganzfried.

D.

GAON: An influential Jewish family in Vitoria, Spain.

Don Gaon: Chief farmer of taxes under Henry IV. of Castile, whose suite he accompanied through the Basque territory on the way to S. Juan de Luz on the Spanish-French frontier. During his stay in Fuenterrabia, the king sent Gaon to Guipuzcoa to collect the tribute. The hidalgos of Guipuzcoa regarded this demand as an encroachment on the old statutory rights, and murdered Gaon on his arrival in Tolosa (May 6, 1463). The king at once proceeded with his troop of cavalry to take revenge. In the first outburst of his anger he desired to destroy the city. The house in which the Jew had been murdered was already torn down, when the leading inhabitants of the town appeared before the king, and resigned the old privileges which they had dearly bought with life and blood. This appeased the king, and he desisted from further punishment for Gaon's murder.

Eliezer Gaon: Merchant in Vitoria; son of the preceding. In 1482, together with Eliezer Tello and Moses Balid, he held the office of tax-collector in Vitoria.

Samuel Benjamin Gaon: Member of the deputation which, toward the end of June, 1492, in the name of the Jewish community, made an irrevocable present of the Jewish cemetery, with all its appurtenances, to the city of Vitoria.

BIBLIOGRAPHY: Kayserling, *Gesch. der Juden in Spanien*, i. 121 *et seq.*, 128 *et seq.*, 214 *et seq.*

G. M. K.

GAON (plural, **Geonim**).—**In Babylon:** The title of "gaon," probably an abbreviation of גאון יעקב (Ps. xlvii. 5), was given to the heads of the two Babylonian academies of Sura and Pumbedita, though it did not displace the title of "rosh yeshibah"

(Aramaic, "resh metibta"), which properly designated the office of head of the academy, and remained to the end the official designation for that position. There are no data whatever to show when the title "gaon" originated (see JEW. ENCYC. i. 146). Sherira, who is the source for the exact sequence of the Geonim, apparently considers "gaon" an ancient title of the head of the academy, for he says (ed. Neubauer, i. 34) that the amora Ashi was gaon at Mata Meḥasya (Sura). But Sherira himself begins to use the title consistently only toward the close of the sixth century, "at the end of the Persian rule," when the schools of Sura and Pumbedita resumed their parallel activity after a period of interruption. One is justified, therefore, in assigning to that date the beginning of the period of the Geonim—all the more so as the period of the Saboraim can not be extended down to the year 689, as Abraham ibn Daud assumes in his historical work, "Sefer ha-Ḳabbalah." According to an old, well-authenticated statement, 'Ena and Simuna, who flourished in the first third of the sixth century, were the last saboraim. The interval between this date and that of the reopening of the schools referred to above, may be included in the period of the Saboraim, and the period of the Geonim may be said to begin with the year 589, when Mar Rab Ḥanan of Iṣkiya became gaon of Pumbedita. The first gaon of Sura, according to Sherira, was Mar Rab Mar, who assumed office in 609. The last gaon of Sura was Samuel b. Ḥofni, who died in 1034; the last gaon of Pumbedita was Hai, who died in 1038; hence the activity of the Geonim covers a period of nearly 450 years.

Their Functions.

The Geonim officiated, in the first place, as directors of the academies, continuing as such the educational activity of the Amoraim and Saboraim. For while the Amoraim, through their interpretation of the Mishnah, gave rise to the Talmud, and while the Saboraim definitively edited it, the Geonim's task was to interpret it; for them it became the subject of study and instruction, and they gave religio-legal decisions in agreement with its teachings.

As the academies of Sura and Pumbedita were also invested with judicial authority, the gaon officiated at the same time as supreme judge. The organization of the Babylonian academies recalled the ancient sanhedrin. In many responsa of the Geonim, members of the schools are mentioned who belonged to the "great sanhedrin," and others who belonged to the "small sanhedrin." As may be gathered from the statements of Nathan ha-Babli (tenth century), and from various references in the geonic responsa, the following customs connected with the organization of the academies were observed in the two "kallah" months, Adar and Elul, during which (as in the time of the Amoraim) foreign students assembled in the academy for common study. In front of the presiding gaon and facing him were seated seventy members of the academy in seven rows of ten persons each, each person in the seat assigned to him, and the whole forming, with the gaon, the so-called "great sanhedrin." Gaon Amram calls them in a responsum ("Responsa der Geonim," ed. Lyck, No. 65) the "ordained scholars who take the place of the great sanhedrin." A regular ordination ("semikah") is of course not implied here; that did not exist in Babylonia, only a solemn nomination taking place. Gaon Ẓemaḥ refers in a responsum (see "Jeschurun," v. 137) to "the ancient scholars of the first row, who take the place of the great sanhedrin." The masters, or "allufim" (*i.e.*, the seven heads of the college of teachers ["resh kallah"]), and the "ḥaberim," the three most prominent among the other members of the college, sat in the first of the seven rows. Nine sanhedrists were subordinated to each of the seven allufim, who probably supervised the instruction given during the entire year by their subordinates. Notwithstanding the assumption of Grätz ("Geschichte der Juden," v. 148, 480) and Halevy ("Dorot ha-Rishonim," iv. 217), it appears from the text of Nathan ha-Babli (ed. Neubauer, ii. 87), if read rightly, and from other sources, that only the seven kallah heads were called "allufim," and not all the 70 members of the college. The two geonim Amram and Ẓemaḥ designate in their responsa, mentioned above, the resh kallah and the allufim as heads of the college. A scholar by the name of Eleazar, who went from Lucena in Spain to Babylon in the ninth century, is designated both as "alluf" and as "resh kallah" (see Harkavy, "Resp. der Geonim," pp. 201, 376). A correspondent of Hai Gaon, Judah b. Joseph of Kairwan, is called on one occasion "alluf," on another "resh kallah," and on a third "resh sidra" (Harkavy, *l.c.* pp. 359, 383).

The Kallah.

The members of the academy who were not ordained sat behind the seven rows of sanhedrists. During the first three weeks of the kallah month the scholars seated in the first row reported on the Talmud treatise assigned for study during the preceding months; in the fourth week the other scholars and also some of the pupils were called upon. Discussions followed, and difficult passages were laid before the gaon, who also took a prominent part in the debates, and freely reproved any member of the college who was not up to the standard of scholarship. At the end of the kallah month the gaon designated the Talmudic treatise which the members of the assembly were obliged to study in the months intervening till the next kallah should begin. The students who were not given seats were exempt from this task, being free to choose a subject for study according to their needs.

During the kallah which took place in the month of Adar the gaon laid before the assembly every day a certain number of the questions that had been sent in during the year from all parts of the Diaspora. The requisite answers were discussed, and were finally recorded by the secretary of the academy according to the directions of the gaon. At the end of the kallah month the questions, together with the answers, were read to the assembly, and the answers were signed by the gaon. A large number of the geonic responsa originated in this way; but many of them were written by the respective geonim without consulting the kallah assemblies convened in the spring.

Nathan ha-Babli's account, from which the foregoing statements have been taken, refers only to the

kallah months. The remaining months of the year passed more quietly at the academies. Many of the members, including those of the college designated as "sanhedrin," lived scattered in the different provinces, and appeared before the gaon only at the time of the kallah. Nathan designates the permanent students of the academy by the Talmudic term "bene be-rab" (sons of the schoolhouse), in contradistinction to the "other students" that gathered at the kallah. These two classes of students numbered together about 400 at the time when Nathan wrote his account (tenth century). When a resh kallah or any other member of the college died and left a son who was worthy to occupy his father's seat, the son inherited it. The students coming to the academy during the kallah months received support from a fund which was maintained by gifts sent to the academy during the year, and which was in charge of a trustworthy man. The members sitting in the front rows seem to have drawn a salary.

Its Members.

A description of the organization of the geonic academies differing in important details from Nathan's account is found in an interesting genizah fragment edited by Schechter ("J. Q. R." xiii. 365). This fragment, however, most probably refers to the Palestinian academy of the eleventh century (see "J. Q. R." xv. 83, and also GAON IN PALESTINE).

Two courts were connected with each of the two Babylonian academies. The higher court ("bet din gadol") was presided over by the gaon (see Harkavy, *l.c.* p. 88). It appointed the judges for the districts within the jurisdiction of the respective academies (comp. the letter of appointment in Aramaic in Harkavy, *l.c.* p. 80), and was empowered to set aside the verdicts of the several judges and to render new ones. The other court belonging to the academy was under the direction of the ab bet din, and judged minor cases.

The geonim occasionally transcended the Talmudic laws and issued new decrees. At the time of the gaons Mar R. Huna at Sura and Mar R. Rabba at Pumbedita (*c.* 670), for instance, the measures taken in relation to a refractory wife were different from those prescribed in the Talmud (Ket. 62b). Toward 785 the geonim decreed that debts and the ketubah might be levied on the movable property of orphans. Decrees of this kind were issued jointly by both academies; and they also made common cause in the controversy with Ben Meïr regarding a uniform Jewish calendar (see "R. E. J." xlii. 192, 201).

Judicial Functions.

The gaon was generally elected by the academy, although he was occasionally appointed by the exilarch; the geonim Mar R. Samuel and R. Yehudai of Sura and R. Naṭroi Kahana of Pumbedita, for instance, were appointed by the exilarch Solomon b. Ḥisdai (eighth century). The exilarch David b. Judah appointed R. Isaac b. Hananiah gaon of Pumbedita in 833. But when the exilarch David b. Zakkai appointed R. Kohen Ẓedeḳ gaon of Pumbedita, the academy itself elected Rab Mebasser. The schism arising thereby was finally adjusted peaceably, the geonim officiating together down to Mebasser's death (926), after which Kohen Ẓedeḳ remained as the sole gaon of Pumbedita. David b. Zakkai also appointed a counter-gaon to Saadia at Sura, whom he himself had called to that office, this being a well-known incident in the history of the controversy between Saadia and David b. Zakkai. Sherira cites still other examples to show that two geonim officiated at the same time at Pumbedita. For instance, during the controversy between Daniel and the exilarch David b. Judah the ab bet din Joseph b. Ḥiyya was appointed gaon of Pumbedita side by side with the gaon Abraham b. Sherira; Joseph, however, recognized the superiority of Abraham. Once when both were present at Bagdad in the synagogue of Bar Nasla on the occasion of the kallah at which homage was paid to the gaon, the leader in prayer called out: "Listen to the opinion of the heads of the Academy of Pumbedita." The congregation thereupon began to weep because of the schism indicated by the plurality of heads, and Mar Joseph, deeply moved, rose and said: "I herewith voluntarily renounce the office of gaon, and resume that of ab bet din." Gaon Abraham then blessed him and said: "May God grant you to partake of His blessedness in the world to come" (Sherira, ed. Neubauer, i. 38). When Abraham died Joseph became his successor (828). Joseph b. Ḥiyya's son Menahem, who became gaon in 859, also had a counter-gaon in the person of R. Mattithiah, who succeeded to the office on Menahem's death a year and a half later.

The gaon was entirely independent of the exilarch, although the geonim of both academies, together with their prominent members, went every year to render homage to the exilarch (see Nathan ha-Babli, ed. Neubauer, ii. 78). The assembly at which this homage took place was called the "great kallah." In the controversy between the academies and Ben Meïr the exilarch sided with the two geonim (see "R. E. J." xlii. 211). The signature and seal of the exilarch, together with the signatures of both the geonim, were affixed to certain especially important decrees (see "'Iṭṭur," ed. Lemberg, i. 44a). The Geonim were empowered to examine documents and decisions originating in the court of the exilarch (see Harkavy, *l.c.* p. 276).

Relations with Exilarch.

The gaon of Sura ranked above the gaon of Pumbedita, and a sort of court etiquette was developed in which this fact found expression (see the account taken from the first edition of "Yuḥasin," in Neubauer, ii. 77 *et seq.*). The gaon of Sura sat at the right hand of the exilarch, while the gaon of Pumbedita sat at the left. When both were present at a banquet, the former pronounced the blessing before and after the meal. The gaon of Sura always had precedence, even if he was much younger than his colleague, and, in writing a letter to him, did not refer to him as gaon, but addressed merely "the Scholars of Pumbedita"; the gaon of Pumbedita, on the other hand, addressed his letters to "the Gaon and the Scholars of Sura." During the solemn installation of the exilarch the gaon of Sura read the Targum to the Pentateuch sections which had been read by the exilarch. On the death of the exilarch the gaon of Sura had the exclusive claim

to his official income until the election of a new exilarch.

The gaon of Sura evidently owed his superior rank to the ancient reputation of the academy over which he presided; for Sura had been the leading academy of the Babylonian Jews during the period of the Amoraim, first under its founder Rab and his pupil Huna (third century), and then under Ashi (d. 427).

Geonim of Sura.

In the geonic period also the more prominent scholars taught at Sura; this is indicated by the fact that most of the geonic responsa that have been preserved originated at Sura. The liturgic order of prayers and rules was formulated by geonim of Sura, such as Kohen Ẓedeḳ, Sar Shalom, Naṭronai, and Amram. R. Yehudai Gaon's "Halakot Pesuḳot" and the "Halakot Gedolot" of Simeon Ḳayyara (who was, however, no gaon) were written at Sura (see Epstein, "Ha-Goren," iii. 53, 57). The Midrash Esfa, which was edited by the gaon Ḥaninai (769–777), may also be regarded as an evidence of the early literary work of the academy there (see Yalḳ. i. 736).

But it was Saadia's activity that lent to this academy unusual luster and an epoch-making importance for Jewish science and its literature. Then, after a long period of decadence, another worthy occupant of the office arose in the person of Samuel b. Ḥofni, the last gaon of Sura. Among the earlier geonim of Pumbedita only Ẓemaḥ (872–890) achieved a literary reputation, as author of a Talmudic dictionary entitled "'Aruk"; but Aḥa (Aḥai) the author of "She'iltot" (middle of the eighth century), also seems to have belonged to the Academy of Pumbedita. This academy, however, as if eager to make up for the delay of ages, furnished in the persons of its last two heads, the geonim Sherira and Hai (father and son), scholars of the first rank, who displayed great literary activity and inaugurated a final significant epoch for the gaonate, which came to an end on Hai's death.

The importance of the Geonim in Jewish history is due, in the first place, to the fact that for a number of centuries they occupied a unique position as the heads of their respective schools and as the recognized authorities of Judaism. Their influence probably extended chiefly to the Mohammedan countries, especially northern Africa and Spain; but in the course of time the Jews of Christian Europe also came under the influence of the Babylonian schools. It was for this reason that the Babylonian Talmud came to be recognized as the basis for religio-legal decisions throughout Jewry and as the principal object of study. Even the facilities offered for such study to the Diaspora were due to the Geonim, since the geonic exposition of the Talmud, with regard to both text and contents, was directly or indirectly the chief aid in comprehending the Talmud. The importance of the period of the Geonim for the history of Judaism is further enhanced by the fact that the new Jewish science, which steadily developed side by side with Talmudic studies, was created by a gaon, and that the same gaon, Saadia, effectively opposed the disintegrating influences of Karaism. The activity of the Geonim may be seen most clearly in their responsa, in which they appear as the teachers of the entire Diaspora, covering in their religio-legal decisions a wide field of instruction.

Significance.

In the course of the tenth century, however, even before the Babylonian schools ceased with the death of the last gaon, other centers arose in the West from which went forth the teachings and decisions which superseded those of the Geonim. The fixed gifts which the Jews of Spain, the Mograb, North Africa, Egypt, and Palestine had contributed to the support of the Babylonian schools were discontinued long before, as Abraham ibn Daud reports (Neubauer, ii. 67); and the decadence of these schools was hastened thereby as much as by the internal conflicts to which they were subjected. The historic importance of the Geonim and their schools may be said to have ceased even before the institutions themselves were dissolved on the death of Gaon Hai. It is symbolic of the sad end of the gaonate that after Hai's death (1038) the exilarch Hezekiah was the only person found worthy to assume the direction of the sole remaining Academy of Pumbedita; and with his forcible deposition and imprisonment as a result of calumnious charges brought against him two years later the office of exilarch also ceased.

An authentic account of the names, sequence, and terms of office of the geonim of both academies, taken from their records, has been left by Sherira, the last gaon but one of Pumbedita, in a long letter which he addressed to the scholars of Kaitwan, and in which he recites the history of the Babylonian academies. Abraham ibn Daud's "Sefer ha-Ḳabbalah" is in comparison merely of secondary importance. For the period down to about 800 the latter uses another source, probably Samuel ha-Nagid's "Mebo ha-Talmud" (see Rapoport's biography of Nathan, note 24, and biography of Hai, note 2); his list of the Geonim, moreover, is very confused, geonim of Sura being assigned to Pumbedita, and vice versa. Beginning with the geonim and Isaiah ha-Levi, he draws upon Sherira's letter, from which he frequently copies verbatim.

Sources.

The list of the geonim of Sura and Pumbedita, which is given on the following page, is based entirely on Sherira's account. The dates, which Sherira noted according to the Seleucidan era, have been reduced to their equivalents in the common era. The date given is that of the gaon's entering upon office; some of the dates are missing in the account of Sherira, who says in reference to the geonim of Sura that down to 1000 Seleucidan (689 C.E.) even those that he does give are not indisputable. His dates referring to the terms of office of the geonim of Sura from the end of the eighth century down to the time of Saadia need revision, for, as given by Sherira, the sum of years during which the geonim of Sura officiated, from the time of Mar R. Hilai (792) down to Saadia (928), is 153 years instead of 136. The difference of 17 years has been adjusted in the following list by reducing the terms of office of some of the geonim. The dates of the last geonim, Sherira, Hai, and Samuel b. Ḥofni, are taken from Abraham ibn Daud's historical work "Sefer ha-Ḳabbalah."

SYNCHRONISTIC LIST OF THE GEONIM OF SURA AND PUMBEDITA.

SURA.	YEAR.	PUMBEDITA.	YEAR.
		Mar b. R. Ḥanan of Iskiya..	589
Mar R. Mar b. Mar R. Huna	609	Mar R. Mari b. Mar R. Dimi	609

E. C. A. E.—W. B.

——**In Palestine:** In the century following the death of Hai, the last Babylonian gaon, there was an academy in Palestine, the head of which assumed the same titles as had the Babylonian geonim: "gaon" and "rosh yeshibat geon Ya'aḳob." The yeshibah in

Palestine existed already during Hai's life, for in 1031 Josiah the "haber" was ordained at the "holy yeshibah of Palestine" (see "J. Q. R." xiv. 223). A postscript to a small chronicle dating from the year 1046 says that Solomon b. Judah was then the "head of the Academy of Jerusalem" (Neubauer, i. 178). Three generations of the descendants of this Solomon b. Judah were heads of the Palestinian academy, and bore the title of "gaon." A work of one of these geonim of Palestine, the "Megillat Abiathar" ("J. Q. R." xiv. 449 *et seq.*), has been recently discovered by Schechter in the genizah of Cairo, and gives a very clear account of this interesting episode in the history of the Jews of Palestine. It is learned with regard to the organization of the Academy of Palestine that, as in Babylonia, the ab bet din, the president of the court, ranked next to the gaon, and that another member of the college, called "the third" ("ha-shelishi"), held the third highest office. In another document from the genizah, which Schechter has published under the title "The Oldest Collection of Bible Difficulties" ("J. Q. R." xiii. 345 *et seq.*), the ab bet din is described as seated at the right hand of the gaon, and "the third" at the left (see "J. Q. R." xv. 83). A letter in the "Mittheilungen aus der Sammlung der Papyrus Erzherzog Rainer" is addressed to Solomon b. Judah, "the first gaon of Palestine" ("R. E. J." xxv. 272). This letter clearly shows the same close connection between the Jews of Egypt and those of Palestine as is indicated in the "Megillat Abiathar." Solomon b. Judah was succeeded at his death by his son Joseph Gaon, his other son, Elijah, becoming ab bet din. When Joseph died in 1054, David b. Azariah, a scion of the house of exilarchs who had gone from Babylon to Palestine, and had formerly done much injury to the brothers, was elected gaon, to the exclusion of Elijah, who remained ab bet din. David b. Azariah died in 1062 after a long and serious illness, which he himself is said to have acknowledged to be a punishment for his ill treatment of his predecessors. Elijah now became gaon, filling the office down to 1084. In 1071, when Jerusalem was taken by the army of the Seljuk prince Malik Shah, the gaonate was removed from Jerusalem, apparently to Tyre. In 1082 Gaon Elijah called a large convocation at Tyre, and on this occasion he designated his son Abiathar as his successor in the gaonate, and his other son, Solomon, as ab bet din. Elijah died two years later, and was buried in Galilee, near the old tannaite tombs, a large concourse of people attending the burial. Shortly after Abiathar entered upon his office David b. Daniel, a descendant of the Babylonian exilarchs, was proclaimed exilarch in Egypt; and he succeeded in having his authority recognized also by the communities along the Palestinian and Phenician coasts, Tyre alone retaining its independence for a time. But when this city again came under Egyptian rule in 1089, the Egyptian exilarch subjected its community also, forcing Abiathar to leave the academy. The academy itself, however, resisted the exilarch, declaring his claims to be invalid, and pointing out his godlessness and tyranny while in office. Fast-day services were held (1093), and the sway of the Egyptian exilarch was soon ended. The nagid Meborak, to whom David b. Daniel owed his elevation, called a large assembly, which deposed David b. Daniel and reinstated Abiathar as gaon (Iyyar, 1094). Abiathar wrote his "Megillah" in commemoration of this event. A few years later, at the time of the First Crusade, he sent a letter to the community of Constantinople, which communication has recently been discovered ("J. Q. R." ix. 28). It is dated from Tripolis in Phenicia, to which the academy may have been removed. Abiathar was succeeded by his brother Solomon. An anonymous letter, unfortunately without date, dwells on the controversies and difficulties with which the academy had to contend ("J. Q. R." xiv. 481 *et seq.*). The next generation of Solomon b. Judah's descendants dwelt in Egypt. In 1031 Mazliah, a son of Solomon b. Elijah, addressed from the "gate of the Academy of Fostat" a letter to a certain Abraham, in which he gives his whole genealogy, adding the full title of "gaon, rosh yeshibat geon Ya'akob," to the names of his father, grandfather, and great-grandfather. The Academy of Palestine had probably ceased to exist before Palestine was conquered by the Christians, and its head, the gaon Mazliah, went to Fostat, where there was an academy that had seceded from the authority of the Palestinian academy at the time of the Egyptian exilarch David b. Daniel ("J. Q. R." xv. 92 *et seq.*). It is not known what office Mazliah occupied at Fostat, although he retained his title of gaon. A daughter of Mazliah presented to the academy a book by Samuel ben Hofni which she had inherited from her grandfather, the gaon Solomon b. Elijah. In 1112 the "Mushtamil," the philological work of the Karaite scholar Abu al-Faraj Harun, was copied for Elijah, a son of the gaon Abiathar, "grandson of a gaon and great-grandson of a gaon" ("R. E. J." xxx. 235). In 1111 the same Elijah purchased at Fostat R. Hananel's commentary to Joshua, which subsequently fell into the hands of his cousin, the gaon Mazliah ("J. Q. R." xiv. 486). It may be noted here that the geonic family of Palestine was of Aaronite origin and that Abiathar claimed Ezra as his ancestor. The tradition of the Palestinian gaonate seems to have survived at Damascus, for Benjamin of Tudela (*c.* 1170) says that the teachers of Damascus were considered as the scholastic heads of Israel ("rashe yeshibot shel erez Yisrael").

GARCIA, BERNARDO (BENJAMIN?) NUÑEZ: Spanish poet; lived in Amsterdam about the middle of the eighteenth century. His little burlesques and occasional poems are extant in manuscript. Among them are an epithalamium, written in the year 1735 for the wedding celebration of Don Isaac de Abraham Curiel and Donna Ester Alvares; "Entremes del Pintor Cornelio"; and "Entremes del Hurto de los Muertos."

GARMENTS. See COSTUME.

GARMISON, SAMUEL: Palestinian rabbi of the seventeenth century. He was a native of Salonica, and settled in Jerusalem, where he became rabbi. Of his numerous works only two, and these in manuscript, are extant: "Imre Binah," novellæ on Talmudic treatises, and "Imre No'am," homilies; the second part of the latter is in the possession of Ḥakam Bashi Al-Yashar in Jerusalem. In the latter work the author quotes three others: "Imre Yosher," "Imre Emet," and a commentary on Ṭur Ḥoshen Mishpaṭ.

GARMON, NEHORAI: Rabbi of Tunis; poet; born at Tripoli about 1682; died at Tunis 1760. Garmon went to Tunis at twenty, and studied Talmud under Isaac Lombroso, whom he succeeded in the rabbinate. He was the author of "Yeter ha-Baz," novellæ on the Talmud and on Maimonides' "Yad," printed with which are eleven poems of the author (only one in meter), and the novellæ of his son, Ḥayyim Garmon (d. 1781), entitled "Ẓedakah le-Ḥayyim" (Leghorn, 1787). The father mentions in his preface that he lost a large part of his writings in an attack on the Jewish quarter.

GARMU, BET: A family of skilled bakers employed in the Temple at Jerusalem as bakers of the showbread (Ex. xxv. 30). They kept secret their method of baking. Fearing the family might die out and the secret perish with them, the chiefs of the Temple replaced them with experts from Alexandria, but these could not compete with the Garmuites. The sages therefore summoned the latter back to their office; they, however, would not return until their original salary had been doubled, and for this they were ever after censured. When asked why they would not reveal the secrets of their art, they replied, "Our forebears communicated to us their premonition that the Temple would eventually be destroyed; should we instruct others in our art, it might come to pass that our pupils would exercise the art in the service of some idolatrous temple." The Garmuites are often mentioned with reverence as models of scrupulous honesty (Yoma iii. 11, 38a; Tosef., Yoma, ii. 5, and parallels; see BAKING).

E. C. S. M.

GARNISHMENT: In law, the process by which A collects his demand from his debtor, B, by attaching money owing to B from a third person; hence called "Dritt-Arrest" in German law. The power of a court to enforce a judgment against B by collecting the debt of C to B and paying it to A, the judgment creditor, is asserted in a baraita (Ket. 19a) by R. Nathan, who rather quaintly derives the rule from Num. v. 7. This rule is found in the codes ("Yad," Malweh, ii. 6; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 86, 1-4). The process, however, is not to be resorted to until the court has found that B has no money, goods, or lands from which to satisfy the debt, just as in the law of most American states the garnishment process is used only after a return of "no property."

According to later opinions, first found in the Arba' Ṭurim and in Ḥoshen Mishpaṭ, 101, 5, a shorter process is allowed when the debtor holds a bond of a third person. The court may have it appraised, taking into consideration not only the third person's degree of solvency, but also his character (as a stubborn litigant or otherwise), and may turn the bond over to the creditor after the appraisement. The commentary "Be'er ha-Golah" on Ḥoshen Mishpaṭ expresses disapprobation of this course of procedure, but admits that it is well established in practise.

S. S. L. N. D.

GART, JOSEPH: Provençal liturgical poet and commentator; probably lived at Aix in the fifteenth century. The surname is, according to Neubauer, the equivalent of the Hebrew "Shimroni," borne by the Gard family of Avignon (to which Joseph belonged) in addition to their Provençal surname, "Gart." Two literary productions of Gart are still extant in manuscript, a liturgical poem for New-Year's Day (Bibliothèque Nationale, Paris, No. 893), and a commentary on the liturgies for the Four Sabbaths.

J. I. BR.

GÄRTNER, GUSTAV: Austrian physician; born at Pardubitz, Bohemia, Sept. 28, 1855. He received his education at the gymnasium at Königgrätz and the University of Vienna, obtaining the degree of doctor of medicine in 1879. In the same year he became junior assistant at the general hospital at Vienna, and in 1882 assistant to Professor Stricker in experimental pathology, occupying the latter position until 1891. He was admitted to the medical faculty of his alma mater in 1886 as privatdocent, and in 1890 was appointed assistant professor, which position he now holds.

Gärtner has paid particular attention to the use of electricity in medicine, and has invented several instruments: the "elektrisches Zweizellenbad" (electrical bath with two cells); the kaolin rheostat; the tonometer, an instrument for measuring the pressure of the blood; the ergostat, etc. He has contributed many essays to the medical journals, among which may be mentioned: "Ueber die Beziehung Zwischen Nierenerkrankungen und Oedœmen," in "Wiener Medizinische Zeitung," 1883; "Das Electrisches Zweizellenbad," in "Wiener Klinische Wochenschrift," 1889, No. 44; "Der Kaolin Rheostat," *ib.* 1890, No. 6; with F. Römer, "Ueber die Einwirkung von Tuberkulin und Andern Bakterien-Extracten auf den Lymphstrom," *ib.* 1892, No. 2; with A. Beck, "Ueber den Einfluss der Intravenösen Kochsalzeinspritzung auf die Resorption von Flüssigkeiten," *ib.* 1893, No. 31; "Ueber ein Neues Instrument zur Intensitätsmessung des Auskultationsphänomen," *ib.* 1894, No. 44; "Ueber Electrische Medizinalbäder," *ib.* 1895, Nos. 33 and 34; with J.

Wagner, "Die Lehre vom Hirnkreislauf," *ib.* 1899, No. 26; "Ueber Intravenöse Sauerstoffingestionen," *ib.* 1902, Nos. 27, 28.

G. M. SEL.

GASTER, MOSES: Haham of the Spanish and Portuguese congregation, London; born in Bucharest Sept. 16, 1856. Having taken a degree in his native city (1874), he proceeded to the Jewish seminary at Breslau, where he received the degree of Ph.D. in 1878 and the "Hattarat Hora'ah" in 1881. His history of Rumanian popular literature was published at Bucharest in 1883. Gaster's magnum opus, on which he was engaged for ten years, is a Rumanian chrestomathy and glossary covering the period from the dawn of Rumanian literature down to 1830. He was lecturer on the Rumanian language and literature at the University of Bucharest (1881–85), inspector-general of schools, and a member of the council for examining teachers in Rumania. He also lectured on the Rumanian apocrypha, the whole of which he had discovered in manuscript.

Gaster wrote various text-books for the Jewish community of Rumania, made a Rumanian translation of the prayer-book, and compiled a short Scripture history.

Having been expelled from Rumania by the government in 1885, he went to England, where he was appointed Ilchester lecturer in Slavonic literature at the University of Oxford, his lectures being published afterward as "Greco-Slavonic Literature," London, 1886. He had not been in England many years before the Rumanian government canceled the decree of expulsion, presented him with the Rumanian Ordre pour le Mérite of the first class (1891), and invited him to return; but he declined the invitation. In 1895, at the request of the Rumanian government, he wrote a report on the British system of education, which was printed as a "green book" and accepted as a basis of education in Rumania.

In 1887 Gaster was appointed haham of the Spanish and Portuguese congregation in London, in which capacity he presided over the bicentenary of Bevis Marks Synagogue. He was also principal of Judith Montefiore College, Ramsgate, from 1891 to 1896, and wrote valuable essays accompanying the yearly reports of that institution. He is a member of the councils of the Folk-Lore, Biblical, Archeological, and Royal Asiatic societies, and has written many papers in the transactions of these bodies. Among Gaster's works are the following: "Jewish Folk-Lore in the Middle Ages" (London, 1887); "The Sword of Moses," from an ancient manuscript book of magic, with introduction, translation, and index (*ib.* 1896); "The Chronicles of Jerahmeel" (*ib.* 1899); "History of the Ancient Synagogue of the Spanish and Portuguese Jews," a memorial volume in celebration of the two-hundredth anniversary of its inauguration (*ib.* 1901). The following are among his numerous contributions to periodical literature: "Beiträge zur Vergleichenden Sagen und Märchenkunde," in "Monatsschrift," xxix. 35 *et seq.*; "Ein Targum der Amidah," in *ib.* xxxix. 79 *et seq.*; "The Apocalypse of Abraham, from the Roman Text," in the "Transactions of the Royal Asiatic Society," ix. 195; "The Unknown Hebrew Versions of the Tobit Legend," in *ib.* 1897, p. 27; "The Oldest Version of Midrash Meghillah," in "Kohut Memorial Volume"; "Hebrew Text of One of the Testaments of the Twelve Patriarchs," in the "Proceedings of the Society of Biblical Archæology," xvi. 33 *et seq.*; "Contributions to the History of Aḥikar and Nadam," in the "Transactions of the Royal Asiatic Society," 1900, p. 301.

Gaster is among the most active leaders of the Zionist movement in England; and even while in Rumania he assisted in establishing the first Jewish colony in Palestine. He was vice-president of the first Basel Congress, and has been a prominent figure in each succeeding congress.

J. G. L.

GASTFREUND, ISAAC: Galician rabbinical scholar; born about 1845; died in Vienna after 1880. He was the author of "Toledot Rabbi 'Akibah," a biography of the tanna Akiba b. Joseph (Lemberg, 1871; see "Ha-Shaḥar," ii. 399–400), and of the German work "Mohamed nach Talmud und Midrash" (issued in parts, Berlin, 1875; Vienna, 1877–80; see Sprenger in "Z. D. M. G." xxix. 654–659). He also wrote in Hebrew a biography of the Königswarter family entitled "Toledot Bet Königswarter" (Vienna, 1877); "Anshe Shem," biographies of Jonathan Eybeschütz and Solomon Munk (Lyck, 1879); and "Toledot Yellinek," a biography of Adolph Jellinek (Brody, 1880).

E. C. P. WI.

GATE (Hebrew, שער; Aramaic, תרע; more properly "gateway"): This denotes not so much a contrivance like a door (דלת) for barring ingress and egress, as the passageway and the group of buildings designed for ornament or defense (I Macc. xiii. 33), together with the open space adjoining to or enclosed by them, at the entrance to a palace, a temple, or a city. The most elaborate description in the Bible of such a gate is that of the eastern structure in the outer Temple court (Ezek. xl. 6–16). Steps led up to it; it had two thresholds, a number of lodges or guard-chambers five cubits apart, and porches and posts, with an open space ten cubits wide, while from the roof of one lodge to that opposite was a breadth of twenty-five cubits; the whole enclosed a court, the walls being broken by windows and the openings spanned by arches.

Probably not quite so elaborate, the common gates were provided with doors consisting of stout wings or leaves of wood fastened with brass or iron bolts ("beriaḥ") or barred with heavy wooden beams covered with brass or iron ("min'al"). These were closed at nightfall and on the Sabbath (Josh. ii. 5, 7; Neh. xiii. 19). The entrance led underneath an upper chamber, and sometimes through a small court

(II Sam. xviii. 24, 33) to an inner building. The roof over these buildings was flat; and on this, or on a tower connected with it, the gatekeeper ("sho'er") was stationed, giving notice either by loud calls or by blasts upon a horn when any one approached (II Sam. xxiv. 14; II Kings ix. 7; Jer. vi. 17; Ezek. xxxiii. 1 *et seq.*; comp. II Chron. xxvi. 9). Guards under the command of the chief gatekeeper are also mentioned (II Kings vii. 10–11; Neh. xiii. 19; Jer. xxxvii. 13), for whose accommodation the lodges or guard-chambers were intended. Close by the city and Temple gates were larger or smaller open squares ("reḥobot"), which were public resorts (Gen. xix. 2; Judges xix. 15 *et seq.*; II Sam. xix. 8; I Kings xxii. 10).

The Popular Center.

As the gate protected the whole city, the word came to be used for the city itself (Isa. xiv. 31; Ex. xx. 10; Deut. xvi. 5; Ruth iii. 11). The king's court is also designated as the "gate" (Esth. iii. 2; Dan. ii. 49; comp. Esth. ii. 19 *et seq.*). The gate and the adjoining open area constituted the market-place (Neh. viii. 16, xiii. 19; Job xxix. 7; II Kings vii. 1); hence such names as "fish-gate," "sheep-gate" (Neh. iii. 1, 3, 32; xii. 39; Zeph. i. 10). The gates offered the main opportunity for social intercourse. The wells were sometimes situated here (II Sam. xxiii. 15–16). Here news from the outside was sure to be announced first (I Sam. iv. 18); private grief or public calamity found "at the gate" ready sympathizers among the assembled throng of idlers (comp. II Macc. iii. 19; Gen. xix. 1; Ps. lxix. 12 [A.V. 13]; Prov. xxxi. 31); matters of public concern were discussed (I Kings xxii. 10; Jer. xxxviii. 7; at the gates of the Temple, Ezek. xi. 1; Jer. xxvi. 10 *et seq.*), public announcements were made (Jer. xvii. 19 *et seq.*; Prov. i. 21, viii. 3), and court and council sessions were held here (Job xxix. 7, xxxi. 21; Prov. xxxi. 23; Lam. v. 14; Deut. xvi. 18, xxi. 19 *et seq.*, xxii. 15–16; Josh. xx. 4).

The Levite, the stranger, the widow that is "within thy gates" (Deut. xvi. 14, *et al.*) have a legal status and claim to kindly consideration (comp. Amos v. 12, 15). The heads of slain enemies were probably exhibited in the gates (I Sam. xvii. 51, 54; comp. II Kings x. 8). Criminals were punished outside the gates (I Kings xxi. 13), but near by, while lepers were sent out from the gates (Lev. xiii. 46; II Kings vii. 3), being assigned a settlement beyond the city limits but not too far from the city wall.

Gates and doors were marked with inscriptions (Deut. vi. 9, xi. 20; see Door; Mezuzah). Camps, too, had gates (Ex. xxxii. 26–27). The "gate of heaven"—an old mythological expression—is mentioned (Gen. xxviii. 17), while the Temple's gates are paraphrased as "gates of righteousness" or "gate of the Lord," through which the righteous shall enter (Ps. cxviii. 19–20). "Gates of death" and "gates of thick darkness" occur in poetic phraseology, in many cases with a tinge of mythological coloring (Ps. ix. 14 [A.V. 13]; Job xxxviii. 17, Hebr.). For the gates of Jerusalem see Jerusalem; for the gates of the Temple see Temple.

"Gate" is used allegorically in rabbinical idioms, as the "gates of repentance" (שערי תשובה; Pesiḳ., ed. Buber, xxv. 157a), the "gates of tears," and the "gates of prayer" (Ber. 32b; B. M. 59a), which are said to be "open"; *i.e.*, repentance or prayer is accepted. Hence the petition in the Ne'ilah service of the Day of Atonement: "Open unto us the gate at the time the gate [of the day] is closing." God is called the "Opener of the gates" (of day, for the sun to rise) in the prayer on Sabbath eve. "Sha'ar" = "gate," or its Aramaic synonym, "baba," is used in later Hebrew literature to designate "chapter" or "section" in a book (*e.g.*, "Baba Batra," etc.; "Sha'ar ha-Yiḥud," in Baḥya's "Ḥobot ha-Lebabot").

E. G. H.

GATH: One of the five principal cities of the Philistines (Josh. xiii. 3; I Sam. vi. 17). The name occurs in the El-Amarna tablets as "Gimta," "Gimti," "Ginti"; in the Egyptian inscriptions as "Kutu." Goliath came from this city (I Sam. xvii.). David took refuge with King Achish of Gath (I Sam. xxi. 10, xxvii. 2). According to II Chron. xi. 8, Rehoboam fortified the city, which, however, must have fallen into the hands of the Philistines again, for Uzziah conquered it (II Chron. xxvi. 6). Previous to that Gath was taken by the Syrian king Hazael (II Kings xii. 18). According to an Assyrian inscription, Sargon took Gath among other Philistine cities (comp. Amos vi. 2; Micah i. 14).

E. G. H. F. Bu.

GATIGNO (Portuguese, **Gatinho**; Levantine, **Gattegno**): Name (Spanish) of a family known in the fourteenth century, and still flourishing in Turkey; it is probably derived from the former French district of Gatines.

Abraham Gatigno: Rabbi; born in Salonica; grandson of Abraham ben Benveniste Gatigno; chosen ḥakam bashi of Salonica (Jan. 10, 1875) in succession to Raphael Asher Covo (d. Dec. 26, 1874). Abraham Gatigno founded the first modern Jewish school in Salonica. He is the author of "Ẓel ha-Kesef" (Salonica, 1872).

Bibliography: Franco, *Histoire des Israélites de l'Empire Ottoman*, p. 206.

M. K.

Abraham ben Benveniste Gatigno: Turkish rabbi; died at Salonica May, 1730. He wrote: "Ṭirat Kesef," homiletic commentary on the Pentateuch, Salonica, 1736; "Ẓeror ha-Kesef," responsa and homilies, with many additions by his son, Benveniste Gatigno, *ib.* 1756.

Eliakim ben Isaac Gatigno: Turkish rabbi; lived at Smyrna in the eighteenth century. He wrote: "To'afot Re'em," commentary on Elijah Mizraḥi's "Perush Rashi," Smyrna, 1766; "Agurah be-Oholeka," responsa, Salonica, 1781; "Yiẓḥaḳ Yerannen," novellæ on Maimonides, *ib.* 1785. Benjacob ("Oẓar ha-Sefarim," p. 228) attributes the last-named work to Isaac b. Eliakim Gatigno.

Bibliography: Fürst, *Bibl. Jud.* i. 319; Zedner, *Cat. Hebr. Books Brit. Mus.* p. 265.

M. Sel.

Ezra ben Solomon ibn Gatigno (Astruc Solomon): Commentator; pupil of Joseph b. Joshua ibn Vives; lived in Saragossa and Agremonte (1356–72). He is the author of a supercommentary to Abraham ibn Ezra's commentary on the Pentateuch. Following the example of Joseph ibn Caspi, he separated the exegetical from the mystical portion of the commentary. The former, which was finished in Agremonte on the 18th of Elul, 5132 (=Aug. 18, 1372), is entitled "Sefer ha-Zikronot"; to the latter he gave the title "Sod Adonai Lire'aw." Manuscript copies of both are extant in Oxford; copies of the mystical portion in the Munich and other libraries.

Bibliography: Steinschneider, in Ersch and Gruber, *Encyc.* section i., part 54, pp. 358 *et seq.*; idem, *Hebr. Uebers.* p. 436; idem, *Cat. Munich*, 2d ed., p. 7; Jellinek, *Kontres ha-Mazkir*, 2d ed., pp. 22 *et seq.*

M. K.

Isaac ben Eliakim Gatigno: Turkish rabbi; lived at Salonica in the eighteenth century. He wrote: "Bet Yiẓḥaḳ," a critical commentary on Maimonides' "Yad," Salonica, 1792; "Bet Mo'ed," novellæ and homilies, *ib.* 1839. See Eliakim ben Isaac Gatigno.

Bibliography: Fürst, *Bibl. Jud.* i. 319; Zedner, *Cat. Hebr. Books Brit. Mus.* p. 265.

M. Sel.

Solomon Astruc Gatigno ("the Martyr"): A Bible commentator, probably of the fifteenth century. He wrote expository notes to Messianic passages in the Bible, such as Isa. lii. 13 and Ps. cxxxix.; also a commentary on the Pentateuch entitled "Midrash ha-Torah," a manuscript copy of which work was seen by Azulai. His commentaries are preserved in manuscript at Oxford.

Bibliography: Steinschneider, in Ersch and Gruber, *Encyc.* section ii., part 27, p. 357; Azulai, *Shem ha-Gedolim*, i. 164.

D. M. K.

GAU, JACOB IBN. See Ibn Jau, Jacob.

GAULONITIS: Section of country east of the Jordan and of the Sea of Galilee; so called particularly in the first century C.E. It is frequently mentioned by Josephus as a part of the tetrarchy of Philip, in the same general region as Trachonitis, Auranitis, and Batanea. The origin of the name is probably to be found in "Golan," one of the cities of refuge (Deut. iv. 43; Josh. xx. 8) located in Bashan, in the territory of the half-tribe of Manasseh, and also one of the Levitical cities assigned to the children of Gershon (Josh. xxi. 27; I Chron. vi. 56). The modern equivalent of "Golan" is "Jaulan," described by Schumacher in his "Across the Jordan" (p. 3):

"This district of Jaulân is bounded on the south by the Shari'at el Menâdireh, and on the north extends to the Jisrs (or Bridges) of 'Allân and Rukkâd, or even as far as Ghadîr el Bustân. On the east it is bounded by the gorge of the Nahr el 'Allân (Haurân), and on the west by the still more precipitous Nahr er Rukkâd. Its highest elevation, at Ghadîr el Bustân, reaches 1,912 feet; while its lowest inhabited village, not counting the Bedawin huts at Kuweyyeh, is El Ekseïr, at 1,145 feet; but its average height may be put at 1,500 feet above the Mediterranean Sea."

This plateau is but little cultivated except near the villages. It is dotted with volcanic mounds of basaltic formation, and makes fine pasturage during the earlier spring. Schumacher (pp. 91–93), on the authority of the present inhabitants, mentions Saḥem al-Jaulan, the best-built village in all Jaulan, as probably the ancient capital of this district.

E. G. H. I. M. P.

GAUNSE (Gaunz, Ganse, Gans), JOACHIM (Jeochim, Jochim): German mining expert who figures in the English state papers of the reign of Elizabeth. He was born at Prague, and was therefore in all probability a connection of David Gans, who settled there in 1564; he certainly shared his scientific interests. He is first mentioned in his professional capacity at Keswick, Cumberland, in 1581, and he remained in England till the end of 1589. He introduced a new process for the "makeing of Copper, vitriall, and Coppris, and smeltinge of Copper and leade ures." A full description of his operations is preserved in the English state papers (Domestic Series, Elizabeth, vol. 152, No. 88). Foreign miners were very active in England about this period. There is no doubt that England owed much to such immigrants in the mining industries (see Cunningham, "Alien Immigrants," p. 122).

In Sept., 1589, in the presence of a minister, Richard Curteys, at Bristol, Gaunse, speaking "in the Hebrue tonge," proclaimed himself a Jew, and as a result was arrested and sent in custody to the privy council in London (Domestic Series, Elizabeth, vol. 226, No. 46). The council seems to have taken no hostile action, however. Walsingham, who was then secretary of state, was an old employer of Gaunse, and other members of the council also knew him.

Bibliography: I. Abrahams, *Joachim Gaunse, a Mining Incident in the Reign of Queen Elizabeth*, in *Transactions of Jewish Historical Society of England*, iv., where all the documents are published.

J. I. A.

GAVISON, MEÏR: Egyptian scholar; flourished in the sixteenth and seventeenth centuries. He was one of the rabbis at Cairo at the time of R. Jacob Castro, and was generally recognized as a great Talmudist. One volume of his responsa was seen in Egypt by Azulai. His responsa are also mentioned by Abraham ha-Levi in his "Ginnat Weradim," part iii., No. 1.

Bibliography: Azulai, *Shem ha-Gedolim.*

D. L. Grü.

GAYA: Town in the Austrian province of Moravia. In official records Jews at Gaya are first mentioned toward the end of the seventeenth century; but there can be no doubt that a Jewish community existed there at the beginning of the sixteenth century, as an inscription on the ceiling of the old synagogue, torn down in 1851, showed the date 1507. In 1688 the Jews had only twelve houses. In 1696 the inhabitants petitioned Emperor Leopold I. "to free them from the troublesome Jews who are encroaching upon all branches of industry," but their request was refused. In 1727, under Charles VI., the Jews of Gaya were organized as an independent municipality, which still exists. In 1848 the number of members contributing to the expenses of the Jewish community was 94; in 1852 it was 121; and at present (1903) there are 160 taxpayers. The Jews number about 900 in a total population of about 3,800. Gaya has a synagogue,

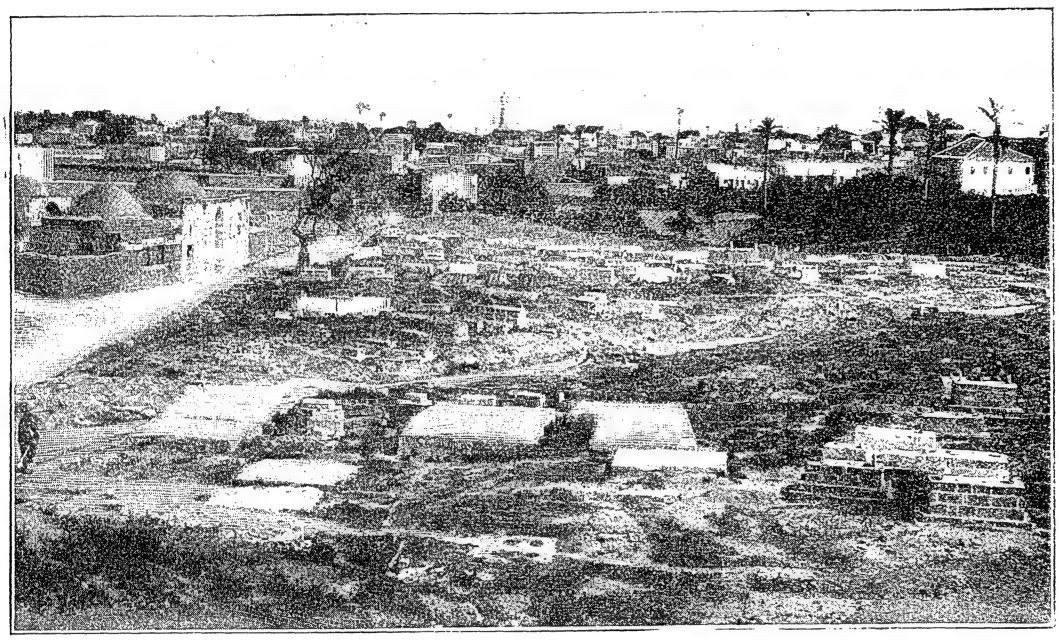
dedicated in 1852; an old and a new cemetery; and a school building with four classrooms.

The "Memorbuch" contains the names of twenty rabbis, among whom are Isaac of Janow, author of "Pene Yiẓḥaḳ Zuṭa," Amsterdam, 1731; Josef Weisse; and Moritz Duschak. When the last-named was called to Cracow in 1872 the rabbinate remained vacant till 1902, when the present incumbent, Moritz Bauer, was called. The Gaya community includes the former communities of Kosteletz and Koritschan.

D. M. Ba.

GAZA (עזה): Palestinian city on the Mediterranean, about 85 kilometers southeast of Jerusalem. In early times it was one of the terminals of the trade-route from South Arabia, as well as from Petra and Palmyra. Gaza was condemned by Amos (i. 6) for trafficking in slaves with Edom. On account of its position its possession was bitterly contested by the Pharaohs from the sixteenth to the fourteenth century, and by the Ptolemies in the third and the second. The history of Gaza goes back to remotest antiquity. It is mentioned in Gen. x. 19 as the boundary of Canaan. Conquered by the tribe of Judah (Judges i. 18, where LXX. introduces "not," probably having later conditions in mind), and retaken by the Philistines, it was the scene of Samson's prowess; he is said to have carried the two gates of the city up the neighboring mountain, and to have perished subsequently in overturning the temple of Dagon (Judges xvi.). It was accounted one of the five chief Philistine cities (Josh. xiii. 3), and at the time of Solomon was the southern limit of the kingdom (I Kings v. 4, Hebr.). When Alexander the Great went from Tyre to Egypt, he took Gaza and left a garrison there. The city later capitulated to Jonathan Maccabeus, who destroyed the suburbs by fire. The Jewish king Alexander Jannæus destroyed Gaza after a siege of a year (96 B.C.); it was wrested from the Jews by Pompey, and was rebuilt and fortified by the Roman general Gabinius in 57. In 30 it was given by Augustus to Herod; but at the beginning of the last Jewish war it was completely destroyed. Jerome, however, speaks of it as a large city in his time. In the Talmudic period residence there was permitted to Jews, though its inhabitants were pagans. The Arabs under Amr took it in 634, but it was restored by the Christians under Baldwin III. In 1152 it came into the possession of the Templars. In 1187 Saladin recaptured it.

Notwithstanding all these changes of rulership,



VIEW OF MODERN GAZA.
(From a photograph.)

scarcely anything is known of the Jews of Gaza. Meshullam of Volterra (1481) found sixty Jewish householders there and four Samaritans. The wine of the place was all grown by the Jews (Luncz, "Jerusalem," i. 193). Obadiah of Bertinoro (1488) mentions as rabbi of Gaza when he was there a certain Moses of Prague, who had come from Jerusalem ("Zwei Briefe," ed. Neubauer, p. 19). The Karaite Samuel b. David found a Rabbinite synagogue there in 1641 (ed. Gurland, p. 11). It may, however, be assumed that a Jewish community existed at Gaza at the end of the sixteenth century, and that the Najjara family supplied some of the rabbis of the place. Israel Najjara, son of the Damascene rabbi Moses Najjara, the author of the songs "Zemirot Yisrael," was chief rabbi of Gaza and president of the tribunal in the middle of the seventeenth century. In 1666 the pseudo-Messiah Shabbethai Ẓebi

found there his most devoted follower, Nathan of Gaza, son-in-law of a rich and pious Jew of that community. A certain R. Ẓedaḳah of Gaza is mentioned in a Bodleian manuscript (Steinschneider, "Cat. Bodl." col. 579, No. 1658). There were Jews at Gaza as late as 1799, but they fled in numbers before Napoleon's army; and Volney, who accompanied the latter, and who describes Gaza in detail, does not allude in any way to the Jews. About 1880 a group of them settled in the town, in which at present there are about ninety.

GAZELLE. See Roebuck.

GEBA (גבע; pausal form, **Gaba**): A city of Benjamin, among the group of towns lying along the northern boundary (Josh. xviii. 24). Geba and its suburbs were allotted to the priests (*ib.* xxi. 17; I Chron. vi. 60). It is mentioned in II Kings xxiii. 8 as the northern landmark of the kingdom of Judah, in opposition to Beer-sheba, the southern; it is spoken of in II Sam. v. 25 as the eastern limit, in opposition to Gazer, the western. In the parallel passage, I Chron. xiv. 16, the name is changed to "Gibeon." "Geba" is sometimes used where "Gibeah" is meant, and vice versa, as in I Sam. xiv. 2, 16. See Gibeah. In the time of Saul, Geba was occupied by the Philistines (*ib.* xiii. 3). The latter, ejected by Jonathan, made a furious onslaught, the armies being arrayed on opposite sides of the ravine which was between Geba on the south and Michmash on the north (*ib.* xiv. 4, 5). This description of the topography of Geba tallies with that given in Isa. x. 28, 29. Geba is identified with a village called "Jeba'," situated on a hill, opposite which there is a village called "Mukhmas," the Biblical "Michmash" (see Robinson, "Researches," ii. 113 *et seq.*; Buhl, "Geographie des Alten Palästinas," pp. 172–176).

E. G. H. M. Sel.

GEBAL: A later designation for the northern part of the Edomite mountain, called "Gebalene" by the Greeks; it occurs in Ps. lxxxiii. 8 (A. V. 7), and, according to Winckler, also in Obad. v. 6. The Arabic word "Jibal," from which the name has been derived, is still applied to this district.

E. G. H. F. Bu.

GEBALENA. See Palestine.

GEBER: **1.** Son of Geber; mentioned (I Kings iv. 13) as one of Solomon's district commissariat officers who resided in the fortress of Ramoth-gilead and had charge of Havoth-jair and the district of Argob.

2. Son of Uri; district commissariat officer of "the land of Gilead," a territory south of Argob and originally possessed by Sihon, king of the Amorites, and by Og, King of Bashan (I Kings iv. 19). The text is rather obscure. The English versions read: "and he was the only officer which was in the land." Solomon had twelve officers in Israel (I Kings iv. 7). The text admits "and one officer who [was] in the land," as an alternative to "and he was the only officer which was in the land."

E. G. H. B. P.

GEBIHA OF ARGIZAH: Babylonian scholar of the fifth century; contemporary of Ashi, the projector of the Babylonian Gemara compilation. Huna b. Nathan once reported to Ashi a homiletic interpretation by Gebiha (Giṭ. 7a; Yalḳ. to Josh. xv. 22, § 17). In "Seder Tanna'im we-Amora'im" (ed. Taussig, in "Neweh Shalom," p. 5; Maḥzor Vitry, p. 483, Berlin, 1893) he is erroneously reckoned among the Saboraim, though he flourished about a century before them (see Brüll's "Jahrb." ii. 25). As to "Argizah," see Jastrow, "Dict." p. 115a; Kohut, "Aruch Completum," i. 271a; Neubauer, "G. T." p. 388; Rapoport, "'Erek Millin," p. 192.

S. S. S. M.

GEBIHA OF BE-KATIL: Babylonian halakist of the fifth century; junior of Aḥa b. Jacob, Abaye, and Raba; from all of these he learned halakot, which he eventually reported to Ashi, whom he assisted in the compilation of the Babylonian Talmud (Yeb. 60a; B. B. 83a; 'Ab. Zarah 22a; Ḥul. 26b, 64b). Once he lectured at the residence of the exilarch, and Amemar reported the substance of the lecture to Ashi (Beẓah 23a). During the last fourteen years of his life (419–433) he held the presidency of the Academy of Pumbedita, vacated by the death of Aḥa b. Raba.

GEBIHA B. PESISA. See Alexander the Great.

GEBINI (from Lat. "Gabinius"): Officer of the Second Temple, whose duty was at certain times of each day to announce the rite to be performed, and to remind the appointees of their respective parts in the performance of that rite. Thus he would cry out: "Priests, attend to the sacrifice; Levites, attune the hymn; Israelites, take your places" (Sheḳ. v. 1; Yer. Sheḳ. v. 48c). Gebini's voice is said to have been once heard by Agrippa at a distance of eight miles, whereupon the king richly rewarded him (Sheḳ. *l.c.*). Elsewhere it is said that his proclamations in the Temple were often heard at Jericho, a distance of ten miles (Tamid iii. 8; Yoma 20b; Yer. Suk. v. 55b, incorrectly גבי). It is believed that "Gebini" became an eponym for all successors in the office of Temple crier (see commentaries to Sheḳ. *l.c.*).

S. S. S. M.

GEBINI B. ḤARSON: A Jewish Crœsus, cited as a realistic illustration of Eccl. iv. 8. The Midrash thus dissects the verse: "There is one alone": that means Gebini b. Ḥarson, to whom

"there was no second," he being without an equal. "He hath neither child nor brother": he was his mother's only son; and "there is no end to his labor," that is, the laboriously accumulated wealth which his father bequeathed to him. "Neither is his eye satisfied with riches," because he was blind in one eye. "For whom do I labor, and bereave my soul of good?" It is related that, after his father's death, he requested his mother, "Show me all the silver and the gold which my father has left me." She showed him a heap of denars the bulk of which was such as to prevent their seeing each other when they stood on opposite sides thereof. "And," adds R. Levi in the name of Resh Lakish, "the very day when Gebini b. Ḥarson died, Belshazzar, afterward governor of Babylonia, was born, and he subsequently carried off all that wealth" (Eccl. R. *ad loc.*; see "Mattenot Kehunnah" *ad loc.*).

S. S. S. M.

GEBWEILER: Town of Alsace, in the consistorial district of Colmar and rabbinate of Sulz. The first document referring to its Jewish community dates from 1270, and is now in the archives of Colmar (L. 16, 6). The synagogue is first mentioned in 1333. The Jews of Gebweiler suffered in the persecutions of 1349 ("R. E. J." iv. 27), and no Jews seem to have lived there during the next few centuries; but at the time of the Thirty Years' war three Jewish families received permission to settle temporarily in the town on payment of 20 reichsthaler per week, the open country being unsafe. In 1674 Gabriel Bloch was admitted on payment of 14 pfennigs protection-money and board for one horse for the town. When Wolf Wechsler, who signs himself in certain documents בניכן חלפון, sought permission from the government to settle at Gebweiler, the abbot, who did "not wish to force the Jew upon the town," left the matter to the magistrate for decision. In the discussion it was pointed out that Wechsler had rendered important services to the bishopric and to the town, and ought therefore to be admitted. Wechsler was director of the Jews of the upper free district (J. Weiss, "Geschichte und Rechtliche Stellung der Juden im Bistum Strasburg," p. 13).

In 1706 four Jewish families were living at Gebweiler, and in 1741 ten families; but in 1784 there were only seven families, aggregating 40 persons. In 1903 there were 83 families at Gebweiler, including the suburb of Lauterbach. The congregation has three charitable societies. Its present synagogue was built in 1870–71; its dead are buried in the cemetery of Jungholz.

GEDALIAH: Son of Ahikam, through whose influence Jeremiah was saved from the fury of the mob, and grandson of Shaphan the scribe (Jer. xxvi. 24; II Kings xxii.; II Chron. xxxiv.); probably cousin of Michaiah, son of Gemariah (Jer. xxxvi. 11). Gedaliah was thus a scion of a noble and pious family. Nebuchadnezzar appointed him governor of Palestine after the conquest of the land, and entrusted Jeremiah to his care (Jer. xxxiv. 14, xl. 5). Gedaliah made Mizpah his capital, where the scattered remnants of the nation soon gathered round him. Not only the poor peasants and laborers, but also the generals and military men came back from their hiding-places among the surrounding tribes, and settled in the deserted towns of Palestine. Gedaliah exhorted them to remain loyal to the Babylonian rulers, and to lay down their arms and betake themselves to agriculture and to the rebuilding of their razed cities. He permitted them to gather the crops on lands which had no owner.

His Death.

Baalis, king of the Ammonites, envious of the Jewish colony's prosperity, or jealous of the might of the Babylonian king, instigated Ishmael, son of Nathaniel, "of the royal seed," to make an end of the Judean rule in Palestine. Ishmael, being an unscrupulous character, permitted himself to become the tool of the Ammonite king in order to realize his own ambition to become the ruler of the deserted land. Information of this conspiracy reached Gedaliah through Johanan, son of Kareah, and Johanan undertook to slay Ishmael before he had had time to carry out his evil design; but the governor disbelieved the report, and forbade Johanan to lay hands upon the conspirator. Ishmael and his ten companions were royally entertained at Gedaliah's table. In the midst of the festivities Ishmael slew the unsuspecting Gedaliah, the Chaldean garrison stationed in Mizpah, and all the Jews that were with him, casting their bodies into the pit of Asa (Josephus, "Ant." x. 9, § 4). The Rabbis condemn the overconfidence of Gedaliah, holding him responsible for the death of his followers (Niddah 61a; comp. Jer. xli. 9). Ishmael captured many of the inhabitants of Mizpah, as well as "the daughters of the king" entrusted to Gedaliah's care by the Babylonian general, and fled to Ammon. Johanan and his followers, however, on receiving the sad tidings, immediately pursued the murderers, overtaking them at the lake of Gibeon. The captives were rescued, but Ishmael and eight of his men escaped to the land of Ammon. The plan of Baalis thus succeeded, for the Jewish refugees, fearing lest the Babylonian king should hold them responsible for the murder, never returned to their native land. In spite of the exhortations of Jeremiah they fled to Egypt, joined by the remnant of the Jews that had survived, together with Jeremiah and Baruch (Jer. xliii. 6). The rule of Gedaliah lasted, according to tradition, only two months, although Grätz argues that it continued more than four years.

Fast of Gedaliah.

The Biblical records place the death of Gedaliah in the seventh month (Tishri) without specifying the day. The traditional view is that it occurred on the third day of Tishri, which was therefore subsequently established as a fast-day in commemoration of the sad event (Zech. vii. 5, viii. 19; R. H. 18b). Later authorities accepted the view that the assassination occurred on New-Year's Day, and the fast was postponed to the week-day following it—the third of the month (Shulḥan 'Aruk, Oraḥ Ḥayyim, 549, 1; Ṭure Zahab *ad loc.*). It is not, however, regarded as a postponed fast-day. If it falls on the Sabbath, the fast must be observed on the following day. The ritual of the day is the same as that of any other fast-day, with the addition of those

prayers which are peculiar to the penitential days. See FASTING AND FAST-DAYS.

GEDALIAH, JUDAH, DON: Portuguese printer; born in Lisbon, where he was engaged as foreman in the printing-house of Eliezer Toledano. Driven out of Portugal at an advanced age, he settled in Salonica, and about 1515 set up the first Hebrew printing-press established in that city, using in part the type which he had taken with him from Lisbon. One of the first works printed was the "'En Ya'aḳob" of Jacob ibn Ḥabib, whom Gedaliah esteemed highly. In 1522 he printed Isaac Arama's "'Aḳedat Yiẓḥaḳ." Gedaliah died about 1526 in Salonica. His press was continued by his sons, and altogether produced about thirty works.

GEDILIAH (גדיליא), ABRAHAM BEN SAMUEL: Rabbi and Talmudist of the seventeenth century; came originally from Jerusalem, traveled in Italy, and lived in Leghorn; he was also rabbi in Verona. He corresponded with Samuel Aboab and Moses Zacuto, and was highly esteemed by them as a Talmudist. He wrote a commentary on the Yalḳuṭ entitled "Berit Abraham," which was printed at Leghorn together with the Yalḳuṭ (part i. in 1650, part ii. in 1660; the part on the Pentateuch was reprinted in 1713). In addition to careful explanations, his work contains much matter from manuscripts of old midrashim which is not found in the Yalḳuṭ. Gediliah has also done an important service in preserving the correct text of the Yalḳuṭ.

GE-ḤARASHIM (גיא חרשים [A.V. and R.V. "Valley of Charashim"]), or **GE HA-ḤARASHIM (גי החרשים):** **1.** Town—the name of which means "the valley of craftsmen"—founded by Joab, one of the tribe of Judah (I Chron. iv. 14).

2. Town inhabited by Benjamites (Neh. xi. 35). In this passage Ge-Ḥarashim is mentioned with Lod and Ono, which form, according to Yer. Meg. i. 1, a part of Ge-Ḥarashim or "the valley of craftsmen."

E. G. H. M. SEL.

GEHAZI (lit. "valley of vision": LXX. Γιεζί; Vulgate, "Giezi"): Elisha's servant (II Kings iv. 12 *et seq.*; v. 20, 21, 25; viii. 4–5).—**Biblical Data:** Gehazi is mentioned first in connection with the history of the woman from Shunem. He explains to the prophet her desire to have a son (*ib.* iv. 14). Later, when she visits Elisha at Carmel, beseeching his aid in behalf of the child that has died, Gehazi would rudely thrust her aside. Elisha, however, charges him to hurry to Shunem, saluting none on the way, and lay the prophet's staff on the child's face (*ib.* iv. 27–29). Though he does as he is bidden, he fails to recall the child to life.

Gehazi is also connected with the story of Naaman. Moved by covetousness, he runs after the Syrian general to secure for himself a share of the presents refused by his master (II Kings v. 20). Inventing a story about an unexpected visit of two sons of prophets in need of garments, he asks for "a talent of silver and two changes of garments," putting the request as though it were from Elisha. He receives enough to burden two servants, who carry the gifts to the "'ophel" (hill), where he hides them. Upon his return to his master he denies having run after the foreign general. But the prophet unmasks the hypocrite, and smites him with the leprosy of Naaman. Gehazi, having become "a leper as white as snow," leaves the presence of Elisha (II Kings v. 21–27).

Gehazi appears again, carrying on a conversation with King Jehoram (II Kings viii. 1–6) concerning Elisha's restoration of the Shunammite woman's son to life; but his recital of Elisha's miracles is interrupted by the appearance of the woman herself to petition the king for the recovery of her house and land, abandoned by her in the recent famine. This last narrative seems to be out of place, and should apparently precede II Kings v. (see ELISHA: CRITICAL VIEW).

——**In Rabbinical Literature:** Gehazi is one of those who, denying the resurrection of the dead, have no portion in the world to come, but share the doom of Balaam, Doeg, and Ahithophel (Sanh. 90a). It was while on the way to Shunem with Elisha's staff that Gehazi proved himself to be a skeptic concerning the resurrection. He considered the whole procedure a joke (Pirḳe R. El. xxxiii.), and instead of obeying the order not to address even one word to any passer-by, nor return any salutation, he asked derisively of those he met whether they believed the

(In the possession of Hon. Mayer Sulzberger.)

staff had the power to restore the dead to life. For this reason he failed.

In other ways, too, Gehazi displayed a mean character, as, for instance, in his behavior to the Shunammite woman (Pirḳe R. El. xxxiii.; Ber. 10b; Lev. R. xxiv.; Yer. Yeb. ii.; Sanh. xi.); he drove away Elisha's disciples (Sanh. 107b); he possessed a magnet by which he lifted up the idol made by Jeroboam, so that it was seen between heaven and earth; he had "YHWH" engraved on it, and in consequence the idol (a calf) pronounced the first two words of the Decalogue (*ib.*). When Naaman went to Elisha, the latter was studying the passage concerning the eight unclean "sheraẓim" (creeping things; comp. Shab. xiv. 1). Therefore when Gehazi returned after inducing Naaman to give him presents, Elisha, in his rebuke, enumerated eight precious things which Gehazi had taken, and told him that it was time for him to take the punishment prescribed for one who catches any of the eight sheraẓim, the punishment being in his case leprosy. The four lepers at the gate announcing Sennacherib's defeat were Gehazi and his three sons (Soṭah 47a). Nevertheless, Elisha is censured for having been too severe. He "thrust him away with both hands" instead of using one for that purpose and the other for drawing him toward himself (Yer. Sanh. 29b). Elisha went to Damascus to induce Gehazi to repent, but Gehazi refused, quoting his master's own teachings to the effect that a sinner who had led others into sin had no hope (Sanh. 107b; Soṭah 47a).

Gehazi was interrupted in his conversation with the king because the praises of a holy man should not be sung by a sinner (Lev. R. xvi. 4). He had been disrespectful to his teacher, calling him by name (Sanh. 100a). His character is said to have been that of a man who, though learned, was jealous and avaricious, unchaste and a cynic (Yer. Sanh. xi.).

E. G. H.

GEHENNA (Hebr. גיהנם; Greek, *Γέεννα*): The place where children were sacrificed to the god Moloch was originally in the "valley of the son of Hinnom," to the south of Jerusalem (Josh. xv. 8, *passim*; II Kings xxiii. 10; Jer. ii. 23; vii. 31–32; xix. 6, 13–14). For this reason the valley was deemed to be accursed, and "Gehenna" therefore soon became a figurative equivalent for "hell." Hell, like paradise, was created by God (Soṭah 22a); according to Gen. R. ix. 9, the words "very good" in Gen. i. 31 refer to hell; hence the latter must have been created on the sixth day. Yet opinions on this point vary. According to some sources, it was created on the second day; according to others, even before the world, only its fire being created on the second day (Gen. R. iv., end; Pes. 54a). The "fiery furnace" that Abraham saw (Gen. xv. 17, Hebr.) was Gehenna (Mek. xx. 18b, 71b; comp. Enoch, xcviii. 3, ciii. 8; Matt. xiii. 42, 50; 'Er. 19a, where the "fiery furnace" is also identified with the gate of Gehenna). Opinions also vary as to the situation, extent, and nature of hell. The statement that Gehenna is situated in the valley of Hinnom near Jerusalem, in the "accursed valley" (Enoch, xxvii. 1 *et seq.*), means simply that it has a gate there. It was in Zion, and had a gate in Jerusalem (Isa. xxxi. 9). It had three gates, one in the wilderness, one in the sea, and one in Jerusalem ('Er. 19a). The gate lies between two palm-trees in the valley of Hinnom, from which smoke is continually rising (*ib.*). The mouth is narrow, impeding the smoke, but below Gehenna extends indefinitely (Men. 99b). According to one opinion, it is above the firmament, and according to another, behind the dark mountains (Ta'an. 32b). An Arabian pointed out to a scholar the spot in the wilderness where the earth swallowed the sons of Korah (Num. xvi. 31–32), who descended into Gehenna (Sanh. 110b). It is situated deep down in the earth, and is immeasurably large. "The earth is one-sixtieth of the garden, the garden one-sixtieth of Eden [paradise], Eden one-sixtieth of Gehenna; hence the whole world is like a lid for Gehenna. Some say that Gehenna can not be measured" (Pes. 94a). It is divided into seven compartments (Soṭah 10b); a similar view was held by the Babylonians (Jeremias, "Hölle und Paradies bei den Babyloniern," pp. 16 *et seq.*, Leipsic, 1901; Guthe, "Kurzes Bibelwörterb." p. 272, Tübingen and Leipsic, 1903).

Nature and Situation.

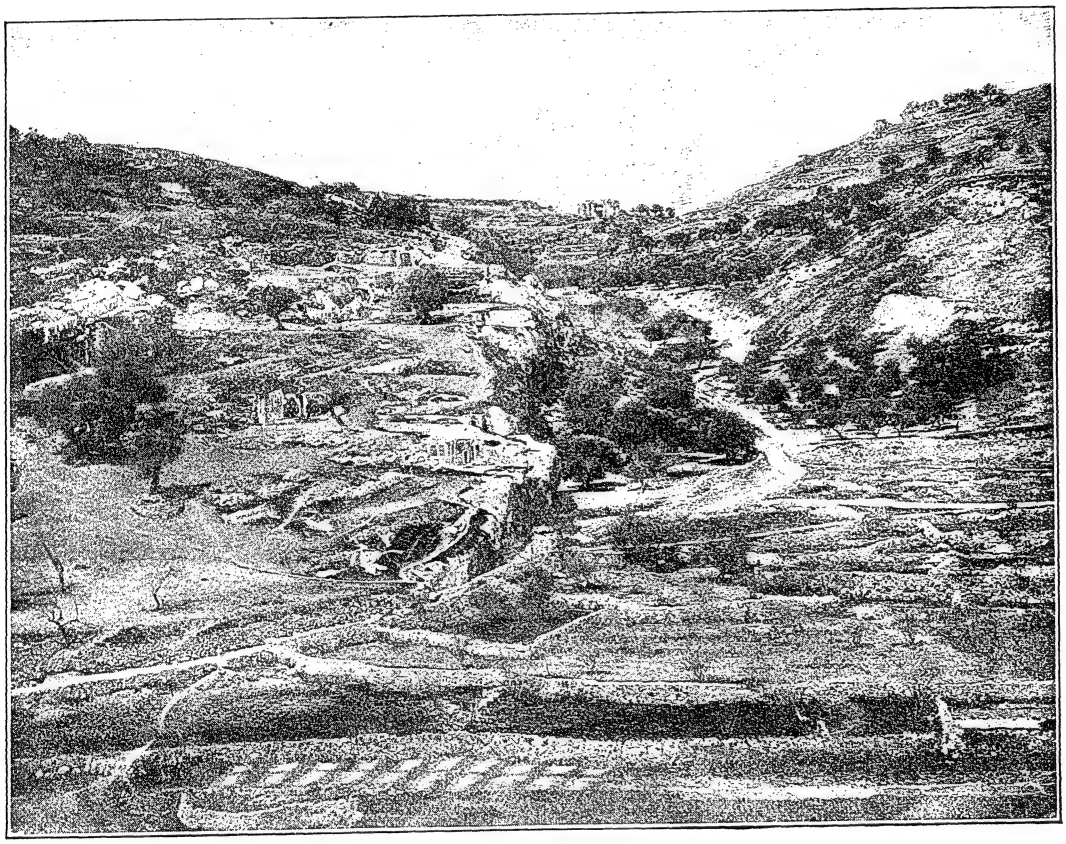
Because of the extent of Gehenna the sun, on setting in the evening, passes by it, and receives from it its own fire (evening glow; B. B. 84a). A fiery stream ("dinur") falls upon the head of the sinner in Gehenna (Ḥag. 13b). This is "the fire of the West, which every setting sun receives. I came to a fiery river, whose fire flows like water, and which empties into a large sea in the West" (Enoch, xvii. 4–6). Hell here is described exactly as in the Talmud. The Persians believed that glowing molten metal flowed under the feet of sinners (Schwally, "Das Leben nach dem Tode," p. 145, Giessen, 1892). The waters of the warm springs of Tiberias are heated while flowing past Gehenna (Shab. 39a). The fire of Gehenna never goes out (Tosef., Ber. 6, 7; Mark ix. 43 *et seq.*; Matt. xviii. 8, xxv. 41; comp. Schwally, *l.c.* p. 176); there is always plenty of wood there (Men. 100a). This fire is sixty times as hot as any earthly fire (Ber. 57b). There is a smell of sulfur in Gehenna (Enoch, lxvii. 6). This agrees with the Greek idea of hell (Lucian, *Ἀληθεῖς Ἱστορίαι*, i. 29, in Dietrich, "Abraxas," p. 36). The sulfurous smell of the Tiberian medicinal springs was ascribed to their connection with Gehenna. In Isa. lxvi. 16, 24 it is said that God judges by means of fire. Gehenna is dark in spite of the immense masses of fire; it is like night (Yeb. 109b; comp. Job x. 22). The same idea also occurs in Enoch, x. 4, lxxxii. 2; Matt. viii. 12, xxii. 13, xxv. 30 (comp. Schwally, *l.c.* p. 176).

It is assumed that there is an angel-prince in charge of Gehenna. He says to God: "Put everything into my sea; nourish me with the seed of Seth; I am hungry." But God refuses his request, telling him to take the heathen peoples (Shab. 104). God says to the angel-prince: "I punish the slanderers from above, and I also punish them from below with glowing coals" ('Ar. 15b). The souls of the sons of Korah were burned, and the angel-prince gnashed his teeth at them on account of their flattery of Korah (Sanh. 52a). Gehenna cries: "Give me the heretics and the sinful [Roman] power" ('Ab. Zarah 17a).

It is assumed in general that sinners go to hell immediately after their death. The famous teacher Johanan b. Zakkai wept before his death because he did not know whether he would go to paradise or to hell (Ber. 28b). The pious go to paradise, and sinners to hell (B. M. 83b). To every individual is apportioned two shares, one in hell and one in paradise. At death, however, the righteous man's portion in hell is exchanged, so that he has two in heaven, while the reverse is true in the case of sinners (Hag. 15a). Hence it would have been better for the latter not to have lived at all (Yeb. 63b). They are cast into

Judgment.

(R. H. 17a; comp. Shab. 33b). All that descend into Gehenna shall come up again, with the exception of three classes of men: those who have committed adultery, or shamed their neighbors, or vilified them (B. M. 58b). The felicity of the pious in paradise excites the wrath of the sinners who behold it when they come from hell (Lev. R. xxxii.). The Book of Enoch (xxvii. 3, xlviii. 9, lxii. 12) paraphrases this thought by saying that the pious rejoice in the pains of hell suffered by the sinners. Abraham takes the damned to his bosom ('Er. 19a; comp. Luke xvi. 19–31). The fire of Gehenna does not touch the Jewish sinners because they confess their



VALLEY OF GE-HINNOM.
(From a photograph by Bonfils.)

Gehenna to a depth commensurate with their sinfulness. They say: "Lord of the world, Thou hast done well; Paradise for the pious, Gehenna for the wicked" ('Er. 19a).

There are three categories of men; the wholly pious and the arch-sinners are not purified, but only those between these two classes (Ab. R. N. 41). A similar view is expressed in the Babylonian Talmud, which adds that those who have sinned themselves but have not led others into sin remain for twelve months in Gehenna; "after twelve months their bodies are destroyed, their souls are burned, and the wind strews the ashes under the feet of the pious. But as regards the heretics, etc., and Jeroboam, Nebat's son, hell shall pass away, but they shall not pass away" sins before the gates of hell and return to God ('Er. 19a). As mentioned above, heretics and the Roman oppressors go to Gehenna, and the same fate awaits the Persians, the oppressors of the Babylonian Jews (Ber. 8b). When Nebuchadnezzar descended into hell, all its inhabitants were afraid that he was coming to rule over them (Shab. 149a; comp. Isa. xiv. 9–10). The Book of Enoch also says that it is chiefly the heathen who are to be cast into the fiery pool on the Day of Judgment (x. 6, xci. 9, *et al.*). "The Lord, the Almighty, will punish them on the Day of Judgment by putting fire and worms into their flesh, so that they cry out with pain unto all eternity" (Judith xvi. 17).

The sinners in Gehenna will be filled with pain when God puts back the souls into the dead bodies on the Day of Judgment, according to Isa. xxxiii. 11 (Sanh. 108b). Enoch also holds (xlviii. 9) that the sinners will disappear like chaff before the faces of the elect. There will be no Gehenna in the future world, however, for God will take the sun out of its case, and it will heal the pious with its rays and will punish the sinners (Ned. 8b).

It is frequently said that certain sins will lead man into Gehenna. The name "Gehenna" itself is explained to mean that unchastity will lead to Gehenna (חנם=חנם; 'Er. 19a); so also will adultery, idolatry, pride, mockery, hypocrisy, anger, etc. (Soṭah 4b, 41b; Ta'an. 5a; B. B. 10b, 78b; 'Ab. Zarah 18b; Ned. 22a). Hell awaits one who indulges in unseemly speech (Shab. 33a; Enoch, xxvii.); who always follows the advice of his wife (B. M. 59a); who instructs an unworthy pupil (Ḥul. 133b); who turns away from the Torah (B. B. 79a; comp. Yoma 72b). For further details see 'Er. 18b, 101a; Sanh. 109b; Ḳid. 81a; Ned. 39b; B. M. 19a.

Sin and Merit.

On the other hand, there are merits that preserve man from going to hell; *e.g.*, philanthropy, fasting, visiting the sick, reading the Shema' and Hallel, and eating the three meals on the Sabbath (Giṭ. 7a; B. B. 10a; B. M. 85a; Ned. 40a; Ber. 15b; Pes. 118a; Shab. 118a). Israelites in general are less endangered (Ber. 10a) than heretics, or, according to B. B. 10a, than the heathen. Scholars (Ḥag. 27a; comp. Men. 99b and Yoma 87a), the poor, and the pious (Yeb. 102b) are especially protected. Three classes of men do not see the face of hell: those that live in penury, those suffering with intestinal catarrh, and those that are pressed by their creditors ('Er. 41b). It would seem that the expressions "doomed to hell" and "to be saved from hell" must be interpreted hyperbolically. A bad woman is compared to Gehenna in Yeb. 63b. On the names of Gehenna see 'Er. 19a; B. B. 79a; Sanh. 111b; *et al.*

K. L. B.

GE-HINNOM, or **GE BEN-(BENE-)HINNOM:** Name of the valley to the south and southwest of Jerusalem (Josh. xv. 8, xviii. 16; Neh. xi. 30; II Kings xxiii. 10; II Chron. xxxiii. 6; Jer. vii. 31 *et seq.*, xix. 2, xxxii. 35). Its modern name is "Wadi al-Rababah." The southwestern gate of the city, overlooking the valley, came to be known as "the gate of the valley." The valley was notorious for the worship of Moloch carried on there (comp. Jer. ii. 23). According to Jer. vii. 31 *et seq.*, xix. 6 *et seq.*, it was to be turned into a place of burial; hence "the accursed valley Ge-hinnom" ("Gehenna" in the N. T.) came to be synonymous with a place of punishment, and thus with hell (comp. Isa. lxvi. 24; Enoch, xxvi. *et seq.*; and the rabbinical Hebrew equivalent). See Gehenna; Paradise.

E. G. H. F. Bu.

GEIGER, ABRAHAM: German rabbi and scholar; born at Frankfort-on-the-Main May 24, 1810; died at Berlin Oct. 23, 1874; son of Rabbi Michael Lazarus Geiger (born 1755; died April, 1823) and Roeschen Wallau (born 1768; died Aug., 1856.) Geiger was one of the most important exponents of Reform Judaism; as author, historian, and critic, one of the pathfinders of the science of Judaism ("Wissenschaft des Judentums"). He was editor of Jewish scientific reviews, and teacher at the Berlin Hochschule (now Lehranstalt) für die Wissenschaft des Judentums.

Geiger's early life and education, because typical of the experience of the great rabbis of the German Reform movement, deserve to be told in some detail. When a mere infant of three years, he mastered the Hebrew and German alphabets. Making rapid progress in the Hebrew Bible, he took up at four the study of the Mishnah. At six his father inducted him into the Talmud. The next two years he spent at a Talmud school "doing nothing" (his own statement in "Nachgelassene Schriften," iii. 4, Berlin, 1875). This induced his parents to take him home, where until his thirteenth year he studied Talmud under his father, in the meantime also acquiring in a desultory way a knowledge of history, Latin, and Greek. His father died soon after his "bar miẓwah," on which occasion he delivered, in addition to a Hebrew "derashah," a German address, much to the discomfort of some of his pious relatives. Under his brothers and others he continued both his Talmudical and secular studies; his religious views, however, underwent a great change, partly as a consequence of his reading, partly as a result of his intercourse with other young men; so that when the choice of his profession was considered he was inclined to disregard the wishes of his family, who had predestined him to theology, and to decide in favor of Oriental philology. In this frame of mind he entered in the summer of 1829 the University of Heidelberg, where he remained one semester, devoting his time to courses in the classics, while privately mastering Syriac. He also continued working on a grammar and glossary of the Mishnah which he had begun two years earlier. The next winter he repaired to Bonn to study Arabic under Freytag. Here he met and became intimate with such men as S. Scheyer, editor and translator of the "Morch Nebukim"; S. R. Hirsch, his subsequent colleague and opponent, who influenced him in many directions (Geiger, "Nachgel. Schriften," iii. 18, 19); Ullmann, translator of the Koran; and Hess, a rabbi in Eisenach. With them he founded a society for the practise of preaching, of which later Frensdorff (the editor of Masoretic works) and Rosenfeld also became members. It was to this society that Geiger preached his first sermon (Jan. 2, 1830). Later the exercises consisted of regular divine services. Geiger confesses that the lectures of his professors had a far less stimulating influence on him than the association with fellow students. His studies, however, were of a very ambitious scope, embracing the classics and history as well as logic and philosophy. While a student at Bonn, mainly encouraged by Professor Freytag, he prepared his

Early Studies.

essay on the Jewish elements in the Koran, in competition for a prize offered by the faculty. Written originally in Latin, this essay, after receiving the prize, was also published in German under the title "Was Hat Mohammed aus dem Judentume Aufgenommen?" (Bonn, 1834). Toward the close of his student days at Bonn Geiger became intimate with Elias Grünbaum (later rabbi at Landau) and Joseph Derenbourg.

On June 16, 1832, Geiger preached at Hanau as a candidate for its vacant pulpit. He did not succeed in being elected, though two months later the faculty at Bonn awarded him the prize for his dissertation on Mohammed. On Nov. 21, 1832, he was called as rabbi to Wiesbaden. Soon afterward he became engaged to Emilie Oppenheim (May 6, 1833), but the wedding did not take place until seven years later (July 1, 1840).

Abraham Geiger.

Geiger remained in Wiesbaden until 1838, devoting much time to the preparation of his sermons as well as to the other duties of his office, such as teaching. He introduced certain changes in the synagogal services with a view to heightening their impressiveness, and did his utmost to induce the government to amend the laws affecting the Jews' standing, especially those bearing on the form of the Jews' oath. A plan to publish a Jewish theological review soon took root in Geiger's mind. It was carried into effect in 1835, and three volumes and two parts of the fourth (1835–38) appeared as "Wissenschaftliche Zeitschrift für Jüdische Theologie"; the remaining parts of iv., as well as v. and vi. 1, appeared later while Geiger was in Breslau. Through this periodical he was brought into closer relations with Zunz and Rapoport. It contained in the main articles from his own pen. Their contents are remarkable both for thoroughness of treatment and for variety of subjects, comprising learned investigations, penetrating criticisms, polemics in defense of Judaism and against high-stationed Jew-baiters, and proposals for reforming Jewish life and liturgy. In 1834 the University of Marburg conferred on Geiger the degree of doctor of philosophy. Among the articles published in the "Zeitschrift" (ii. 1 *et seq.*) that entitled "Ueber die Errichtung einer Jüdisch-Theologischen Fakultät" merits special mention. It pleads for a recognition of the science of Judaism and the placing of the study of theology on an equality with other sciences in method and freedom. This dream of his younger days Geiger was privileged to see realized only in part and in the declining years of his life (Berlin, 1872). While in Wiesbaden he succeeded in bringing together a number of rabbis (in 1837) for the purpose of discussing measures of vital concern to Judaism. Nevertheless, he found Wiesbaden too limited a sphere. As early as 1835 friends had tried to secure for him a call to Gothenburg, in which they were not successful because Geiger's orthodoxy was suspected. Three years later (July 2, 1838) he resigned his office, his parting word as it were, a sort of "apologia pro vita sua," and a program of his further intentions, being his essay "Der Schriftsteller und der Rabbiner" ("Nachgelassene Schriften," i. 492–504). Shortly before, one of the positions in the rabbinate of Breslau had become vacant, and Geiger was induced to visit this important center of Jewish activity. He was asked to preach on Sabbath, July 21, 1838. Rabbi S. A. Tiktin, in order to forestall this, invoked the intervention of the police on the plea that the king had inhibited German sermons in the synagogue. The chief of police, Heineke, was a man of liberal ideas. To gain time he referred the matter to a higher authority. The decision, which favored Tiktin, arrived on the very day set for Geiger's sermon; but Heineke went to the synagogue himself, leaving the decree of his superior officers unopened on his desk until his return from the services. Geiger's sermon (published in "Nachgel. Schriften," i. 355–369) led to his election (July 25),

The "Wissenschaftliche Zeitschrift für Jüdische Theologie."

despite the peculiar manner of appointing the fifty-seven delegates who had the power to nominate the rabbi. Geiger was chosen "Rabbinatsassessor" and second rabbi. But it being necessary for him to become naturalized in Prussia, a chance arose to circumvent the confirmation by the Prussian government. A heated controversy ensued, lasting eighteen months.

Rabbi at Breslau.

During most of this time Geiger stayed in Berlin (Sept., 1838–Dec., 1839), interviewing the authorities and enlisting in his behalf the good offices of Alexander von Humboldt. On Dec. 6, 1839, Geiger was naturalized, and on Jan. 2, 1840, he was installed at Breslau. The first years in his new field of activity were disturbed by agitations against him on the part of S. A. Tiktin and his partizans (see "Nachgel. Schriften," i. 52–112), who resorted to all sorts of schemes to induce the government to depose Geiger. This led to the publication of a number of "Gutachten" (expert opinions) by other (Reform) rabbis in defense of Geiger ("Rabbinische Gutachten über die Verträglichkeit der Freien Forschung mit dem Rabbineramte," Breslau, 1842 and 1843). Tiktin died March 20, 1843, and Geiger paid him a glowing but just tribute ("Der Israelit," 1843, p. 64). Geiger now became the first rabbi; H. B. Fassel, elected as the second, would not accept the election. Nevertheless, the conditions in the congregation continued on a war-footing until 1849, when two congregations ("Kultusverbände") were constituted, one with Geiger as rabbi, the other with G. Tiktin (first with the title "Landrabbiner in Schlesien," and finally, in 1856, when this second congregation became again a part of the Breslau congregation, with the same title as Geiger's)—an arrangement that at last overcame all friction. Geiger's congregation willingly sustained their leader in his efforts to reconstruct the ritual on a modern basis. In 1854 his prayer-book ("Israelitisches Gebetbuch," Breslau, 1854), carrying out his "Grundzüge und Plan zu einem Neuen Gebetbuche," formulated in 1849 ("Nachgel. Schriften," i. 203–229), was adopted.

The program of the Frankfurt Reform Verein had in the meantime stirred up all German Jewry (see "Israelit des 19ten Jahrh." 1843, pp. 170–182). While endeavoring to keep in touch with the leaders and to interest others in the cause, Geiger did not sympathize with the means proposed nor altogether with the demands contained in that pronunciamento. He pleaded, as a historian naturally would, for a gradual evolution; this brought upon him the distrust of the extremists (for instance, Hess, in the "Israelit"). This "historical temper" marks Geiger's attitude also in the three rabbinical Conferences, in the discussions at which he took a prominent part (Brunswick, 1844; Frankfort, 1845; Breslau, 1846). It also decided his relations to the Berlin Reformgenossenschaft, whose rabbi he otherwise would have become ("Nachgel. Schriften," iii. 117). He would not be the preacher of merely one part of the congregation, but the rabbi of the whole congregation. Yet in his theories he was consistently the exponent of the principles underlying the most radical Reform. Judaism for him was not a given quantity, not a national law. It was a process still in flux; tradition itself was the result of this continuous process of growth. He was less inclined than Einhorn and others to emphasize the "election of Israel." He met Frankel's ar-

His Views of Judaism.

raignment of the conference in a way that left no doubt as to where he stood on all the vital questions. He vehemently opposed the policy of the "via media" so characteristic of the school of Frankel. He brooked no limitations to criticism. The Torah as well as the Talmud, he demanded, should be studied critically and from the point of view of the historian, that of evolution, development. These views he took occasion often to emphasize in his later "Jüdische Zeitschrift für Wissenschaft und Leben," the editorials in which are for the most part dedicated to the exposition of Reform principles. As from 1844 to 1846 he was one of the leading spirits in the "Rabbinerversammlungen," so later he took a prominent part in the Leipsic (1869) and Augsburg (1872) synods, and in the preliminary gathering at Cassel (1868).

During his stay at Breslau his "Zeitschrift" was continued. His "Lehr- und Lesebuch zur Sprache der Mischnah" appeared there in 1845. The history of Jewish medieval literature likewise engaged his attention ("Niṭ'e Na'amanim," 1847). In 1850 he published a monograph on Maimonides. Among other fruits of his investigations were contributions on the Ḳimḥis, etc., in Hebrew periodicals; a life of Judah ha-Levi, with metrical German translations of some of his poems; similar treatment of the Spanish and Italian Jewish poets; studies in the history of exegesis ("Parschandatha," etc., Leipsic, 1855), the history of Jewish apologetics (*e.g.*, Isaac Troki), and that of Jewish philosophy ("Leo da Modena; Rabbiner zu Venedig," Breslau, 1856). He

His Publications.

was also a faithful contributor to the "Zeitschrift der Deutschen Morgenländischen Gesellschaft." Besides, he gathered around him a number of young students of theology, before whom he delivered lectures on Hebrew philology, Jewish history, and comparative studies of Judaism and Christianity. He was greatly disappointed at not being called to the directorship of the Jewish Theological Seminary, to which he had induced Jonas Fränkel to leave his fortune.

His greatest work is his epoch-making "Urschrift und Uebersetzungen der Bibel" (Breslau, 1857), which owed its origin to the author's intention to write a history of the Karaites. Thus he came to take up the controversies between the Sadducees and Pharisees; and this led him still further back to those between the Samaritans and the Judeans. In this work he shows that the growing Jewish religious consciousness is reflected in the readings of the Biblical text, the Masoretic being as little exempt from intentional changes as any other of the ancient versions. He also proves the absolute falsity of the notions concerning Pharisees and Sadducees. The former were the nationalists, the latter sacerdotalists (Ẓadoḳites); the former the "people" and an aristocracy of learning and piety, the progressists, the latter the aristocrats by birth, the literalists. In the older Halakah as distinct from the younger, is reflected a divergence of opinions within Phariseeism itself, and it is this distinction which throws light on

the old literature of the post-Biblical schools (Mekilta, Sifra, Sifre). The "Urschrift" led Geiger to begin the publication of another magazine, "Jüdische Zeitschrift für Wissenschaft und Leben"; in its eleven volumes (from 1862 to 1874) are contained many studies supplemental to his chief work. The death of his wife (Dec. 6, 1860) was the remote cause of Geiger's removal from Breslau to Frankfort-on-the-Main (1863). His hope of finding in Frankfort men and means to realize his project of founding a genuinely scientific Jewish theological faculty was doomed to disappointment. His lectures on Judaism and its history ("Das Judenthum und Seine Geschichte," 2d ed. of vol. i., 1864; 3d vol., 1869–71) were in the nature of "university extension" courses. Brilliantly presented, his views lost none of their scholarly thoroughness. His introductory lecture, giving his views on revelation, is especially worthy of note: "the genius of the people of Israel is the vehicle of revelation"—a view at once liberal and loyal, though hopelessly in opposition to the mechanical theory of revelation held to be orthodox. In these lectures, too, Geiger gave without reserve the results of his studies on the origin of Christianity, while in connection with the second series he prepared a biography of Ibn Gabirol (Leipsic, 1867). Called to Berlin, he preached his inaugural sermon Jan. 22, 1870. The opening of the Hochschule (1872) finally gave him, during the last two years of his life, the opportunity for which he had prayed and pleaded so long. He lectured on "Biblical Introduction," and "Introduction to the Science of Judaism," inspiring his students with his own fervor for truth and research. Death came without premonition, almost literally taking the pen out of his hand.

In stature Geiger was small. His head, framed by long, flowing hair parted in the middle, was leonine. His eyes, shielded by very strong glasses on account of myopia, shone with a rare luster even behind the double windows. As a preacher Geiger was impressive. He moved his auditors by both the beauty of his diction and the profundity of his thought. Among others the following may claim the honor of having been his pupils: Immanuel Löw (chief rabbi at Szegedin), Klein (at Stockholm), Loewy (Temesvar), Richter (Filehne), Felix Adler (New York), Sale (St. Louis), Schreiber and E. G. Hirsch (Chicago). Geiger left two daughters and two sons, Prof. Ludwig Geiger of Berlin, and Dr. Berthold Geiger, attorney-at-law, Frankfort-on-the-Main.

S. E. G. H.

GEIGER, LAZARUS (ELIEZER SOLOMON); generally known as **Lazar Geiger)**: German philologist; born at Frankfort-on-the-Main May 21, 1829; died there Aug. 29, 1870. His father was Solomon Michael Geiger, the eldest brother of Abraham Geiger. Eliezer Geiger began the study of Hebrew at a very early age, under the guidance of his father. Not originally devoted to a literary career, he spent several years as a bookseller's apprentice at Mayence, but soon showed a great dislike for business life. His thirst for knowledge overcame all obstacles. He returned to Frankfort, graduated from the gymnasium, and then went to the universities of Marburg, Heidelberg, and Bonn to study classical philology. In 1851 he took up his permanent abode in his native town, and devoted himself principally to linguistic and philosophic studies. His first publication bears the title "Ueber Umfang und Quelle der Erfahrungsfreien Erkenntniss" (Frankfort-on-the-Main, 1865). But as early as 1852 he had begun his chief work, to which his whole life was devoted: "Ursprung und Entwickelung der Menschlichen Sprache und Vernunft" (vol. i. Stuttgart, 1868).

Geiger commenced to publish the principal results of his studies in the more popularly written "Der Ursprung der Sprache"(Stuttgart, 1869, 2d ed. 1878). Before he was able to finish his great work, however, a suddenly developed affection of the heart ended his life. The second volume was published in a fragmentary condition by his brother Alfred Geiger (*ib.* 1872; 2d ed., 1899). The papers he had read on different occasions were also published by Alfred Geiger under the title "Zur Entwickelungsgeschichte der Menschheit" (*ib.* 1871; 2d ed., 1878), and were translated into English by D. Asher ("History of the Development of the Human Race," London, 1880). Even before Darwin's publications, Geiger had come to the conviction that evolution reigned in all nature. He, at all events, was the first to apply this doctrine to reason and language.

His Views.

According to Geiger, language is not degeneration, but evolution; it begins with the most insignificant and trifling expression (a mere cry, which Geiger calls "Sprachschrei"). It is the source of reason. In it and from it, according to the universal law of causality, reason has developed itself, being the offspring, not of sound and the ear, but of light and the eye. The sound of the word and its meaning have, without purpose or consciousness, for a long time varied and differentiated until they have become quite independent of each other. Man's growing familiarity with the world, and his heightened sensibility to pain, have by degrees sharpened his faculty of distinction and comprehension. The history of that evolution leads with certainty back to a state of things in which man, as yet, did not think. At one time the race must have been in a condition similar to that of animals—speechless, helpless, without religion, art, and morals.

Geiger was a stanch opponent of religious reforms, and fought valiantly on many occasions against the leaders of rationalism. When the venerable and ancient synagogue of Frankfort was sacrificed in favor of a more modern building with an organ, Geiger published a pamphlet, "Terzinen beim Fall der Synagoge zu Frankfurt-am-Main" (Frankfort, 1854), in which he gave expression to his grief. From 1861 he occupied a position as teacher in the Jewish high school (Philanthropin) of Frankfort; his pamphlet, "Ueber Deutsche Schriftsprache und Grammatik, mit Besonderer Rückricht auf Deutsche Schulen" (*ib.* 1870), contains his views of certain pedagogical questions. His bust has been placed in the entrance-hall of the public library of his native town.

S. A. GE.

GEIGER, LUDWIG: German literary historian; son of Abraham Geiger; born at Breslau June 5, 1848. After having been educated for the rabbinate under paternal supervision, Geiger entered Heidelberg University, where he applied himself to the study of history; later he went to the University of Göttingen (1865), and devoted some time to Oriental studies. In 1868 he graduated as doctor of philosophy from Göttingen University, where he resumed the study of history and took up that of literature, both of which he continued some years later in Paris. From 1870 to 1873 he held various positions as instructor in different Jewish schools; in 1873 he became privat-docent of German literature at the University of Berlin, and in 1880 assistant professor at the same institution. The subject of his lectures was mainly German literature from the sixteenth to the nineteenth century, and French literature from the sixteenth to the eighteenth century. Geiger has published the following works: "Das Studium der Hebräischen Sprache in Deutschland vom Ende des 15. bis zur Mitte des 16. Jahrhunderts" (Breslau, 1870); "Nikolaus Ellenbog, ein Humanist und Theolog des 16. Jahrhunderts" (Vienna, 1870); "Johann Reuchlin, Sein Leben und Seine Werke" (Leipsic, 1871); "Geschichte der Juden in Berlin" (2 parts, Berlin, 1871); "Petrarca" (Leipsic, 1874); "Deutsche Satiriker des 16. Jahrhunderts" (Berlin, 1878); "Abraham Geiger" (1878); "Renaissance und Humanismus in Italien und Deutschland" (in Oncken's "Allgemeine Geschichte in Einzeldarstellungen," *ib.* 1882, 2d ed. 1901); "Firlifimini und Andre Kuriosa" (*ib.* 1885); "Vorträge und Versuche" (Dresden, 1890); "Geschichte des Geistigen Lebens der Preussischen Hauptstadt" (Berlin, 1892–94); "Augustin, Petrarca, Rousseau" (*ib.* 1893); "Berlin's Geistiges Leben" (2 vols., Berlin, 1894–96). He also published the correspondence of Johann Reuchlin (Stuttgart, 1876). From 1880 to 1903 Geiger was editor of the "Goethe-Jahrbuch"; from 1885 to 1886 he edited the "Vierteljahrschrift für Kultur und Litteratur der Renaissance"; from 1887 to 1891 he edited together with M. Koch the "Zeitschrift für Vergleichende Litteraturgeschichte und Renaissance-Litteratur"; from 1886 to 1891, the "Zeitschrift für die Geschichte der Juden in Deutschland" (5 vols., Brunswick). Lately Geiger has published biographies and the correspondence of numerous eminent German scholars and statesmen of the eighteenth and nineteenth centuries.

GELDERN, SIMON VON: Traveler and author; born 1720; died 1774. He was the great-uncle of Heine, who describes him in his "Memoirs" as an adventurer and Utopian dreamer. The appellation "Oriental" was given him because of his long journeys in Oriental countries. He spent many years in the maritime cities in the north of Africa and in the Moroccan states, there learning the trade of armorer, which he carried on with success.

Von Geldern made a pilgrimage to Jerusalem, and during an ecstasy of prayer, while upon Mount Moriah, he had a vision. Subsequently he was chosen by an independent tribe of Bedouins on one of the oases of the North-African desert as their leader or sheik, and thus became the captain of a band of marauders. He next visited the European courts, and subsequently took refuge in England to escape the consequences of the discovery of his too gallant relations with a lady of high birth. He pretended to have a secret knowledge of the Cabala, and issued a pamphlet in French verse entitled "Moïse sur Mont Horeb," probably having reference to the above-mentioned vision.

GELIL HA-GOYIM. See GALILEE.

GELILAH ("the act of rolling up"): The wrapping of the scroll of the Law in its vestments after the lesson has been read from it. In the German ritual it follows the "hagbahah" (lifting up), and its performance is deemed a lesser honor than that of the latter; in the Sephardic ritual the gelilah is not connected with the hagbahah, which takes place before the reading. According to Shulḥan 'Aruk, Oraḥ Ḥayyim, 147, the most honored man among those called to the desk should perform the gelilah, though among the Sephardim it is usually done by small boys. There are minute rules with regard to rolling up the scroll with proper respect; among the Sephardim it is deemed improper to touch the bare parchment; hence they put a linen or silken cloth ("mappa") next to the scroll.

Neither the Talmud nor the treatise Soferim mentions the gelilah as a ceremony; Soferim (xiii. 8) rules that each man called to the desk, after reading his own subsection and before the closing benediction, shall roll up the scroll; he does this by simply bringing the part on his right and that on his left close together, so that no portion of the writing can be seen.

A. L. N. D.

GELLER, PETER ISAACOVICH: Russian painter; born at Shklov Dec. 10, 1862. He studied at the Odessa School of Design, and entered (1878) the St. Petersburg Art Academy, where he won (1881–83) two silver medals, and (1885) a gold medal for his painting "St. Irene Cures St. Sebastian." In 1887 Geller won the title of "artist of the first degree" for his painting "Ivan the Terrible Taking Orders Before His Death from the Metropolitan." On his graduation in 1887 Geller enlisted as a volunteer, and served in the army for several months. In 1889 he exhibited at the St. Petersburg Academy his painting "The Jewish Conscripts Taking Their Oath," which was purchased by the academy.

GEMARA. See TALMUD.

GEMARA NIGGUN: The chant used by students in reading the Talmud. See CANTILLATION.

GEMARIAH (גמריה): **1.** Son of Shaphan the scribe. It was in Gemariah's chamber that Baruch read to the people the prophecy of Jeremiah (Jer. xxxvi. 10–12). Gemariah was one of the princes who entreated King Jehoiakim not to destroy the roll taken from Baruch (Jer. xxxvi. 10–12, 25).

2. Son of Hilkiah; sent by Zedekiah to Nebuchadnezzar, bearing at the same time a letter from Jeremiah to the captive Jews (Jer. xxix. 1, 3).

E. G. H. M. SEL.

GEMAṬRIA: A cryptograph which gives, instead of the intended word, its numerical value, or a cipher produced by the permutation of letters. The term first occurs in literature in the twenty-ninth of the thirty-two hermeneutic rules of R. Eliezer b. R. Jose, the Galilean (*c.* 200). In some texts the rule for permutative gematria is counted as a separate regulation—the thirtieth (comp. Königsberger's edition of the rules in his "Monatsblätter für Vergangenheit und Gegenwart des Judenthums"). Waldberg ("Darke ha-Shinnuyim"), who gives a list of 147 cases of gematria occurring in traditional literature, includes in this number cases of symbolical numbers, which properly belong to the twenty-seventh rule ("ke-neged"). The reader is referred for the subject of permutative gematria and symbolical numbers to the articles Anagram and Numbers and Numerals; the present article is limited to a discussion of gematria in the later meaning of the term, namely, numerical gematria, and treats therefore only of the numerical values of words.

In its form gematria is a simple arithmetical equation; *e.g.*, צמח (= 138) = מנחם (= 138). The computation of the numerical value of a word, with the inference drawn therefrom, is called גימטריא לשון גימטריקון, לשן גימטריון, גמטריא (comp. Krauss, "Lehnwörter," ii. *s.v.*).

Terms.

The plural is גימטראות, גימטריאות (Krauss, *l.c.*, *s.v.*), גימטרות (Ibn Ezra; see "Kerem Ḥemed," iii. 174), and גמטריות (see Kohut, "Studies in Yemen-Hebrew Literature," ii. 68). The numerical value itself is called חושבנא (Ned. 32a), חשבון or מנין (Num. R. xiii. 15, 16), חשבון התבה (*ib.*), מנין האותיות (Tan., ed Buber, p. ל"ד).

The etymology of the word is doubtful. Some identify it with the Greek *γεωμετρία* in the sense of *ἀριθμητική* (Krauss, *l.c.*, *s.v.*); others consider it to be a transposition of a supposed גרמטיא = * *γραμματεία*, and a derivative of either *γράμμα* ("letter") or *γραμματεύς* ("scribe"; Bacher, "Die Aelteste Terminologie der Jüdischen Schriftauslegung," p. 127; Königsberger, "Monatsblätter," p. 94). The derivation from *γράμμα* may perhaps be supported by the use of the term אותיות, the Hebrew equivalent of גימטריא (Sanh. 38a = Yoma 65a).

I. In Biblical Literature: In the Bible itself there is no reference to numerical gematria, or the symbolical use of numbers, and their existence can not be positively demonstrated. Nevertheless, considering that examples of permutative gematria are found in Biblical literature (ששך = בבל, Jer. xxv. 26; קב קמי = בשדים, *ib.* li. 1), there is great probability that at least some of the claims made by later writers to having found also numerical gematriot are justified. The following three may be considered as very probable: (1) Gen. xiv. 14, where the number 318 is the equivalent of "Eliezer" (Ned. 32a), the only name known to tradition from among those of Abraham's servants; (2) Deut. xxxii. 1–6, the initial letters of the verses giving the number 345, the value of the name of Moses (Tan. *ad loc.*), and the abnormal form of the first letter of verse 6 calling the reader's attention to the cryptographic acrostic; (3) Ezek. v. 2, where ימי המצור, omitting ו and ה, = 390, the number given in *ib.* iv. 9 (comp. Berthelot's commentary *ad loc.*).

II. In Traditional Literature: The following forms of gematria occur: (1) A number in the text points to a person or object, as the number 318 to Eliezer (see above). (2) A word in the text points to a number, a person, or an object. Under this head fall the following kinds:

(a) The word may be taken in its normal numerical value (comp. § III. E 1, below); *e.g.*, הכסף, the money (Esth. iii. 11) promised Haman, foreshadows העץ, the gallows on which he was to be hanged (Esth. R. vi.), since each = 165.

(b) The word may be taken in its minor value (see § III., E 2, below); *e.g.*, קונה (5 + 5 + 6 + 1) = תורה (5 + 2 + 6 + 4, see Esth. R. i.).

(c) Instead of taking the word as it is, all or some of its letters may be first changed by permutation; *e.g.*, קטרת refers to the 613 commandments contained in the Torah, when the first letter ק is changed by the permutation אתבש into a ד, giving (400 + 200 + 9 + 4) = 613 (Num. R. xiii. 15, 16).

(d) Homorganic letters may be interchanged in the computation; *e.g.*, אלה = 39 when ח is substituted for ה (Yer. Shab. vii. 2).

(e) The vowel letters אהוי may be disregarded when written, or supplied when not in the text; *e.g.*, מסכה = 120 (Ex. R. xlii. 8), the ה being disregarded; שרק (Isa. v. 2) = 606 (Tan., section וילך), the spelling שורק being assumed.

(f) A portion of the word may be entirely disregarded, or may be explained by noṭariḳon; *e.g.*, שני רשעים (Ps. iii. 8) = 60 (Meg. 15b), counting only the last letter of the first word and the last two letters of the second word (40 + 10 + 10). This is done because if the text had nothing to include which is not distinctly said by the Scriptures, it would have had the singular שן רשע. The expression אנכי shows that God, the One (Deut. vi. 4), has chosen out of 70 (נב) nations Israel (י; comp. Waldberg, *l.c.* p. 81b, note 160).

(g) The word is first changed by the rule of "al tikre"; *e.g.*, for מה read מאה (Men. 43b).

(h) One of the members of the equation may be a compound; *e.g.*, מעצות (Prov. xxii. 20) = 606, and together with the 7 Noachian commandments gives the number 613 (Tan. *l.c.*).

(i) To one of the members of the equation may be added the external number (comp. § III. E 10, below) of the words whose numerical value is taken. For an example see the next paragraph (j).

(j) Of two identical numbers one may be disregarded. תורה and יראת each amount to 611; add to this sum 2, the external number of both words, and the total becomes 613 (Num. R. xviii. 21).

(k) One of the members of the equation may be a

multiple of the other (comp. § III. E 12, below); *e.g.*, זן (Ex. xv. 16) refers to the twenty-six generations that passed from the creation of the world to the revelation on Sinai (Tan., section נשא).

(l) Integration (comp. III. D e, below) may be used (comp. Waldberg, *l.c.* 77b, note 87, and 88a, note 90).

(m) The grammatical form of the word may be interpreted in terms of numbers; *e.g.*, אלה הדברים (Ex. xxxv. 1) amount to 39 in the following way: אלה = 36; the additional 3 are gained from הדברים in one of two ways. R. Jose b. Ḥanina says: דבר is 1, דברי is 2, דברים is 3; R. Ḥanina of Sepphoris, in the name of R. Abahu, explains: דבר is 1, דברים is 2 (Yer. Shab. v. 2), הדברים is 3 (anonymously in Num. R. xviii. 21).

The gematria method, developed largely in the Middle Ages, became a very popular mode of interpretation, entire treatises being devoted to this branch (see Benjacob, "Oẓar ha-Sefarim," p. 96, Nos. 119, 120; 123; p. 479, No. 737).

III. In the Cabala: In cabalistic literature the use of gematria has been greatly extended, and its forms have been developed in many directions. The principle on which gematria rests is not stated in traditional literature; but it may be assumed that it is essentially the same as that which is found in the Cabala, though in the latter it has been developed along the lines of cosmogonic theories.

A. Theoretic Basis: All creation has developed through emanation from the En Sof. The first degrees of that evolution are the ten SEFIROT, from the last of which, Kingdom, developed the twenty-two letters of the Hebrew alphabet. Through the latter the whole finite world has come into existence. These letters are dynamic powers. Since these powers are numbers, everything that has sprung from them is number. Number is the essence of things, whose local and temporal relations ultimately depend on numerical proportions. Everything has its prototype in the world of spirit, that spiritual prototype being the germ from which the thing has been developed. As the essence of things is number, the identity of things in number demonstrates their identity in essence.

B. Degrees of Identity: While all of the twenty-two letters of the alphabet are coordinate powers, still it is evident that the ramifications of a letter like ד, for example, whose numerical value is 4, can not be the same as those of the letter ת, whose numerical value is 400. It is, moreover, equally apparent that two equal sums will not be absolutely identical in their contents, if the factors in each are different. The identity, therefore, implied in a gematrical equation admits of a practically unlimited number of degrees. It is only for the highest three degrees that the cabalists have coined the following terms:

(a) חלק המשקל ("degree of equibalance"), the highest degree, which denotes an equation with an equal number of letters in both members; *e.g.*, אברהם (40 + 5 + 200 + 2 + 1) = רזיאל (30 + 1 + 10 + 7 + 200) = 248; each member having 5 letters.

(b) חלק החבור or חלק היחוד ("degree of addition," or "degree of consolidation"); *e.g.*, when חכם = חיים, it is necessary to add the י and obtain a כ — both having the value of 20 — to make the equation identical.

(c) חלק הפרוד or חלק החלוק ("degree of separation," or "degree of division"), when one letter is resolved into smaller values, the reverse of the preceding.

C. Objects: The objects dealt with by gematria may be:

(a) Letters, persons, things, and conceptions considered under the aspect of number; *e.g.*, ב is 2; the tribes are 12; the genus of anything is 1.

(b) Things may be fancied to resemble letters. The nose and the eyes, for instance, are fancied to resemble the group of letters יוי. A dot and a line are fancied to resemble י and ו respectively. Accordingly, the vowel-signs consisting of one dot amount to 10; paṭaḥ, being a line (ַ), is 6; the ḳamez, composed of a line and a dot (ָ), is 16, etc.

(c) Letters may be dissolved to form groups of things or of other letters; *e.g.*, the letter י is considered as consisting of three dots or strokes ("'uḳẓin"), and therefore amounting to 3. The letter ו amounts to 10 in the following way: its head is י = 3; its body is a line = 6; its tail is a point = 1; sum 10. The א is dissolved into יוי or יוד, the middle stroke being ו. In the first case it may amount to (10 + 6 + 10) = 26, or, since ו may amount to 10, to 30. In the latter case it may equal 20 or 24. By a similar process might be obtained the equation א = ט = ל = 26; namely, א = יוי, ט = בו, ל = וי (comp. עסים רמונים, 56a, 60b).

D. Principles and Methods: The world is conceived as a pyramid whose apex is the En Sof and whose base consists of the lowest creations. The latter are but gradual ramifications of the former. The lower is entirely contained in the immediately higher, and the higher is partly found in the lower. From this idea has developed the principle of involution, which branches out in various forms. The following modes of procedure are to be noticed as occurring in many of the cabalistic gematrical operations:

(a) *Decadal Involution:* The ten sefirot differ from one another only in degree, not in essence. Every sefirah, therefore, not being subject to limitations in space, contains all the other sefirot. Hence, each sefirah is made up of 10 sefirot, each of which again includes 10. One sefirah, therefore, includes 100. All the sefirot thus contain 1,000. Similarly, any number may be decadally involved. This involution is called כללותת or כלילות. The number 1, for instance, involved to the first decade (בכללות, בכללות עשר) will amount to 10; when involved to the second decade (בכללות הכללות), to 100. Thus, the four supramundane worlds, אצילות, בריאה, יצירה, עשיה, are the 310 worlds promised to the righteous in the world to come (comp. Sanh. 100a). As each of these four worlds contains 10 sefirot, the three worlds, בי"ע, raised to the first decade give the amount 300; the world of אצילות counts only as 10, because, being on its upper side endless, the more it contained the nearer it would approach unity. Decadal involution usually affects the word as a whole.

Gematria of the Sefirot.

(b) *Geometric Involution:* According to the same

principle, a number may be raised to the second or the third power. Here the sum of the whole word may be so dealt with, or each of its letters may be raised separately and the sums then added (comp. § III. E 5 and 6, below).

(c) *Comprehension:* Creation is but an unbroken chain of cause and effect. The latter is potentially contained in the former, and the former partly in the latter (comp. § III. D, above). Every effect, *i.e.*, everything that can be subsumed under a higher term, is the species (פרט); every cause is the genus (כלל), comprehending the species. The Universal Comprehender (כולל) is God; the General Comprehender, the Ἀγλη. The alphabet is the comprehender of the whole Torah; the א, that of the whole alphabet, *i.e.*, of all numbers. The numerical value of a word is the comprehender of its conceptional contents. In short, any generic concept may be counted and added to the equation.

Genus and Species.

To elucidate the principle involved the following example may be taken: $[(a+b+c)+(d+e)+(f+g+h)] = (i+j+k) = S$. Let α, the first member of the equation, consist of 3 words, or of 8 letters, and β, the second member, of 1 word, or 3 letters. Let S be the numerical value of each member. Suppose that a actually amounts only to $(S-1)$, $(S-2)$, etc. To make up the deficiency, if it is $(S-1)$, there is added the comprehender of a, *i.e.*, the comprehender of $(S-1)$, which is 1. This would be expressed by עם הכולל. If $a = (S-2)$, there must be added the comprehender of $a+$ that of β, עם שני כוללים. If $a = (S-3)$, the comprehenders of $a+\beta+(a+\beta)$, עם שני כוללים וכולל דכולל, may be taken. Or there may be added to a its 3 words, עם המלות. If $a = (S-8)$, one may add the 8 letters עם האותיות. If $a = (S-14)$, the 3 comprehenders + the 3 words + the 8 letters, etc., may be added.

Instead of addition, subtraction may be used; *e.g.*, אדני = כח. The Divine Name, by double integration (comp. § III. D e, below), yields 34 letters; deduct from this number the 4 letters of the integral + the comprehenders of both terms, and the result will be 28. The כולל has a different value in the following example: מקל = the letters עק in the name יעקב, which are the essential parts of that name, corresponding to the comprehenders of יוסף and דוד; namely, עק = 170, יוסף דוד = 170. The abstract noun of כולל is כוללות; of כלל it is כללות.

(d) *Multiplication and Division:* One of the terms may be a multiple of the other; for an example comp. § II. 2 k, above. Multiplication may be used also in many other forms; *e.g.*, a term may be multiplied by its letters, as יהוה $= (5\times6\times5\times10) =$ 1,500. Similarly, one of the terms may be a quotient of the other; *e.g.*, the world was created by means of אמת ("truth"), these being the final letters of ברא אלהים את (Gen. i. 1). The end of all creation is אדם ("man"); for the latter is a tithe of the former: ם $= \frac{1}{10}$ ת, ד $= \frac{1}{10}$ מ, א is indivisible.

(e) *Integration:* Just as in the sefirot all things are contained in a latent state, potentially, so in a number there are latent ramifications. The letter ל, for instance, amounts on the face of it to 30; but it contains also its alphabetic name למד, and therefore really amounts to 74. The word לב, on the face of it amounting to 32, may be integrated (נתמלא) to למד בית, and would then amount to 486. This integral (מלא) may again be integral to למד מם דלת בית יוד תו, and this double integration (מלוי המלוי or מלוי שני) would raise the value of לב to 1,436. In the above example לב is the integral (עקר, שרש, או' שרשיות, אותיות נספרות, סוד, נגלה, פשוט, או' מונות), the integrant (נעלם, העלם) the doubly integrated number מלא דמלא, the process of integration מלוי. The numerical value of the integral is the כלל, that of the integrant the פרט.

Some of the names of the letters may be spelled in various ways, so as to affect the numerical value of the word. Hence, one and the same word may, when integrated, yield several values. The Tetragrammaton יהוה, for example, may be integrated in many forms, but the following four are the usual ones: (1) יוד הא ואו הא $= 45$; (2) יוד הה וו הה $= 52$; (3) יוד הי ויו הי $= 63$; (4) יוד הי ואו הי $= 72$.

(f) *Quaternion:* The quaternary term (רבוע, τετρακτύς) $10 = (1+2+3+4)$ shows that ד $= 10$, as 4 includes all the preceding lower numbers. If the above equation, $4 = 10$, be put in the form $(1+1+1+1) = [1+(1+1)+(1+1+1)+(1+1+1+1)]$ it becomes evident why a word like יהוה, for instance, is equivalent to (יהוה + יהו + יה + י) $= 72$. This process is called סוד אחורים, רבוע; the term itself, מרבע, רבוע. The simple form יהוה is the פנים ("face"); the quaternated form אחור, אחורים ("back"). Quaternation may be combined with integration, and the process is extended to words having more or less than four letters.

(g) *Spatiality:* A word may also be considered under the aspect of dimension, and expressed in terms of spatiality. Thus, יהוה in terms of space would have a רחב ("width") of 4, and a גבה or קומה ("height") of 10; the height being the extent of the integral (comp. § III. D e, above).

E. Numerical Values: From the above explanation it is clear that one word may yield a variety of values. The early cabalists have, for some mystical reason, decided arbitrarily the number of these values to be nine, either because nine is the highest number of units and contains all the lesser numbers, or because of the nine psychic powers of man which are the cause of the whole organism—viz., intellect, understanding, consciousness, the five senses, and the practical will—since man, the microcosm, reflects the world, the macrocosm. However that may be, below is given an enumeration of the cabalists' nine values (Nos. 1–9) and of all the other values actually used.

1. *Normal Value,* מספר הכרחי, מ' מברח, counting א — ט as units, י — ע as tens, ק — ת as hundreds. The 5 final letters have here the same values as their respective initial forms.

2. *Cyclical or Minor Value,* מספר מעגל בללי, מ קטן, where the tens, hundreds, and thousands are reduced to units; *e.g.*, אדם = אמת, *i.e.*, $(40+4+1) = (400+40+1)$. This procedure is also called חזרת הגלגל ("return of the cycle"), since with 1,000 the alphabet must be begun anew, symbolizing that the beginning is connected with the end (נעוץ סופו בתחלתו). This value is assigned to Enoch, who is

identified with Mattatron (a differentiation of Metatron), who, like the gnostic demiurge, has neither knowledge of nor understanding for involution, the pneumatic nature of things.

3. *Inclusive Value*, מספר קדמי, a development of the quaternion, where each number includes all the other numbers that precede it in the order of the alphabet; *e.g.*, ה = (5 + 4 + 3 + 2 + 1) = 15; כ = (20 + 10 + 9 + 8 + 7 + 6 + 5 + 4 + 3 + 2 + 1) = 75.

4. *Additory Value*, מספר מוספי, when the external number of words or of letters is added (comp. § III. D c, above).

5. *Square Value of the Word*, מספר מרבע כללי. The numerical value of the word is successively multiplied by the value of each letter, and the products are added; *e.g.*, דוד = [(14 × 4) + (14 × 6) + (14 × 4)] = 196, or, in short, 14^2. The reason for such a procedure is that inasmuch as 14 branches are contained in 3 powers, each power must be contained in the other two.

6. *Square Value of the Letter*, מספר מרבע פרטי; *e.g.*, דוד = $(4^2 + 6^2 + 4^2) = 68$.

7. *Nominal Value*, מספר שמי, taking the alphabetical name of the letter for the letter itself (comp. § III. D e, above).

8. *Numeral Value*, מספר מספרי, substituting the numeral noun for the number; *e.g.*, מקל = ארבעים מאה שלשים = (40 + 10 + 300 + 30 + 300 + 5 + 1 + 40 + 40 + 10 + 70 + 2 + 200 + 1) = 1,049. The principle is the same as in the preceding.

9. *Major Numeral Value*, מספרי הגדול, the preceding combined with integration; *e.g.*, יוד = י = עשרים = 620.

10. *External Value*, מספר חיצוני, when the contents are disregarded, every letter counting for 1. The Tetragrammaton can not be taken in this value ("Asis Rimmonim," 36b).

11. *Major Value*, מספר גדול. In this value the final letters count as hundreds (מספר גדול דמנצפ"ך). In contradistinction to the minor or cyclical value (see § III. E 2, above), the values 10–400 (see § III. E 1, above) also belong under this head.

12. *Multiple Value*, מספר כפול (comp. § III. D d).

13. *Quotient Value*, מספר חלקי (comp. § III. D d).

14. *Cube Value of the Word*, מספר מעקב כללי, מ' משלש כללי.

15. *Cube Value of the Letter*, מספר מעקב פרטי (comp. "Hayyaṭ," in "Minḥat Yehudi," iii.).

16. *First Decadic Involution Value*, מספר כללות עשר (comp. § III. D a, above).

17. *Second Decadic Involution Value*, מספר כללות הכללות.

18. *Double Integration Value*, מספר שמי שני.

19. *Permutation Value*, מספר תמורי, when the values of the permutated letters are taken (comp. § II. 2 c, above).

20–22. *Quaternion Values*, מספר רבוע, either of the simple word or of the singly and doubly integrated forms (comp. § III. D f, above).

Considering that the procedures and values explained above may be used in various combinations, it will easily be seen that a word may be made to yield an almost unlimited number of values.

F. Scientific Value: What scientific value the Talmudists placed on gematria is difficult to tell with certainty. Although one legal enactment, that the duration of the Nazaritic vow be 30 days, is ostensibly founded on gematria, it will perhaps be nearer the truth to assume that they considered it merely as an "asmakta," a mnemonic aid, and that, as in other similar cases, that law had another basis.

In later literature, outside of cabalistic circles, and beginning with Ibn Ezra (comp. "Monatsschrift," xliii. 84), the value of gematria is spoken of more or less derogatorily, especially by Joel Sirkes (ב"ח to Ṭur Oraḥ Ḥayyim, 24, 63), Leo di Modena ("Ari Nohem," ch. xiv.), Milsahagi (ראבי"ה 15c *et seq.*), and Zweifel ("Kerem Ḥemed," ix. 80 *et seq.*).

S. S. C. L.

GEMEINDEBUND, DEUTSCH-ISRAELITISCHER ("Union of Judæo-German Congregations"): An association of Jewish corporations in Germany, founded July 3, 1869, on the occasion of the Jewish synod at Leipsic, and incorporated Feb. 13, 1899. The federation has for its object the exchange of experiences in matters of administration, and especially the promotion of the common interests of German Jews, excluding, however, from its sphere of activity all matters relating to ritual. It directs its attention chiefly to education and charity. It grants subsidies for religious instruction to the smaller communities, and helps the needy by assisting them to take up agricultural and technical pursuits. At the same time it provides for the training of religious teachers and cantors, and for pensions to aged officials of the congregations or to their families, contends against the evil of strolling beggars, and furnishes aid for released convicts. These objects are enumerated in section two of its constitution of Nov. 15, 1898.

Constitution.

At the head of the federation, which at present includes two legally established boards (in Baden and Württemberg), ten provincial and district congregational associations ("Verbände"), and 750 congregations, are a president and a board of thirty-six members. This board appoints delegates in the various communities (numbering 118 in 1903) to watch the interests of the federation. The first two presidents were Jacob Nachod and Moritz Kohner, in Leipsic. When the society moved from Leipsic to Berlin in 1882 Dr. S. Kristeller became president; in 1896 ill health compelled him to resign the office to the present incumbent, Dr. Martin Philippson, formerly professor at the University of Brussels. A regular meeting of delegates is held every four years. The business of this meeting comprises the hearing of the report of the board, as well as that of the treasurer, etc. The last meeting, the ninth since the existence of the federation, was held in Berlin Feb. 23–24, 1902.

The charitable funds and institutions under the administration of the federation are as follows:

German-Jewish Loan-Fund for Women and Girls: established 1875; administration in Leipsic.

Mendelssohn House in Dessau. Bought 1879, on the 150th anniversary of Moses Mendelssohn's birthday. The rear part of the house in which Moses Mendelssohn was born has been left in its

original condition, while the front part has been remodeled. It was planned as a home for retired Jewish scholars, and was opened in 1886.

Samuel Kristeller Fund; founded May 26, 1890. Its object is to assist young Jews who wish to learn a trade, and to help deserving Jewish mechanics in settling themselves.

Montefiore Fund; founded 1900. It offers prizes to be competed for by teachers of mechanical trades and of gardening.

Jewish Workingmen's Colony at Weissensee, near Berlin. Its object is to provide work, food, and shelter for unemployed Jewish men. It was started in 1902, and numbers about 60 inmates.

Jewish Reformatory (Israelitische Fürsorge-Erziehungsanstalt) for Boys (the Eugene and Amalie Rosenstiel foundation) at Repzin and Schivelbein; opened 1901 with twenty-five inmates.

Jewish Reformatory for Girls at Plötzensee, near Berlin; opened 1902.

Commission for the maintenance of indigent congregations by means of contributions to the salaries of religious teachers and to the expenses of school buildings. It at present (1903) subsidizes about 150 needy congregations.

Friedrich-Wilhelm-Victoria Fund; founded (1883) under the protectorate of the crown prince and princess (Emperor Frederick III. and Empress Victoria). It maintains the life-insurance policies of 1,000 community officials.

Philippson Fund; founded 1875. It affords temporary relief to needy congregational officials.

Herxheimer Fund; founded September 26, 1877. Enables poor Jewish students to attend normal schools in Germany.

The following institutions are for the promotion of Jewish science:

Zunz Fund; subsidizes eminent scientific works.

Historical Commission for Investigating the History of the Jews in Germany; founded 1885. It has published "Zeitschrift für die Gesch. der Juden in Deutschland" (Brunswick, 5 vols.); Aronius, "Regesten zur Gesch. der Juden im Fränkischen und Deutschen Reiche bis zum Jahr 1273"; Höniger-Stern, "Das Judenschreinsbuch der Laurenzpfarre in Köln"; Neubauer-Stern-Baer, "Berichte über die Judenverfolgungen Während der Kreuzzüge"; Salfeld, "Das Martyrologium des Nürnberger Memorbuches."

Educational Department (for discussing pedagogical questions).

The Gemeindebund has published a number of popular tracts, the best known being "Grundsätze der Jüdischen Sittenlehre," by Dr. S. Kristeller, approved by the most influential rabbis and Jewish notables. It publishes a statistical year-book of the Jewish communities of Germany (fifteen have so far appeared), and from time to time the "Mittheilungen vom Deutsch-Israelitischen Gemeindebund" (sixty numbers). The decisions of courts and authorities ("Behördliche Entscheidungen und Verordnungen") appended to the year-book give it additional value.

The assets of the union are valued at about 650,000 marks. It has a library of about 5,000 books, mostly Judaica.

BIBLIOGRAPHY: *Mittheilungen vom Deutsch-Israelitischen Gemeindebund*, Nos. 1-60; *Statistisches Jahrbuch* of the association, Berlin, 1901.

D. S. SA.

GEMMINGEN, URIEL VON. See REUCHLIN, JOHN.

GEMS: Precious stones, usually cut or polished for ornamental or other uses. Gems were not indigenous to Palestine; they were imported, under Solomon, in ships from Ophir (I Kings x. 11; II Chron. ix. 10), or brought by wandering merchants from Arabia and Phenicia (Ezek. xxvii. 22). Precious stones were among the Queen of Sheba's gifts (I Kings x. 2, 10), as well as among the riches for which Hezekiah provided treasuries (II Chron. xxxii. 27). Together with gold, they were esteemed the most costly and rare possessions (Job xxviii. 15 *et seq.*; Prov. xvii. 8, xxvi. 8; Wisdom vii. 9). Therefore the restored city of Zion (Isa. liv. 11, 12) will be founded and beautified with precious stones (comp. Rev. xxi. 18 *et seq.*); even the vision of God's glory recalls the glow of gems (Ezek. i. 26, 27). They were in use as ornaments at a comparatively early period (in the crown of the Ammonite monarch: II Sam. xii. 30; on robes and canopies: Ezek. xxviii. 13; Apocr. Esther iv. 6; on golden vessels: Ecclus. [Sirach] l. 9-10). They were especially employed for signet-rings and seals, cylinders and cones (see ENGRAVING; SEALS; also Benzinger, "Arch." *s.v.* "Siegel"; Cant. v. 14; Ecclus. [Sirach] xxxii. 7 *et seq.*; Greek, xxxv. 5 *et seq.*; Greek, xxxviii. 27). David is said to have gathered gems while preparing for the erection of the Temple, and Solomon is credited with having studded its interior walls with them (I Chron. xxix. 2, 8; II Chron. iii. 6).

Gems are designated as אבן יקרה (Ezek. xxviii. 13; I Kings x. 2, 11; Assyrian, "abnu aḳartu" = אבן חן: Prov. xvii. 8; אבני חפץ: Isa. liv. 12; Ecclus. [Sirach] xlv. 11; אבני מלאים: Ex. xxv. 7; אבני פוך: I Chron. xxix. 2; Talmudic, אבן טובה: B. B. 10b; also in the plural אבנים טובות, in the frequent expression אבנים טובות ומרגליות = "gems and pearls"). In addition to a few other specific references, the twelve stones in the breastplate of the high priest and the two in his ephod are specifically enumerated (Ex. xxviii. 9, 17-20; xxxix. 10 *et seq.*), from which lists that given by Ezekiel in the description of Tyre's glory ("cherub") (Ezek. xxviii. 13; comp. Rev. xxi. 9-11) is in all probability an adaptation; some extreme critics have even assumed the reverse relation between Ezekiel and Exodus (see Guthe, "Kurzes Bibelwörterb." *s.v.* "Edelsteine"). The exact determination of the value of the names given is extremely difficult, in some cases impossible. It has rightly been held (Flinders-Petrie, in Hastings, "Dict. Bible"; and J. L. Myres, in Cheyne and Black, "Encyc. Bibl." both *s.v.* "Stones, Precious") that the Septuagint represents the Greek knowledge on the subject in the Alexandrian period as summed up in Theophrastus' treatise (Περὶ Λίθων), while Rev. xxi. 9-11 reflects Pliny's views ("Historia Naturalis," xxxvii.). The Targumim throw light on the views traditionally held in their time by the Jews, but there is no reason to believe that they preserve accurate knowledge of the stones in use before their day. Josephus' description ("Ant." iii. 7, § 5; "B. J." v. 5, § 7) is valuable only as giving his personal interpretation. Modern versions, as far as they do not follow the Septuagint, resort to equivalents based on the practise of their day. It is noteworthy in this connection that Sirach contents himself with a general description without details (Ecclus. [Sirach] xlv. 11).

In High Priest's Breastplate and Ephod.

On the well-grounded supposition that the Hebrews could not have been familiar with stones unknown to the peoples with whom they came in contact and from whom they drew their stock of gems, Myres has compiled a table of stones in actual use among Egyptians, Babylonians, etc., at various periods. In the following, Myres' compilation has been consulted. Dividing the twelve stones into

four rows of three each, Exodus (xxviii. 17–20) enumerates them thus:

(1) אדם: *σάρδιον* = "sardius"; A. V. and R. V. "sardius" or "ruby" (Ex. xxviii. 17, xxxix. 10; Ezek. xxviii. 13; Rev. xxi. 20); Targ. Onḳ. סמקן; Targ. Yer. i. סמוקתא, ii. סמקתא; Ex. R. xxxviii. שרירנין; Josephus, "Ant." iii. 7, § 5, "sardonyx." This, as the name implies and according to the Targumim and Num. R. vi. 7, was of red color, though possibly its name meant merely to suggest its Edomite origin. It is thus safe to identify it with the modern sard, which, according to Pliny (*l.c.* xxxvii. 106), was very common among the engraved stones in antiquity. Petrie holds it to be the opaque blood-red jasper, which was valued as a charm against bleeding, and was indeed common in Egypt, Babylonia, and Assyria. While the sardonyx is a variety of agate in which white or semiopal chalcedony alternates with sard, the latter is a very compact variety of chalcedony, transparent, and much esteemed by ancient lapidaries. The reading in Ex. R. xxxviii. should be emended to שרדנין, the sardonyx or carnelian, possibly the same stone as that which occurs elsewhere in rabbinical writings under the name סרוליון or סנדלפונין (Sanh. 59b; Ab. R. N., Text A, i. and xxxviii.; Targ. to Job xxviii. 18), which Levy derives from *σανδαράκη*, and Kohut identifies with a Persian word meaning "ruby" (see Bacher in "R. E. J." xxix. 83). On this stone in the breastplate was engraved "Reuben" (Ex. R. *l.c.*).

Sard.

(2) פטדה: *τοπάζιον* = "topazius"; A. V. and R. V. "topaz" (Ex. xxviii. 17, xxxix. 10; Ezek. xxviii. 13; Job xxviii. 19); Rev. xxi. 20, *σαρδόνυξ*; Targ. Onḳ. רקן; Targ. Yer. i. and ii. ירקתא, Ex. R. *l.c.* שבפונין; Josephus, *l.c.* "topaz." These renderings agree in identifying the "piṭdah" with the "topaz" (for the reading in Exodus Rabbah is doubtless a corruption of שטמפונין; comp. the Syriac in Job xxviii. 19; see Monatsschrift," 1882, p. 334; Bacher, in "R. E. J." xxix. 84), and in making it a stone of yellow-green color. By modern scholars it is identified as the Assyrian "ḫipindu," a "flashing" stone. Thus the piṭdah could scarcely represent our modern topaz. But it may have been the "false topaz," that is, a yellow rock-crystal, or with still greater probability the modern chrysolite, which is a green-colored, vitreous, transparent or translucent mineral, of which there are two kinds, the common and the precious. The precious, of a pale yellowish-green color, is found in the Levant. In Pliny the description of the topaz fits the modern chrysolite, and that this corresponds to the Hebrew "piṭdah" is the opinion of Myres, Petrie, Cheyne, and Fraas (see Riehm, "Handwörterb." 2d ed., p. 338b, note). According to Job xxviii. 19 this stone came from Cush (Ethiopia). This seems to agree with the report (Pliny, *l.c.* vi. 34 and xxxvii. 32, where it is described as green; Targum to Job, *l.c.*; Diodorus Siculus, iii. 39) about the topaz island in the Red Sea. This stone was engraved "Simeon."

Chrysolite or Topaz.

(3) ברקת: Septuagint and Josephus, *σμάραγδος*; A. V. "carbuncle"; R. V. "carbuncle" or "emerald"; Targ. Onḳ. ברקן; Yer. i., ii. ברקתא; Ex. R. רייקניתין. In Ezek. xxviii. 13 the Septuagint retains *σμάραγδος*, but the Masoretic text has "yahalom." As the Hebrew name etymologically indicates, this was a "flashing, brilliant" stone. Its identification, however, is doubtful. According to the Greek writers, the Greek *σμάραγδος* (Lewy, "Die Semitischen Fremdwörter," p. 57) was a crystal found in immense columns and was of intense brilliancy. This would apply to the rock-crystal and the beryl. In favor of the former see Rev. iv. 3, and Petrie in Hastings, "Dict. Bible" (*l.c.*). In Egypt colorless, brilliant rock-crystal was extensively used for engraving, as it was from the later Babylonia time onward in Mesopotamia (Myres); hence the presumption is that the Biblical ברקת represents this crystal. The reading in Exodus Rabbah expresses the Greek *ὑάκινθος* (Syriac of Rev. xxi. 20). This would make it a stone of the color of the hyacinth, or the jacinth, one of the many varieties of zircon. It is mentioned in Revelations, but not in the Old Testament. Pliny (*l.c.* xxxvii. 41 *et seq.*) names Ethiopia as the source of its supply. In rabbinical literature it is frequently named (Gen. R. lxxix; Yalḳ. to Deut. 854; Yalḳ. to Gen. 134; Maḥzor Vitry, pp. 312, 336; comp. "R. E. J." xxix. 84). This stone was engraved with Levi's name.

Rock-Crystal.

(4) נפך: A. V. and R. V. "emerald"; R V., margin, "carbuncle"; Septuagint and Josephus, *ἄνθραξ*; Targ. Onḳ. אוכמרודין; Yer. i. איזמורד; Yer. ii. כרכרנא; Ex. R. ברדינין (*ῥόδινος* = "ruby," "rose-stone"). The Hebrew name has the appearance of being a loan-word. W. M. Müller ("Orient. Lit." ii. 39) identifies it with Egyptian "M-f-k-t," and thus in turn with the "lupaaku" stone of the El-Amarna tablets (see Muss-Arnolt, "Concise Dict." p. 801b). This, however, is doubted by Knudson ("Assyr. Beiträge," iv. 324). It must have belonged to the green stones, and the Sinaitic peninsula and Philistia have furnished it in quantities. Fifty of these stones were part of the tribute sent from Ashkalon, just as the "nofek" was among the goods sent from Syria (Masoretic text ארם; or, if reading is אדם, from Edom) enumerated in Ezek. xxvii. 16. Onḳelos and Targ. Yer. i. support this value of nofek as a green stone (emerald) often mentioned in Jewish writings (Lev. R. ii. 5; Pesiḳ. R. x. [p. 39b] as quoted in the 'Aruk, which connects the later name איזמורד with the Arabic "zumurrud"). The modern identification of the nofek with the red garnet, or that by the Septuagint with the carbuncle and ruby, has the support of Targ. Yer. ii. and of Exodus Rabbah. It was assigned to Judah.

Emerald or Garnet.

(5) ספיר: A. V. and R. V. "sapphire" (Ex. xxiv. 10, xxviii. 18, xxxix. 11; Isa. liv. 11; Lam. iv. 7; Cant. v. 14; Job xxviii. 6, 16; Ecclus. [Sirach] xliii. 19; Ezek. i. 26). The same word is employed in the Septuagint, in the Vulgate, and by Josephus (comp. Lewy, *l.c.* p. 56); Targ. Onḳ. ישבזין, Yer. i. ספירינון, Yer. ii. סמפיליגא, Exodus Rabbah סמפרינון ("sapphire"). This stone probably represented in Biblical usage the opaque blue lapis lazuli, according to W. M. Müller the "uḳnu" of the El-Amarna tablets (see Rev. xxi. 19, R. V., margin). It has the appearance of being sprinkled with gold-dust (Theophrastus, *l.c.* p. 692). This is due to the presence of iron pyrites, and harmonizes with both Ex. xxiv. 10 and Ezek. i. 26 (comp. Toy, "Ezekiel," in "S. B. O. T."). Others, however, have contended that the Biblical sapphire is identical with the modern sapphire, the blue corundum (hence Onḳelos, "shabziz"), though this was almost unknown before the Roman empire, and was regarded by the classical mineralogists as a jacinth or hyacinth. The sapphire (probably the true one) occurs in rabbinical books (Tan., Ki Tissa, 29; Eccl. R. x. 20; Yelamdenu to Ex. xxxiii. 1 [quoted in the 'Aruk]; Ex. R. viii. 3; Cant. R. v. 14; and frequently; see Krauss, "Lehnwörter," pp. 398–399). On this stone was engraved "Issachar."

Lapis Lazuli or Sapphire.

(6) יהלם: A. V. "diamond"; R. V. "diamond" or "sardonyx" (see No. 12). The rendering of the old versions is in doubt, as, owing to transpositions, the Septuagint *ἴασπις* and Latin "iaspis" (Ex. xxviii. 18, xxxix. 11) may correspond to another Hebrew term ("yashefeh" according to Petrie and Myres). The readings in Targum, סבהלום, Yer. i. כדכודי, Yer. ii. עין עיגלא, Ex. R. "smaragd" (emerald), אסמרגדון, confirm the suspicion of a confusion. סבהלום in Onḳelos might suggest "yahalom," but see under No. 9; "kadkodi" is the ruby; and "'en 'egla," elsewhere the rendering for אהלמה, is the hyacinth ("vaccinium"). Moreover, the Greek *ἴασπις* is linguistically the equivalent of the Hebrew "yashefeh," which, according to Benfey, is of Egyptian origin (Lewy, *l.c.* p. 56). As Josephus also mentions the jasper, though as the second, not as the third stone of the second row, it is advised to put "yashefeh" in place of the "yahalom" here. This stone was known to the Assyrians ("yashpu"), and was used for the royal seal. The Greek *ἴασπις* was a dull, opaque stone, generally green, but occurred also in red and opalescent varieties. The modern jasper is an impure variety of silica, opaque, and of many colors and shades. Pliny (*l.c.* xxxvii. 9) reports that in the East the variety of jasper which resembled the emerald was especially affected (hence Ex. R. has "emerald"). In the Greek of Isa. liv. 12 *ἴασπις* corresponds to the Hebrew "kadkod," which identification underlies the rendering of Targ. Yer. i. Symmachus, "charchedonion" is another rendering agreeing with the Targum (see Krauss, "Lehnwörter," p. 299). Fraas contends that the jasper of the Bible was the opal found often in Egyptian tombs, and which even furnished the material for a delicately chiseled statuette of Isis (Riehm, "Handwörterb." 2d ed., p. 335, note). All things point to the conclusion that in the breastplate the last place in the second row was occupied by an opaque stone of rich green color. On it was engraved the name "Zebulun."

Diamond.

(7) לשם: Septuagint, *λιγύριον* (so also Josephus) = "ligurius"; A. V. "ligure"; R. V. "jacinth," margin "amber"; Targ. Onḳ. קנכרי; Yer. i. קנכירינין; Yer. ii. זוזין; Ex. R. כהלין. As these various renderings show, tradition emphasizes the ignorance concerning the true value of the Hebrew word. The only fact made prominent is that the stone was brilliant and of an intense luster. Hence the Midrash makes it of the white tin-like color of antimony; Yer. ii. merely calls it "shiny." Onḳelos and Yer. i. name it by the Greek *κέγχριvον* ("with little grains"), which also is the Syriac equivalent. Based on Pliny's

Amber or Jacinth.

description of the ligure (*l.c.* viii. 57, xxxvii. 11-13), it has been identified with the amber, while the fact that in the apocalyptic enumeration (Rev. xxi.) the hyacinth appears in its stead has suggested the rendering "jacinth." The only conclusion warranted is that the "leshem" was a lustrous gold-colored stone. It is the stone of Dan (comp. Hommel, "Altisraelitische Ueberlieferung," p. 283).

Agate.

(8) שבו: Septuagint and Josephus, ἀχάτης; Targ. Onḳ. טרקיא; Yer. i. ערזין; Yer. ii. בירזלין; Ex. R. אבאטים; A. V. and R. V. "agate." Tradition confirms the modern identification with the agate, one of the cryptocrystalline varieties of quartz, according to Dana of one class, therefore, with chalcedony, carnelian, onyx, and jasper. It is found in many varieties, some banded, or in clouds, others with hues due to impurities. Its use is well attested for Egypt and Assyria, the Hebrew name even appearing to be borrowed from the latter, if it is not a place-name (Ψεφω). Exodus Rabbah's reading is either a corruption or a variant of אבאטים ("R. E. J." xxix. 87); the peculiar בירזלין of Yer. ii. consists of a series of successive corruptions of בירדלין = ברדנין = כדכדון, which is טרכזון; and thus Yer. ii. agrees with the Peshiṭta of Ex. xxviii. 19, xxxix. 12, meaning under this name a variety of the agate. The ערקין of Yer. i. must be corrected into טרקין = טרקיא of Onḳelos. This is the Thracian stone, the "turkis" or turquoise (Gen. R. xii. 13; Maḥzor Vitry, "turḳiza" [p. 163]; Yer. Ber. 2c. [according to Serillo]; not as Bacher [in "R. E. J." xxix. 87] has it, the "anthrakion" = "carbuncle"; see Krauss, "Lehnwörter," pp. 278 *et seq.*). According to this rendering a sky-blue stone would be meant. The agate—Naphtali's stone—was regarded as potent in procuring divine aid (Schwab, "Vocabulaire de l'Angélologie," p. 53).

Amethyst.

(9) אחלמה: R. V. and A. V. "amethyst"; Septuagint and Josephus, ἀμέθυστος; Targ. Onḳ., Yer. i., and Yer. ii. עין ענגלא; Ex. R. הימוסיון, which is a misreading for "amethyst," and not "the bloodstone" (see "Monatsschrift," 1882, p. 335; "R. E. J." xxix. 87). For the meaning of the "calf's eye" of the Targumim see above. The amethyst, which name is connected with the stone's supposed power to quench inordinate thirst for strong drink, is a variety of quartz, of a clear purple or bluish-violet color, and was extensively known and used by the Egyptians; many specimens with engravings are among the finds from the coast of Syria. It has been suggested that the Hebrew name points to some folk-lore connection between the "aḥlamah" and dreams ("ḥalom"). The etymology seems to imply the idea of being strong (Halévy, in "Journal Asiatique," 7th series, x. 426), or it may beindicative of the place (Aḥlamu) where the stone was found (see Gesenius, "Thesaurus," *s.v.*). Targum Yer. ii. gives to "yahalom" (No. 6) the same rendering as it, together with the two other Aramaic paraphrases, gives to "aḥlamah," *i.e.*, "the calf's eye," that is, "vaccinium" or hyacinth. But Onḳelos' translation for the sixth stone (סבהלום) must be "amethyst." Its first syllable certainly refers to "strong drinking" (from סבא, "to drink to excess," whatever the second be—perhaps חלום = חלם = "strong"), recalling thus the superstition implied also in the Greek term. This was Gad's stone.

Beryl.

(10) תרשיש: A. V. "beryl"; R. V. "beryl" or "chalcedony"; χρυσόλιθος (also Josephus), "chrysolithus" (Ezek. x. 9; Septuagint has ἄνθραξ = "carbuncle," but Vulgate "chrysolithus"); Targ. Onḳ. and Yer. ii. יכרום יבא; Yer. i. the same with the addition of רבא; Ex. R. קרומטיסין. This must have been a stone believed to be imported from Tarshish. It has been variously identified with the beryl (R. V.), with amber, with the modern pale-green topaz (see No. 2). To a green stone, not to amber, the rendering of the Targumim "of the color of the sea" refers (Krauss, "Lehnwörter," p. 297; comp. Ber. 6b; Cant. R. i. 14; Targ. to Esth. viii. 15; Sachs, "Beiträge," ii. 41). The word of Exodus Rabbah is a corruption of the Greek χρυσόλιθος. What may be meant by the Greek term is very doubtful, and the best rendering is that of the Septuagint (to Ezek. i. 6; Cant. v. 14): "Tarshish" stone, without attempt at greater definiteness. This stone was reserved for Asher's name.

Malachite.

(11) שהם: A. V. "onyx"; R. V. "onyx" or "beryl"; βηρύλλιον (Josephus gives "beryl" for No. 12), "onychinus"; Targ. Onḳ. בורלא; Yer. i. בירלות הלא; Yer. ii. ברולחא; Ex. R. פראלוקין. The Jewish tradition identifies this stone with the beryl, Yer. ii. being the exception, naming the "bedolaḥ" (Gen. ii. 12), usually an aromatic plant, but here and in Syriac an Indian crystal (Lagarde, "Gesammelte Abhandlungen," xx. 39; "Orientalia," ii. 44; Gen. R. xvi.). The beryl, of which the readings in Yer. i. and Exodus Rabbah give the name in corrupt form, is also by later Jewish commentators said to be the Biblical "shoham" (see Ḳimḥi, *s.v.* יהם). The Septuagint translates the word in other passages by "onyx" (see Josephus, "B. J." v. 5, § 7), by "emerald" (Ex. xxviii. 9, xxxv. 27, xxxix. 6), in Gen. ii. 12 by "the leek-green stone," by "sard" (Ex. xxxix. 9), while in Chron. v. 1 the Hebrew is simply transliterated. This shoham-stone is frequently mentioned in Biblical writings. Havilah is its home (Gen. ii. 11). Two such stones with six tribal names engraved on each were fastened to the ephod (Ex. xxviii. 9). This stone is described in Job xxviii. 16 as very precious. If it was the beryl, it must have been that variety distinguished by the modern mineralogists from the beryl proper (which is of a bright emerald-green), namely, the chrysophras (leek-green golden). It is very likely that the word "shoham" was a generic term covering a large number of varieties of different colors, which fact may account for the wide range in the Greek equivalents for it. Myres' identification of it with the malachite seems to meet every implication of the various traditional equivalents ("green emerald," "cloudy beryl," and "opaque" and "striped" enough to be described as an onyx). This was Joseph's stone.

Ring-Stone.

(12) ישפה (but see No. 6; "yahalom" should replace "yashefeh"): in Septuagint "beryl," but more frequently "onyx"; Vulgate "beryl," probably, as in Josephus, due to a transposition of 11 and 12; Targ. Onḳ. פנרי; Yer. i. the same, preceded by מרגניות; just as in Yer. ii.; Ex. R. מרגילטום; Onḳelos' "panther-stone," a "yellow, light-flecked stone," may render the "yashefeh" (ἴασπις, jasper), but the other Targumim use the word which frequently denotes pearls and precious stones in general. "Yahalom" might very properly be translated by a general term, as its identification was involved in doubt. The diamond, because "the hard stone" (yahalom, from חלם, "to be hard," "to hammer"), has been suggested, but the art of cutting diamonds is of a much later date, and the list of stones in use among the ancients fails to name it. Nor does onyx occur early enough to look for its being known among the Hebrews of Ex. xxviii. All that may be safely said is that this was a hard stone, probably used in the making of whole rings ("onyx" = Assyrian "unḳu" = "ring"), according to Myres; therefore the Assyrian "elmeshu," the "ring-stone." This is Benjamin's stone.

Of other stones mentioned the "kadkod" (A. V. "agate," R. V. "ruby," in Isa. liv. 12 and Ezek. xxvii. 16; the Septuagint gives ἴασπις in Isa. liv. 12) undoubtedly was the "karkedon" stone quoted by the Rabbis (Pesiḳ. 136a; Yalḳ. Shimeoni to Isa. § 339 *et passim*), the (Carthaginian) carbuncle. The "shamir" in Ezek. iii. 9, said to be "harder than flint" (R. V. and A. V. "adamant"), was not a precious stone, and the traditional identification, "diamond," should be abandoned (Loew, "Graph. Requisiten," i. 181). The legendary character given the shamir by the Rabbis (Soṭah ix. 10, 48b; Yer. Soṭah ix. 24b; Giṭ. 68a) indicates that the exact determination of its value had been lost. Etymologically it is related to the Egyptian "asmer," which passed, probably through Semitic channels, into the Greek σμίρις (Lewy, "Fremdwörter," p. 59), and signifies "emery" or "corundum"; possibly "diamond-dust." It is the Targumic שבזין, identified (see above) with the ספיר in Onḳ. to Ex. xxviii. 18, xxxix. 11 (Targ. Yer. to Num. ii. 10, Ezek. xxviii. 13, Job xxviii. 6, 16, Lam. iv. 7, and Cant. v. 14); the Arabic "sunbadaj" = "emery" (Krauss, *l.c.* p. 579). It has been noticed that of all the stones used for engraving among the ancients, the turquoise alone is not mentioned in the Biblical enumerations. As shown above, Targ. Onḳ. to Ex. xxviii. 19 (comp. Targ. Yer. to Num. ii. 18) evidences that in post-Biblical times this stone was known to the Jews.

To recapitulate, according to the above the following were the order and character of the stones on the high priest's breastplate:

I. Sardonyx or sard, red.
Topaz, pale-yellowish green.
Rock-crystal, brilliant white (colorless).

II. Emerald, green.
Lapis lazuli, blue with gold (yellow-reddish) dots.
Yashefeh, rich green.
III. Leshem, lustrous gold.
Agate, sky-blue.
Amethyst, bluish violet.
IV. Tarshish stone.
Malachite, bright green.
Yahalom, yellowish to dark blue.

This seems, on the whole, to correspond to the color scheme of the Egyptian reports (see Müller, in "Orient, Lit." ii. 39). In post-Biblical writings the following gems appear: amethyst; amiantus (a green stone, a fibrous kind of chrysolite); ruby; agate; beryl; chalcedony; sapphire; sardonyx; emerald; topaz; jacinth; chrysolite; turquoise; "panther-stone" (for "yashefeh" in Targ. Ezek. xxviii. 13); diamond, probably designated by מרגלא and מרגליטים; crystal, קרוסטלינין (Abba Gorion i. 1; see also Perles, "Thron und Circus," p. 13; comp. Acts iv. 6, xx. 1). The קרח (Ezek. i. 22) may possibly denote a crystal; גביש (Job xxviii. 18) certainly does (Lagarde, "Reliquiæ Juris Ecclesiastici Syriaci," xxii., Leipsic, 1856). The art of fabricating false gems seems to have been known (Tan., Bemidbar, 23; Num. R. iv. 2; see Krauss, "Lehnwörter," p. 132).

GENAPPE. See Holland.

GENAZZANO, ELIJAH ḤAYYIM BEN BENJAMIN OF: Italian physician, theologian, and cabalist; flourished in the first half of the sixteenth century. He had a religious controversy with Fra Francisco da Acquapendente, in which he bitterly attacked Christianity for its dogma of original sin, for its claim of salvation exclusively for its own adherents, and for its hatred of Judaism, the religion which furnished it with the kernel of its teaching, and which, in contrast with the Church, attributes a share in the future world to the righteous of all nations. This disputation he described in a Hebrew pamphlet entitled "Wikkuaḥ," existing in manuscript (Cod. Munich, No. 312, and Cod. Vienna, No. 16). He wrote also under the title "Iggeret Ḥamudot" (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1927; Cod. Munich, No. 112; *et al.*) a strong apology of cabalistic doctrines, which, although not printed, became well known in the sixteenth century. In this pamphlet he attacked the religious philosophers in an undignified and offensive manner, especially Isaac Abravanel, the author of "'Aṭeret Zeḳenim"; and he was one of the first to spread the fable that Maimonides had retracted his anti-Talmudic and anti-cabalistic sentences (Leon de Modena, "Ari Nohem," pp. 4, 33, 35, 70; Ibn Yaḥya, "Shalshelet ha-Ḳabbalah," p. 60). The name of Elijah Ḥayyim of Genazzano often occurs as "Elijah Magistratus," or as "Markianz," etc. (Steinschneider). There exists in manuscript a poem by "Elia Genazzano" (published by Neubauer in "Letterbode," x. 104) which contains an attack on woman, and in which Biblical personages are treated in a very irreverent manner. It is perhaps a work of this author.

GENEALOGY.—Biblical Data: A list, in the order of succession, of ancestors and their descendants. The Pentateuchal equivalent for "genealogies" is "toledot" (generations), the verb being ילד in the "ḳal" and "hif'il" forms. The later form is יחש (Neh. vii. 5), and the verb "hityaḥes" (to enroll oneself or be enrolled by genealogy). In later Hebrew, as in Aramaic, the term יחס and its derivatives "yiḥus" and "yuḥasin" recur with the implication of legitimacy or nobility of birth.

The following genealogical lists are given as far as possible in the order in which they occur in the Hebrew canon:

1. Adamites (with historical glosses): Adam; Cain; Enoch; Irad; Mehujael; Methusael; Lamech—seven generations, becoming, with the eighth, two parallel streams, (1) Jabal and his brother Jubal, (2) their half-brother Tubal-cain and his sister Naamah (Gen. iv. 1-24: Cainites).

2. Adamites (with chronological details): Adam; Seth; Enos; Cainan; Mahalaleel; Jared; Enoch; Methuselah; Lamech; Noah—ten generations, the eleventh comprising (1) Shem, (2) Ham, (3) Japheth (Sethites).

3. The Noahites, divided into (1) Shemites, (2) Hamites, (3) Japhethites—the "ethnic table," or "list of nations" (Gen. x. 1-31).

4. Abraham's pedigree, from Shem downward, enumerating ten generations (Gen. xi. 10-26).

5. Rebekah's pedigree, from Nahor through Milcah, with mention of collateral line through his father's concubine Reumah (Gen. xxii. 20-24).

6. Abrahamites through Keturah (Gen. xxv. 1-4).

7. Abrahamites through the line of Ishmael (Gen. xxv. 12-18: Ishmaelites).

8. Abrahamites through Isaac and Esau = Edom (Gen. xxxvi. 1-43).

9. Jacob's (= Israel's) descendants (Gen. xxxv. 23-27, xlvi. 8-28; seventy souls).

10. The pedigree of Moses, enumerating the "heads of their fathers' houses" of the sons of Reuben, the sons of Simeon, the sons of Levi: (1) Gershon, (2) Kohath, (3) Merari. Out of Kohath came Amram, from whom came (a) Moses and (b) Aaron; the pedigree continues the chain of descent, after mentioning side lines, through Aaron's son Eleazar to Phinehas (Ex. vi. 14-25).

11. A register of the Israelites as a nation—in which Levi, however, is omitted—grouped under the heads: "generations" (תולדות), "family" or "clan" (משפחה), and "fathers' house" (בית אבות: Num. i. 1-47). This is, strictly speaking, a census-roll.

12. The tribal list (Num. ii. 1-33), also a census-roll.

13. The genealogy of the Aaronites (Num. iii. 1-5).

14. The genealogy of the Levites (Num. iii. 17-39), with data concerning their respective assignments to service in the sanctuary.

15. A list of the Israelites, with reference to division and occupation of territory (Num. xxvi. 1-51).

16. The families of the Levites (Num. xxvi. 57-61), with details concerning the births of Aaron, Moses, and Miriam, and the names and fate of Aaron's sons.

17. The "genealogy of those that went up with me [Ezra] from Babylon" (Ezra viii. 1-14; the list of "the children of the province that went up out of the Captivity" [Ezra ii. 1 *et seq.*] is in reality not a genealogy, but is of importance as bearing upon the standing of their descendants in the congregation of Israel.)

18. Ezra's own pedigree (Ezra vii. 1-6).

19. A list with genealogical notes concerning priests that had taken strange wives, and of Levites, and, moreover, of Israelites (Ezra x. 18 *et seq.*).

20. Genealogies of certain of the descendants of Judah and Benjamin (Neh. xi. 4 *et seq.*).

21. List of priests and Levites (Neh. xii. 1-26).
22. The pedigree of Adamites from Adam to Noah (I Chron. i. 1-3), continued through the Noahites, with details of the genealogical descent of the Hamites and Japhethites (2-23), and non-Israelitish Shemites down to the kings of Edom (23-54).
23. Genealogy of the sons of Israel (I Chron. ii. 1-33) down to Jerahmeel, continued (1) in the part Egyptian line of Sheshan through his daughter's marriage to Jarha the Egyptian (34-41); and (2) in the family of Caleb (42-55), coming down to David.
24. David's pedigree (Ruth iv. 18-22).
25. The descendants of David (II Sam. iii. 3-5, v. 14-16; I Chron. iii. 1-9; compare xiv. 4-7), of Solomon, of Jehoiakim (verse 16), of the sons of Jeconiah, of Pedaiah, of Zerubbabel, and of Hananiah (I Chron. iii. 10-21).
26. Genealogy of Judah and Simeon (I Chron. iv.).
27. Genealogy of Reuben, Gad, and the half-tribe Manasseh (I Chron. v.).
28. The genealogy of the Levites, according to families (I Chron. vi.), of Issachar, Benjamin, Naphtali, Manasseh, Ephraim, Asher (vii.), and of the Benjamites (viii.) and the inhabitants of Jerusalem (ix.).

E. G. H.

——**In Rabbinical Literature:** Rabbinical sources show that with the dominance of Ezra's influence and ideas importance came to be attached to genealogies. Ezra would not leave Babylon until he had succeeded in establishing the genealogical relations of the new Israel to a degree of fineness resembling that of the finest flower (Ḳid. 69b). His own pedigree, too, he had been careful to verify (B. B. 15a). Chronicles and Ezra-Nehemiah were in fact regarded as ספר היוחסים ("scrolls of genealogies"), as מגילות כתבי היחס (B. B. 15a; Pes. 62). That the Exile and the subsequent vicissitudes had heavily impaired tribal and racial purity was nevertheless recognized (see the discussion between R. Joshua and R. Gamaliel: Yer. Ḳid. iv. 1). But for the priests purity of descent was indispensable. Hence their genealogies were scrupulously kept and, when necessary, minutely investigated. A special officer seems to have been entrusted with these records, and a court of inquiry is mentioned as having been instituted in Jerusalem (Ḳid. 76b). The testimony of Josephus corroborates the fact that a record of the pedigrees of the priests was kept (Josephus, "Contra Ap." i., § 7; "Vita," § 1). A priest was bound to demonstrate the purity of the pedigree of the priestly maiden he desired to wed, even as far back as her great-great-grandfather and great-great-grandmother. In the case of marriage with a daughter of Levi or of Israel his scrutiny had to extend a degree further (Ḳid. iv. 4). Exemptions depending upon the presumption created in favor of credibility and honorableness by general reputation or public service, were admitted (Ḳid. iv. 5). The very division of Israel into "houses" presupposes among them the existence of well-authenticated genealogies. Such divisions are mentioned in connection with the furnishing of wood (Ta'an. iv. 5: "house of Arak, tribe of Judah"; comp. Ezra ii. 5; Neh. vii. 10; "house of David, tribe of Judah"; comp. Ezra viii. 2; "men of unknown pedigree" are also named). Hillel's pedigree is quoted (Yer. Ta'an. iv. 68a, bottom). Ben 'Azzai also speaks of a מגלת יוחסין ("genealogical record"; Yeb. 49b).

Genealogies of Priests.

It is assumed that under Herod I. all genealogical rolls kept in the Temple were destroyed (Sachs, "Beiträge," ii. 157). The loss of official genealogies was deeply deplored as a calamity, more especially because of their importance for the understanding of the books of Chronicles (Pes. 62b; B. B. 109). How prolific these Biblical books were in provoking genealogical conceits is shown by the statement that 900 camel-loads of commentary existed on I Chron. viii. 37 to ix. 44 (Pes. 62b). Much mischief must have been done by this speculation on family origins and pedigrees; at least the provision requiring caution in instruction in genealogy and limiting the hours for it (Pes. 76) would seem to indicate as much. Family pride is rebuked also in the familiar saying that a "mamzer" (bastard), if learned in the Law, outranked an ignorant high priest (Hor. 11); in fact, the priestly insistence upon purity of pedigree was fully counterbalanced by the demand for knowledge, which, through Phariseeism (nobility of learning) as opposed to Sadduceeism (priestly nobility), gradually succeeded in developing a new aristocracy, that of the mind, in the place of the old one (Ẓadoḳite) of blood. Many stories preserve the memory of the struggle for recognition of the one or the other claim to distinction which agitated learned and unlearned Israel in the early Christian centuries (Ḳid. 70a, 71a, b).

Loss of Genealogies.

Of spurious genealogies, specimens of which Sprenger ("Das Leben und die Lehre Mohammad") adduces, Jewish literature has a goodly number to show (Seder 'Olam Zuṭa; Zunz, "G. V." 2d ed., 1892, pp. 142 *et seq.*; Itinerary of Benjamin of Tudela, Asher's ed., ii. 6 *et seq.*). Yet this is not proof that all the pedigrees current among Jews were of this class (Zunz, "Analekten," No. 15, p. 46). The tribes of Reuben, Simeon, and Levi, according to Midr. R. to Num. xiii., preserved while in Egypt their "yiḥus" (genealogy) to prove the purity and legitimacy of their descent. Upon this yiḥus the Jews have always laid great stress, as have also the Gentiles (Yeb. 62a; Yer. Yeb. ii. 4a). Marriage was invalidated if any deception regarding one's yiḥus was discovered, even if the actual rank was higher than the assumed (Yer. Ḳid. ii. 62c). Silence when taunted with low origin creates the presumption that the person taunted is of high stock (Ḳid. 71b). שלשלת יוחסין, the "chain of genealogies," is spoken of (Gen. R. lxxxii.), and the word יוחסין has passed into literature to designate historical annals.

——**Critical View:** The genealogical lists of Genesis, as well as those that are meant to account for the origin and subdivisions of the Israelitish tribes, are similar to the tables which were current, first orally and then in written form, among the Arabs. These lists illustrate the theory obtaining in early Semitic civilization, according to which the tribe—the central unit of every institution—was looked upon as the progeny of one common ancestor, assumed, in many cases, as the eponym. Historical, geographical, and ethnological data and reminiscences are spontaneously (not artificially or intentionally) expressed in the terms of this theory. Geographical or racial propinquity is indicated by the degree of relationship ascribed to the component elements. Political supremacy and dependence are reflected in the assumption of

descent on the one hand in direct line from the first-born, on the other in a collateral line, sometimes traced through a concubine or a second wife, perhaps the bondmaid of the ancestor's legitimate spouse.

Septs and subdivisions are ranked in the tribal tree according to their numbers or importance, either as branches or as continuing the main trunk.

Tribal Relations Indicated.

Conversely, the descendants of groups originally not connected with the tribe, but in course of time incorporated into it, are characterized as offshoots, the issue of illegitimate conjugal unions (comp. W. R. Smith, "Marriage and Kinship in Early Arabia," *passim*; Wellhausen, "Die Ehe bei den Arabern"; see also GOVERNMENT). Concrete illustrations of the foregoing view may be seen in the genealogies of the Hebrew tribes and clans *e.g.*, BENJAMIN, DAN, and ESAU.

The many discrepancies among the various genealogies are not due exclusively to imperfections of memory and the vicissitudes to which tradition is always exposed. Changes in geographical and political relations, as well as in religious views, are often reflected in these variations, the subject of the genealogy or a component part of it appearing at one time as the son or descendant of one person, while at another he is named as a member of some other family. It must be remembered that these genealogies are not all of one age. The institution of the blood covenant, by which are established relationships as close as natural ones (see BROTHER), may also underlie these variants and discrepancies.

In some of the genealogies of Genesis, however, intentional readjustments of the traditional material come clearly to the surface, as in the twofold genealogy of Noah. He is a Cainite in one; a Sethite in the other. To the Cainites later historiography and theology ascribe the corruption of the pre-Noachian race (see ENOCH; FALL OF ANGELS; FLOOD, IN RABBINICAL LITERATURE). This midrashic and pseudepigraphic view represents an ancient popular tradition probably antedating by centuries the written form in the Apocrypha or the Haggadah. To the desire to disconnect Noah from Cain's seed, the second genealogy with its but thinly disguised duplications of the first owes its origin. The so-called "List of Nations" (Gen. x.), while showing in what degree the peoples of which the ancient Hebrews had knowledge were regarded as related to the Israelites, reflects geographical and not ethnological data, the nations being ranged in the main under three great geographical zones. As now preserved, the chapter is not free from indications of being a composite of several ethnic-geographic lists.

Genealogies in Genesis.

That place-names and districts figure in many of the genealogies as individuals is beyond dispute; even arts and musical accomplishments come near being represented as "sons" (Gen. iv. 21). The necessity for keeping accurate genealogical lists in pre-exilic Israel is not apparent. Neither for the regulation of the royal succession nor for the division of inherited property was proof of legitimate descent imperatively needed. By far the greatest number of genealogies of individuals occur in the post-exilic books; elsewhere individual genealogies rarely go back further than one or two generations. No mention is made of any officer appointed to keep the records. Nor was pre-exilic Israel jealous of racial purity (comp. Gen. xxxviii.); sacerdotal preoccupation in this regard is post-exilic (Ezraic). The genealogies of Genesis exhibit a strong realization of the unity of the human race, while framed to assign to Israel a distinct place in the economy of the human family. From Adam, Noah, Abraham, and Jacob a continuous process of selection is posited in the scheme. This is the ethical aspect and value of these genealogies.

The Exile stimulated genealogical zeal (Ezek. xiii. 9). The old tribal organization had passed away. A spiritual factor took its place as the uniting and differentiating energy, the congregation gradually but steadily adjusting itself to the tripartite scheme: priest (Zadokite), Levite, and Israel, with Israel as a "holy seed." To this new attitude must be ascribed in the exilic and early post-exilic congregation the rise of many Levitical and other genealogies, constructed on data such as memory could supply and skill could marshal to good effect, some of which are undoubtedly at the basis of the genealogical lists in Ezra-Nehemiah and Chronicles. These first attempts were not very complex in plan (see, for instance, Ezra ii. 40, iii. 9; Neh. ix. 4; Num. xxvi. 58; see also LEVI). But as the Ezraic construction of Israel's past and part came to triumph, the "Levitizing" purpose asserted itself in ever greater measure; and the lists of Chronicles and Ezra-Nehemiah display the overruling passion. That of the high priests (I Chron. vi. 3–15, v. 29–41) is altogether typical of the sacerdotal view-point, in which the Zadokites are exalted. Moreover, it is virtually a duplicate of Ezra's genealogy (Ezra vii. 1; comp. I Esd. viii. 2 and II Esd. i. 7).

The Influence of the Exile.

E. G. H.

GENERATION: This many-sided word, like its equivalents in the modern versions of the Bible, is used to translate the Hebrew "dor" and "toledah" (the latter found only in the plural). The primary meaning of "dor" is "period"; the secondary, the period bounded by the life of a man or of a single family. Thus "dor" signifies generations, or ages, of men in the past or future; it also designates the men who live in any special period or age (see especially Ps. cxlv. 4; Eccl. i. 4). From this idea of men regarded as a group bound together by relationship a transition is made to men of any particular time taken as a class connected only by contemporaneousness. Thus in "a generation that curseth its father" (Prov. xxx. 11) the class character is so strong that the persons described are spoken of throughout as a single unit.

In "toledot," on the other hand, the idea of descent by birth and family relationship gives its special force to the translating term. Thus "generations" in Gen. x. 32 means a genealogical succession of families; in Num. i. 20, genealogical divisions by parentage. A secondary and very important usage may be seen where "generations" means the history in the form of a genealogical account of any set of people along with their descendants (Gen. v. 1). All early history began with genealogical lists, and even the process of creation of heaven and earth is viewed in Gen. ii. 4 as a genealogical history. The word "toledot" is found mostly in the Hexateuch, and there only in the Priestly Code.

E. G. H. J. F. McC.

GENERATION, LENGTH OF: The number of years that elapse before the children of one set of human beings arrive at a marriageable age. This number has been defined to be equal to the average male age at marriage, plus one year before childbearing begins, plus half the average number of years during which fecundity lasts. As a rule, Jews marry much earlier than the rest of the male population among which they dwell, probably owing to the rabbinic requirement that a man should marry before attaining the age of twenty (Kid. 29b). On the other hand, their fecundity is greater; therefore the time of fertility of the female is longer; but exact figures concerning this detail are not available. From such data as are obtainable it appears that Jews marry at the age of twenty-two, as compared with twenty-nine for the rest of the population (Mayo-Smith, "Science of Statistics," i. 103); while fertility lasts, on an average, for fourteen years after marriage, as compared with twelve among non-Jews (*ib.* 113). This would give the length of a generation among Jews as thirty years, as compared with thirty-six in the remaining population. The difference does not appear to be large, but its effect on the increase of population is cumulative and increases in geometrical progression, the modulus being 1.2, causing the Jewish population in four generations to become double that of the unit rate. Another consequence of the less length of generations among Jews is the proportionately larger number living simultaneously, and, as a result, the greater opportunity for, and superior strength of, tradition among them.

E. C. J.

GENESIS, THE BOOK OF.—Biblical Data: § 1. The first book of the Torah, and therefore of the whole Bible, is called by the Jews "Bereshit," after the initial word; by the Septuagint and by Philo it is called Γένεσις (κόσμου) = "origin" (of the world), after the contents, and hence "Genesis" has become the usual non-Hebrew designation for it. According to the Masorah, it is divided into ninety-one sections ("parashiyyot"), forty-three of which have open or broken lines ("petuḥot"), and forty-eight closed lines ("setumot"); or into forty-three chapters ("sedarim") and twenty-nine sections ("piskot"); for reading on the Sabbath, into twelve lessons; according to the division adopted from the Vulgate, into fifty chapters with 1,543 verses.

§ 2. Genesis is a historical work. Beginning with the creation of the world, it recounts the primal history of humanity and the early history of the people of Israel as exemplified in the lives of its patriarchs, Abraham, Isaac, and Jacob, and their families. It contains the historical presupposition and basis of the national religious ideas and institutions of Israel, and serves as an introduction to its history and legislation. It is a well-planned and well-executed composition of a single writer, who has recounted the traditions of his people with masterly skill, combining them into a uniform work, without contradictions or useless repetitions, but preserving the textual and formal peculiarities incident to their difference in origin and mode of transmission.

Nature and Plan.

§ 3. The author has treated the story as a series of ten "generations" ("toledot"); namely, (1) of heaven and earth, ch. ii. 4–iv.; (2) of Adam, v.–vi. 8; (3) of Noah, vi. 9–ix.; (4) of Noah's sons, x.–xi. 9; (5) of Shem, xi. 10–26; (6) of Terah, xi. 27–xxv. 11; (7) of Ishmael, xxv. 12–18; (8) of Isaac, xxv. 19–xxxv.; (9) of Esau, xxxvi.; (10) of Jacob, xxxvii.–l.

Contents.

§ 4. In the beginning God created heaven and earth (i. 1), and set them in order in six days. He spoke, and on the first day there appeared the light; on the second, the firmament of heaven; on the third, the separation between water and land, with vegetation upon the latter; on the fourth, sun, moon, and stars; on the fifth, the marine animals and birds; on the sixth, the land animals; and, finally, God created man in His image, man and woman together, blessing them and giving them dominion over all beings. On the seventh day God rested, and blessed and sanctified the day (i. 2–ii. 3). As regards the creation and subsequent story of man (Adam), God forms him out of earth ("adama"), and breathes into him the breath of life. Then He sets him in a pleasure-garden (Eden), to cultivate and watch over it. Adam is allowed to eat of all the fruit therein except that of the "tree of the knowledge of good and evil." God then brings all the animals to Adam, to serve as company for and to receive names from him. When Adam can find no being like himself among all these creatures, God puts him into a deep sleep, takes a rib from his side, and forms a woman (called later "Eve"), to be a companion to him. The woman is seduced by the artful serpent to eat of the forbidden fruit, and the man also partakes of the same. As punishment they are driven out of Eden (ii. 4–iii.). Adam and Eve have two sons, Cain and Abel. Cain grows envious of the favor found by his brother before God, and slays him; he then wanders over the earth as a fugitive, and finally settles in the land of Nod. Enoch, one of his sons, builds the first city, and Lamech takes two wives, whose sons are the first dwellers in tents and owners of herds and the earliest inventors of musical instruments and workers in brass and iron. Cain's descendants know nothing about God (iv.). Another son, Seth, has in the meantime been born to Adam and Eve in place of the slain Abel. Seth's descendants never lose thought of God. The tenth in regular descent is the pious Noah (v.).

§ 5. As mankind has become wicked, indulging in cruelties and excesses, God determines to destroy it entirely. Noah only, on account of his piety, will escape the general ruin; and God commands him to build a large ark, since the work of destruction is to be accomplished by means of a great flood. Noah obeys the command, entering the ark together with his wife, his three sons, Shem, Ham, and Japheth, their wives, and, by God's instructions, with one couple of each kind of animal on the earth. Then the flood comes, destroying all living beings save those in the ark. When it has subsided, the latter leave the ark, and God enters into a covenant with Noah and his descendants. Noah begins to cultivate the field that has been cursed during Adam's lifetime (iii. 17–19; v. 29), and plants a vineyard (ix. 20). When, in a fit of intoxication, Noah is shamelessly treated by his son Ham, he curses the latter in the person of Ham's son Canaan, while the reverential Shem and Japheth are blessed (ix. 21–27). Ch. x. contains a review of the peoples that are descended from

Japheth, Ham, and Shem (down to the chief branch of the last-named), and are living dispersed over the whole earth. The dispersion was due to the "confusion of tongues," which God brought about when men attempted to build a tower that should reach up to heaven (xi. 1-9). A genealogy is given of Shem's descendants in regular line, the tenth generation of whom is represented by Terah (xi. 10-25).

§ 6. Terah, who lives at Ur of the Chaldees, has three sons: Abram, Nahor, and Haran. Haran's son is Lot. Nahor is married to Milcah, and Abram to Sarai, who has no children (xi. 26-32). God directs Abram to leave his home and kindred because He intends to bless him. Abram obeys, emigrating with his entire household and Lot, his brother's son, to the land of Canaan. Here God appears to him and promises that the land shall become the property of his descendants. Abram is forced by a famine to leave the country and go to Egypt. The King of Egypt takes possession of the beautiful Sarai (whom Abram has represented as his sister), but, smitten by God, is compelled to restore her (xii.). Abram returns to Canaan, and separates from Lot in order to put an end to disputes about pasturage, leaving to Lot the beautiful country in the valley of the Jordan near Sodom. God thereupon again appears to Abram, and again promises him the whole country (xiii.). Lot is taken prisoner during a war between Amraphel, King of Shinar, and Bera, King of Sodom, with their respective allies, whereupon Abram pursues the victors with his armed servants, liberates Lot, and seizes the booty, refusing his share of the same (xiv.). After this exploit God again appears to Abram and promises him protection, a rich reward, and, in spite of the fact that Abram still has no children, a numerous progeny. These descendants must pass four hundred years in servitude in a strange land; but after God has judged their oppressors they, in the possession of great wealth, shall leave the land of their affliction, and the fourth generation shall return to the same land (xv.).

Sarai being still childless, Abram gets a son, Ishmael, by her Egyptian handmaid, Hagar (xvi.). God again appears to Abram, and enters into a personal covenant with him securing Abram's future: God promises him a numerous progeny, changes his name to "Abraham" and that of Sarai to "Sarah," and institutes the circumcision of all males as an eternal sign of the covenant. Abraham, together with his whole house, immediately fulfils the rite (xvii.). God once more appears to Abraham in the person of three messengers, whom Abraham receives hospitably, and who announce to him that he will have a son within a year, although he and his wife are already very old. Abraham also hears that God's messengers intend to execute judgment upon the wicked inhabitants of Sodom and Gomorrah, whereupon he intercedes for the sinners, and endeavors to have their fate set aside (xviii.). Two of the messengers go to Sodom, where they are hospitably received by Lot. The men of the city wish to lay shameless hands upon them, and, having thus shown that they have deserved their fate, Sodom and Gomorrah are destroyed by fire and brimstone, only Lot and his two daughters being saved. The circumstances of the birth of Ammon and Moab are set forth (xix.). Abraham journeys to Gerar, the country of Abimelech. Here also he represents Sarah as his sister, and Abimelech plans to gain possession of her, but desists on being warned by God (xx.).

At last the long-expected son is born, and receives the name of "Isaac." At the instance of Sarah, the boy Ishmael, together with his mother, Hagar, is driven out of the house, but they also have a great future promised to them. Abraham, during the banquet that he gives in honor of Isaac's birth, enters into a covenant with Abimelech, who confirms his right to the well Beer-sheba (xxi.).

Now that Abraham seems to have all his desires fulfilled, having even provided for the future of his son, God subjects him to the greatest trial of his faith by demanding Isaac as a sacrifice. Abraham obeys; but, as he is about to lay the knife upon his son, God restrains him, promising him numberless descendants. On the death of Sarah Abraham acquires Machpelah for a family tomb (xxiii.). Then he sends his servant to Mesopotamia, Nahor's home, to find among his relations a wife for Isaac; and Rebekah, Nahor's granddaughter, is chosen (xxiv.). Other children are born to Abraham by another wife, Keturah, among whose descendants are the Midianites; and he dies in a prosperous old age (xxv. 1-18).

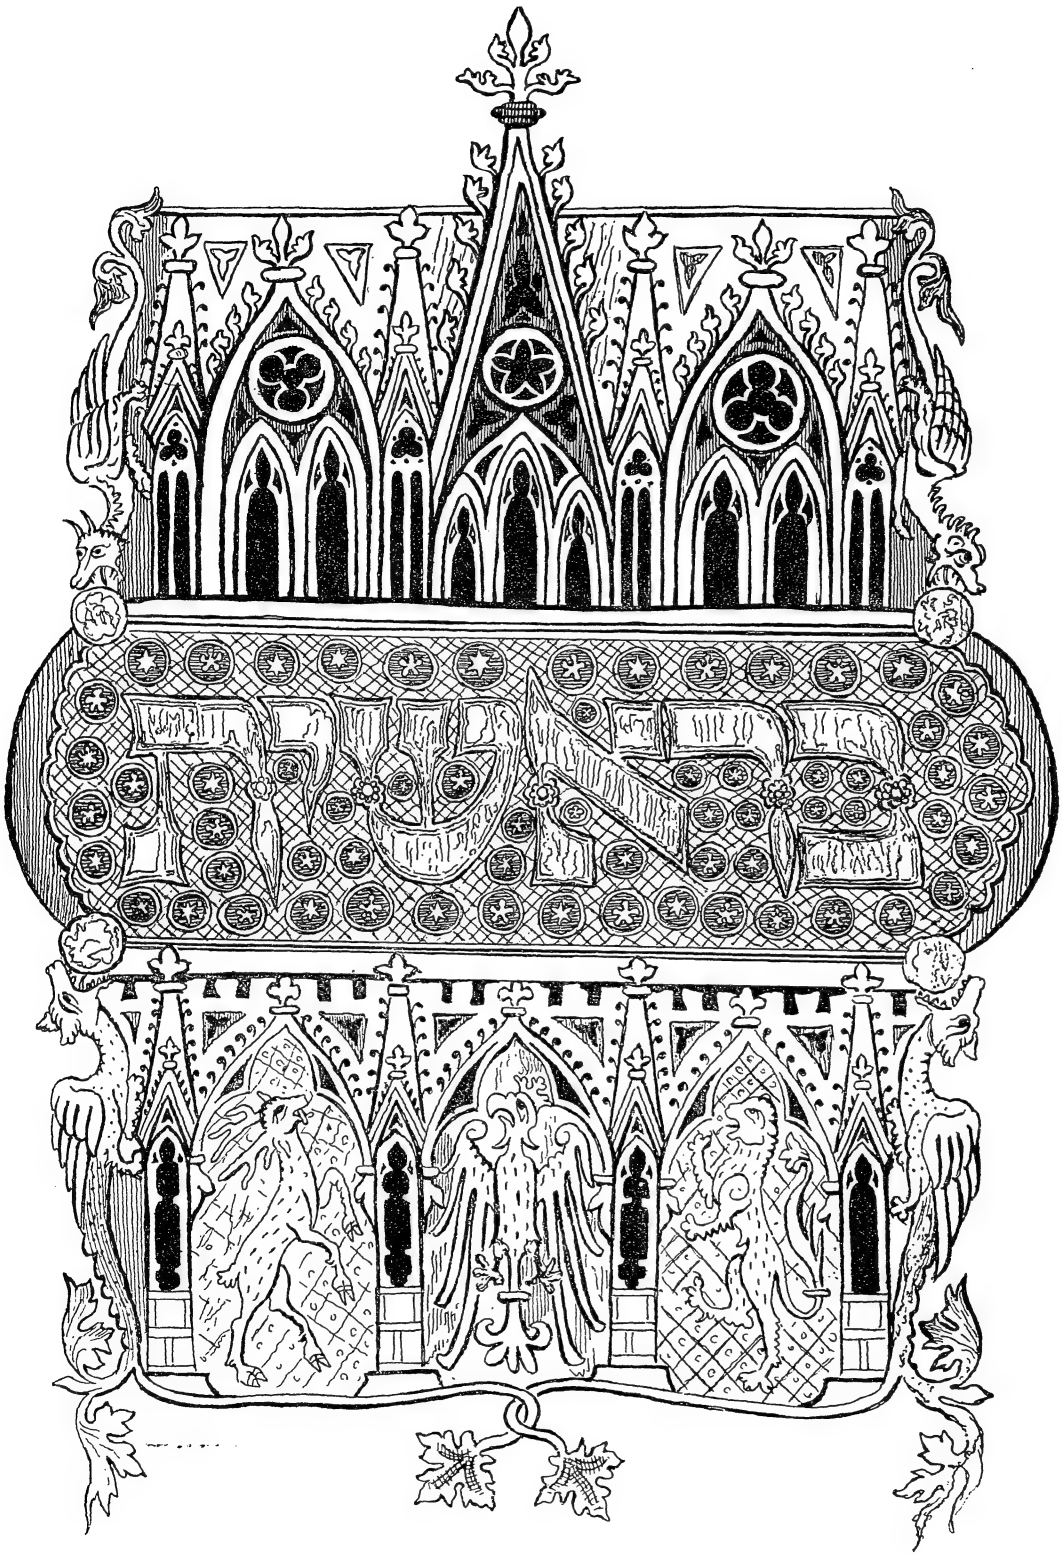
§ 7. After being married for twenty years Rebekah has twins by Isaac: Esau, who becomes a hunter, and Jacob, who becomes a herdsman. Jacob persuades Esau to sell him his birthright, for which the latter does not care (xxv. 19-34); notwithstanding this bargain, God appears to Isaac and repeats the promises given to Abraham. His wife, whom he represents as his sister, is endangered in the country of the Philistines, but King Abimelech himself averts disaster. In spite of the hostility of Abimelech's people, Isaac is fortunate in all his undertakings in that country, especially in digging wells. God appears to him at Beer-sheba, encourages him, and promises him blessings and numerous descendants; and Abimelech enters into a covenant with him at the same place. Esau marries Canaanite women, to the regret of his parents (xxvi.). Rebekah persuades Jacob to dress himself as Esau, and thus obtain from his senile father the blessing intended for Esau (xxvii.). To escape his brother's vengeance, Jacob is sent to relations in Haran, being charged by Isaac to find a wife there. On the way God appears to him at night, promising protection and aid for himself and the land for his numerous descendants (xxviii.). Arrived at Haran, Jacob hires himself to Laban, his mother's brother, on condition that, after having served for seven years as herdsman, he shall have for wife the younger daughter, Rachel, with whom he is in love. At the end of this period Laban gives him the elder daughter, Leah; Jacob therefore serves another seven years for Rachel, and after that six years more for cattle. In the meantime Leah bears him Reuben, Simeon, Levi, and Judah; by Rachel's maid Bilhah he has Dan and Naphtali; by Zilpah, Leah's maid, Gad and Asher; then, by Leah again, Issachar, Zebulun, and Dinah; and finally, by Rachel, Joseph. He also acquires much wealth in flocks (xxix.-xxx.).

In fear of Laban, Jacob flees with his family and all his possessions, but becomes reconciled with Laban, who overtakes him (xxxi.). On approaching his home he is in fear of Esau, to whom he sends presents; and with the worst apprehensions he turns at night to God in prayer. An angel of God appears to Jacob, is vanquished in wrestling, and announces to him that he shall bear the name "Israel," *i.e.*, "the combatant of God" (xxxii.). The meeting with Esau proves a friendly one, and the brothers separate reconciled. Jacob settles at Shalem (xxxiii.). His sons Simeon and Levi take bloody vengeance on the city of Shechem, whose prince has dishonored their sister Dinah (xxxiv.). Jacob moves to Beth-el, where God bestows upon him the promised name of "Israel," and repeats His other promises. On the road from Beth-el Rachel gives birth to a son, Benjamin, and dies (xxxv.). A genealogy of Esau and the inhabitants and rulers of his country, Edom, is given in ch. xxxvi.

§ 8. Joseph, Jacob's favorite, is hated by his brothers on account of his dreams prognosticating his future dominion, and on the advice of Judah is secretly sold to a caravan of Ishmaelitic merchants going to Egypt. His brothers tell their father that a wild animal has devoured Joseph (xxxvii.). Joseph, carried to Egypt, is there sold as a slave to Potiphar, one of Pharaoh's officials. He gains his master's confidence; but when the latter's wife, unable to seduce him, accuses him falsely, he is cast into prison (xxxix.). Here he correctly interprets the dreams of two of his fellow prisoners, the king's butler and baker (xl.). When Pharaoh is troubled by dreams that no one is able to interpret, the butler draws attention to Joseph. The latter is thereupon brought before Pharaoh, whose dreams he interprets to mean that seven years of abundance will be followed by seven years of famine. He advises the king to make provision accordingly, and is empowered to take the necessary steps, being appointed second in the kingdom. Joseph marries Asenath, the daughter of the priest Poti-pherah, by whom he has two sons, Manasseh and Ephraim (xli.).

When the famine comes it is felt even in Canaan; and Jacob sends his sons to Egypt to buy corn. The brothers appear before Joseph, who recognizes them, but does not discover himself. After having proved them on this and on a second journey, and they having shown themselves so fearful and penitent that Judah even offers himself as slave, Joseph reveals his identity, forgives his brothers the wrong they did him, and promises to settle in Egypt both them and his father (xlii.-xlv.). Jacob brings his whole family, numbering 66 persons, to Egypt, this making, inclusive of Joseph and his sons and himself, 70 persons. Pharaoh receives them amicably and assigns to them the land of Goshen (xlvi.-xlvii.). When Jacob feels the approach of death he sends for Joseph and his sons, and receives Ephraim and Manasseh among his own sons (xlviii.). Then he calls his sons to his bedside and reveals their future to them (xlix.). Jacob dies, and is solemnly interred in the family tomb at Machpelah. Joseph lives to see his great-grandchildren, and on his death-bed he exhorts his brethren, if God should remember them and lead them out of the country, to take his bones with them (l.).

§ 9. In the choice, connection, and presentation of his material the narrator has followed certain principles incident to the purpose and scope of his work. Although he adopts the universal view



ILLUMINATED PAGE OF GENESIS.

(From a manuscript formerly in the possession of the Duke of Sussex.)

point of history, beginning with the Creation and giving a review of the entire human race, he yet intends to deal particularly with Israel, the people subsequently chosen by God, and to give an account of its origin and of its election, which is based on its religious and moral character. His chief point of view, therefore, is that of narrator of tribal and religious history; and only the details that bear on this history are reported.

Aim of Work.

§ 10. It is his primary intention to show that the people of Israel are descended in a direct line from Adam, the first man created by God, through legitimate marriages in conformity with Israelitish moral ideals, *i.e.*, monandric marriages. Offshoots branch from this main line at central points represented by Adam, Noah, Shem, Eber, Abraham, and Isaac, though their subsequent legitimacy can not be guaranteed. Linguistically the descent from the main line is always indicated by the word הוליד, vouching for the paternity; while descent in a branch line is indicated by ילד. This is the explanation of the interchange of these two words, a phenomenon which has never yet been correctly interpreted. The line branching off at any one central point is always fully treated before the next member of the main line is mentioned. Only such matters are related in regard to the branch lines as are important for the history of humanity or that of Israel. No fact is ever introduced merely on account of its historical or antiquarian value. In the main line the interest is concentrated upon the promised, long-expected generations of Isaac—Jacob, his sons and grandsons—who safely pass through all dangers and tribulations, emphasis being laid on their religious and moral character.

§ 11. The events are related in definite chronological order, the chief dates being as follows:

Event.	Year of Creation.
Adam dies	930
Noah is born, the first birth after Adam's death	1056
The Flood	1656
Birth of Abraham	1948
Noah's death at the age of 950	2006
Abraham goes to Canaan	2023
Birth of Ishmael	2034
Birth of Isaac	2048
Death of Terah at the age of 205	2083
Death of Sarah at the age of 127	2085
Isaac marries Rebekah	2088
Birth of Esau and Jacob	2108
Death of Abraham, aged 175	2123
Death of Shem at the age of 600	2158
Ishmael dies at the age of 137	2171
Death of Eber at the age of 464	2181
Jacob marries Leah and Rachel	2192
Birth of Joseph	2199
Joseph is sold	2216
Death of Isaac at the age of 180	2228
Jacob and his family go to Egypt	2238
Death of Jacob at the age of 147	2255
Death of Joseph at the age of 110	2309

The year of the Creation is the year 3949 before the common era.

The ten generations before the Flood attain to ages varying between 777 years (Lamech) and 969 years (Methuselah), with the exception of Enoch (365 years). Those of the ten generations after the Flood vary between 600 years (Shem) and 148 (Nahor). All the reasons for the details of this chronology have not yet been discovered. Oppert has declared (in "R. E. J." 1895, and in CHRONOLOGY) that the figures are connected with ancient Babylonian chronological systems. The variations found in the Septuagint and in the Samaritan Pentateuch were introduced for certain purposes (see Jacob in "J. Q. R." xii. 434 *et seq.*). The correctness of the Masoretic figures, however, is evident from the context.

§ 12. Anachronisms such as various critics allege are found in Genesis do not in reality exist; and their assumption is based on a misunderstanding of the historiographic principles of the book. Thus the history of a generation no longer of importance is closed and the death of its last member noted, although it may not be contemporaneous with the next succeeding generation, to which the attention is then exclusively directed. This view explains the apparent contradictions between xi. 32 and xi. 26, xii. 4; also between xxv. 7 and xxv. 26; xxi. 5 and xxv. 20; xxxv. 28 (Jacob was at that time 120 years old) and xlvii. 9; xxxvii. 2, xli. 46; etc. In ch. xxxiv. Dinah is not six to seven years old, nor Simeon and Levi eleven and ten respectively, but (xxxv. 27, xxxvii. 1 *et seq.*, xxxiii. 17) each is ten years older. The events in ch. xxxviii. do not cover twenty-three years—from the sale of Joseph in his seventeenth year to the arrival of Judah's grandsons in Egypt (xlvi. 12) in Joseph's fortieth year—but thirty-three years, as the words ויהי בעת ההיא (elsewhere only in xxi. 22 and I Kings xi. 29) refer back in this case to xxxiii. 17. The story is introduced at this point to provide a pause after ch. xxxvii.

§ 13. Nor are there any repetitions or unnecessary doublets. If ch. ii. were an account of the Creation differing from that found in ch. i., nearly all the events would have been omitted; it is, however, the story in detail of the creation of man, introduced by a summary of what preceded. Neither are there two accounts of the Flood in ch. vi.–ix., in which no detail is superfluous. The three accounts of the danger of Sarah and Rebekah, ch. xii., xx., and xxvi., are not repetitions, as the circumstances are different in each case; and ch. xxvi. refers expressly to ch. xx. The account in xix. 29 of the destruction of Sodom and Gomorrah and the rescue of Lot, is but a summary introducing the story that follows, which would not be comprehensible without xix. 14, 23, 28. Repeated references to the same place (Beth-el, xxviii. 19, xxxv. 15), or renewed attempts to explain the same name (Beer-sheba, xxi. 31, xxvi. 33; comp. xxx. 20 *et seq.*), or several names for the same person (xxvi. 34, xxvii. 46–xxxvi. 2 for Esau's wives) are not contradictions. The change of Jacob's name into that of "Israel" is not narrated twice; for xxxii. 29 contains only the announcement by the messenger of God. Apparently no exegete has noted that יאמר is a parenthesis often found in prophetic speeches ("Not Jacob—thus it will be said [*i.e.*, in xxxv. 10]—shall be thy name"); אמר שם is an impossible construction in Hebrew; xxxii. 4 *et seq.* and xxxiii. 1 *et seq.* do not prove, contrary to xxxvi. 6–7, that Esau was living at Seir before Jacob's return. The account of the sale of Joseph as found in xxxvii. 1–25, 28, 29–36; xl. 1 *et seq.* does not contradict xxxvii. 25–27, 28; xxxix.; for

the Midianites were the middlemen between the brothers and the Ishmaelites, on the one hand, and between the latter and Potiphar, on the other. Potiphar is a different person from the overseer of the prison; and Joseph could very well say that he had been stolen, *i.e.*, that he had been put out of the way (xl. 15).

§ 14. It is the purpose of the book, on its religious as well as its historic side, to portray the relation of God to humanity and the behavior of the latter toward Him; His gracious guidance of the history of the Patriarchs, and the promises given to them; their faith in Him in spite of all dangers, tribulations, and temptations; and, finally, the religious and moral contrasts with Hamitic (Egyptian and Canaanite) behavior.

§ 15. Being a historical narrative, no formal explanations of its religious views are found in Genesis; but the stories it contains are founded on such views, and the author furthermore looks upon history as a means of teaching religion. He is a historian only in virtue of being a theologian. He inculcates religious doctrines in the form of stories. Instead of propounding a system he describes the religious life. The book therefore contains an inexhaustible fund of ideas. The most important among these, regarding God, the Creation, humanity, and Israel's Patriarchs, may be mentioned here.

Religion of Genesis.

§ 16. There is only one God, who has created heaven and earth (that is, the world), and has called all objects and living beings into existence by His word. The most important point of the theology of Genesis, after this fundamental fact, is the intentional variation in the name of God. It is the most striking point of the book that the same God is now called "Elohim" and now "YHWH." In this variation is found the key to the whole book and even to the whole Pentateuch. It is not accidental; nor are the names used indifferently by the author, though the principle he follows can not be reduced to a simple formula, nor the special intention in each case be made evident.

§ 17. "YHWH" is the proper name of God (= "the Almighty"; see Ex. iii. 12 *et seq.*, vi. 2), used wherever the personality of God is to be emphasized. Hence only such expressions are used in connection with "YHWH" as convey the impression of personality, *i.e.*, anthropomorphisms. Eyes, ears, nose, mouth, face, hand, heart are ascribed only to "YHWH," never to "Elohim." These anthropomorphisms are used merely to suggest the personal life and activity of God, and are not literal personifications, as is conclusively proved by the fact that phrases which would be actual anthropomorphisms—*e.g.*, "God sees with His eyes"; "He hears with His ears"; "one sees God's face" ("head," "body," etc.)—never occur. The expression "YHWH's eyes" indicates divine knowledge of what may be seen through personal apperception; "YHWH's ears," what may be heard; אף יהוה = "God's anger" indicates the reaction of God's moral nature against evil; "YHWH's mouth" indicates the utterances of the God who speaks personally; "YHWH's face" indicates immediate personal intercourse with the God who is felt to be present; "YHWH's hand" indicates His sensible manifestations of power; "YHWH's heart" indicates His thoughts and designs. The phrase "YHWH, a personal God," characterizes fully the use of this name. A person or a nation can have personal relations with the personal YHWH only; and only He can plan and guide the fate of either with a personal interest. YHWH is the God of history and of the education of the human race. Only YHWH can exact a positive attitude toward Himself, and make demands upon man that are adequate, *i.e.*, moral: YHWH is the God of positive morality. A personal, inner life longing for expression can be organized into definite form and find response only if YHWH be a personal, living God. YHWH is the God of ritual, worship, aspiration, and love.

§ 18. "Elohim" is an appellative, and the general name for the divinity, the superhuman, extramundane being, whose existence is felt by all men —a being that possesses intelligence and will, exists in the world and beyond human power, and is the final cause of all that exists and happens. "YHWH" is concrete; "Elohim" is abstract. "YHWH" is the special, "Elohim" the general, God. "YHWH" is personal; "Elohim" impersonal. Yet there is no other Elohim but YHWH, who is "ha-Elohim" (*the* Elohim).

The following points may be observed in particular: (*a*) "Elohim," as genitive of a person, indicates that the latter has superhuman relations (xxiii. 6; similarly of an object, xxviii. 17, 22). (*b*) It also indicates ideal humanity (xxxiii. 10; comp. xxxii. 29).

(*c*) "Elohim" expresses the fate imposed by a higher power. The statement "A person is prosperous" is paraphrased by "Elohim is with him," which is distinctly different from "YHWH is with him." While the former indicates objectively a person's prosperity with regard to a single event, the latter expresses the higher intentions and consecutive plans of the personal God in regard to the person in question. Abimelech says to Abraham, "Elohim is with thee in all that thou doest" (xxi. 22), while he says to Isaac, "YHWH is with thee," and "thou art now the blessed of YHWH" (xxvi. 28, 29). For Abimelech had at first tried in vain to injure Isaac; but later he convinced himself (ראו ראינו) that evidently (עתה) it was the YHWH worshiped by Isaac that designedly protected and blessed the latter. Again, in xxi. 20: "And Elohim was with the lad"; for Ishmael did not belong to the chosen line, concerning which God had special plans. YHWH, however, is always with Israel and its heroes (xxvi. 3, 28; xxviii. 15 [xxxii. 10, 13]; xlvi. 4; Ex. iii. 12; Num. xxiii. 21; Deut. ii. 7; xx. 1; xxxi. 8, 23; Josh. i. 5, 9, 17; iii. 7; Judges ii. 18; vi. 12, 16; I Sam. iii. 19; xvi. 18; xviii. 12, 14; xx. 13; II Sam. vii. 3, v. 10; I Kings i. 37; II Kings xviii. 7). Particularly instructive is Jacob's vow, xxviii. 20 *et seq.*, "If Elohim will be with me . . . then shall YHWH be my Elohim." Adverse fate especially is, out of fear, euphemistically ascribed to the general Elohim, the impersonal God, rather than to YHWH xlii. 28).

(*d*) As "Elohim" designates the universal ruler of the world, that term is used in ch. i. in the story of the Creation; but in order to designate this Elohim as the true God the word "YHWH" is always added

in the following chapters (ii., iii.). (*e*) In so far as man feels himself dependent upon Elohim, whom he needs, the latter becomes *his* Elohim. As the term "Elohim" includes the idea of beneficent power, this relation becomes, on the part of God, that of the omnipotent patron, and, on the part of man, that of the protégé, the one who needs protection and offers respect and obedience (xvii. 7, xxviii. 22). The same interpretation applies to "Elohim" followed by the genitive of a person. (*f*) Elohim is the religious meeting-ground between the believer in YHWH and persons of a different faith (xiv. 22; xx. 13; xxi. 23; xxxix. 9; xli. 16, 25, 28, 32, 38). (*g*) "Elohim" is the appellation of God used in connection with the person who is inclined toward YHWH, but whose faith is not yet fully developed; for the one who is on the way to religion, as Melchizedek (ch. xiv.) and Abraham's servant (ch. xxiv.; comp. Jethro in Exodus and Balaam in Numbers; see §§ 28, 31). (*h*) "Elohim" represents God for those whose moral perception has been blunted by sin (iii. 3, 5); from the mouths of the serpent and the woman instead of "Jahweh" is heard "Elohim"; they desire to change the idea of a living God, who says, "Thou shalt," into a blurred concept of an impersonal and indefinite God. But the God who pronounces judgment is YHWH (ch. ii., iii.; on Cain, ch. iv.; in connection with the Flood, vi. 3–8; the tower of Babel, xi. 5 *et seq.*; Sodom and Gomorrah, xviii. 19; Er and Onan, xxxviii. 7, 10). (*i*) Although the personality of Elohim is indistinct, he yet is felt to be a moral power making moral demands. The moral obligation toward him is the negative virtue of the "fear of God," the fear of murder (xx. 11), unchastity (xxxix. 9), injustice (xlii. 18), and renunciation (xxii. 12). (*k*) "Elohim" also means the appearance of the Deity, and hence may be synonymous with "mal'ak." It may also designate an object of the ritual representing or symbolizing the Deity (xxxv. 2).

§ 19. "Elohim" is more explicitly defined by the article; "ha-Elohim," *i.e.*, "the Elohim" or "of the Elohim," is sometimes used to identify an "Elohim" previously mentioned (xvii. 18; comp. verse 17; xx. 6, 17; comp. verse 3). The single, definite, previously mentioned appearance of an Elohim is called "ha-Elohim," being as such synonymous with "Mal'ak YHWH" (xxii. 1, 3, 9, 11, 15), both speaking for YHWH (verse 16; comp. xlviii. 15). "Ha-Elohim," when derived from "Elohim," is a preparation for "YHWH"; when derived from "YHWH" it is a weakening of the idea of God (see §§ 31 *et seq.*). Although these examples do not exhaust the different uses of these two names, they are sufficient to show the author's intentions.

§ 20. A rare term for "God" is "El Shaddai" (xvii. 1, xxviii. 3, xxxv. 11, xliii. 13, xlviii. 13; "Shaddai" in xlix. 25). The usual translation and interpretation, "Almighty," is entirely unsupported. The term, when closely examined, means "the God of faith," *i.e.*, the God who faithfully fulfils His promises. Perhaps it also means a God of love who is inclined to show abundant love.

§ 21. God as a personal being is not only referred to in anthropomorphistic and anthropopathic terms, but He also appears to man and speaks with him. Thus He speaks with Adam and Eve, Cain, Noah, Abraham, Hagar, Abimelech, Isaac, Jacob, and Laban. But He appears only from the time of Abraham, and in different ways. An Elohim "appears" to Abimelech and Laban in a dream at night (xx. 3, xxxi. 24); a mal'ak YHWH appears to Hagar (xvi. 7 *et seq.*), being called in verse 13 simply "YHWH." YHWH appears to Abram (xii. 7, xv. 1); in a vision (xii. 1, 7) apparently accompanied by darkness, a pillar of smoke, and fire; in xvii. YHWH, who is subsequently called "Elohim" (verses 9, 15, 19), appears, and then ascends (verse 22); in xviii. YHWH appears in the form of three men who visit Abraham, but these speak as one YHWH in verses 13, 17, 20, 26, and 33, who then leaves, while the two messengers go to Sodom. YHWH appears to Isaac on a certain day (xxvi. 2), and again that night (verse 24). Jacob is addressed in a dream by YHWH (xxviii. 12 *et seq.*). In xxxi. 3 YHWH speaks to Jacob; Jacob says (verse 11) that a mal'ak of Elohim appeared to him in a dream. In xxxv. 9 Elohim again appears to him, in reference to the nocturnal encounter with a "man" (xxxii. 14 *et seq.*), and ascends (xxxv. 13). In xlvi. 2 Elohim speaks to him in a vision of the night.

Hence, the appearance of God means either a dream-vision, or the appearance of a messenger sent by God, who speaks in His name, and may therefore himself be called "Elohim of YHWH."

§ 22. "Mal'ak of God" signifies, in the first place, the fortunate disposition of circumstances (xxiv. 7, 40; comp. xlviii. 16), in which case it is parallel to "ha-Elohim," the divine guidance of human life; more often, however, it denotes the "angels" ("mal'akim"), messengers of God in human shape who carry His behests to men and who seem to enter and leave heaven through a gate (xxviii. 11); *e.g.*, "YHWH's messenger" (xvi. 7, 11; xxii. 11, 15); "Elohim's messenger" (xxi. 17; in the plural, xix. 1, 15; xxviii. 12; xxxii. 2); or "ha-Elohim's messenger" (xxxi. 11). The "man" who wrestled with Jacob likewise seems to have been a mal'ak (xxxii. 25, 29, 31), and the men whom Abraham entertained and who saved Lot were also mal'akim (xviii., xix.). According to the popular belief, it is disastrous to meet them (xvi. 13, xxxii. 31). On this point, more than on any other, the author seems to have followed popular ideas.

§ 23. It appears from the foregoing that the conception of God found in Genesis is throughout a practical, religious one. God is treated exclusively with reference to His dealings with the world and with man, and to the interest that He takes in man's fate and behavior. He guides, educates, and punishes. He assigns to the first of mankind a habitation in Eden, sets them a task, and commands them not to do a certain thing. When they break this command He punishes them; but even after that He cares for them. Although punishing the murderer Cain, He affords him protection; the cruelties and unnatural sins of the generation of the Flood arouse His sorrow and anger; He humiliates the pride of the men who are planning to build a tower that shall reach to heaven; He utterly destroys with fire and brimstone the sinful generation of Sodom and Gomorrah. The punishments are either the natural consequences of sin—the first of mankind have

robbed the earth, which had willingly offered the fruit of its trees, hence it is cursed and paralyzed, and can no longer give its fruit freely, so long as Adam is living; Eve has succumbed to desire, hence she has become the slave of desire; Cain has defiled the earth by murder, hence he has deprived it of its strength—or they correspond exactly to the sins; *e.g.*, men build a tower in order to remain united, hence they are dispersed; Jacob wishes to rule his brother, therefore he must humiliate himself before that brother; he deceives, and is deceived in return; he dresses up in a goatskin in order to obtain a blessing fraudulently, therefore he is terribly deceived and plunged in sorrow through a goatskin; Judah advises the sale of Joseph as a slave, therefore he himself is forced to offer himself as a slave.

God, on the other hand, is pleased with the pious, with Enoch and Noah, and especially with Abraham's unshakable faith (xv. 6); his righteousness and justice, which he recommends to his children and household (xviii. 19); his implicit obedience, which is ready to make the supreme sacrifice (xxii. 12, 16). For Abraham's sake God saves Lot (xix. 19); blesses Abraham's son Isaac (xxvi. 5), his children, and his children's children; protects them through all dangers; prevents others from doing evil to them (xii. 17, xiv., xv., xx. 3, xxvi., xxxi. 24); and leads them in a marvelous manner. He gives commands to men, and binds them to Himself by covenants and promises. They are the objects of His designs, as they are His work.

§ 24. The entire universe is the work of God; this proposition is the necessary consequence of the idea of God as found in Genesis and the Pentateuch and in the whole Bible generally. From this arises doubtless the author's belief that God created the world out of nothing. He does not say how this primal act of creation was accomplished. In the beginning the earth was a desolate watery chaos ("tohu wa-bohu"), over which the spirit of God brooded, and which God divided into heaven and earth and arranged and peopled in six days. The living beings are created in an orderly sequence, proceeding from the inorganic to the organic, from the incomplete to the complete, man being the crown. In the beginning God creates light together with time and the day. The outer firmament separates the waters above and below it; then when the lower waters recede the land appears; the earth produces grass and trees; and plants and animals are created, each "after its kind," and endowed with the faculty of propagating within their kind in their respective elements. Every organic being, therefore, is endowed with a nature of its own, which the Creator intends it to keep by pairing only with its own kind. The lights that God has fixed in the firmament serve to separate the day from the night; they shall be for "signs, periods, seasons, and years," and shall give light to the earth. The sun is the greater light, that rules the day; the moon is the lesser light, that rules the night.

The Creation.

§ 25. The Creation is, in the judgment of God, good in particular, and very good in general, *i.e.*, fit for life, commensurate to its purpose, salutary, harmonic, and pleasing. The book expresses an optimistic satisfaction and pleasure in the world, a lively veneration for God's arrangements and the peculiar dignity of each being as determined by God. The simplicity, sublimity, depth, and moral grandeur of this story of the Creation and its superiority to every other story dealing with the subject are universally recognized.

§ 26. Man, the crown of Creation, as a pair including man and woman, has been made in God's image. God forms the first man, Adam, out of earth ("adamah"). This indicates his relation to it in a manner that is fundamental for many later laws. Man is a child of the earth, from which he has been taken, and to which he shall return. It possesses for him a certain moral grandeur: he serves it; it does not serve him. He must include God's creatures in the respect that it demands in general, by not exploiting them for his own selfish uses. Unlawful robbery of its gifts (as in paradise), murder, and unchastity anger it, paralyze its power and delight in producing, and defile it. God breathed the breath of life into the nostrils of man, whom He formed out of earth. Therefore that part of him that is contrasted with his corporeal nature or supplements it—his life, soul, spirit, and reason—is not, as with the animals, of earthly origin, existing in consequence of the body, but is of divine, heavenly origin. Man is "toledot" (ii. 4) of heaven and earth.

Humanity.

The creation of man also is good, in the judgment of God; the book, therefore, is cognizant of nothing that is naturally evil, within man or outside of him. After God has created man, He says: "It is not good that the man should be alone; I will make him an help meet for him" (ii. 18). In order that man may convince himself that there is no being similar to him among all the creatures that have been made, God brings all the animals unto Adam, that he may name them, *i.e.*, make clear to himself their different characteristics. Hence man, looking for a being like unto himself among the animals, finds language. God thereupon creates woman out of the rib of man, who gladly recognizes her as bone of his bone and flesh of his flesh. "Therefore shall a man leave his father and his mother, and shall cleave unto his wife: and they shall be one flesh"; meaning that the mature man may and shall leave the paternal house, where he has been merely a dependent member of the family, and, urged by the longing for a sympathetic being that will supplement him, shall live with the woman of his choice, and found with her a family of his own, where the two shall be combined in an actual and a spiritual unity. In this passage the relation between man and woman is expressed, and also the nature of marriage, which is a life partnership in which one helps and supplements the other. Procreation is not its purpose, but its consequence. God has given to man, as to all living beings, the faculty of multiplying.

§ 27. God gives to man dominion over the earth and over all living beings. The food of the first man consists solely of the fruits of the field, that of the animals being grass (i. 29). His occupation is to cultivate and watch over the Garden of Eden (ii. 15), the only restriction placed upon its enjoy-

ment being that he shall not eat of the fruit of the tree of the knowledge of good and evil. In the Garden of Eden men go naked and know no shame; this feeling is aroused only after they have broken God's command, and then He makes them garments of skins to cover their nakedness.

§ 28. All men on earth are descended from the first pair, Adam and Eve, and are therefore also of the image of God. This statement expresses the unity of the whole human race. Man is a created being, made in the image of God, and all men are related: these doctrines are among the most fundamental and weighty of the whole Bible.

The branch descended from Cain, the fratricide, the eldest son of the first pair, is the founder of civic and nomadic culture. The branch descended from Seth develops along religious lines: from Elohim (Seth, in iv. 25) through ha-Elohim (Enoch, in v. 22) to YHWH (Noah, in vi. 8). But punishment has been made necessary on account of Adam's sin; the human race must be destroyed on account of its cruelties and excesses. A new race begins with Noah and his sons, and God promises that He will neither curse the earth again, nor destroy all living beings, but that, on the contrary, "seed-time and harvest, and cold and heat, and summer and winter, and day and night shall not cease" (viii. 22). He blesses Noah and his family, that they may multiply and fill the earth and be spiritually above the animals. He permits men to eat meat, but forbids them to eat blood, or meat with the blood thereof. God will demand the blood (life) of every man or animal that spills it. "Whoso sheddeth man's blood, by man shall his blood be shed" (ix. 6). God enters into a covenant with Noah and his descendants, promising them that He will not again send a general flood upon the earth, and instituting the rainbow as a token thereof (ch. ix.). The God whom all the Noachidæ worship is Elohim (ix. 1, 7, 8, 12, 16, 17), YHWH being worshiped by Shem and his descendants. All the peoples dispersed over the earth are grouped as descendants of Shem, Ham, and Japheth. The genealogy of these peoples which the author draws up in ch. x. according to the ethnographic knowledge of his time, finds no parallel in its universality, which includes all men in one bond of brotherhood. In this way have originated the peoples that shall be blessed in Abraham.

§ 29. Terah, the descendant of Shem and Eber, has three sons, one of whom, Abraham, is destined by God for momentous events. He shall leave his home; and God says to him: "I will make of thee a great nation, and I will bless thee and make thy name great; and thou shalt be a blessing: And I will bless them that bless thee, and curse him that curseth thee; and in thee shall all families of the earth be blessed" (xii. 2–3). God often repeats the promise that Abraham's descendants shall be as numerous as the stars in heaven and as the sand on the seashore (xv. 5, xxii. 17); that He will make him a father of many nations, and cause him to be exceedingly fruitful; that kings and nations shall be descendants of him and Sarah (xvii. 5, 6, 16); that he shall become a great people; that all nations of the earth shall be blessed in him (xviii. 18, xxii. 18); and that his descendants shall receive the entire land of Canaan as a hereditary possession (xiii. 14 *et seq.*, xv. 7, xvii. 18). But before all this comes to pass Israel shall be sorely oppressed for four hundred years as servants in a strange land, after which they shall go out with rich possessions, and God shall judge their oppressors (xv. 13 *et seq.*). In confirmation of these promises God enters twice into a covenant with Abraham: the first time (xv. 18 *et seq.*) as an assurance that his descendants shall possess Canaan; and the second time, before Isaac's birth, as a sign that He will be their God. In token thereof God changes Abram's and Sarai's names into "Abraham" and "Sarah" (אברם־אברה]ם; שרי־שרה]), combining His own name with theirs, and institutes the circumcision of all the men of Abraham's household and their male descendants as an eternal sign of the covenant between Himself and Abraham. Abraham acknowledges YHWH (xiv. 22), builds altars to Him (xii. 7, 8; xiii. 18); calls upon His name (xii. 8, xiii. 4, xxi. 33); shows an invincible faith in His promises, whatever present circumstances may be; is ready for the greatest sacrifice; and proves himself, by his human virtues—his helpfulness, unselfishness, hospitality, humanity, uprightness, dignity, and love of peace—worthy of divine guidance.

Israel's Patriarchs.

§ 30. Of Abraham's two sons Ishmael shall be blessed, and become the father of twelve princes and the progenitor of a great people (xvi. 10, xvii. 20, xxi. 18). Ishmael himself becomes an archer, lives in the wilderness, and marries an Egyptian woman (xxi. 20 *et seq.*). But the one to inherit the promises and the land is Isaac (xvii. 21, xxi. 12), Sarah's son. Therefore his father chooses for him a wife from among his own relations (ch. xxiv.). God renews to him the promises given to Abraham (xxvi. 3, 24). Isaac is truly the son of his great father, though he has a somewhat passive nature. He also builds an altar to YHWH, and calls upon His name (xxvi. 2).

§ 31. Isaac's sons are twins; Esau, the elder, scorns the rights of the first-born, leaving them to Jacob (xxv. 34). Esau is a hunter, whose fate it is to live by the sword and be subject to his brother, though in time he will throw off his yoke (xxvii. 40). He is also called "Edom," and subsequently lives in the land of that name in the mountainous region of Seir. He is loved by his father, but Rebekah loves Jacob; and when Esau marries a Canaanite woman, Isaac, deceived by a trick, blesses Jacob, who, before he sets out for Haran, receives from his father Abraham's blessing also (xxviii. 4). Jacob attains to right relations with God only after mistakes, trials, and struggles. He knows YHWH, whose hand he has seen in his father's life (xxvii. 20); he recognizes Him in the divine appearance (xxviii. 16); but he has not experienced God in his own life. God has not yet become *his* God; hence he avoids the name of YHWH so long as he is in a strange country (xxx. 2; xxxi. 7, 9, 42, 53; xxxii. 3); but the narrator does not hesitate to say "YHWH" (xxix. 31; xxxi. 3; xxxviii. 7, 10), that name being also known to Laban (xxx. 27, 30) and his daughters (xxix. 32 *et seq.*, xxx. 24). Not until a time of dire distress does Jacob find YHWH, who becomes for him Elohim when the vow turns to a prayer. He has overcome Elohim, and himself receives another name after he has

amended his ways (*i.e.*, has gained another God), namely, "Israel," *i.e.*, "warrior of God." God now gives him the same promises that were given to Abraham and Isaac (xxxv. 11 *et seq.*), and Jacob builds an altar to God ("El"), on which he pours a drink-offering. Similarly he brings offerings to the God of his father when he leaves Canaan to go with his family to Egypt, God promising to accompany him and to lead his descendants back in due time. Jacob finds the name of YHWH again only on his death-bed (xlix. 18).

§ 32. With Jacob and his twelve sons the history of the Patriarchs is closed; for the seventy persons with whom Jacob enters Egypt are the origin of the future people of Israel. God does not appear to Jacob's sons, nor does he address them. Joseph designedly avoids the appellation "YHWH"; he uses "Elohim" (xxxix. 9; xl. 8; xli. 16, 51, 53; xlv. 5, 9; xlviii. 9; l. 25; "ha-Elohim," xli. 25, 28, 32; xlii. 18 [xliv. 16]; xlv. 9; and the "Elohim of his father," xliii. 23). The narrator, on the other hand, has no reason for avoiding the word "YHWH," which he uses intentionally (xxxix. 2, 3, 5). YHWH takes a secondary place in the consciousness of Israel while in Egypt, but becomes all-important again in the theophany of the burning bush.

The book prescribes no regulations for the religious life. The Patriarchs are represented in their family relations. Their history is a family history. The relations between husband and wife, parents and children, brother and sister, are displayed in pictures of typical truthfulness, psychologic delicacy, inimitable grace and loveliness, with an inexhaustible wealth of edifying and instructive scenes.

§ 33. Since the time of Astruc (1753) modern criticism has held that Genesis is not a uniform work by one author, but was combined by successive editors from several sources that are themselves partly composite, and has received its present form only in the course of centuries; its composition from various sources being proved by its repetitions, contradictions, and differences in conception, representation, and language. According to this view, three chief sources must be distinguished, namely, J, E, and P.

Scientific Criticism.

(1) J, the Jahvist, is so called because he speaks of God as "YHWH." In his work (chiefly in the primal history, ch. i.–xi., as has been asserted since Budde) several strata must be distinguished, J^1, J^2, J^3, etc. (2) E, the Elohist, is so named because down to Ex. iii. he calls God "Elohim." A redactor (R^{JE}) at an early date combined and fused J and E, so that these two sources can not always be definitely separated; and the critics therefore differ greatly in regard to the details of this question. (3) P, or the Priestly Codex, is so called on account of the priestly manner and tendencies of the author, who also calls God "Elohim." Here again several strata must be distinguished, P^1, P^2, P^3, etc., though only P^3 is found in Genesis. After another redactor, D, had combined Deuteronomy with JE, the work so composed was united with P by a final redactor, who then enlarged the whole (the sequence J, E, D, P is, however, not generally accepted). Hence the present Book of Genesis is the work of this last redactor, and was compiled more than one hundred years after Ezra. The works of J, E, and P furnished material for the entire Pentateuch (and later books), on whose origin, scope, time, and place of composition see PENTATEUCH.

As it would take too much space to give an account of all the attempts made to separate the sources, the analysis of only the last commentator, namely, of Holzinger, who has made a special study of this question, will be noted. In his "Einleitung zum Hexateuch" he has given a full account of the labors of his predecessors, presenting in the "Tabellen" to his work the separation into sources laid down by Dillmann, Wellhausen, Kuenen, Budde, and Cornill. The commentary by Gunkel (1901) is not original as regards the sources.

§ 34. ANALYSIS OF THE SOURCES.

"a" and "b" denote respectively the first and second half of the verse; α, β, γ, etc., the smaller parts; * = "worked over"; "s" added to a letter means that the matter contains elements belonging to R or J or E or to the latter two; "f" = "and the following verse" or "verses."

§ 35. Serious objection may be brought to this analysis of sources on the following grounds: (1) It is unsupported by any external proof whatever; there is no authentic information showing that the Pentateuch, or Genesis in particular, was compiled from various sources, much less have any such sources been preserved in their original form. (2) Hence the critics must rely solely upon so-called internal evidence. But the subjective state of mind with which the final decision rests is unstable and deceptive. It is hazardous to apply modern criteria and rules of composition and style to such an

ancient and peculiar work, whose origin is entirely unknown. (3) Even if it be demonstrated that Genesis has been compiled from various sources, yet the attempt to trace the origin of each verse and of each part of a verse will never meet with success; the critics themselves confess that the process of combination was a most complicated one. (4) If the contradictions and repetitions said to be found in the book really existed, this would not necessarily prove that there had been more than one author; for the literatures of the world furnish numerous similar examples. The existence of such repetitions and contradictions, however, has never been demonstrated.

Objections.

(5) The theory of sources is at best a hypothesis that is not even necessary; for it is based on a total misconception of the dominant ideas, tendencies, and plan of the book. Its upholders have totally misconceived the theology of Genesis; transforming the interchange of the name of God, which is the soul of the book, into an external criterion for distinguishing the different authors. They have not understood the reason for the variation in the use of ילד and הוליד, which in itself is a proof of uniform composition; and they have, therefore, missed a second fundamental idea, namely, that implied in the genealogies and their intimate relation to the Israelitic concept of the family. In criticizing the unequal treatment of the various portions of the material, the theory misconceives the different degrees of their importance for the author. Difference in treatment is proof, not of different authors, but of different subjects and of the different points of view in one author. (6) This would also explain the variations in the language of different passages. But criticism on this point runs in a circle, diversity of sources being proved by differences of language, and vice versa. (7) The separation into sources in particular is based on numberless exegetic errors, often of the most obvious kind, showing not only a misconception of the scope and spirit of the book, and of its mode of narration, but even of the laws of language; and this separation is in itself the greatest barrier to a correct insight into the book, in that it encourages the student to analyze difficult passages into their sources instead of endeavoring to discover their meaning.

§ 36. Notwithstanding all these objections, however, it can not be denied that various portions of Genesis palpably convey the impression of difference in origin and a corresponding difference in conception; but as the impression that the work gives of having been uniformly planned in every detail is still stronger, the explanation given in § 2 is here repeated; namely, Genesis has not been compiled from several sources by one redactor or by several redactors, but is the work of *one* author, who has recorded the traditions of his people with due reverence but independently and according to a uniform plan. Genesis was not compiled from various books.

§ 37. The historicity of the Book of Genesis is more or less denied, except by the representatives of a strict inspiration theory. Genesis recounts myths and legends. It is generally admitted that the primal story is not historical (ch. i.–xi.); but critics vary in ascribing to the stories of the Patriarchs more or less of a historical foundation. For details see the articles under their respective names; here only a summary can be given:

Historical Criticism.

(a) The story of the Creation can not be historically true, for the reasons (1) that there can be no human traditions of these events; (2) its assumption of a creation in six days, with the sequence of events as recounted, contradicts the theories of modern science regarding the formation of the heavenly bodies during vast periods of time, especially that of the earth, its organisms, and its position in the universe. The popular view of Genesis can not be reconciled with modern science. The story is a religio-scientific speculation on the origin of the world, analogous to the creation-myths found among many peoples. The similarities to the Babylonian creation-myth are most numerous and most striking. The extent of its dependence on other myths, the mode of transmission, and the age and history of the tradition and its adaptation are still matters of dispute.

(b) The story of the Garden of Eden (ch. ii., iii.) is a myth, invented in order to answer certain questions of religion, philosophy, and cultural history. Its origin can not be ascertained, as no parallel to it has so far been found.

(c) The stories of Cain and Abel and the genealogies of the Cainites and Sethites are reminiscences of legends, the historical basis for which can no longer be ascertained. Their historical truth is excluded by the great age assigned to the Sethites, which contradicts all human experience. A parallel is found in the ten antediluvian primal kings of Babylonian chronology, where the figures are considerably greater.

(d) The story of the Flood is a legend that is found among many peoples. It is traced back to a Babylonian prototype, still extant. It is perhaps founded on reminiscences of a great seismic-cyclonic event that actually occurred, but could have been only partial, as a general flood of the whole earth, covering even the highest mountains, is not conceivable.

(e) The genealogy of peoples is a learned attempt to determine genealogically the relation of peoples known to the author, but by no means including the entire human race; this point of view was current in antiquity, although it does not correspond to the actual facts.

(f) The stories of the Patriarchs are national legends. Abraham, Isaac, and Jacob and his sons are idealized personifications of the people, its tribes, and families; and it can not now be ascertained whether or not these are based on more or less obscure reminiscences of real personages. In any case, these legends furnish no historically definite or even valuable information regarding the primal history of the people of Israel. The whole conception of the descent of one people from one family and one ancestor is unhistorical; for a people originates through the combination of different families. It has also been maintained that the stories of the Patriarchs are pale reflections of mythology or nature-myths.

B. J.

——**Critical View:** Genesis forms part of the Hexateuch. As such it is regarded by the critical schools as a composite work, containing data from P and JE, the latter a history which, itself a combination of two distinct compilations—one, northern or Israelitish, E; the other, southern or Judean, J—tells in detail and in popular style the story of Israel from the beginning of things to the completed conquest of Canaan. In addition to these elements, some independent material is distinguished from that ascribed to the sources named; and editorial comments (R) and changes have been separated in the critical analysis. There is practical unanimity among critics with regard to the character of P and what must be assigned to him.

The P elements in Genesis consist of a series of interconnected genealogies, uniform in plan, and always prefaced by the introductory phrase "These are the generations of." Connected with them is a scheme of CHRONOLOGY around which a few historical glosses are grouped. In fuller detail the stories of Abraham's covenant and his purchase of a burial-place at Hebron are elaborated. The accounts of Creation (see COSMOGONY) and of the FLOOD are also given fuller treatment. It would thus

Elements. seem that P presupposes acquaintance with and the existence of a history or histories of the Patriarchs and of the times preceding theirs. P is thus a work of a student aiming to present certain ideas and emphasizing certain conclusions. He traces the origin of Israel and his descendants as the one family chosen from among all the children of Adam. He lays particular stress on the religious institutions; *e.g.*, the Sabbath ordained by God Himself at the completion of the week of Creation; the command to abstain from partaking of blood; the covenant of circumcision; and the purity of the Israelitish stock (contrast Esau's marriages with Jacob's).

The theory has been advanced that P is based on J, his story of Creation presupposing the use of historical and traditional material collected in J. On the whole, this may be admitted; but it is also plain that for the P account of the Creation and the Flood Babylonian sources and information were drawn upon. The theology of P is of a high order. God is One; He is supramundane. Creation is a transcendental, free act of the Absolute Creator (hence ברא). In history are revealed a divine plan and purpose. God communicates His decrees directly without the intervention of angels or dreams, and without recourse to theophanies. He is Elohim for Noah, El Shaddai for Abraham, and YHWH for Israel. Anthropomorphisms are few and inoffensive. This theology reveals the convictions and reflections of a late epoch in Israel's religious and historical development.

JE, after the elimination of P, presents an almost unbroken narrative. In the earlier chapters J alone has been incorporated; E begins abruptly in Gen. xx. It is a moot point whether E contained originally a primeval history parallel to that now preserved in Genesis from J. That of the latter, as incorporated in the pre-Abrahamic chapters, is not consistent throughout; especially do the account of the FLOOD, the fragments of a genealogy of Seth, and other portions suggest the use of traditions, probably Babylonian, which did not originally form part of J.

JE, as far as Genesis is concerned, must be regarded as compilations of stories which long before their reduction to written form had been current orally among the people. These stories in part were not of Canaanitish-Hebrew origin. They represent

Legends. Semitic and perhaps other cycles of popular and religious tales ("Sagen") which antedate the differentiation of the Semitic family into Hebrews, Arabs, etc., or, migrating from one to the other of the Semitic groups after their separation, came to the Hebrews from non-Semitic peoples; hence the traces of Babylonian, Egyptian, Phenician, Aramaic, and Ishmaelitish influence. Some of the narratives preserve ancient local traditions, centered in an ancient religious sanctuary; others reflect the temper and exhibit the

coloring of folk-tales, stories in which the rise and development of civilization and the transition from pastoral to agricultural life are represented as the growth and development of individuals. Others, again, personify and typify the great migratory movements of clans and tribes, while still others are the precipitate of great religious changes (*e.g.*, human sacrifices are supplanted by animal ones). The relations and interrelations of the tribes, septs, and families, based upon racial kinship or geographical position, and sometimes expressive of racial and tribal animosities and antipathies, are also concreted in individual events. In all this there is not the slightest trace of artificiality. This process is the spontaneous assertion of the folk-soul ("Volksseele"). These traditions are the spontaneous creation of popular interpretation of natural and historical sentiments and recollections of remote happenings. The historical and theological interpretations of life, law, custom, and religion in its institutions have among all men at one time taken this form. The mythopeic tendency and faculty are universal. The explanations of names which exhibit signs of being the result of intentional reflection, are, perhaps, alone artificial.

Naturally, in the course of oral transmission these traditions were modified in keeping with the altered conditions and religious convictions of the narrators. Compiled at a time when literary skill had only begun to assert itself, many cycles of patriarchal histories must have been current in written form prior to the collections now distinguished by critics as E and J. Criticism has to a great extent overlooked the character of both of these sources as compilations. It has been too free in looking upon them as works of a discriminating litterateur and historian. P may be of this nature, but not J and E. Hence any theory on the literary method and character of either is forced to admit so many exceptions as to vitiate the fundamental assumption. In E are found traits (elaborations, personal sentiment) ascribed exclusively to J; while J, in turn, is not free from the idiosyncrasies of E.

Compilation.

Nor did R (the editor, editors, or diaskeuasts) proceed mechanically, though the purely literary dissection on anatomical lines affected by the higher criticism would lead one to believe he did. He, too, had a soul. He recast his material in the molds of his own religious convictions. The Midrashic method antedates the rabbinical age. This injection of life into old traditional material unified the compilation. P's method, rightly regarded as under theological intention ("Tendenz"), was also that of R. Hence Genesis, notwithstanding the compilatory character of its sources, the many repetitions and divergent versions of one and the same event, the duplications and digressions, makes on the whole the impression of a coherent work, aiming at the presentation of a well-defined view of history, viz., the selection of the sons of Israel as the representative exponents of YHWH's relations to the sons of Adam, a selection gradually brought about by the elimination of side lines descended, like Israel, from the common progenitor Adam, the line running from Adam to Noah—to Abraham—to Jacob = Israel.

Chapter xiv. has been held to be a later addition, unhistorical and belonging to none of the sources. Yet the story contains old historical material. The information must be based on Babylonian accounts (Hommel, "Alt-Israelitische Ueberlieferung," p. 153, speaks of an old Jerusalem tradition, and Dillmann, in his commentary, of a Canaanitish tradition; see ELIEZER); the literary style is exact, giving accurate chronological data, as would a professional historian. The purpose of the account is to glorify Abraham. Hence it has been argued that this chapter betrays the spirit of the later Judaism.

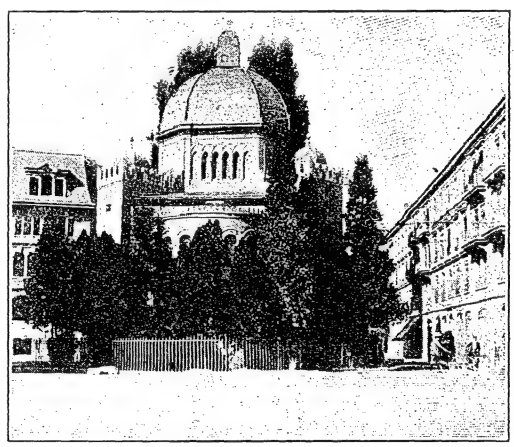
Later Additions.

Chapter xlix., the blessing by Jacob, is also an addition; but it dates from the latter half of the period of the Judges (K. Kohler, "Der Segen Jacob's").

The theory that the Patriarchs especially, and the other personages of Genesis, represent old, astral deities, though again advanced in a very learned exposition by Stucken ("Astral Mythen"), has now been generally abandoned.

E. G. H.

GENEVA: Capital of the Swiss canton of the same name; situated at the southwest end of Lake Geneva; population (1900) about 80,000, of whom 1,076 are Jews. Jews lived there, as well as in



Synagogue at Geneva, Switzerland.
(From a photograph.)

other towns along the lake, as early as the fourteenth century. In 1348 those living along Lake Geneva, which then belonged to Savoy, were accused of poisoning the wells; many of them were racked and burned. In Geneva, where they lived in a separate street, the Christian merchants frequently attacked them, and in 1490 drove them out of the city. Thereafter every Jew who passed through Geneva had to pay a toll of four denarii; a pregnant Jewess, eight denarii. A legendary report says that in 1582, German Jews proposed to the authorities of Geneva to allow them to come in numbers of from 8,000 to 10,000 and build an entire city in the vicinity of St. Victor, for which privilege they offered to pay a considerable tribute as well as to perform military service. In 1632 Nicolas

Antoine, a young Protestant pastor who had been converted to Judaism, was publicly burned.

The modern history of the Geneva community begins with the year 1783, when a number of Lorraine Jews settled in the suburb Carouge, which belonged to the Duke of Savoy until he ceded it to Geneva in 1816. Under French domination several Jews settled in Geneva, enjoying complete freedom until 1815, when French rule ceased. The law of Nov. 14, 1816, forbade their owning land in the canton. Not until 1841 did they again receive civic equality. In 1843 the first Jews were naturalized, and were granted full religious liberty. For several decades the few Jews who lived in Geneva worshiped in Carouge, where the old synagogue still exists. In 1857 the law of Nov. 14, 1816, was repealed, and all the Jews who lived in Carouge were, without charge, enfranchised. The Jews in Geneva, numbering about 200, thereupon proceeded to build a temple on a piece of land given them by the city. This temple was dedicated in 1859, and in the same year Joseph Wertheimer, a pupil of the rabbinical school of Metz, was chosen rabbi. The old cemetery at Carouge has been extended by the community.

Several Jews have been, and are, professors at the Geneva University, among them being the rabbi Joseph Wertheimer and M. Schiff. The Jews of Geneva are engaged chiefly in the clock-making industry and in commerce.

GENIZAH (lit. "hiding" or "hiding-place"): The storeroom or depository in a synagogue; a cemetery in which worn-out and heretical or disgraced Hebrew books or papers are placed. A genizah serves therefore the twofold purpose of preserving good things from harm and bad things from harming. Shab. 115a directs that holy writings in other than the Hebrew and Greek languages require "genizah," that is, preservation. In Pes. 118b "bet genizah" = "treasury." In Pes. 56a Hezekiah hides ("ganaz") a medical work; in Shab. 115a R. Gamaliel orders that the Targum to Job should be hidden ("yigganez") under the "nidbak" (layer of stones). In Shab. 30b the sages sought to hide ("lignoz") as heretical the books of Ecclesiastes and Proverbs. The same thing occurs in Shab. 13b in regard to the Book of Ezekiel, and in Pes. 62 in regard to the Book of Genealogies.

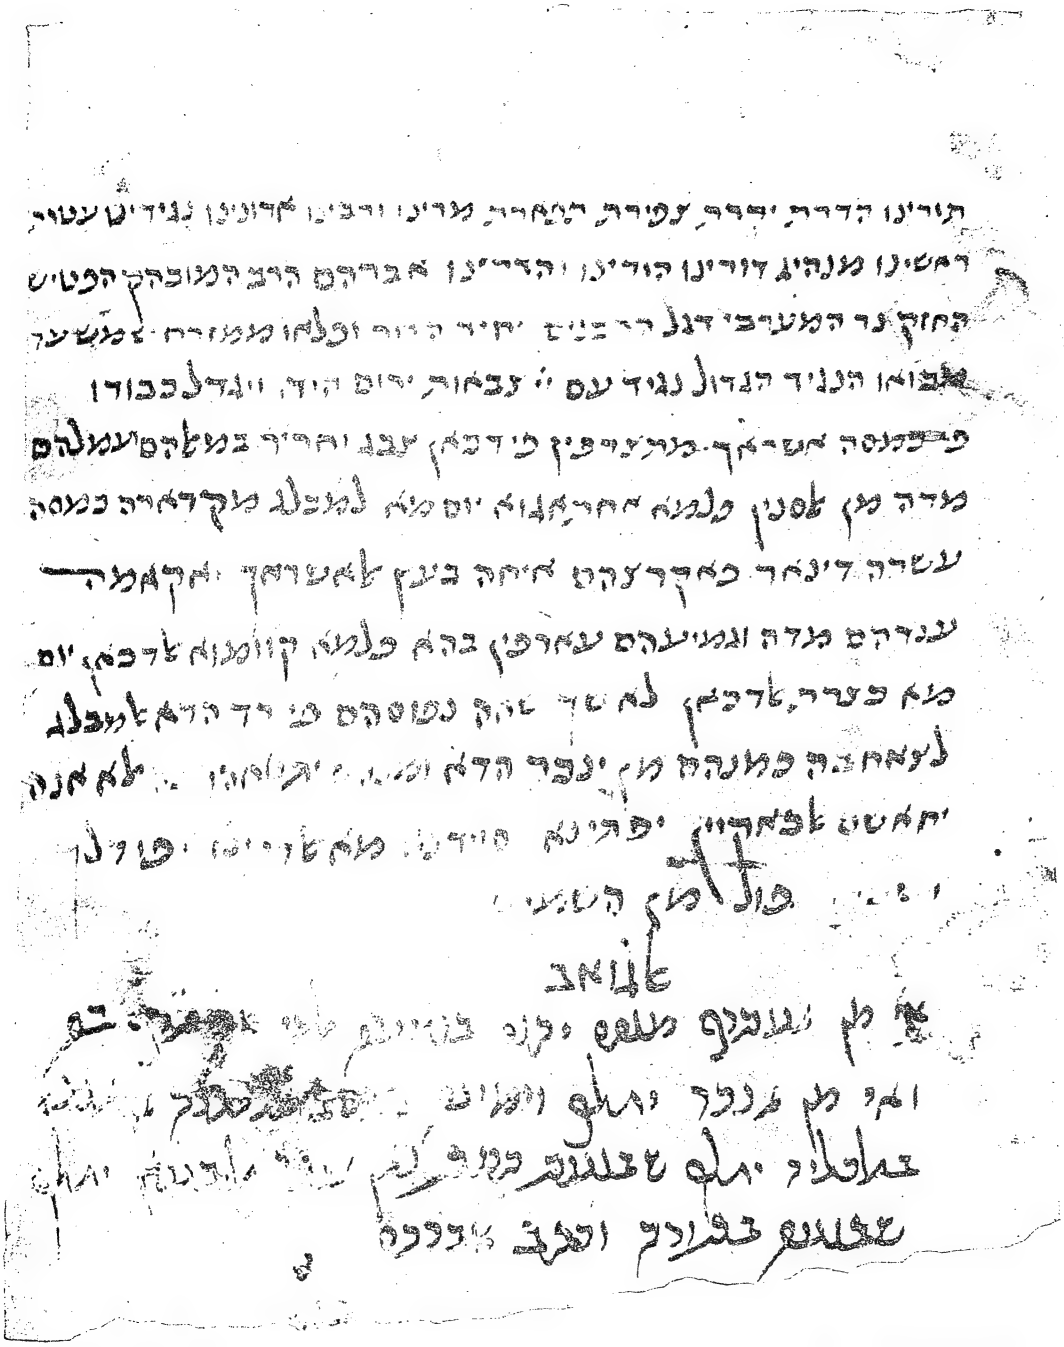
In medieval times such Hebrew scraps and papers as were relegated to the genizah were known as "shemot" (names), because their sanctity and consequent claim to preservation were held to depend on their containing the "names" of God. In addition to papers, articles connected with the ritual, such as zizit, lulabim, and sprigs of myrtle, are similarly stored (comp. Shab. 63; Yoma 16, as to the stones of the altar).

The discovery by Solomon Schechter, on May 13, 1896, of a fragment of the original Hebrew of Ecclesiasticus drew so much attention to the genizah whence it came that the term "genizah" is now applied almost exclusively to the hoard at the old synagogue of Fostat near Cairo. This was a church dedicated to St. Michael until the conquest of Egypt by Chosroes in 616, when it became a synagogue. To Benjamin of Tudela, in the twelfth century, it appeared "very ancient." Simon van Geldern (*c.* 1750), Heine's ancestor, tells in his diary how much impressed he was by the wealth of possibility that lay hidden amid the rubbish of the genizot there. In 1864 Jacob Safir visited it, and his "Eben Sappir" describes how he spent two days ferreting among the ancient books and leaves till the dust and ashes sickened him of the task; but "who knows what may yet be beneath?" In 1888 E. N. Adler visited the synagogue, but did not succeed in seeing more than a recess in the upper part of the right wall containing the scroll of Ezra and a few other ancient manuscripts. He was informed that all shemot were buried in the Jewish cemetery at Basatin. Shortly afterward the synagogue was repaired by the Cairene community, and during its renovation the old receptacle seems to have been rediscovered. It is a secret chamber at the back of the east end, and is approached from the farthest extremity of the gallery by climbing a ladder and entering through a hole in the wall.

The Cairo Genizah.

When Sayce visited the synagogue many of the contents of the genizah had been thrown out and buried in the ground, through a part of which a road was subsequently cut. This would account for the evident exposure to dampness which some of the oldest fragments have undergone and for their earthy odor. Sayce acquired many fragments from the caretakers of the synagogue, which are now in the Bodleian Library. Other libraries and collectors, especially Archduke Rainer, made similar acquisitions. E. N. Adler revisited the synagogue on Jan. 3, 1896, under the escort of the chief rabbi, Rafaïl ben Shimon ha-Kohen, and was allowed to take away with him a sack containing all the parchment and paper fragments they had been able to gather in about four hours. Some of these turned out to be of exceptional interest, and were published shortly afterward. It was the identification of a Ben Sira text among the Bodleian fragments in May of that year which induced Schechter to proceed to Cairo in the autumn and bring back with him practically the entire written contents of the genizah. These now constitute the bulk of the Taylor-Schechter collection at the Cambridge University Library. About the same time Mrs. Lewis and Mrs. Gibson, two learned sisters, known by their discoveries in the Mount Sinai Monastery, visited Cairo, and returned to Cambridge, England, with a large number of fragments, which they placed at Professor Schechter's disposal for the purpose of examination. Visits to the genizah in October, 1898, April, 1901, and February, 1903, merely brought to light printed matter; but if this be found to include title-pages and colophons, some of it may prove to have bibliographical value. Cyrus Adler of Washington during a visit to Cairo in the year 1891 secured about forty pieces from a dealer; doubtless large quantities of fragments from the same genizah remain in the hands of dealers in Cairo, Jerusalem, and else-

Taylor-Schechter Collection.



The Jewish Encyclopedia, Vol. V. In the possession of Prof. S. Schechter.

CAIRO GENIZAH FRAGMENT, EARLY XIII. CENTURY.

Autograph Letter of Abraham, Son of Maimonides.

where; and are occasionally brought to Europe and to America and offered for sale. Among the various buyers from the dealers may be mentioned: Mrs. Lewis and Mrs. Gibson of Cambridge, Dr. Neubauer, the late Professor Kaufmann of Budapest, the trustees of the British Museum, Dr. Gaster, Professor Gottheil of Columbia University, Judge Sulzberger of Philadelphia, Mr. Amram, also of Philadelphia, and E. N. Adler.

Most ancient synagogues had genizot. That of Feodosia in the Crimea is an alcove on the ground floor at the back of the ark, approachable from the outside of the building by a hole so small as only to admit of the entrance of a very small boy. Search there proved fruitless, as it had been cleared a generation previously by Firkovitch. At Bokhara the genizah is in the roof, but disused copies of scrolls of the Law are walled up by stucco in arched alcoves surrounding the interior of the building. At Teheran it is in an underground cellar, so damp that papers turn to pulp in a few weeks; a ketubah or two were all that resulted from a search in 1896. In a secret chamber in the eaves of the roof of one of the chapels of the ancient synagogue at Aleppo (4th cent.?) is the genizah of that famous city. In 1898 this was as full of dust as the one at Cairo, but it is much less interesting and ancient. Its contents are periodically removed, and are taken solemnly to the Jewish cemetery. Their burial is locally supposed to induce a downfall of rain. At Rustchuk burials of "shemot" take place every ten years, when a sermon is delivered, followed by a banquet, and the right of burying each sack is sold as a "miẓwah"; one month later a stone is laid over the place of burial, and inscribed as the genizah of the year in question.

Other Genizot.

In Prague the genizah is also in the roof, over the historic banner which records the bravery of the Bohemian Jews. The genizah is protected from the designs of the desecrator or collector by a legend, devoutly believed, that it is under the special protection of a "golem."

In the Orient generally, shemot are from time to time deposited temporarily in some corner or cupboard of the synagogue, often below the ark or "almemar." When the collection grows too big, or when some special occasion arises, such as a drought, the papers are solemnly gathered up and carried off to the "bet ḥayyim" and buried there with some ceremony. With this custom is associated the far older practise of burying a great or good man with a "sefer" which has become "pasul" (unfit for use through illegibility or old age). In Morocco, in Algiers, in Turkey, and even in Egypt, such paper-interments continually occur, and not the least important part of the Taylor-Schechter collection has come from the graveyard.

Practise in the Orient.

It was reported (1898) that the genizah at Rosetta had been transported from the cemetery there and reburied at Alexandria by a pious Jew, the last of the community to leave the Delta city. The spade-work of a night succeeded in bringing to light some interesting material—an early "RIF," a Cretan ketubah, and part of a Naḥmanides printed in Portugal. The contents of all these genizot are of the most varied description, and some, indeed, of entrancing interest. Autographs of Saadia and Maimonides, of resh gola and nagid, of gaon and heretic, the last-mentioned sometimes recalcitrant and sometimes apologetic, are constantly to be met with. A vivid description of such contents is given by Schechter in his "Hoard of Hebrew Manuscripts"—an article contributed by him to the "Times" (London) of Aug. 3, 1897.

S. S. E. N. A.

GENNESARET, LAKE OF.—Biblical Data: A lake which takes its name ("Gennesaret" or "Gennesar"; I Macc. xi. 67; Luke v. 1; and in Josephus) from the small fruitful plain which lies on its western side (Matt. xiv. 34; Mark vi. 53), the present Al-Ghuwair. It was also called the "Sea of Galilee" (Matt. iv. 18; Mark i. 16; comp. John vi. 1). In the Old Testament its name is "Yam Kinnereth" (or "Kinneroth"; Num. xxxiv. 11; Josh. xii. 3, xiii. 27). The lake is traversed by the Jordan, and is situated in a deep depression, its surface being 682 feet below sea-level. It is 20 kilometers long and about 9 kilometers wide, with which the statements of Josephus (140 stades long, 40 wide) nearly agree. Its greatest known depth is 141 feet. It is especially rich in edible fish. At the time of the Gospels and of Josephus it was covered with countless fishing-boats and ships, which at times were in serious danger on account of the violent winds to which the lake was subject. The surrounding mountains closely invested it, though opening in some places, in one to admit the fruitful and well-watered plain of Gennesaret, in another the plain of Baṭiḥah, on the northern side. On its western shore was the beautifully situated Tiberias, afterward a principal seat of Jewish learning. At that time there was a chain of villages and towns around the lake, though now only a few ruins are to be seen.

——In Rabbinical Literature: The Biblical "Kinneret" or "Kinnerot" is rendered in the Targumim of Pseudo-Jonathan (Num. xxiv. 11) and Jonathan (Josh. xi. 2) by "the Sea of Genusar" ("Yamma di-Genusar"). The same appellation is frequently met with in the Talmud and Midrashim, where the lake is also called "the Sea of Tiberias" (Gen. R. xcviii. 22), and is referred to as abounding with fish. The Lake of Gennesaret having fallen to the lot of Naphtali, Joshua imposed on that tribe the obligation of letting every one fish there with a fishing-rod who so desired (B. Ḳ. 81a). The fish of Gennesaret differed in taste from those of the other lakes in Palestine (Gen. R. iii.). The valley washed by the lake is called "the valley of Gennesaret" ("biḳ'at Genusar"), and is renowned for its fertility. Hence the words "God's blessing" (Deut. xxxiii. 23) are interpreted as meaning the valley of Gennesaret (Sifre, Num. 355; Yalḳ., Num. 962). "Why are there no

fruits of Genusar at Jerusalem?" asks R. Abin. "It is in order that people may not say that we go to Jerusalem only for the sake of those fruits" (Pes. 8b). The fertility of the valley is, according to the Talmudists, the origin of both the Biblical and the Talmudic names: it is called "Kinneret" because its fruit is as sweet as the sound of a harp ("kinnor"; Meg. 6a); and "Genusar" because it is "the gardens of princes" ("ganne sar"; Gen. R. xcviii. 23).

Kinneret was one of the five fortified cities which fell to the lot of Naphtali (Josh. xix. 35). It is mentioned after Rakkath, which is identified in the Talmud with Tiberias (Yer. Meg. i. 1). Genusar as an inhabited place is also mentioned in Yer. Ma'as. i. 2 and in Tosef., Kelim, B. B. v. 6; but, as it appears from another Talmudic passage, the ancient town was no longer in existence in Talmudic times, and the name "Genusar" was applied to the forts Bet-Yeraḥ and Sinnabri, which had protected it: on account of this the plural "Kinnerot" is met with (Yer. Meg. i. 1; Gen. R. *l.c.*).

GENOA (גינובה): An important Italian seaport on the Gulf of Genoa; also a former republic of the same name. It is very probable that even before the destruction of the Second Temple Jews from Rome settled in Genoa and took part in its commerce. The first authentic record of Jews in Genoa, however, is contained in two letters of the emperor Theodoric (fifth century) given by Cassiodorus, and referring to a synagogue and to previous grants. The Jews in Genoa suffered, although not as much as their coreligionists in northern lands, at the hands of the Crusaders, who found the large seaport a convenient gathering-place. In 1134 a special tax was levied upon the Genoese Jews to provide oil for the altars of Christian churches. Shortly afterward they were either driven out or else emigrated voluntarily in consequence of organized persecutions. Benjamin of Tudela, who passed through Genoa about 1165, found only two Jews residing there. It is certain that, later, Jews were forbidden to remain longer than three days in Genoa. This prohibition still existed in 1492. At that time many exiles from Spain landed at the port and begged permission to stay long enough to repair their ships, which had suffered heavy damage, and to recuperate from the voyage. The unfortunate fugitives presented a pitiful appearance. "And while they were making their preparations to journey farther, winter came on, and many died on the wharves." Such was the account given by Bartolomeo Senarega, secretary to the republic, and his report confirms a description given by Joseph ha-Kohen in his "'Emek ha-Baka" (ed. Letteris, p. 85). The Genoese doubtless felt pity for the persecuted exiles, but commercial jealousy and religious fanaticism, increased by the sermons of Bernardino da Feltre, caused the repeal of the permission for a temporary stay in the harbor, which had been obtained with such difficulty in 1492. In the hope of converting them the Jews were later granted shelter and support again, but only one single case of conversion resulted. Twenty-one of the families which landed in Genoa were allowed to settle in Ferrara.

Middle Ages.

The number of Jews that came to Genoa increased with the spread of persecutions in Portugal, so that at the beginning of the sixteenth century a special office was established in Genoa, "Ufficio per gli Ebrei." The wearing of a badge was ordered, and the prohibition to reside in Genoa was renewed under penalty of a large fine, of imprisonment, and even of being sold into slavery. Only wholesale merchants and physicians holding papal permits were exempt from these acts of oppression, and an attempt was made to prevent even them from settling in the city. Nevertheless, petitions for permission to settle became more and more numerous, and in 1550 a number of Jews obtained the right of free residence and of free commerce for several years; even the wearing of the badge and the seclusion in a ghetto were abolished. Such privileges were renewed in 1578, 1582, and 1586, but only for a few years. In 1587 the wearing of the yellow badge was restored, but at the petition of the Jews again abolished.

Banished in 1598.

The combined hostility of the clergy and of the Inquisition brought about a new decree of banishment Jan. 8, 1598; but individual Jews still remained in the city. They were compelled to wear the Jewish badge, but by paying a certain sum could buy the privilege of discarding it. Commercial considerations in general demanded a milder treatment of the Jews, and in the free harbor law of 1648 and 1658 the Jews were again recognized, and special regulations were made for importing their goods. The Inquisition considered this treatment too lenient, and called forth a similar expression of opinion from the Holy Office at Rome. Although the republic at first refused to listen to these complaints, it was nevertheless compelled in 1659 to make new and oppressive regulations concerning the Jews, and their right of residence was limited to ten years. The Jews from Spain and Portugal were glad to be received anywhere under any conditions, and hence new arrivals submitted to the new regulations. Land for a ghetto was granted in 1660, and there a synagogue was built. The ghetto had two iron gates, which remained closed from sunset until morning. The number of the Jews at that time amounted to about 700; among them were many prosperous merchants, who, owing to the importance of their business, received better treatment and were allowed to live outside the ghetto. All Jews, however, were obliged to attend Christian sermons during Lent, a compulsion which was felt to be the deepest humiliation; on these occasions, besides being reviled by the preacher, they met with insults and even acts of violence on the part of the mob.

The Ghetto.

At the end of the ten years (1669) an attempt was made to drive the Jews out again, under all sorts of pretexts. The Senate opposed this, and in 1674 obtained an extension of the right of residence for ten years more, under a new charter and in a different part of the city. But the rules were too severe, and especially the attendance at the sermons was felt to

be so degrading that the Jews rebelled, and in 1679 were all driven from the city. As before, Jews were later allowed to settle there again singly and only for a limited time. Even that privilege was abolished by a decree of banishment in 1752. However, only the poor were affected by the decree; the rich remained and were even favorably regarded on account of their acknowledged importance for the commerce of the republic. Through their influence a new charter was drawn up in 1752 upon fairly liberal terms, and the opposition of Pope Benedict XIV. remained without effect. The Senate at that time was very friendly to the Jews; it recognized the advantages they might bring to the city, the more so as it saw with regret how the neighboring port of Leghorn, where Jews enjoyed the most extensive liberties, was flourishing and injuring the commerce of Genoa. The Jews, however, had recognized the indecisive nature of this favor and kept at a distance from Genoa. Not until toward the end of the eighteenth century did they establish large commercial houses there. Their legal status remained precarious and rested upon the personal tolerance of the mercantile class, not upon the firm basis of the law; and it was not until 1848, when the constitution of the kingdom of Sardinia was promulgated, that the Jews received the full rights of citizenship, and there still exists among the population a feeling of animosity against them, which is due to clerical leaning.

Emancipation.

Since 1848 the community has steadily increased; in 1901 it numbered about 1,000 souls. The Jews have taken a large share in the flourishing commerce of Genoa, while the commerce of Leghorn has almost ceased, and a large proportion of its Jewish community has emigrated to the former city. In consequence of this influx from Leghorn the ritual of the Sephardim has been introduced into the only synagogue of Genoa. The community possesses a school for religious instruction, a good library, and a very good charitable organization. There is little to be said concerning the scholars and rabbis who lived and labored in Genoa, for their number was small and their existence precarious. Judah Abravanel (Leo Hebræus) practised medicine there. The historian Joseph ha-Kohen lived there with his parents and family from 1501 until 1547, when he was exiled in spite of the intercession of his patients. Two rabbis are mentioned as residing in the city in 1680, Abitur Abba Mari and Abraham Zarfati. In the latter part of the nineteenth century Felice Finzi was the rabbi of the community; since his death the post has been vacant.

In 1516 the "Psalterium Octaplum" was printed in Genoa at the press of Nicolaus Giustiniani; this is celebrated because it contains the history of Columbus' discovery of America in the scholia to Psalm xix.

D.

GENTILE: A word of Latin origin (from "gens"; "gentilis"), designating a people not Jewish, commonly applied to non-Jews. The term is said (but falsely so) to imply inferiority and to express contempt. If used at all by Jews of modern times—many of them avoiding it altogether, preferring to speak of "non-Jews"—this construction of its implications must certainly be abandoned as contrary to truth. The word "Gentile" corresponds to the late Hebrew "goi," a synonym for "nokri," signifying "stranger," "non-Jew." In the Hebrew of the Bible "goi" and its plural "goyyim" originally meant "nation," and were applied both to Israelites and to non-Israelites (Gen. xii. 2, xvii. 20; Ex. xiii. 3, xxxii. 10; Deut. iv. 7; viii. 9, 14; Num. xiv. 12; Isa. i. 4, lx. 22; Jer. vii. 28). "Goi" and "goyyim," however, are employed in many passages to designate nations that are politically distinct from Israel (Deut. xv. 6; xxviii. 12, 36; Josh. xxiii. 4). From this use is derived the meaning "stranger" (Deut. xxix. 24; comp. II Chron. vi. 32 = "'amme ha-'arez"). As the non-Israelite and the nokri were "heathens," "goi" came to denote a "heathen," like the later "'akkum," which, in strict construction, is not applicable to Christians or Mohammedans (see below). In its most comprehensive sense "goi" corresponds to the other late term, "ummot ha-'olam" (the peoples of the world).

Meaning of the Term.

Toward idolatry and the immoralities therewith connected, the Biblical writings display passionate intolerance. As the aboriginal population of Canaan was the stumbling-block for Israel, constantly exposed to the danger of being contaminated by Canaanitish idolatrous practises, the seven "goyyim," *i.e.*, nations (Deut. vii. 1, xii. 2), were to be treated with but little mercy; and, more especially, marriages with them were not to be tolerated (Deut. vii. 3; comp. Ex. xxxiv. 16). Notwithstanding this prohibition, mention is made of marriages with non-Hebrews of other stock than the seven nations enumerated (Ruth i. 4; II Sam. iii. 3; I Kings vii. 14, xiv. 21; I Chron. ii. 34), and even of marriages in direct contravention of the prohibitive law (Judges iii. 6; II Sam. xi. 3; I Kings xi. 1 *et seq.*, xvi. 31). This proves that the animosity against non-Hebrews, or "goyyim," assumed to have been dominant in Biblical times among the Hebrews, was by no means intense. The caution against adopting the "ḥukḳot ha-goyyim" (Lev. xviii. 2), and the aversion to the customs of "the nations," rest on the recognition of the morally pernicious character of the rites indulged in by the Canaanitish heathens.

The "stranger," whether merely a visitor ("ger") or a resident ("ger toshab"), was placed under the protection of the Law, though possibly a distinction was made between the transient and the permanent stranger; from the former, for instance, interest could be taken and a debt was collectable even in the Year of Release. But God was said to love the stranger (Deut. x. 18; Ps. cxlvi. 9). The native-born was required to love him (Lev. xix. 33-34). Recourse to the courts was open to him (Ex. xxii. 21, xxiii. 9; Deut. xxiv. 17, xxvii. 19). "One law and one statute" was to apply to native and stranger alike (Lev. xxiv. 22; Num. ix. 14; xv. 16, 29; Ex. xii. 49). But of the stranger it was expected that

he would forego the worship of idols (Lev. xx. 2; Ezek. xiv. 7) and the practise of sorcery, incest, or other abominations (Lev. xviii. 26), and that he would refrain from eating blood (Lev. xvii. 10), from working on Sabbath (Ex. xx. 10, xxiii. 12), from eating leavened bread on Pesaḥ (Ex. xii. 19), and from violating Yom ha-Kippurim (Lev. xvi. 29). For other provisions concerning the stranger, or non-Jew ("goi"), see Lev. xvii. 8; xxiv. 16, 22; Num. xv. 14, xxxv. 15; Deut. xiv. 21; xvi. 11, 14).

The "Stranger."

Restrictions in the matter of the reception of strangers (see PROSELYTE AND PROSELYTISM) were made in the case of (1) Edomites and Egyptians, who were entitled to acceptance only in the fourth generation, *i.e.*, the third from the original immigrant; and (2) Ammonites and Moabites. These latter two were put on a level with persons of illegitimate birth, and were therefore excluded from "the congregation of the Lord forever" (Deut. xxiii. *et seq.*; compare the American anti-Chinese legislation).

The strangers, *i.e.*, the goyyim, enjoyed all the benefits of the poor-laws (see Deut. xiv. 28, xxvi. 11; comp. Job i. 7); and the Prophets frequently enjoin kindness toward the non-Israelite (Jer. vii. 6, xxii. 3; Ezek. xxii. 7; Zech. vii. 10; Mal. iii. 5; comp. Ps. xciv. 6).

Non-Israelites figure in the Bible as exemplars of fidelity (see ELIEZER), devotion (RUTH), and piety (JOB); and Deutero-Isaiah's welcome and promise to the "sons of the stranger" (Isa. lvi. 3–6; comp. Ezek. xlvii. 22) likewise betoken the very opposite of the spirit of haughty exclusiveness and contempt for the non-Israelite said to be characteristic of the Jew and of Judaism.

Under Ezra and Nehemiah, it is true, rigorous measures were proposed to insure the purity of the holy seed of Abraham (Neh. ix. 2; xiii. 3, 23; Ezra ix. 2 *et seq.*, x. 3); but the necessities of the situation justified the narrower policy in this case.

In pre-exilic times the intercourse between Israelites and non-Israelites (non-Canaanites) was not very active or extensive, and non-Israelites (Egyptians, Assyrians, Babylonians) always appeared as enemies. But the Exile brought Israel into closer contact with non-Israel. If the conclusions of the critical schools are accepted, according to which the opening chapters of Genesis date from this period, the fact that Israel posits at the beginning of history the unity of all humanity should give pause to the ascription to Judaism of hostility toward the Gentile majority of humanity. The books of Ruth and Jonah are also documentary proof that the Hebrew racialism of Ezra met with strenuous opposition. Greeks, Syrians, and Romans, the peoples with whom post-exilic Israel had incisive relations, were not animated by a spirit apt to engender in the Jew a responsive sentiment of regard. Nor were their morals ("ḥukḳot ha-goyyim") such as to allay the apprehension of faithful Jews as to the probable results of contact. The Maccabean revolution, the struggle against Hellenism, the rise against Rome under both Titus and Hadrian, are the historical background to the opinions expressed concerning non-Jews and the enactments adopted against them. Yet withal, both relatively —by comparison with the attitude of the Greek world toward the non-Greek (barbarian), or with the Roman treatment of the non-Romans (the "pagani") —and absolutely, the sentiments of the Jew toward the non-Jew were superior to the general moral and mental atmosphere. The ESSENES certainly represent the cosmopolitan and broadly humanitarian tendencies of Judaism; and as for the PHARISEES, their contempt for the Gentile was not deeper than their contempt for the Jewish 'AM HA-AREẒ (the unlearned, suspected always of laxity in religious duty). The golden rule is Pharisaic doctrine (comp. Ab. R. N., Recension B, xxvi., xxix., xxx., xxxiii.).

Judaism Not Hostile to Gentiles.

In judging the halakic enactments one must keep in mind not merely the situation of the Jews—engaged in a bitter struggle for self-preservation and exposed to all sorts of treachery and suffering from persecution—but also the distinction between law and equity. The law can not and does not recognize the right of demented persons, minors, or aliens to hold property. Even modern statutes are based on this principle; *e.g.*, in the state of Illinois, U. S. A., an alien can not inherit real estate. But what the law denies, equity confers. The Talmudic phrase "mi-pene darke shalom" ("on account of the ways of peace"; see below) is the equivalent of the modern "in equity."

How the views of the Tannaim concerning Gentiles were influenced largely by their own personal temper and the conditions of their age, is apparent from an analysis of the discussion on the meaning of Prov. xiv. 34, of which two versions are found: one in Pesiḳ. 12b; the other in a baraita in B. B. 10b. According to the former, Eliezer, Joshua, and Eleazar b. 'Arak, under their master Johanan ben Zakkai; and Gamaliel, a certain Abin b. Judah, and Neḥunya ben ha-Ḳana are the participants. In the latter version, Eliezer, Joshua, Gamaliel, Eleazar of Modi'im, and Neḥunya ben ha-Ḳana are mentioned. It is probable that two distinct discussions, one under Johanan ben Zakkai and the other under Gamaliel, were combined, and the names and opinions confounded (see Bacher, "Ag. Tan." i. 38, note). This, however, is immaterial, in view of the fact that each of the men quoted gives a different interpretation; the truly humane one by Neḥunya (in the Pesiḳta, by Eleazar ben 'Arak) alone meeting with the approval of the master. According to R. Eliezer, the maxim "Love, benevolence ["ḥesed"] exalteth a nation" refers to Israel; while whatever charity the Gentiles practise is really sinful, the motive being self-glorification. Joshua is of the same opinion, alleging that whatever charitable action the Gentiles do is done to extend their kingdom. Gamaliel also expresses himself to the same effect, adding that the Gentiles, by their impure motive, incur the penalty of Gehenna. Eleazar of Modi'im sides with him, saying that "the Gentiles practise benevolence merely to taunt Israel." But Neḥunya ben ha-Ḳana (in the Pesiḳta, Eleazar ben 'Arak) interprets the maxim as follows: "Righteousness exalteth a nation; for benevolence both for Israel and for the Gentiles is a sin-offering." The

Tannaitic Views of Gentiles.

master, approving this construction, explains that, in his view, the passage teaches that as the sin-offering works atonement for Israel, so does benevolence for the Gentiles.

The following anthology of haggadic observations on non-Israelites or Gentiles is arranged chronologically, as it is essential that the time-element be kept in view and that the opinions of one tanna be not taken as those of the Talmud.

Gamaliel II.

Of Gamaliel II. is recorded a conversation with two pseudo-proselyte generals, who, being sent to investigate Jewish practises, take exception only to the provision permitting to a Jew the use of property stolen from a non-Jew (Sifre, Deut. 344; B. Ḳ. 38a—the law which, in regard to the damage done by a goring ox, does not put Jew and Gentile on an equal footing). In Yer. B. Ḳ. 4b they censure also the prohibition of Jewish women from attending non-Jewish women as midwives and nurses. Gamaliel is reported to have repealed the obnoxious law on the use of stolen property (see Grätz in "Monatsschrift," 1881, p. 493).

Eliezer b. Hyrcanus is less tolerant. According to him, the mind of every non-Jew is always intent upon idolatry (Giṭ. 45b). The cattle of a heathen is unfit for sacrifices ('Ab. Zarah 23b). Explaining Prov. xiv. 34, he maintains that the non-Jews only practise charity in order to make for themselves a name (B. B. 10b; Pesiḳ. 12b; Gamaliel is credited with the same opinion in B. B. 10b). The persecutions which, at the instigation of Judæo-Christians, Eliezer had suffered at the hands of the Romans may explain his attitude, as well as his opinion that the Gentiles have no share in the life to come (Tosef., Sanh. xiii. 2; Sanh. 105a). He nevertheless cites the example of a non-Jew, Dama b. Netina, as illustrative of the command to honor father and mother (Ḳid. 31a; 'Ab. Zarah 23b; comp. Yer. Peah 15c; Ḳid. 61b; Pesiḳ. R. xxiii.).

Joshua b. Hananiah, contrary to Eliezer b. Hyrcanus, contends that there are righteous men among the Gentiles, and that these will enter the world to come (Tosef., Sanh. xiii. 2), though as a rule Gentiles cling to vain things and are rejected (Prov. xxviii. 19; Gen. R. lxxxii.). He excludes the descendants of Amalek from the Messianic kingdom (Sifre, Deut. 310; Mek., Yitro, 57a); while all other Gentiles will adopt monotheism ('Ab. Zarah 24a; comp. Pesiḳ. 28b). He is of the decided opinion that Gentiles (heathen) may lead a righteous life and thus escape Gehenna (see Zunz, "G. V." p. 269, note d; Bacher, "Ag. Tan." i. 159). It is also reported of Joshua b. Hananiah that in a dialogue with the emperor Hadrian—who insisted that, as God's name was not mentioned in those parts of the Decalogue addressed to all men, the Gentiles were preferred, Israel being threatened with greater punishments—he controverted that monarch's conclusions by means of an illustration not very complimentary to the Gentiles (Pesiḳ. R. xxi.).

Eleazar of Modi'im, in reference to Micah iv. 5, explains that Israel, though guilty of the same sins as the Gentiles, will not enter hell, while the Gentiles will (Cant. R. ii. 1). In another of his homilies, however, he speaks of the joy with which the Gentiles blessed Israel for having accepted the Decalogue (Zeb. 116a). On the whole, he is very bitter in his condemnations of the heathen. "They profit by their deeds of love and benevolence to slander Israel" (referring to Jer. xl. 3; B. B. 10a).

Eleazar ben Azariah maintains, on the basis of Ex. xxi. 1, that a judgment rendered by a non-Jewish (Roman) court is not valid for a Jew (Mek., Mishpaṭim). There is also recorded a high tribute which he paid to a heathen servant, Ṭabi, who was so worthy that Eleazar declares he felt that he himself ought to be the servant (Midr. Mishle to Prov. ix. 2).

Ishmael ben Elisha used to reply to the heathen's benedictions and imprecations: "The word befitting you has long since been uttered." Asked for an explanation, he referred to Gen. xxvii. 29 (Hebr.): "Those that curse thee shall be cursed; those that bless thee shall be blessed" (Gen. R. lxvi.). In order to protect Jews he would decide in their favor, using the non-Jewish or the Jewish code as suited the occasion (Sifre, Deut. 16; in B. Ḳ. 113a this is given as a prescription of his for others to follow, against which Akiba, recognizing that this would be a profanation of God's name, protests "mi-pene ḳiddush ha-Shem").

Akiba.

Akiba, like Hillel, declared the command to love one's neighbor as oneself (Lev. xix. 18) to be the fundamental proposition of religion (Sifra, Ḳedoshim, ed. Weiss, p. 89a; Yer. Ned. 41c; Gen. R. xxiv.; comp. Ab. iii. 14; Ab. R. N. xxxix.). Robbery of which a Gentile is the victim is robbery (B. B. 113a). For his opinion of the non-Jewish peoples, the "Dialogue Between Israel and the Gentiles" is characteristic (Mek., Beshallaḥ, ed. Weiss, p. 44b; Sifre, Deut. 343; Cant. R. i. 3, v. 9, vi. 1). In another dialogue, Israel's monotheism is shown to be far superior to the ever-changing belief of the Gentiles (Mek., Yitro, x.). His contempt for the folly of idolatry as practised by the Romans is apparent in his conversation with Rufus, in which he compares the gods to dogs (Tan. Terumah, ed. Stettin, p. 139; comp. Grätz, "Gesch." iv. 447).

Among Akiba's disciples Tarphon is noted for his antipathy to the Judæo-Christians, whose books he would burn without regard for the name of God occurring therein, preferring the temple of idolaters to them (Shab. 116a).

Jose the Galilean rebukes Israel for its inconstancy, which he contrasts with the fidelity shown by the Gentiles to their ancestral beliefs (Sifre, Deut. 87). The good done by Gentiles is rewarded (see Gen. xxiii. 5; Sifra, Aḥare Mot, 85b).

Judah ben Baba holds that by the customs of the heathen forbidden in Lev. xviii. 3 were meant the cosmetic arts (Sifra, 86a; see commentary of Abraham ben David *ad loc.*; comp. Tosef., Soṭah, xv. 9; Shab. 62b).

The warning against the practises of the heathen in Lev. xviii. 3 is interpreted by R. Meïr (Sifra, 85b) to refer to the superstitions "of the Amorites" (enumerated in Shab. 67a; comp. Mishnah vi., last section). He would not permit Jews to visit the theaters (arenas) of the Gentiles, because blood is spilled and idols are worshiped there (Tosef., 'Ab. Zarah, ii. 5; 'Ab. Zarah 18b; Yer. Sanh. 40a; Ab. R. N. xxi.). Intolerant of idolatry ('Ab. Zarah i. 5, 8; ii. 2, 4; iii. 1; Blumenthal, "Rabbi Meïr," pp. 82 *et seq.*), it was Meïr who insisted that in Lev. xviii. 5 the word "man," not "priest," "Levite," or "Israelite," occurs, and thus claimed that a non-Jew versed in the Torah equals in rank the high priest (B. Ḳ. 38a; Sanh. 59a; Sifra, 86b, where II Sam. vii. 19 ["ha-adam"]; Isa. xxvi. 2, "goi ẓaddiḳ"; Ps. xxxiii. 1, "ẓaddiḳim," and cxxv. 4, "le-ṭobim," are similarly applied to Gentile and Jew alike). He was on a footing of intimacy with the Gentile philosopher Euonymos of Gadara (Grätz, *l.c.* iv. 469).

R. Meïr.

In an anecdote, significant as indicating the freedom of intercourse between Jew and Gentile, Meïr illustrates the cynic materialism of a rich heathen who, angry at the lack of a trifle at his banquet, which offered "whatever was created in six days," broke a rich plate; pleading that, as the world to come was for Israel, he had to look to this world for his pleasures (Pesiḳ. 59b; Num. R. xxi.). Meïr has a conversation with a "hegemon," who expresses his contempt of Israel, calling the Israelites slaves; whereupon Meïr shows that Israel is a wayward son, always finding, if ready to repent, the father's house open (Jellinek, "B. H." i. 21). This anecdote, also, is significant as showing the sentiments of the Gentiles toward the Jews.

Simon ben Yoḥai is preeminently the anti-Gentile teacher. In a collection of three sayings of his, beginning with the keyword אמר (Yer. Ḳid. 66c; Massek. Soferim xv. 10; Mek., Beshallaḥ, 27a; Tan., Wayera, ed. Buber, 20), is found the expression, often quoted by anti-Semites, "Ṭob shebe-goyyim harog" (="The best among the Gentiles deserves to be killed"). This utterance has been felt by Jews to be due to an exaggerated antipathy on the part of a fanatic whose life experiences may furnish an explanation for his animosity; hence in the various versions the reading has been altered, "The best among the Egyptians" being generally substituted. In the connection in which it stands, the import of this observation is similar to that of the two others: "The most pious woman is addicted to sorcery"; "The best of snakes ought to have its head crushed" (comp. the saying, "Scratch a Russian and you will find a Tartar").

On the basis of Hab. iii. 6, Simon b. Yoḥai argued that, of all the nations, Israel alone was worthy to receive the Law (Lev. R. xiii.). The Gentiles, according to him, would not observe the seven laws given to the Noachidæ (Tosef., Soṭah, viii. 7; Soṭah 35b), though the Law was written on the altar (Deut. xxvi. 8) in the seventy languages. Hence, while Israel is like the patient ass, the Gentiles resemble the easy-going, selfish dog (Lev. R. xiii.; Sifre, Deut., Wezot ha-Berakah, 343). Yet Simon speaks of the friendly reception given to Gentiles (Sifre, Deut. 1). The idols were called "elilim" to indicate that "wo [אין] is them that worship them" (Jellinek, *l.c.* v. 78). Simon b. Yoḥai insists upon the destruction of idols, but in a different manner from that proposed by others ('Ab. Zarah iii. 3; 'Ab. Zarah 43b). He extends to Gentiles the prohibition against sorcery in Deut. xviii. 10 *et seq.* (Tosef., 'Ab. Zarah, viii. 6; Sanh. 55b).

Judah ben 'Illai recommends the daily recital of the benediction, "Blessed be Thou . . . who hast not made me a goi" (Tosef., Ber. vii. 18; Men. 43b, sometimes ascribed to Meïr; see Weiss, "Dor," ii. 137). Judah is confident that the heathen (Gentiles) will ultimately come to shame (Isa. lxvi. 5; B. M. 33b).

The Gentiles took copies of the Torah, and yet did not accept it (Soṭah 35b).

Eliezer, the son of Jose the Galilean, calls the Gentiles poor "goyyim dawim," because they would not accept the Torah (Mek., Yitro, 62a), referring to Hab. iii. 6 and Ps. cxlvii. 20.

Joshua ben Ḳarḥa is reported to have answered the accusation—still repeated in modern anti-Semitic literature—that Israel refuses to celebrate the festivals of the Gentiles—by showing that nature's bounties bring joy to all men alike (Gen. R. xiii.).

Simon ben Gamaliel II. is the author of the saying that strict justice shall be done the Gentile, who shall elect whether he shall be tried according to the Jewish or the Gentile code (Sifre, Deut. 16).

Josiah holds that every idolatrous heathen is an enemy of Israel (Mek., Mishpaṭim, 99a).

Jonathan insists that eclipses are of bad augury for Gentiles only, according to Jer. x. 2 (Mek., Bo, 19b).

According to Hananiah b. Akabia the word רֵעֵהוּ (Ex. xxi. 14) may perhaps exclude the Gentile; but the shedding of the blood of non-Israelites, while not cognizable by human courts, will be punished by the heavenly tribunal (Mek., Mishpaṭim, 80b).

Why Gentile circuses and theaters continued while the Temple was in ruins, was a perplexing problem for many a pious Jew. Nehorai learns from Elijah that this is the cause of earthquakes (Yer. Ber. 13c; Midr. Teh. to Ps. xviii. 8).

Jacob, the grandson of Elisha ben Abuya, reports having seen a heathen bind his father and throw him to his dog as food (Sifre, Deut. 81).

Simon ben Eleazar does not favor the social amenities (*e.g.*, invitations to wedding-feasts) between Gentiles and Jews (Tosef., 'Ab. Zarah, iv. 6; Ab. R. N. xxvi.; 'Ab. Zarah 8a), referring to Ex. xxxiv. 16.

According to Judah ha-Nasi, the word "goyyim" designates the nations that subjected Israel, while "ummim" denotes those that did not. Both must praise the God of Israel (Midr. Teh. to Ps. cxvii. 1).

Phinehas ben Jair prohibits the appropriation of an object lost by a non-Jew, as this is tantamount to desecrating God's name (B. Ḳ. 113b).

Simon ben Jose likens Israel to a stone, and the Gentiles to a potsherd (Isa. xxx. 14), applying the proverb: "If the stone falls on the pot, wo to the pot; if the pot falls on the stone, wo to the pot." This he offered as a consolation to persecuted Israel (Esther R. iii. 6).

Antigonus complains of the cruelty of the non-Jews toward Israel (Mek., Beshallaḥ, 27a; but see Bacher, "Ag. Tan." ii. 331, note 2).

With regard to the attitude of the Palestinian amoraim toward Gentiles the following facts may be stated:

Views of the Amoraim.

That antipathy was due to idolatry itself and not to the fact that idolaters were of non-Jewish stock, appears from Ḥanina bar Ḥama's discussion with Jonathan b. Eleazar of the question whether one should take a road passing by a temple of idols or one passing through a disreputable district, in which the decision was given in favor of the latter ('Ab. Zarah 17a, b). It was also this amora who ascribed moral sanctity to the marriages of non-Jews (Noachidæ; Yer. Sanh. 58c), though he himself witnessed gross immoralities perpetrated by non-Jews ('Ab. Zarah 22b). Yet he is credited with the opinion that during the Messianic time only the heathen will be subject to death (Gen. R. xxvi.).

Hezekiah b. Ḥiyya deduces from II Kings xx. 18 that he who shows hospitality to a heathen brings the penalty of exile upon his own children (Sanh. 104a).

Some of the parables of Joshua b. Levi illustrate strikingly the reciprocal feelings entertained in his day between Jews and Gentiles. The latter accused the former of being descended from illegitimate compulsory connection between their female ancestors and the Egyptians (Pesiḳ. 82b); the Jews, in turn, likened the Romans to dogs (referring to Isa. lvi. 11; Midr. Teh. to Ps. iv. 8; comp. Matt. xv. 26; Mark vii. 27; Bacher, "Ag. Pal. Amor." i. 146-147). That Joshua had objections only to the Jews following the evil practises of the Gentiles, is evidenced by his comments on Ezek. v. 7, xi. 12 (Sanh. 39b), in which he points out that Israel deserved censure for rejecting the good customs as well as for adopting the evil ones of the nations ("Ye have not done according to the approved among them ["ke-metuḳḳanim she-bahem"], but we have done according to the corrupt ones ["ke-meḳulḳalim she-bahem"]"). His liberality is also attested in his legendary visits to paradise and hell for the purpose of ascertaining whether non-Jews were to be found in the former (Jellinek, *l.c.* ii. 48-51).

Johanan.

Johanan bar Nappaḥa complains of the insults and injuries offered by Gentiles to his people (referring to Lam. iii. 21; Pes. 139b; Cant. R. ii. 14; Ex. R. xxi.). He lays stress on the fact that God offered the Law to all nations, who refused to accept it ('Ab. Zarah 2b); therefore while the virus of lust that the serpent injected into Eve was neutralized in Israel, the "nations of the world" still have it in their blood (Shab. 145b; Yeb. 103b; 'Ab. Zarah 22b). "The wise among the heathen is called and must be honored as a wise man" (Meg. 16a), is one of Johanan's sayings, though he is also the author of another which holds that, as the Torah was given as a heritage to Israel, a non-Israelite deserves death if he studies it (Sanh. 59a). Notwithstanding all this, he maintains that Gentiles outside of Palestine are not to be regarded as idolaters, but as observers of their ancestral customs (Ḥul. 13b). Significant of the attitude of the Gentiles toward the Jews in his day is his observation that when a Gentile touches the pot placed on the common hearth by a Jew, the latter does not deem it rendered unclean; but that as soon as a Jew touches the pot of the Gentile, the latter shouts "Unclean!" (Esther R. ii. 3). Under certain circumstances, Johanan permitted the eating of food prepared by Gentiles (Yeb. 46a). His also is the maxim, "Whosoever abandons idolatry is called 'Jew'" (Meg. 13a).

Resh Laḳish prohibited the use of water which had been revered by heathens; but he had to recall his decision ('Ab. Zarah 58b; comp. Yer. Sheb. 38b, c, concerning a public bath in which was a statue of Aphrodite).

Eleazar ben Pedat observes that the suggestion of intermarriage always comes from the Gentile side: "Never does an Israelite put his finger into the mouth of a non-Israelite, unless the latter has first put his into the mouth of the Israelite" (Gen. R. lxxx.). According to Eleazar, the Jew and not the heathen is bound to sanctify God's name (Yer. Sheb. 35a). Murders committed by Gentiles are recorded by God on His own cloak in order that He may have authentic proof of their atrocities (Midr. Teh. to Ps. ix. 13).

Abbahu.

Abbahu calls attention to the fact that the Gentiles as well as Israel were offered the Torah (Pesiḳ. 200a; Tan., Berakah, 3). He complains also of the insults to which Jews are exposed in the theaters of the Gentiles (Proem 17 to Lam. R.) by Gentile actors and attendants. He indorsed the law (B. Ḳ. iv. 3) according to which a Gentile whose ox had been gored by the ox of a Jew was not entitled to damages (B. Ḳ. 32a).

Assi is the author of the injunction not to instruct the Gentile in the Torah (Ḥag. 13a).

Isaac Nappaḥa is the author of some parables in which Israel is exalted to offset the slanders of the Gentiles; and the latter, in turn, are spoken of in terms of contumely (Bacher, "Ag. Pal. Amor." ii. 291).

Levi enumerates six commandments (prohibitions of polytheism and of blasphemy; the institution of courts of justice; prohibitions of shedding of blood, of incest, and of robbery) which are binding upon all men (Gen. R. xvi.; Midr. Teh. to Ps. i. 10; the "Torat Adonai" is said to consist of these universal laws; so that to be the "happy" man of whom the psalm speaks one need not necessarily be a Jew). Levi is, however, very severe in his reflections on the morality of the Gentiles (Cant. R. to vi. 8; see Bacher, *l.c.* p. 329, note 7). Levi claims that the injunction not to take revenge (Lev. xix. 18) does not apply to Gentiles (Eccl. R. viii. 4).

'Abba b. Kahana protests, in an explanation of Ruth iv. 16, against racial arrogance on the part of Israel (Ruth R. viii.).

Jonah and Jose permitted the baking of bread for the Roman soldiers on Sabbath-day (Yer. Sheb. 35a; Yer. Sanh. 21b; comp. Yer. Beẓah 60c). Yet they would not permit the use of a scroll partially burned in a conflagration caused by these same soldiers.

Judan applies the proverb, "A fat animal becomes lean; but a lean one has to give up the ghost," to Israel's maltreatment on the part of the Gentiles (Lam. R. iii. 20).

Phinehas b. Ḥama calls attention to the fact that Israel on Sukkot offered seventy heifers for all the nations, and prayed for them, applying the verse (Ps. cix. 4), "On account of my love they attack me" (Pes. 193b). Other stories of his bring out the fact that in his day the Jews were not liked by their Gentile neighbors (Yer. Peah 16d; Lam. R. i. 11; comp. Josephus, "B. J." iii. 2, § 2).

Abin testifies that Israel was called by others "stubborn" and "stiff-necked" (Ex. R. xlii.; אומה של קשה עֹרף).

Tanḥuma enjoins that if one is greeted by a Gentile with the salutation of peace or a blessing, one should answer "Amen!"

(אם בירכך גוי ענה אחריו אמן; Yer. Ber. 12c; Yer. Suk. 54a; Yer. Meg. 72a), though he likens the nations to wolves and Israel to a lamb (Pesiḳ. R. ix. [ed. Friedmann, p. 32a]).

The Babylonian Amoraim advert but rarely to the relations of the Israelites to the Gentiles; and, while on the whole their haggadic interpretations are less numerous than those of the Palestinian schools, the paucity of their comments on Gentiles is noteworthy as illustrative of the fact that the typical Gentile against whom rabbinical animosity was directed was the depraved Roman. According to Rab, the Saturnalia and the Calends originated with Adam, and were based on purely human sentiments ('Ab. Zarah 8a; Yer. 'Ab. Zarah 39c), a view certainly betokening tolerance for pagan customs. Similarly does Rab recognize the chastity of non-Jewish women, as is shown by his story of the Gentile woman who when sick was willing to serve any idol in order to be cured, but who upon coming to the temple of Baal-peor preferred to remain sick rather than to take part in the worship of that god (Sanh. 64a). It is the immorality of idolatry that more especially strikes him (Sanh. 63b). The moral purpose of the Torah for all men (לצרף בהן את הבריות; Lev. R. xiii.) is one of his themes. His ethical maxims are addressed as a rule to man and not to the Jew (Sanh. 107a).

Views of Babylonian Amoraim.

Cruelty to one's fellow men marks one a non-Abrahamite (Beẓah 32b). Hospitality like Abraham's—*i.e.*, to all men—Rab commends highly (Shab. 127a; Shebu. 35b; B. M. 86b). For him the Persian empire represented the typical antipode of piety and justice. Hence his saying (in opposition to Samuel), "Guilty of death is he that learns anything from a Magian [Persian]" (Shab. 116b); and the following: "Rather under the Romans than under the Persians" (*ib.* 11a).

Mar 'Uḳba, on the other hand, regards Rome as one of the two daughters of Hell (Prov. xxx. 15), the other being Apostasy or Heresy ('Ab. Zarah 17a).

Samuel, for whom the only distinction of the Messianic age is the absence of the subjugation of Israel by Gentile powers, makes no difference between Israel and the nations as far as God's judgment is concerned (Yer. R. H. 57a).

Judah's benediction of the trees in springtide is characteristic of his broad spirit, since he praises God for thus delighting the "sons of man," not the Israelite alone (Ber. 43b; R. H. 11a).

Naḥman bar Jacob, finally, forbids every kind of irony and taunt except such as are directed against the idolatry of the non-Jews prevailing in his day (Meg. 28b; Sanh. 63b).

BIBLIOGRAPHY: Bacher, *Ag. Pal. Amor.*; idem, *Ag. Bab. Amor.*; idem, *Ag. Tan.*

E. C. E. G. H.

——In Relation to Jews: In rabbinic literature, owing to the censor's overvigilance and ignorance, the term "Gentile" is often erroneously identified with "Kuti" (= "Samaritan"), "Egyptian," "Amalek," etc., and in rare instances is misplaced for "Noẓri" = "Christian." Thus the censor's zeal to protect "the faith" had the effect of characterizing the Christian as a heathen, which was far from the authors' intention (see "Paḥad Yiẓḥaḳ," גוי, p. 7a). As a rule the Talmud, especially the Mishnah, speaks of the Gentiles who dwelt in Palestine under the Jewish government, either as idolaters or as domiciled aliens ("ger toshab"), bound to observe the seven moral commandments given to Noah's descendants: namely, against (1) idolatry, (2) incest, (3) homicide, (4) robbery, (5) eating limbs of live animals, (6) castration, and (7) the mixing of breeds (Sanh. 56b); and having their own judges in every district and town like the Israelites (*ib.*), the Gentiles outside of Palestine were not considered strict idolaters, but blind followers in the path of their ancestors (Ḥul. 13b).

The seven nations in the Holy Land were to be exterminated for fear they might teach the Israelite conquerors idolatry and immoral practises (Deut. vii. 1-6, xviii. 9-14, xx. 16-18); but in spite of the strenuous efforts of Joshua and other leaders the Israelites could not drive them out of the Promised Land (Josh. xiii. 1-6). Having in view the curbing of assimilation and the protection of the Jewish state and society, the legislators, men of the Great Assembly, adopted stringent measures against these Gentiles. These laws were collected and incorporated in the Mishnah, and were interpreted in the Gemara of the Jerusalem and Babylonian Talmuds. The restrictive regulations may be classified as having been enacted for the following reasons: (1) to exalt monotheism, and Israel as a nation; (2) to combat and outlaw barbarism; (3) to overcome the unreliability of the Gentile; and (4) to counteract Gentile laws not in harmony with the humanitarian laws of the Jews.

1. The Pharisees, interpreting the spirit of the Law, and acting under the elastic rule that "there is a time to serve the Lord by relaxing his law" (Ps. cxix. 126, Hebr.; Yoma 69a), permitted the desecration of the Sabbath in besieging a Gentile city "until it be subdued" (Deut. xx. 20), in accordance with Shammai's interpretation (Shab. 19a). This definition was not new, as already the Maccabeans had taken advantage of it in fighting the enemy unceasingly, putting aside the observance of the Sabbath for the sake of God and of their national existence (I Macc. ii. 43, 44). Probably for the same reason (to facilitate war with the Gentile enemy), the Rabbis modified the laws of purification so as not to apply when one comes in contact with a corpse or human bones, or when one enters an enclosure containing a dead body. With regard to the text "This is the law when a man dieth in a tent" (Num. xix. 14), they held that only Israelites are *men*, quoting the prophet, "Ye my flock, the flock of my pasture, are men" (Ezek. xxxiv. 31); Gentiles they classed not as men but as barbarians (B. M. 108b). The Talmudic maxim is, "Whoever has no purification laws can not contaminate" (Naz. 61b). Another reason assigned is that it would have been utterly impossible otherwise to communicate with Gentiles, especially in the post-exilic times (Rabinovitz, "Mebo ha-Talmud," p. 5, Wilna, 1894). Patriotism and a desire to regain a settlement in the Holy Land induced the Rabbis, in order not to delay the consummation of a transfer of property in Palestine from a Gentile to a Jew, to

Rabbinical Modification of Laws.

permit the deed to be written on the Sabbath, an act otherwise prohibited (B. Ḳ. 80b).

2. The barbarian Gentiles who could not be prevailed upon to observe law and order were not to be benefited by the Jewish civil laws, framed to regulate a stable and orderly society, and based on reciprocity. The passage in Moses' farewell address: "The Lord came from Sinai, and rose up from Seir unto them; he shined forth from Mount Paran" (Deut. xxxiii. 2), indicates that the Almighty offered the Torah to the Gentile nations also, but, since they refused to accept it, He withdrew His "shining" legal protection from them, and transferred their property rights to Israel, who observed His Law. A passage of Habakkuk is quoted as confirming this claim: "God came from Teman, and the Holy One from Mount Paran. . . . He stood, and measured the earth; he beheld, and drove asunder [ויתר = "let loose," "outlawed"] the nations" (Hab. iii. 3-6); the Talmud adds that He had observed how the Gentile nations steadfastly refused to obey the seven moral Noachian precepts, and hence had decided to outlaw them (B. Ḳ. 38a).

It follows that the Gentiles were excepted from the general civil laws of Moses. For example, the Law provides that if a man's ox gores and kills a neighbor's ox, the carcass and the surviving ox shall be sold, and the proceeds divided between the respective owners (half-damages). If, however, the goring ox has been known to be dangerous and its owner has not kept watch over it, he shall pay full damages for the dead ox and take the carcass (Ex. xxi. 35-36, Hebr.). Here the Gentile is excepted, as he is not a "neighbor" in the sense of reciprocating and being responsible for damages caused by his negligence; nor does he keep watch over his cattle. Even the best Gentile laws were too crude to admit of reciprocity. The laws of Hammurabi provide: "If the ox has pushed a man, and by pushing has made known his vice, and the owner has not blunted his horn, has not shut up his ox, and that ox has gored a man of gentle birth and caused him to die, the owner shall pay half a mina of silver" (Johns, "Oldest Code of Laws," § 251, Edinburgh, 1903). This price of a half-mina of silver was also the fixed fine for cutting down a tree (*ib.* § 59). It appears that only a nominal sum was paid when a man not of gentle birth was killed, and even less when a neighbor's ox was gored. The Mishnah, bearing such facts in mind, therefore declares that if a Gentile sue an Israelite, the verdict is for the defendant; if the Israelite is the plaintiff, he obtains full damages (B. Ḳ. iv. 3). It should be noted that in these tort cases public or sacred property (הקדש) was also an exception, for the reason that both are wanting in individual responsibility and in proper care. The principle was that the public could not be fined since it could not collect in turn. The Gemara's reliance on the technical term "neighbor" (רעהו) in the text as its justification for excluding both the Gentile and the public, is merely tentative.

Laws of Hammurabi.

The Talmud relates in this connection that the Roman government once commissioned two officers to question the Rabbis and obtain information regarding the Jewish laws. After a careful study, they said: "We have scrutinized your laws and found them just, save the clause relating to a Gentile's ox, which we can not comprehend. If, as you say, you are justified by the term 'neighbor,' the Gentile should be quit when defendant as well as when plaintiff." The Rabbis, however, feared to disclose the true reason for outlawing the Gentiles as barbarians, and rested on the textual technicality in the Mosaic law, in accordance with which they had authority to act in all cases coming within their jurisdiction (B. Ḳ. 38a).

The Mosaic law provides for the restoration of a lost article to its owner if a "brother" and "neighbor" (Deut. xxii. 1-3), but not if a Gentile (B. Ḳ. 113b), not only because the latter would not reciprocate, but also because such restoration would be a hazardous undertaking. The laws of Hammurabi made certain acts connected with "articles lost and found" a ground of capital punishment. "If the owner of the lost property has not brought witnesses identifying his lost property; if he has lied, or has stirred up strife, he shall be put to death" (Johns, *l.c.* § 11). The loser, the finder, or an intermediate person was put to death in certain stages of the search for the missing article (*ib.* §§ 9-13). The Persian law commanded the surrender of all finds to the king (B. Ḳ. 28b). As an illustration of the Gentile law and of Jewish magnanimity, the following is related in the Talmud: "Queen Helen lost her jewelry, and R. Samuel, who had just arrived in Rome, found it. A proclamation was posted throughout the city offering a certain sum of money as a reward for the restoration of the jewels within thirty days. If restored after thirty days, the finder was to lose his head. Samuel waited and restored the jewels after thirty days. Said the queen: 'Hast thou not heard of the proclamation?' 'Yes,' answered Samuel, 'but I would show that I fear not thee. I fear only the Merciful.' Then she blessed the God of the Jews" (Yer. B. M. ii. 5).

Similarly, the mandate concerning the oppression of or withholding wages from a hireling brother or neighbor, or a domiciled alien (Deut. xxiv. 14-15) who observes the Noachian laws, is not applicable in the case of a Gentile. That is to say, a Gentile may be employed at reduced wages, which need not be paid promptly on the same day, but may be paid in accordance with the usual custom of the place. The question arose whether a Jew might share in the spoils gained by a Gentile through robbery. One Talmudic authority reasoned that the Gentile exerted himself to obtain the ill-gotten property much less than in earning his wages, to which the Mosaic law is not applicable; hence property seized by a Gentile, if otherwise unclaimed, is public property and may be used by any person. Another authority decided that a Jew might not profit by it (B. M. 111b).

Ashi's Decisions.

R. Ashi decided that a Jew who sells a Gentile landed property bordering on the land of another Jew shall be excommunicated, not only on the ground that the Gentile laws do not provide for "neighbors' boundary privileges" (בר מצרא), but also because the Jewish neighbor may claim "thou hast caused a lion to lie on my border." The ban shall not be raised unless the seller stipulates to keep the

Jew free from all possible damage arising from any act of the Gentile (B. Ḳ. 114a). The same Ashi noticed in a vineyard a broken vine-branch bearing a bunch of grapes, and instructed his attendant, if he found that it belonged to a Gentile, to fetch it; if to a Jew, to leave it. The Gentile owner overheard the order, and asked: "Is it right to take from a Gentile?" Ashi replied: "Yes, because a Gentile would demand money, but a Jew would not" (*ib.* 113b). This was an adroit and sarcastic answer. In truth, Ashi coincided with the opinion of the authority stated above; namely, that, as the presumption is that the Gentile obtained possession by seizure, the property is considered public property, like unclaimed land in the desert (B. B. 54b). The consensus of opinion, however, was against this authority. R. Simeon the Pious quotes to show that legal possession was required even in dealing with the Seven Nations: "And thou shalt consume [ואכלת = "eat the spoils"] all the people which the Lord thy God shall deliver thee" (Deut. vii. 6, Hebr.), meaning that Israel could claim the land only as conquerors, not otherwise (B. Ḳ. 113b).

In one instance a Gentile had the benefit of the technical term "neighbor," and it was declared that his property was private. The Law provides that an Israelite employed in his neighbor's vineyard or grain-field is allowed to pick there as much as he can eat while working (Deut. xxiii. 25–26). But since the employer in this case was a Gentile (*i.e.*, not a "neighbor"), the Israelite was forbidden to eat anything without permission (B. M. 87b). As regards the property of this Gentile perhaps his title to it was not disputed, and it was therefore considered just as sacred as that of a Jew.

Discriminations against Gentiles, while strictly in accordance with the just law of reciprocity and retaliation, having for their object to civilize the heathen and compel them to adopt the civil laws of Noah, were nevertheless seldom practised. The principal drawback was the fear of "profaning the Holy Name" (חילול השם). Consequently it was necessary to overlook legal quibbles which might appear unjust in the eyes of the world, and which would reflect on the good name and integrity of the Jewish nation and its religion. Another point to be considered was the preservation, "for the sake of peace" ("mi-pene darke shalom"), of the friendly relations between Jew and Gentile, and the avoidance of enmity (מפני איבה; 'Ab. Zarah 26a; B. Ḳ. 113b).

Not only was the principle of retaliation directed against the heathen Gentile, but it also operated against the lawless Jewish herdsmen of sheep and other small cattle, who trespassed on private property in Palestine contrary to the ordinance forbidding them to raise their herds inland (Tosef., B. Ḳ. viii. [ed. Zuckermandel, p. 362]; comp. Sanh. 57a). All retaliation or measures of reprisal are based on the Jewish legal maxim of eminent domain, "The judicial authority can annul the right to the possession of property and declare such property ownerless" (הפקר ב"ד הפקר, B. B. 9a).

3. Another reason for discrimination was the vile and vicious character of the Gentiles: "I will provoke them to anger with a foolish nation" (נבל = "vile," "contemptible"; Deut. xxxii. 21). The Talmud says that the passage refers to the Gentiles of Barbary and Mauretania, who walked nude in the streets (Yeb. 63b), and to similar Gentiles, "whose flesh is as the flesh of asses and whose issue is like the issue of horses" (Ezek. xxiii. 20); who can not claim a father (Yeb. 98a). The Gentiles were so strongly suspected of unnatural crimes that it was necessary to prohibit the stabling of a cow in their stalls ('Ab. Zarah ii. 1). Assaults on women were most frequent, especially at invasions and after sieges (Ket. 3b), the Rabbis declaring that in case of rape by a Gentile the issue should not be allowed to affect a Jewish woman's relation to her husband. "The Torah outlawed the issue of a Gentile as that of a beast" (Miḳ. viii. 4, referring to Ezek. *l.c.*).

Discrimination Against Gentiles.

Excepting the Greeks, no Gentiles, not even the Persians, were particular in shedding blood (B. Ḳ. 117a). "Meeting a Gentile on the road armed with a sword [on his left], the Jew shall let him walk on his right [being thus ready to wrench away the weapon if threatened with it]. If the Gentile carries a cane [in his right hand], the Jew shall let him walk at his left [so that he may seize the cane if raised against him]. In ascending or descending the Jew shall always be above, and shall not stoop down for fear of assassination. If the Gentile ask to be shown the way, the Jew shall extend his own journey a point farther and shall not tarry on reaching the stranger's destination" ('Ab. Zarah 25b).

Taking these conditions into consideration, the precautions against the employment of Gentile midwives can be easily understood. A Gentile woman was not allowed to suckle a Jewish babe, save in the presence of Jews. Even so it was feared that the Gentile nurse might poison the child (*ib.* 25a). As a retaliative measure, or for fear of accusation, the Rabbis forbade Jewish midwives and nurses to engage themselves in Gentile families, unless offered a fee for the service or to avoid enmity (*ib.*). The same rule applied to physicians (Maimonides, "Yad," 'Akkum, ix. 16). The Roman laws ordained that physicians should be punished for neglect or unskilfulness, and for these causes many were put to death (Montesquieu, "L'Esprit des Lois," xxix. § 14). In a place where no Jewish physician could be found to perform the rite of circumcision the question arose whether a Gentile or a Samaritan mohel might be chosen to operate. If the Gentile is "an expert physician patronized by the public, he may be employed, as it is presumed he would not jeopardize his reputation by purposely injuring a Jewish patient" ('Ab. Zarah 27a).

With such a character as that depicted above, it would naturally be quite unsafe to trust a Gentile as a witness, either in a criminal case or in a civil suit. He could not be depended upon to keep his promise or word of honor like a Jew (Bek. 13b). The Talmud comments on the untruthfulness of Gentiles ("a band of strange children whose mouth speaketh vanity, and their right hand [in raising it to take an oath] is a right hand of falsehood" [Ps. cxliv. 11]), and contrasts it with the

Unreliability of Gentiles.

reputation of a Jew: "The remnant of Israel shall not do iniquity nor speak lies; neither shall a deceitful tongue be found in their mouth" (Zeph. iii. 13). Also excluded as a "neighbor" was the Gentile in whose trust property was left with all prescribed provisions (Ex. xxii. 6-14). The Torah does not discriminate against the testimony of a Gentile, save when he is held to be a robber; when it is thought that he has no intention of perjuring himself he is believed (Mordecai, Annotations to Rosh Giṭ. 10). Hence documents and deeds prepared by Gentile notaries in their courts are admitted as valid evidence (Giṭ. i. 4). R. Simeon even validates a Jewish writ of divorce signed by a Gentile notary (*ib.*). In dietary cases, where a Gentile is disinterested his evidence is accepted (Shulḥan 'Aruk, Yoreh De'ah, 86, 1). A Gentile's testimony to a man's death, incidentally related as a matter of fact, he being unaware that his evidence is wanted, is held sufficient to release a woman from her marriage bond and to permit her to marry again (Giṭ. 28b; Shulḥan 'Aruk, Eben ha-'Ezer, 17,14; see 'Agunah).

4. After the destruction of Jerusalem the condition of the Gentiles in general was somewhat improved by the establishment of Roman courts of justice; but the laws of the latter, borrowed from the Persians and modified by feudalism, never attained the high standard of Jewish jurisprudence. Even under the Roman supremacy the Jews were permitted to decide their civil and criminal cases in accordance with their own code of laws, just as in countries like Turkey, China, and Morocco extra-territorial rights are granted by treaty to the consular courts of foreign nations. In a mixed trial where the suitors were respectively Jew and Gentile, the Jew had to abide by the harsh and illogical laws of the Gentiles; and for this the Jew retaliated whenever occasion arose.

As Suitors in Civil Cases.

It sometimes happened that the Gentile, wishing to take advantage of the liberal Jewish laws, summoned his Jewish opponent to a Jewish court. In such cases the Gentile would gain little benefit, as he would be dealt with in accordance with the Jewish or the Gentile law, as might be least advantageous to him. The judge would say: "This is in accordance with our law" or "with your law," as the case might be. If this was not satisfactory to the Gentile, legal quibbles and circumventions might be employed against him. R. Akiba, however, would not permit such proceedings, which tended to profane the Holy Name (B. Ḳ. 113a).

The differences between their laws were the main barriers between Jew and Gentile. The Talmud would excommunicate a Jew who without a summons testified in a petty Gentile court as a single witness against a Jew, for the Jewish law required at least two witnesses. But in the supreme court a single Jewish witness might testify, as the Gentile judge would administer the oath to the defendant, which proceeding was similar to that prescribed by Jewish law (*ib.*).

The Jewish mode of acquisition of real property by deed or by three years' undisputed possession did not apply to Gentiles (Ḳid. 14b), who as a rule acquired their property by seizure. The Persian laws leased property for a term of forty years, so that three years' occupation would not amount to a presumption of purchase (B. B. 55a). In case of transfer of chattels, a money payment was sufficient without delivery or removal, which the Jewish law required (B. Ḳ. 13a). Part payment or a consideration was not valid (B. B. 54b).

Acquisition by a consideration was an old established Jewish law: "This was the manner in former time in Israel concerning redeeming and concerning changing, for to confirm all things; a man plucked off his shoe and gave it to his neighbor" (Ruth iv. 7). The article of consideration in "former times" was changed in later times to a kerchief (קנין סודר). The Gentiles did not admit acquisition by a consideration. Transfers of their property were effected only for ready money to the full amount (Ḳid. 8a). The Persians bound themselves by an exchange of presents, which was considered equivalent to a word of honor, but not, however, in the sense of a consideration ('Ab. Zarah 71a).

The Persian law ordered the guarantor to pay immediately on the default of the debtor; while the Jewish law required the creditor first to proceed against the debtor, and that then, if the debt were not paid, he should sue the guarantor (B. B. 173b, 174a).

The Jewish law against overcharging one-sixth or more above the current price of marketable merchandise—a violation of which affected the validity of the sale—applied only to a Jew or domiciled alien, not to a Gentile. "If thou sell ought unto thy neighbor, or buyest ought of thy neighbor's hand, ye shall not oppress [overcharge] one another" (Hebr. = "his brother"; Lev. xxv. 14), was contrary to the Gentile legal maxim, "A bargain is a bargain." For this the Gentile was paid in his own coin, so to speak. Samuel declared legal a transaction in which an error has been made by miscalculation on the part of a Gentile. Following out his theory, Samuel was unscrupulous enough to purchase from a Gentile a gold bar for four zuz, which was the price of an iron bar; he even beat down the price one zuz. Such transactions, while regarded as perfectly proper and legitimate among the Gentiles, were not tolerated among the Jews themselves.

On the other hand, there were many examples of cases in which Jews refused to take advantage of errors. A rabbi once purchased wheat from a Gentile agent, and, finding therein a purseful of money, restored it to the agent, who blessed "the God of the Jews." Simeon b. Shaṭaḥ restored a valuable pearl he had found on a donkey to the Gentile of whom he had purchased the beast (Yer. B. M. ii. 5). In cases of wilful murder, an alien Gentile who observed the Noachian laws which forbid murder was treated like a Jew. "One law and one manner [judgment] shall be for you and for the stranger that sojourneth with you" (Num. xv. 16)—that is, provided he abides by the same law. According to the Talmud, there is a difference between a domiciled alien (גר תושב), one who abandoned idolatry in order to be allowed to settle in Palestine, and a true alien (גר צדק), who voluntarily and conscientiously observed the Noachian laws (see Proselyte and Proselytism). In regard to manslaughter (unpremeditated homicide), for which the culprit was exiled

to a city of refuge (Num. xxxv. 11), the Mishnah says: "All were exiled for the manslaughter of an Israelite; and an Israelite was exiled for the manslaughter of others, save a domiciled alien. The latter was exiled for the manslaughter of another domiciled alien" (Mak. ii. 3). This was in accord with the general rule that a man could not be sentenced to death without a previous warning (התראה; Sanh. 57a); and since such forewarning was necessarily lacking in cases of manslaughter, the Israelite guilty thereof was simply exiled, this step being taken to forestall the avenger of blood. The Gemara to the Mishnah cited above (Mak. 8b) holds that an alien was not entitled to the forewarning, and hence should be executed.

For robbery or defaulting in a trust the guilty person was required to repay the principal and to pay one-fifth in addition (Lev. v. 21–24 [A. V. vi. 2–4]); in other cases fines, ranging from double to four and five times the original amount for theft, were imposed (Ex. xxii. 1–4). Where the stolen property belonged to a Gentile or to the public, however, the guilty was required to pay only the principal, without the additional fines (Maimonides, "Yad," Gezelah, i. 7). As the fine was a personal compensation, the public, lacking individuality, could not receive it; nor could a Gentile, since his own laws were at variance with reason and justice. For example, the Twelve Tables ordained that a thief be whipped with rods and condemned to slavery; and the Greeks inflicted capital punishment for stealing even a trifle.

Gentile Property Exempt from Fines.

The prohibition of usury, or rather of taking any amount over and above that of the original loan, specifies of "a poor brother" and a stranger (alien) "that he may live with thee" (Ex. xxii. 25; Lev. xxv. 35–37). "Unto a stranger [נכר = "foreigner"], however, thou mayest lend upon usury" (Deut. xxiii. 20). This was a purely economic measure, encouraging a tax on loans to foreigners, and cautioning against impoverishing the domestic producer. The Gentile was considered a foreigner whom an Israelite need not support, and his own laws did not prohibit usury. The Jewish prohibition extended to the alien ("ger"), as the text plainly indicates; but there is a question whether it included a domiciled alien ("ger toshab"; B. M. 71a). Nevertheless the Mishnah says the Gentile poor shall be supported together with the Jewish poor, for the sake of peace (Git. 61a). The Talmud also says that a pious Jew shall not take interest from a Gentile, and quotes Ps. xv. 5: "He that putteth not out his money to usury" (Mak. 24b). In fact, the Talmud did not tolerate the charging of interest to Gentiles (B. M. 71a). See Usury.

Gentile Poor to Be Supported.

The relation of the Jews to the ruling government was fixed by Samuel's maxim, "The law of the land is binding," thus validating all enactments of the land not in conflict with the Jewish religion, and rendering unto Cæsar his due as regards taxes and imposts, which no one might evade—provided, however, that the taxes were authorized (B. Ḳ. 113a). Rabbenu Tam, defining this maxim, adds: "provided the king's edicts are uniform, and apply to all his subjects in all his dominions." R. Eliezer of Metz says: "provided the king taxes his own subjects and settlers; but he can not extort money from journeymen passing through his dominion without having any intention to remain there. Otherwise, it is not law, but robbery" (Mordecai in B. Ḳ. x. § 215; Annotations to Rosh Ned. iii. 11).

Inasmuch as the Jews had their own distinct jurisdiction, it would have been unwise to reveal their laws to the Gentiles, for such knowledge might have operated against the Jews in their opponents' courts. Hence the Talmud prohibited the teaching to a Gentile of the Torah, "the inheritance of the congregation of Jacob" (Deut. xxxiii. 4). R. Johanan says of one so teaching: "Such a person deserves death" (an idiom used to express indignation). "It is like placing an obstacle before the blind" (Sanh. 59a; Ḥag. 13a). And yet if a Gentile study the Law for the purpose of observing the moral laws of Noah, R. Meïr says he is as good as a high priest, and quotes: "Ye shall therefore keep my statutes, and my judgments, which if a man do, he shall live in them" (Lev. xviii. 5). The text does not specify an Israelite or a Levite or a priest, but simply "a man"—even a Gentile ('Ab. Zarah 26a).

Gentiles May Not Be Taught the Torah.

Resh Laḳish (d. 278) said, "A Gentile observing the Sabbath deserves death" (Sanh. 58b). This refers to a Gentile who accepted the seven laws of the Noachidæ, inasmuch as "the Sabbath is a sign between God and Israel alone," and it was probably directed against the Christian Jews, who disregarded the Mosaic laws and yet at that time kept up the observance of the Jewish Sabbath. Rabbina, who lived about 150 years after the Christians had changed the day of rest to Sunday, could not quite understand the principle underlying Resh Laḳish's law, and, commenting upon it, added: "not even on Mondays [is the Gentile allowed to rest]"; intimating that the mandate given to the Noachidæ that "day and night shall not cease" (לא ישבתו = "have no rest") should be taken in a literal sense (Gen. viii. 22) —probably to discourage general idleness (*ib.* Rashi), or for the more plausible reason advanced by Maimonides, who says: "The principle is, one is not permitted to make innovations in religion or to create new commandments. He has the privilege to become a true proselyte by accepting the whole Law" ("Yad," Melakim, x. 9). R. Emden (יעב"ץ), in a remarkable apology for Christianity contained in his appendix to "Seder 'Olam" (pp. 32b–34b, Hamburg, 1752), gives it as his opinion that the original intention of Jesus, and especially of Paul, was to convert only the Gentiles to the seven moral laws of Noah and to let the Jews follow the Mosaic law—which explains the apparent contradictions in the New Testament regarding the laws of Moses and the Sabbath.

With the conversion of the Gentile to Christianity or to Islam, the heathen and pagan of the civilized or semi-civilized world has become almost extinct, and the restrictions placed on the ancient Gentile are not applicable to the Gentile of the present day, except in so far as to consider him a Noachian observ-

ing all moral laws, in contradistinction to the Jew, who as one of the chosen people observes in addition the Mosaic laws. That the laws against the Gentile as a barbarian were not entirely expunged from the rabbinic literature after the advent of Christianity, was due to the persecutions and the barbaric treatment of the Jews in the Middle Ages. The gradual decrease of animosity may, however, be noted by comparing the various codes and collections of responsa. For example, that a Jewish physician should be forbidden to offer his services to a Gentile was contrary to the general practise of the Jews in the Middle Ages. Maimonides himself became the physician of Sultan Saladin in Egypt. The prohibition against the employment of a Gentile nurse or midwife "except a Jewess stands by her" was modified by an eminent authority with "so long as there is a Jew living in that town who is liable to come into the house" (Moses of Coucy, "Semag," § 45). That no such distinction exists anywhere nowadays is an acknowledged fact, proving conclusively that the Rabbis regulate their decisions in accordance with the spirit of the Jewish law.

Present Status of the Gentile.

The special Jewish jurisdiction in civil cases is still maintained in the Orient, in some parts of Europe, and even in America, where the bet din administers the law, mostly by arbitration, effecting a compromise between the litigants for the sake of avoiding the "law's delay" and of saving the expenses of trial in the secular courts. See also Aliens; Idolatry and Idols; Noachian Laws; Proselytes and Proselytism; Usury.

E. G. H. J. D. E.

—From the Post-Talmudic Period to the Present Time: The opinions of a few of the noted and authoritative scholars are here cited to show the favorable change which the attitude of the Jews toward the Gentiles underwent in post-Talmudic times.

R. Sherira Gaon, president of the college in Pumbedita in the tenth century, permitted Jews to bring suit in a Gentile court on the defendant's refusal to have the case adjudicated by a Jewish tribunal. "Even if the Jew be the robber and the Gentile the one robbed, it is the duty of those who know it to so testify before the justice" (quoted in "Be'er ha-Golah" to Shulḥan 'Aruk, Ḥoshen Mishpaṭ; see also *ib.* 426, 5).

Maimonides (twelfth century), in his code written in Egypt, says: "It is forbidden to defraud or deceive any person in business. Jew and non-Jew are to be treated alike. If the vendor knows that his merchandise is defective, he must so inform the purchaser. It is wrong to deceive any person in words, even without causing him a pecuniary loss ("Yad," Mekirah, xviii. 1). In his Mishnaic commentary Maimonides remarks: "What some people imagine, that it is permissible to cheat a Gentile, is an error, and based on ignorance. The Almighty—praised be His Name!—instructed us that in redeeming a Hebrew servant from the services of a Gentile owner 'he shall reckon with him that bought him'" (Lev. xxvi. 50), meaning to be careful in his calculation not to cheat the Gentile. This was in Palestine, where the Jews had the upper hand over the Gentiles. How much more should the law be observed at the present time, when they have no sovereignty over the Gentiles. Moreover, neglect of the precept would cause the desecration of His Name, which is a great sin. Deception, duplicity, cheating, and circumvention toward a Gentile are despicable to the Almighty, as "all that do unrighteously are an abomination unto the Lord thy God" (Deut. xxv. 16; commentary to Kelim xii. 7).

Opinions of Jewish Scholars.

Moses de Coucy (thirteenth century) writes: "I have been preaching before those exiled to Spain and to other Gentile countries, that, just because our exile is so prolonged, it behooves Israel to separate from worldly vanities and to cleave to the seal of the Holy One, which is Truth, and not to lie, either to Jew or Gentile, nor to deceive them in the least thing; to consecrate themselves above others, as 'the remnant of Israel shall not do iniquity nor speak lies.' . . . Behold, the visitation of the Flood for the violence done to the wicked Gentiles!" ("Semag," § 74).

About the same period R. Judah of Ratisbon, compiler of the "Sefer Ḥasidim," quotes: "It is forbidden to deceive any person, even a Gentile. Those who purposely misconstrue the greeting to a Gentile are sinners. There can be no greater deception than this" ("Sefer Ḥasidim," § 51, Frankfort-on-the-Main, 1817). "If either a Jew or Gentile should request a loan, he should get a frank answer. Do not say, 'I have no money,' when the reason is the fear to trust" (*ib.* § 426). "One shall not act in bad faith even to Gentiles. Such acts often bring down a person from his rank; and there is no luck in his undertaking. If perchance he succeeds, punishment is visited on his children" (*ib.* § 1074).

In the fifteenth century R. Isaac b. Sheshet, who lived in North Africa, in response to an inquiry regarding the status of a non-Jew, quotes authorities to prove that the Gentiles nowadays are not ultra-idolaters, and consequently are not subject to the Talmudic restrictions mentioned above. He further says: "We must not presume that such restrictions were fixed rabbinical ordinances, not to be changed. On the contrary, they were made originally to meet only the conditions of the generations, places, and times" (Responsa, No. 119).

Caro (sixteenth century), the author of the Shulḥan 'Aruk, decides that "the modern Gentiles are not reckoned as heathen with reference to the restoration of lost articles and other matters" (Bet Joseph to Ṭur Ḥoshen Mishpaṭ, § 266; see also Ṭur Yoreh De'ah, § 148, ed. Venice, 1551).

R. Benjamin (seventeenth century), replying to an inquiry regarding an error of a Gentile in overpay-

ing eighteen ducats, says: "For the sake of consecrating the Holy Name, a Jew shall correct and make good the error of a Gentile. . . . Jacob charged his sons to return to the governor of Egypt the silver put, perhaps by oversight, in the sacks of corn purchased by them from him. One must not take advantage of an error made either by a Mohammedan or by a Christian. Otherwise, the nations would rightly reproach the chosen people as thieves and cheats. I myself had occasion to restore to a Gentile money received through error" (Benjamin Beer, Responsa, No. 409, Venice, 1539).

Eliezer of Mayence writes: "The commandment prohibiting theft, like those against murder and adultery, applies to both Jews and Gentiles" ("Sefer Ra'aban," § 91, Prague, 1610).

Ezekiel Landau (eighteenth century), in the introduction to his responsa "Noda' bi-Yehudah" (*ib.* 1776), says: "I emphatically declare that in all laws contained in the Jewish writings concerning theft, fraud, etc., no distinction is made between Jew and Gentile; that the titles 'goi,' 'akkum,' etc., in nowise apply to the people among whom we live."

Senior Zalmon (d. 1813), the representative authority of the modern Ḥasidim, in his version of the Shulḥan 'Aruk (vi. 27b, Stettin, 1864), says: "It is forbidden to rob or steal, even a trifle, from either a Jew or Gentile, adult or minor; even if the Gentile grieved the Jew, or even if the matter devolved is not worth a peruta [mite], except a thing that nobody would care about, such as abstracting for use as a toothpick a splinter from a bundle of wood or from a fence. Piety forbids even this."

Israel Lipschütz (nineteenth century), in his commentary to the Mishnah, says: "A duty devolves upon us toward our brethren of other nations who recognize the unity of God and honor His Scriptures, being observers of the seven precepts of Noah. . . . Not only do these Gentiles protect us, but they are charitably inclined to our poor. To act otherwise toward these Gentiles would be a misappreciation of their kindness. One should say with Joseph: 'How can I do this great wickedness and sin against God?'" ("Tif'eret Yisrael" to B. Ḳ. iv. 4).

——**Attitude of Modern Judaism:** Modern Judaism, as inculcated in the catechisms and explained in the declarations of the various rabbinical conferences, and as interpreted in the sermons of modern rabbis, is founded on the recognition of the unity of the human race; the law of righteousness and truth being supreme over all men, without distinction of race or creed, and its fulfilment being possible for all. Righteousness is not conditioned by birth. The Gentiles may attain unto as perfect a righteousness as the Jews. Hence the old Jewish doctrine, "The righteous among the Gentiles are sharers [in the felicity] of the world to come" (Tosef., Sanh. xiii.), is reaffirmed by the modern Synagogue. "Neighbor," in the command, "Thou shalt love thy neighbor like thyself" (Lev. xix.), signifies every human being.

Modern Judaism does not accept the rabbinical maxim, "Ḳiddushin en lahem, abal be'ilat ba'al yesh lahem," to the effect that coition but not marriage obtains among the Gentiles. This reflection on the morals of the non-Jewish world arose out of the conditions of Roman civilization; but, in view of the observance in civilized countries of the Biblical laws of marriage, the modern Synagogue acknowledges without quibble the sanctity of matrimony contracted under the sanction of the civil law or of the Church. Where the civil law is in conflict with the Jewish law, the civil law in general takes precedence; where degrees of consanguinity are permitted in the Mosaic law, but forbidden in the civil law, the latter is recognized by the Synagogue. But where the civil law permits marriages within certain degrees of consanguinity forbidden in the Mosaic code, the Jewish law is respected.

On Marriage.

The jurisdiction of the Gentile tribunals is also recognized in civil suits, whether the parties be Jews or Gentiles. In these cases the maxim of Samuel, "The law of the land is law" ("Dina de-malkuta dina"; Giṭ. 6b), is applied in its broadest sense. The term "huḳḳot ha-goyyim," after rabbinical precedent (see above, under R. Meïr), is applied, if at all, only to such customs as conflict with the implications of ethical monotheism (sorcery, superstition: see Pes. 111a), and to the introduction into the synagogal service of rites repugnant to the genius of monotheistic Judaism. The rabbinical injunction against placing animals in the stable of a Gentile (Giṭ. 46b), as well as the provisions freeing the slave sold to a non-Jew, had its root in the horrid indulgences of the Roman-Greek world. Slavery, whether of Jew or Gentile, is abhorrent in the eyes of modern Judaism. The caution against being found alone with a Gentile, and against leaving a woman alone with one ('Ab. Zarah ii. 1), has lost what reasonableness it had in the days of Roman depravity (see Sifra, Aḥare Mot, 9). The Jewish religion teaches the very contrary of the assumption basic to these injunctions. The Christian, whose morality is fundamentally Jewish, never fell under the designation used in these rabbinical warnings.

Jewish philanthropy draws no distinction between Gentile and Jew. The provision for the relief and care of Gentile dependents and the burial of their dead (Giṭ. 61a) is in full authority, not merely "mi-pene darke shalom" (see above), but as grounded in the very essence of Jewish benevolence. The examples of the old rabbis, quoted in part above, in extending the law of reverence for old age (Maimonides, "Yad," Talmud Torah, vi. 9) to the aged among the Gentiles (Ḳid. 33a); in giving the salutation of peace to the non-Jew (Ber. 17a; Giṭ. 61, 62); in gladdening the hearts of Gentiles on their holidays ('Ab. Zarah 12a, 65a), are recalled in modern catechisms and treatises of Jewish ethics, to teach that the same regard for the dignity of man shall be extended to every one created in God's image. The Mishnaic interdiction of celebrating the holidays of the heathen by intercourse with them on those days (*ib.* i. 1), reasonable enough when idolatry was supreme, has been superseded by the injunction to have due and reverent regard for the religious usages of non-Jews,

Impartiality of Jewish Philanthropy.

and to enter heartily into the spirit of such common celebrations as have no bearing on the positive monotheistic tenets of Judaism.

The oath before a Gentile magistrate is inviolable, though Judaism discourages the practise of taking an oath, believing that "one's yes should be yes, and one's no should be no" (B. M. 49a; Sheb. 36a). Honesty and truthfulness are insisted on in all dealings, whether with a Jew or a Gentile. The Rabbis insisted that the sin known as "genebat da'at" (the stealing of another's good opinion by false representations or by the pretense of friendship and the like) be avoided in one's intercourse even with a heathen (Ḥul. 94a). In view of the virulent aspersions on Jewish morality, it should be noted that modern Judaism, like rabbinical Judaism, makes false dealings, usury, theft, and the like of which a Gentile is the victim, a "ḥillul ha-shem" on the part of the Jew, the one sin for which only death may bring atonement (Lev. R. xxii.; Yer. Ned. 38b; Ab. iv. 4).

The modern prayer-books (*e.g.*, the English edition of Einhorn's "'Olat Tamid," Chicago, 1896) have substituted in the prayer for peace in the "Shemoneh 'Esreh" the words "all nations" and "all the sons of man, thy children," for the old reading "thy people Israel."

Intermarriage is not countenanced by modern Judaism; but this is not due to contempt for the Gentiles, but to the conviction that unity of religion is essential to the happiness of the home.

E. C. E. G. H.

GENTILI (חפץ): Italian family of Gorizia, several members of which were eminent rabbis and Talmudic authorities. Of these the most important were:

Azriel Gentili: Cabalist; lived at Gorizia in the seventeenth century. He is quoted by Issachar Bär in "Be'er Sheba'" on the Pentateuch, in connection with the explanation of Ex. xxxiv. 23.

Gershon ben Kalonymus Gentili: Talmudist; lived, probably at Venice, in the seventeenth century. He was a pupil of Menahem Porto, to whose work on mathematics entitled "'Ober la-Soḥer" he wrote a preface.

Gershon ben Moses Gentili: Italian scholar; born at Gorizia 1683; died there 1700. Although but seventeen years old at his death, he had become a recognized scholar; and his riming dictionary entitled "Yad Ḥaruzim" obtained the approbation of his elder contemporaries. The book was published after his death by his father (Venice, 1700), who wrote a preface containing a biography of the author. Appended to the work are a funeral sermon by Gershon, and a poem by Isaiah Nizza containing the 613 commandments. A second edition with some additions was published by Simon Calimani, Venice, 1740 (?). I. Br.

Jacob Hai Gentili: Talmudist; lived at Gorizia in the seventeenth century. He is cited by Samuel Aboab in his responsa "Debar Shemuel" (p. 299).

Jacob Hai b. Manasseh Gentili: Grandson of Jacob Hai Gentili. Rabbi at Gorizia; died in 1749. He was prominent as preacher, poet, and Talmudist. He wrote several responsa, some of which, on the levying of taxes in the communities, were reprinted in the now very rare "Hilkot Missim," published at Venice in 1709. His funeral oration was delivered by Isaac Lampronti, who spoke of Gentili's great scholarship. Menahem Novara, author of the "Pene Yiẓḥaḳ," was his pupil.

Bibliography: Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 167; Steinschneider, *Cat. Bodl.* col. 535; Mortara, *Indice*, p. 27.

I. E.

Manasseh ben Jacob Gentili: Head of the rabbinical school of Verona in the eighteenth century. An approbation of his on a halakic decision by the rabbis of Ancona is given by Samson Morpurgo in his "Shemesh Ẓedaḳah" (iii. 25). Manasseh was one of the four rabbis who were active in the abolition of the tax imposed by the inhabitants of Reggio on those of Mantua who visited the fair at the former town. I. Br.

Moses b. Gershon Gentili: Italian writer; born at Triest in 1663; died in 1711 at Venice, where he had lived for many years as teacher of the Talmud and Midrash. He was noted for his scholarship, and devoted much time to the study of philosophic, mathematical, and scientific subjects. He wrote: "Meleket Maḥshabot," a commentary on the Pentateuch, printed at Venice in 1710 with a portrait of the author at the age of forty-six, and reprinted with notes under the title "Maḥashebet Ḥosheb," by Judah Löb b. Eliezer Lipman Jafe, Königsberg, 1860; "Ḥanukkat ha-Bayit," a treatise on the Second Temple, with a map, Venice, 1696. His works were praised by the foremost of his contemporaries, as Solomon Nizza, Jacob Aboab, and David Altaras.

Bibliography: Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 239; Mortara, *Indice*, p. 27.

Seligman (Isaac) b. Gershon Gentili: Italian Talmudist; director of the Talmudic academy at Cremona after the death of Joseph Oetling in 1583. Some of his halakic decisions are included in the responsa collection "Naḥalat Ya'aḳob," Padua, 1623.

Bibliography: *Ha-Asif*, iii. 220; Mortara, *Indice*, p. 27.

G. I. E.

GENUBATH (גנבת): Son of Hadad the Edomite by an Egyptian princess, the sister-in-law of the Pharaoh who governed Egypt at the time of David and Solomon (I Kings xi. 20).

E. G. H. M. Sel.

GENUFLEXION. See Adoration.

GEOGRAPHERS: Persons proficient in describing the surface of the earth. Jews have contributed in different ways to the advancement of geographical science. In Biblical times geographical information was mainly given in the form of genealogies, as in the table of the nations in Gen. x. Jewish influence on the progress of geography in the Middle Ages was mainly indirect, the chief point being the tendency to place Jerusalem in the middle of medieval maps, due to the literal adoption of the passage in Ezek. v. 5.

Besides this, several individuals added to the knowledge of the world's surface by actual discovery or learned investigation. The chief Jewish traveler of the Middle Ages was Benjamin of Tudela, to whom is owed considerable knowledge of the Levant in the twelfth century. Another of the same period.

Pethahiah of Regensburg, traveled through Poland, the Crimea, and Mesopotamia. For others see TRAVELERS.

The modern history of geography begins with the establishment of an observatory at Sagres, in southwestern Portugal, by Prince Henry the Navigator. He appointed as the chief director of this establishment Jafuda Cresques, son of Abraham Cresques of Palma, capital of Mallorca in the Balearic Islands (see CRESQUES LO JUHEU). As the author of the Catalan map, Cresques was in a measure the founder of modern chartography, having made use for the first time of the results of the recent discoveries of Marco Polo in Farther Asia.

Jews were especially prominent in connection with the discovery of AMERICA, and almost equally so in the attempt to reach India by the eastern route, when Pedro de Covilhão was sent to discover the country of Prester John. He was followed later by Abraham de Beja and Joseph Zapateiro of Lamego, both Jews, who brought back information in regard to Covilhão's settlement in India.

Apart, however, from descriptions of pilgrimages to the Holy Land, there is little evidence of independent interest in geography, except Meïr Aldabi's "Shebile Emunah," the writings of Abraham Farissol, and David Gans's "Gebulot ha-Areẓ." In more recent times, however, there have been a larger number of works on travels and geography by Jews, among them Julius Lowenberg's "Geschichte der Geographie," Berlin, 1840; G. S. Pollack's "Description of New Zealand"; N. Isaacs' "Zululand," 1834. W. G. Palgrave was almost the first European to visit the Nejd, while Joseph Wolf ventured into Bokhara, and Joseph F. Stern and J. Halevy into Abyssinia. Bessels wrote on a north-pole expedition, and was followed by Angelo Heilprin. Captain Binger discovered and described the bend of the Niger; while Captain Foa traversed the whole of South Africa from south to north, losing his life as a result.

GEOMANCY (גורל החול): Divination by means of points made in sand, or by means of pebbles or grains of sand placed on a piece of paper. Some Moslem writers attribute the science of geomancy to Enoch, others to Daniel. It originated in northern Africa about the ninth century, and from there it penetrated into Jewish literature. It is referred to by Maimonides in his commentary to the Mishnah ('Ab. Zarah iv.), by Naḥmanides in the introduction to his commentary on the Pentateuch, and by Nissim b. Moses ("He-Ḥaluẓ," vii. 124). Aaron b. Joseph, the Karaite Biblical commentator, gives "yidde'oni" (Deut. xviii. 11, *et al.*) the meaning of "he who casts lots by means of points." Joseph Albo, too, speaks of geomancy ("'Iḳḳarim," iv. 4), calling it "goral ha-ḥol" (the lot by sand) or "ḥokmat ha-neḳuddot" (the science of points). According to Jacob Koppelmann in "Ohel Ya'aḳob," his commentary on the "'Iḳḳarim," "ḥokmat ha-neḳuddot" is used because the geomancer takes a handful of sand and makes points in it. Albo (*l.c.*) calls the upper point נשוא and the lower one שפל ראש. There are several works entitled "Sefer ha-Goralot" which are treatises on the casting of lots as based on geomancy. One is attributed to Ahithophel ha-Giloni, one to Saadia Gaon, another to Abraham ibn Ezra, and there are several anonymous treatises. Although in all these works answers to questions are obtained by means of calculation, the calculation itself is based on the principle of geomancy. There is also an anonymous treatise entitled "Goralot ha-Ḥol," which is attributed to one of the Geonim. It is arranged according to the twelve constellations of the zodiac and the seven planets, and is based on Shab. 129b.

GEOMETRY IN THE TALMUD. See MATHEMATICS.

GEORGIA: One of the thirteen original states of the United States, situated on the Atlantic coast; settled by a chartered company of English colonists under James Oglethorpe in June, 1733. Its Jewish settlement dates almost from the foundation of the colony.

Savannah: The second vessel which reached the colony arrived in Savannah from England on July 11, 1733, and had among its passengers the following Jews: Dr. Samuel Nuñez Ribiero (also known as Dr. Nuñez) and Sipra Nuñez Ribiero, his mother; Moses Nuñez Ribiero, Daniel Nuñez Ribiero, Shem Noah; Isaac Nuñez Henriques, his wife and son; Raphael Bornal and wife; David de Olivera and wife; Jacob Lopez de Olivera, wife, and children; David, Isaac, and Leah de Olivera; Aaron Sepivea, Benjamin Gideon, Jacob Lopez de Crasto; David Lopez de Pas and wife; Vene Real (probably Villareal), Molena, David Moranda, Jacob Moranda; David Cohen del Monte and wife, together with their son Isaac Cohen, and daughters Abigail, Hannah, and Grace; Abraham Minis and wife, with their daughters Leah and Esther; Simeon Minis, Jacob Yowel, Benjamin Sheftall and wife; and Abraham de Lyon. These first settlers brought over with them a Sefer Torah with two cloaks, a circumcision-box, and an ark of the law.

Prior to the settlement of Georgia commissions were issued (Sept. 21, 1732) to Anthony da Costa, Francis Salvador, and Alvaro Lopez Suaso of London, "to take subscriptions and collect money for the purposes of the charter." As early as January, 1733, and therefore before the actual settlement of Georgia, the trustees, having apparently learned that it was the intention of these gentlemen, who were among the most distinguished Jews of London, to settle some Jews in the colony, directed their secretary to wait upon Da Costa and his colleagues and require them to surrender their commissions. This action was repeated in 1733, the complaint being made that "certain Jews have been sent to Georgia contrary to the intentions of the trustees and which may be of ill consequence to the colony." Various other resolutions and correspondence upon this point appear in the minutes of the trustees, from which extracts are given by the Rev. George

White in his "Historical Collections of Georgia" (New York, 1854).

It has been assumed by Stephen ("History of Georgia"), by Charles C. Jones ("Publications Am. Jew. Hist. Soc." No. 1, pp. 5, 6), by Daly ("Settlement of the Jews in North America," p. 66), and by practically all writers on the history of Georgia, that the protests of the trustees related to this first settlement of Jews. Recently, however ("Publications Am. Jew. Hist. Soc. " No. 10), Leon Hühner asserted that there were two sets of Jewish settlers who went to Georgia—Portuguese and German. The Portuguese were those whose names are given above, many of whom were refugees from the Inquisition and had independent means; while the Germans were dependent upon charity, and consisted of about twelve families sent over by a committee of the London congregation. The evidence for this statement is derived from the journal of the Rev. Mr. Bolzius, a Protestant clergyman who arrived in the colony in 1734 with a number of Protestant refugees from Salzburg. He speaks of the Jews as understanding the German language, and later on says explicitly that some of the Jews "call themselves Spanish and Portuguese; others call themselves German Jews. The latter speak High German." It would therefore seem that it was against these latter, for whom the London committee used the funds collected, that the protest of the trustees was directed. However this may have been,

First Congregation Organized.

Oglethorpe disregarded the attitude of the trustees and permitted all the Jews to stay in the colony. During the very month of their arrival a congregation was organized under the name of "Mickve Israel," which occupied a small house near the present Market Building on Market street, the services being conducted in turn by the members of the congregation. In 1737 Benjamin Mendes of London sent the congregation a Sefer Torah, a Ḥanukkah lamp, and some books.

A few months after the original settlement of the Portuguese Jews three others arrived, Isaac de Val, Moses le Desma, and Abraham Nuñez Monte Santo. The deed confirming the original allotments of land includes the record of ground secured by the Jews and probably paid for, as several received larger allotments than did Christian colonists. This deed contains these names and a number of others. Nuñez had six farms; Henriques, seven; and Le Desma, ten. One of the colonists, Abraham de Lyon, had been for years prior to his settlement in Georgia a "vineron" in Portugal, and a detailed account of his American vineyard, the first planted within the limits of Georgia, is contained in a memorandum of Col. William Stephens, the agent of the trustees, under date of Dec. 6, 1737 (*ib.* No. 1, p. 11). The growth and manufacture of silk were also an industry followed by the Jewish settlers, to which they added general agriculture and commercial pursuits. According to the diary of Benjamin Sheftall, one of the original settlers, the Jews during the first year of the colony's existence constituted one-third of the entire population. The first white male child born in the settlement of Georgia (July 7, 1734) was Philip Minis, the son of Abraham Minis. In 1740–41, owing to the refusal of the trustees to permit the introduction of slaves, a considerable number of colonists, Christians as well as Jews, left Savannah and went to South Carolina. The number of Jews left in Savannah being insufficient to support the congregation, the latter was dissolved. About 1750 a number of the Jews returned to Georgia, and in 1751 the trustees sent over Joseph Ottolenghi, a Jew by birth, to superintend the silk industry in the colony. Ottolenghi was probably one of the most prominent men in the colony; in 1761 he was elected a member of the Assembly, and retained his seat until 1765.

In 1750 there was founded in Savannah the Union Society, having for its object the education of orphan children; the five founders were of different religious denominations. The names of but three of these have been preserved: the Jew, Benjamin Sheftall; Peter Tondee, a Catholic; and Richard Milledge, an Episcopalian. The society is still in existence, and it is regarded as the representative charitable organization of Savannah.

That the Jews participated in the events leading up to the Revolution is indicated by the fact that in a list of persons disqualified from holding any office of trust, etc., in the province, because of a "most audacious, wicked, and unprovoked rebellion," there occur the names of Mordecai Sheftall, "chairman rebel committee," Levy Sheftall, Philip Jacob Cohen, Sheftall Sheftall, "rebel officer," and Philip Minis. Mordecai Sheftall was deputy commissary-general of issue, and on Sept. 29, 1778, he was captured with his son by a body of Highlanders and placed on board a prison-ship (see Simon Wolf, "The American Jew as Patriot, Soldier, and Citizen," p. 40). At the close of the war he and his family returned to Savannah; and at about the same time the Jewish community was increased by the following additional arrivals: Lyon Henry and wife, with their son Jacob Henry; David Cardozo, David Levi, Cushman Pollock, Levy Abrahams, Abraham Isaack, Moses Simons, Emanuel de la Motta, Abraham da Costa, Samuel Mordecai and family, and Isaac Pollock.

On July 7, 1787, the Jews of Savannah reestablished the congregation Mickve Israel, hiring suitable houses in the rear of St. James square. Mordecai Sheftall having deeded a piece of land to be used by the Savannah Jews as a cemetery, the benevolent society Meshebet Nefesh on July 31, 1787, laid the foundation-stones of the enclosing wall. The burial-ground is at present (1903) under the care of a board of trustees appointed from the congregation by the Superior Court of Savannah.

Incorporation of Congregation Mickva Israel.

On Nov. 30, 1790, Gov. Edward Telfair granted to Levy Sheftall, Cushman Pollock, Joseph Abrahams, Mordecai Sheftall, Abraham de Pas, Emanuel de la Motta, and their successors a charter of incorporation wherein they were declared to be "a body incorporate by the name and style of the 'Parnass and Adjuntas of the Mickve Israel at Savannah.'" This charter is still in the hands of the congregation, as are also the minutes and records of all congregational transactions from the year 1790 to the present time.

Under date of May 6, 1789, Levy Sheftall, in behalf of the Hebrew congregation of Savannah, presented an address to General Washington on the occasion of his election to the presidency, to which Washington made a gracious reply (see "Publications Am. Jew. Hist. Soc." No. 3, pp 88, 89).

From 1797 until 1820 there was quite an exodus from Savannah. In the last-mentioned year, however, the Jewish community began to increase. A building committee for the erection of a synagogue was appointed; and the city of Savannah granted to the congregation a plot of ground situated at the corner of Liberty and Whitaker streets. On July 21, 1820, the new building was consecrated by the honorary ḥazzan, Dr. Jacob de la Motta, who delivered an address. This address was published, and it is one of the earliest prints bearing upon the history of the Jews of America: a copy of it is preserved in the Leeser Library, Philadelphia. Copies were sent by De la Motta to Thomas Jefferson and James Madison, from both of whom sympathetic replies were received. On Dec. 4, 1829, the synagogue was destroyed by fire, but the scrolls of the Law and the Ark were saved uninjured. In 1838 the erection of a brick structure upon the old site was commenced, and it was consecrated Feb. 24, 1841, by Isaac Leeser. In 1876, the Jewish population having increased considerably, the congregation purchased two large building-lots fronting on Bull street; on March 12, 1876, the corner-stone of a new synagogue was laid; and on April 12, 1878, the old synagogue was closed with religious exercises, the new building being consecrated the same day.

Many offices of trust in the city have been held by Jews (see SHEFTALL; MINIS; LEVY, SAMUEL YATES). Solomon Cohen, a lawyer of prominence, was postmaster at Savannah; he established the first Jewish Sunday-school in Georgia (1838). Octavus Cohen (1814–77), merchant, was quartermaster of state troops during the Civil war. The Jews of Georgia contributed about 140 men in that war (see Wolf, *l.c.* pp. 129 *et seq.*), and a considerable number were enrolled in Georgian companies during the Spanish-American contest (see Cyrus Adler, in "American Jewish Year-Book," 5661, pp. 552–553; ATLANTA; AUGUSTA).

Albany has a congregation, B'nai Yisrael, organized in 1876. The Hon. Charles Wessolowsky of that town was for some years the editor of the "Jewish South," published in New Orleans. He also served as a member of the state legislature.

Athens has a congregation, Children of Israel, founded in 1872. The University of the State of Georgia is located in Athens; and many young Jews from adjacent cities are students of that institution. Jews have taken some of the highest honors of the university, and have gained prominence in law, medicine, science, and commerce. The first Jew to receive the degree of doctor of divinity was Isaac P. Mendes of Savannah (1899).

Brunswick has a congregation, Beth Tefilah, organized in 1885. The temple was built about two years later, and was consecrated by Isaac M. Wise. A Sunday-school was established about 1887 by Mrs. Arnold Kaiser, a former resident of Savannah, and for many years one of the teachers of the Mickve Israel Sunday-school.

Columbus has a congregation, Benai Israel, founded about 1854. The town has the honor of having given to Georgia one of its most prominent and worthy Jews, Raphael J. Moses. At the time of the Civil war he was a member of General Longstreet's staff. Simon Wolf (*l.c.* p. 115) pays eloquent tribute to his honesty and worth. His rebuke to his opponent, the Hon. W. O. Tuggle, who during his congressional campaign of 1887 taunted Moses with being a Jew, has become a part of the history of the Jews of Georgia. Moses was a member of the state legislature.

Macon has a congregation, Beth Israel, founded in 1859. The exact date of the first settlement of Jews in Macon is not known. About 1850 a few Hebrew families were living there, most of whom had emigrated from Germany.

Rome has a congregation, Rodef Sholem, founded in 1871. The Jewish community has always been very small, and the congregation has had no regular minister. Max Meyerhardt, a learned jurist and a stanch Jew, has for many years conducted the services and superintended and instructed the Sunday-school. He is grand master for the state of Georgia of the order of Free and Accepted Masons.

All these congregations possess cemeteries, Sunday-schools, benevolent, educational, and orphan-aid societies, besides associations for repairing and beautifying the places of worship. The Council of Jewish Women has sections in Savannah, Augusta, and Atlanta. Junior circles have also been formed in Savannah and Atlanta. The Independent Order B'nai B'rith and the Kesher Shel Barzel have subordinate lodges in all the principal cities of the state. For the Hebrew Orphans' Home see ATLANTA.

There are about 7,000 Jews in the entire state, in a total population of 2,216,331.

GER. See PROSELYTE AND PROSELYTISM.

GERA (גרא): **1.** Fourth son of Benjamin (Gen. xlvi. 21). He is not mentioned in the list of Benjamin's sons given in Num. xxvi. 38–40. In I Chron. viii. 3 Gera is given as the son of Bela, the first son of Benjamin.

2. Father of Ehud the Benjamite, who judged the Israelites in the time of Eglon, King of Moab (Judges iii. 15). In I Chron. viii. 7 Gera is said to have been the son of Ehud.

3. Father of Shimei, also a Benjamite, who cursed David when he fled from before his son Absalom (II Sam. xvi. 5).

GERAH. See WEIGHTS AND MEASURES.

GERAR: Seat of a Philistine prince (Gen. x. 19, xx. 1 *et seq.*, xxvi. 20; I Chron. iv. 39 [LXX.]; II Chron. xiv. 12 *et seq.*). Following the statement

in Gen. xx. 1 ("between Kadesh and Shur"), Trumbull ("Kadesh Barnea," pp. 255, 631) tries to find it in the Wadi Jarur, southwest of Kadesh. But the statements in Gen. xxi. 21, xxvi. 22 *et seq.* do not agree with this; neither do they suggest that Gerar may have been a city. Since Eusebius mentions a city "Gerara" south of Eleutheropolis, and since there is an Umm Jarar south of Gaza, Gerar is doubtless to be sought there, and it may be concluded with Gunkel that there is a gap in the account in Gen. xx. 1.

E. G. H. F. Bu.

GERASI, DANIEL BEN ELIJAH: Turkish Talmudist and preacher of the seventeenth century; lived at Salonica, where he died about 1705. He was the author of "Odeh Adonai," sermons (Venice, 1681–82). Some Talmudic sentences of his are referred to by Ḥayyim Benveniste ("Ba'i Ḥayye, Yoreh De'ah," 120; "Ḥoshen Mishpaṭ," 154, 155; "Keneset ha-Gedolah," second part, 1d).

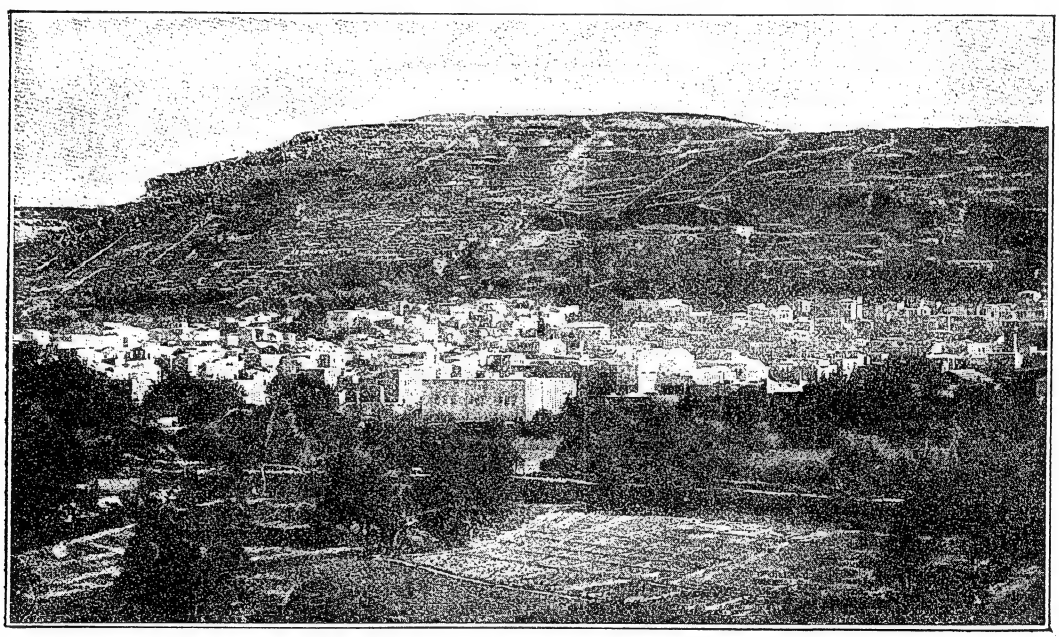
GERIZIM, MOUNT (הר גרזים).—Biblical Data: Mountain south of the valley in which Shechem was situated; the present Jabal al-Ṭur (Deut. xi. 29, xxvii. 12; Josh. viii. 33; Judges ix. 7). It is 2,849 feet high, declines sharply to the north, and is sparsely covered at the top with shrubbery. After their separation from the Jews the Samaritans built a temple on it, which was destroyed by John Hyrcanus. But the mountain continued to be (John iv. 20), as it is to-day, the holy place of the Samaritans, reverenced by them as the scene of the sacrifice of Isaac and as the site of their temple, and upon which they still celebrate the Passover. The temple was surrounded by fortifications (comp. II Macc. v. 23), which survived the destruction of the temple (Josephus, "Ant." xiv. 6, § 2; xviii. 4, § 1; "B. J." iii. 7, § 32). After Christianity had secured a foothold in Shechem, there were frequent disturbances among the Samaritans, on account of which Justinian in 529 built a wall round the church which had been erected on Gerizim, to protect it; the line of this wall is probably to be seen in the extensive ruins still existing on the top of the mountain. Among others there are some ruins called "Lozah," the "Luza" mentioned by Eusebius ("Onomasticon," 214, 135), nine (Hieronymus says three) Roman miles from Shechem.



Mount Gerizim, from Nablus.

E. G. H. F. Bu.

—**In Rabbinical Literature:** Mount Gerizim, though more than sixty miles from the Jordan, was miraculously reached by the Israelites on the same day that they crossed that river. They proceeded at once to perform the solemn ceremony enacted there. Six tribes ascended to the summit of Gerizim, and the remainder placed themselves on the top of Mount Ebal; while the priests and the Levites, clustering round the Ark, took their stand in the valley between the two mountains. On turning their faces to Gerizim the Levites pronounced a benediction; on turning to Ebal, a curse (Soṭah 35a, 36a).

Mount Gerizim was one of the foremost causes of division between the Israelites and the Samaritans, the latter of whom, regarding it as the holy place chosen by God, built their temple there. This temple was destroyed on the twenty-fifth of Ṭebet in the days of Alexander by Simeon the Just, to whom that monarch had given permission to destroy it (Yoma 69a; comp., however, Josephus, "Ant." xiii. 3, § 4; "Yuḥasin," p. 138; Karme Shomron," p. 12).

The Samaritans are charged with having changed the words "in mount Ebal" (Deut. xxvii. 4) to "in mount Gerizim" ("Karme Shomron," p. 37). In the Samaritan Bible the words הר גריזים are always written as one, and במקום אשר יבחר is always changed into אשר בחר (*ib*). According to Simeon ben Eliezer, the wines of the Samaritans were forbidden because the latter used them in the worship of an image of a dove erected on the summit of Mount Gerizim (Ḥul. 6a). According to a midrash, this image was the idol that was buried by Jacob under the oak at Shechem (Gen. xxxv. 4; Tosafot Ḥul. *l.c.*). The first condition a Samaritan has to fulfil to be admitted into the fold of Judaism is to renounce the belief in the sanctity of Mount Gerizim (Masseket Kutim, end).

GERMANUS, MOSES. See Speeth, Moses.

GERMANY: Country of central Europe. The date of the first settlement of Jews in the regions called by the Romans "Germania Superior," "Germania Inferior," and "Germania Magna," and which, on the whole, are included in the present German empire, is not known. The first authentic document relating to a large and well-organized Jewish community in these regions, dates from 321, and refers to Cologne on the Rhine; it indicates that the legal status of the Jews there was the same as elsewhere in the Roman empire. They enjoyed full civic liberty, being restricted only in regard to the dissemination of their faith, the keeping of Christian slaves, and the holding of office under the government. But they were otherwise free to follow any occupation open to their fellow citizens. They were engaged in agriculture, trade, and industry, and only gradually took up money-lending. These conditions at first continued in the subsequently established Germanic kingdoms under the Burgundians and Franks, for ecclesiasticism took root here but slowly, and the Jews lived as peaceably with their new German lords as they had done formerly with the Roman provincials. The Merovingian rulers, also, who succeeded to the Burgundian empire, were devoid of fanaticism, and gave scant support to the efforts of the Church to restrict the civic and social status of the Jews.

Neither was Charlemagne, who readily made use of the Church for the purpose of infusing coherence into the loosely joined parts of his extensive empire, by any means a blind tool of the canonical law. He made use of the Jews so far as suited his diplomacy, sending, for instance, a Jew as interpreter and guide with his embassy to Harun al-Rashid. Yet even then a gradual change came into the life of the Jews. Unlike the Germans, who were liable to be called to arms at any moment in those troublous times, the Jews were exempt from military service; hence trade and commerce were left almost entirely in their hands, and they secured the remunerative monopoly of money-lending when the Church forbade Christians to take usury. This decree caused the Jews to be everywhere sought as well as avoided, for their capital was indispensable while their business was viewed as disreputable. This curious combination of circumstances increased their influence. They went about the country freely, settling also in the eastern portions. Aside from Cologne, the earliest communities seem to have been established at Worms and Mayence.

Under Charlemagne.

The status of the Jews remained unchanged under Charlemagne's weak successor, Ludwig the Pious. They were unrestricted in their commerce, merely paying into the state treasury a somewhat higher tax than did the Christians. A special officer, the "Judenmeister," was appointed by the government to protect their privileges. The later Carolingians, however, fell more and more in with the demands of the Church. The bishops, who were continually harping at the synods on the anti-Semitic decrees of the canonical law, finally brought it about that the ignorant and superstitious populace was filled with hatred against the unbelievers. This feeling, among both princes and people, was further stimulated by the attacks on the civic equality of the Jews. Beginning with the tenth century, Holy Week became more and more a period of persecution for them. Yet the Saxon emperors did not treat the Jews badly, exacting from them merely the taxes levied upon all other merchants. Although they were as ignorant as their contemporaries as regards secular studies, yet they could read and understand the Hebrew prayers, and the Bible in the original text. Halakic studies began to flourish about 1000. At that time R. Gershom b. Judah was teaching at Metz and Mayence, gathering about him pupils from far and near. He is described as a model of wisdom, humility, and piety, and is praised by all as a "lamp of the Exile" (מאור הגולה). He first stimulated the German Jews to study the treasures of their national literature. This continuous study of the Torah and the Talmud produced such a devotion to their faith that the Jews considered life without their religion not worth living; but they did not realize this clearly until the time of the Crusades, when they were often compelled to choose between life and faith.

Up to the Crusades.

The wild excitement to which the Germans had been driven by exhortations to take the cross first

broke upon the Jews, the nearest representatives of an execrated opposition faith. Entire communities, like those of Treves, Speyer, Worms, Mayence, and Cologne, were slain, except where the slayers were anticipated by the deliberate self-destruction of their intended victims. About 12,000 Jews are said to have perished in the Rhenish cities alone between May and July, 1096 (see CRUSADES). These outbreaks of popular passion during the Crusades influenced the future status of the Jews. To salve their consciences the Christians brought accusations against the Jews to prove that they had deserved their fate; imputed crimes, like desecration of the host, ritual murder, poisoning of the wells, and treason, brought hundreds to the stake and drove thousands into exile. They were accused of having caused the inroads of the Mongols, although they suffered equally with the Christians from those savage hordes. When the Black Death swept over Europe in 1348–49, the Jews were accused of well-poisoning, and a general slaughter began throughout the Germanic and contiguous provinces (see BLACK DEATH).

After the Crusades.

Nevertheless, the legal and civic status of the Jews was undergoing a transformation. They found a certain degree of protection with the emperor of the Holy Roman Empire, who claimed the right of possession and protection of all the Jews of the empire in virtue of being the successor of the emperor Titus, who was said to have acquired the Jews as his private property. The German emperors claimed this right of possession more for the sake of taxing the Jews than of protecting them. Ludwig the Bavarian especially exerted his ingenuity in devising new taxes. In 1342 he instituted the "golden sacrificial penny," and decreed that every year all the Jews should pay to the emperor one kreutzer in every gulden of their property in addition to the taxes they were paying to the state and municipal authorities.

Their Legal Status.

The emperors of the house of Luxemburg devised still other means of taxation. They turned their prerogatives in regard to the Jews to further account by selling at a high price to the princes and free towns of the empire the valuable privilege of taxing and mulcting the Jews. On the reorganization of the empire in 1356, Charles IV., by the "Golden Bull," granted this privilege to the seven electors of the empire. From this time onward the Jews of Germany gradually passed in increasing numbers from the authority of the emperor to that of the lesser sovereigns and of the cities. For the sake of sorely needed revenue the Jews were now invited, with the promise of full protection, to return to those districts and cities from which they had shortly before been cruelly expelled; but as soon as they had acquired some property they were again plundered and driven away. These episodes thenceforth constituted the history of the German Jews. Emperor Wenceslaus was most expert in transferring to his own coffers gold from the pockets of rich Jews. He made compacts with many cities, estates, and princes whereby he annulled all outstanding debts to the Jews in return for a certain sum paid to him, adding that any one who should nevertheless help the Jews to collect their debts should be dealt with as a robber and peace-breaker, and be forced to make restitution. This decree, which for years injured the public credit, impoverished thousands of Jewish families during the close of the fourteenth century.

Nor did the fifteenth century bring any amelioration. What happened in the time of the Crusades happened again. The war upon the Hussite heretics became the signal for the slaughter of the unbelievers. The Jews of Austria, Bohemia, Moravia, and Silesia passed through all the terrors of death, forced baptism, or voluntary immolation for the sake of their faith. When the Hussites made peace with the Church the pope sent the Franciscan monk Capistrano to win the renegades back into the fold and inspire them with loathing for heresy and unbelief; forty-one martyrs were burned in Breslau alone, and all Jews were forever banished from Silesia. The Franciscan monk Bernhardinus brought a similar fate upon the communities in southern and western Germany. As a consequence of the fictitious confessions extracted under torture from the Jews of Trent, the populace of many cities, especially of Ratisbon, fell upon the Jews and massacred them.

The end of the fifteenth century, which brought a new epoch for the Christian world, brought no relief to the Jews. They remained the victims of a religious hatred that ascribed to them all possible evils. When the established Church, threatened in its spiritual power in Germany and elsewhere, prepared for its conflict with the culture of the Renaissance, one of its most convenient points of attack was rabbinic literature. At this time, as once before in France, Jewish converts spread false reports in regard to the Talmud. But an advocate of the book arose in the person of John REUCHLIN, the German humanist, who was the first one in Germany to include the Hebrew language among the humanities. His opinion, though bitterly attacked by the Dominicans and their followers, finally prevailed when the humanistic Pope Leo X. permitted the Talmud to be printed in Italy.

The feeling against the Jews themselves, however, remained the same. During the sixteenth and seventeenth centuries they were still subject to the will of the princes and the free cities, both in Catholic and in Protestant countries. The German emperors were not always able to protect them, even when they desired to do so, as did the chivalrous Emperor Maximilian I.; they could not prevent the accusations of ritual murder and of desecration of the host. The unending religious controversies that rent the empire and finally led to the Thirty Years' war further aggravated the position of the Jews, who were made the prey of each party in turn. The emperors even occasionally expelled their "Kammerknechte" from their crown lands, although they still assumed the office of protector. Ferdinand I. expelled the Jews from Lower Austria and Görz, and would have carried out his vow to banish them also from Bohemia had not the noble Mordecai Zemah Cohen of Prague induced the pope to absolve the emperor from this

Sixteenth and Seventeenth Centuries.

Von Gottes Gnaden Wir Wilhelm der Erste,

des Heiligen Römischen Reichs Kurfürst, Landgraf zu Hessen, Fürst zu Hersfeld,

Gefürsteter Grafschaft Hanau, Graf zu Catzenelnbogen, Ziegenhain, Nidda und Schaumburg ꝛc. ꝛc.

Thun Kund und bekennen hiermit öffentlich, daß Wir, jedoch mit Vorbehalt anderwärtiger Verordnung, den Juden Herz Moses Abraham Sohn des verstorbenen Moses Abrahams Hof sich mit Weib und Kindern zu Cassell — — — — niederzulassen und daselbst in Unsern Schutz auf- und angenommen haben, dergestalt, daß sie sich denen allgemeinen Landes-Gesetzen sowohl, als besonders denen bereits erlassenen und noch ferner-hin ergehenden landesherrlichen Verordnungen in Allem gemäß verhalten, auch solchen weder, Niemanden mit unmäßigem Wucher beschweren oder vervortheilen sollen.

Für diesen Unsern landesherrlichen Schutz soll ermeldeter Jude, für sich und seine Familie, außer den gewöhnlichen Silber- Kriegsbeytrags- und sonstigen Geldern, die sie, wie die übrigen in Unsern Landen wohnenden Juden, zu geben schuldig sind, oder Wir ihnen nach Zeit und Umständen, auflegen werden, jährlich Zehen Goldgulden, oder — Pfr. Schutz- und für dasmahl — Rthlr. — Alb. Pfr. Einzugsgeld in Unsere Landschaft zu Cassel gehörig entrichten und dahingegen haben Wir ihnen allen aufrichtigen und denen Juden in den landesherrlichen Verordnungen zugelassenen Handel in Unsern — — — —

vow. Emperor Leopold I. expelled them in 1670 from Vienna and the archduchy of Austria, in spite of their vested rights and the intercession of princes and ecclesiastics; the exiles were received in Brandenburg. The "Great Elector," Frederick William (1620–88), deciding to tolerate all religious beliefs impartially, protected his new subjects against oppression and slander. In spite of the civic and religious restrictions to which they were subjected even here, the Jews of this flourishing community gradually attained to a wider outlook, although their one-sided education, the result of centuries of oppression, still severed them entirely from European culture and kept them in intellectual bondage.

Fortunately, the Jews had kept their piety, their morality, and their intellectual activity. They were devoted to the study of the Halakah.

Literature. In the eleventh century R. Gershom's pupils had been the teachers of Rashi, and his excellent commentaries on the Bible and Talmud marked out new paths for learning. The German Jews contributed much to the spread and completion of these commentaries. Beginning with the twelfth century they worked independently, especially in the fields of Haggadah and ethics. R. Simon ha-Darshan's "Yalḳuṭ" (*c.* 1150), the "Book of the Pious" by R. Judah ha-Ḥasid of Ratisbon (*c.* 1200), the "Salve-Mixer" (Rokeaḥ) of R. Eleasar of Worms (*c.* 1200), the halakic collection "Or Zarua'" of R. Isaac of Vienna (*c.* 1250), the responsa of R. Meïr of Rothenburg (d. 1293), are enduring monuments of German Jewish industry. Even the horrors of the Black Death could not completely destroy this literary activity. Profound and wide scholarship was less common after the middle of the fourteenth century, which led to the institution of allowing only those scholars to become rabbis who could produce a written authorization to teach ("hattarat hora'ah") issued by a recognized master. To this period of decline belong also a number of large collections of responsa and of useful commentaries on earlier halakic works. The customs and ordinances relating to the form and order of worship were especially studied in this period, and were definitely fixed for the ritual of the synagogues of western and eastern Germany by Jacob Mölln (Maharil) and Isaac Tyrnau. As it was difficult to produce any new works in the field of the Halakah, and as the dry study of well-worn subjects no longer satisfied, scholars sought relief in the fantastic interpretations and subtle traditions embodied in the Cabala. There arose a new, ascetic view of life, that found literary expression in the "Shene Luḥot ha-Berit" by R. Isaiah Horovitz of Frankfort-on-the-Main (d. 1626), and that appealed especially to the pietistic German Jews. The end and aim of existence were now sought in the aspiration of the soul toward its fountainhead, combined with the endeavor to saturate the earthly life with the spirit of God. By a continuous attitude of reverence to God, by lofty thoughts and actions, the Jew was to rise above the ordinary affairs of the day and become a worthy member of the kingdom of God. Every act of his life was to remind him of his religious duties and stimulate him to mystic contemplation.

The oppressions under which the Jews suffered encouraged this austere view of life. They lived in fear in their Jews' streets, subsisting on what they could earn as pedlers and as dealers in old clothes.

Separation from the World. Cut off from all participation in public and municipal life, they had to seek in their homes compensation for the things denied them outside. Their family life was pure and intimate, beautified by faith, industry, and temperance. They were loyal to their community. In consequence of their complete segregation from their Christian fellow citizens, the German speech of the ghetto was increasingly interlarded with Hebraisms, and also with Slavonic elements since the seventeenth century, when the atrocities of Chmielnicki and his Tatars drove the Polish Jews back into western Germany. As the common people understood only the books written in this peculiar dialect and printed in Hebrew characters, a voluminous literature of edifying, devotional, and belletristic works sprang up in Judæo-German to satisfy the needs of these readers. Although this output was one-sided, presupposing almost no secular knowledge, its importance in the history of Jewish culture must not be underestimated. The study of Bible, Talmud, and halakic legal works, with their voluminous commentaries, preserved the plasticity of the Jewish mind, until a new Moses came to lead his coreligionists out of intellectual bondage toward modern culture.

From Moses Mendelssohn to the Present Time (1750–1900): Moses Mendelssohn located with true insight the point of departure for the regeneration of Jewish life. The Middle Ages, which could take from the Jews neither their faith nor their various intellectual gifts, had yet deprived them of the chief means (namely, the vernacular) of comprehending the intellectual labors of others. The chasm that in consequence separated them from their educated fellow citizens was bridged by Mendelssohn's translation of the Torah into German. This book became the manual of the German Jews, teaching them to write and speak the German language, and preparing them for participation in German culture and secular science. Mendelssohn lived to see the first-fruits of his endeavors. In 1778 his friend David Friedländer founded the Jewish free school in Berlin, this being the first Jewish educational institution in Germany in which the entire instruction, in Scripture as well as in general science, was carried on in German only. Similar schools were founded later in Breslau (1792), Seesen (1801), Frankfort-on-the-Main (1804), Wolfenbüttel (1807), Brody and Tarnopol (1815). In 1783 the periodical "Der Sammler" was issued with the view of providing general information for adults and of enabling them to express themselves in pure, harmonious German.

Moses Mendelssohn.

A youthful enthusiasm for new ideals at that time pervaded the entire civilized world; all religions were recognized as equally entitled to respect, and the champions of political freedom undertook to restore the Jews to their full rights as men and citizens. The humane German emperor Joseph II. was foremost in espousing these new ideals. As early as

1782 he issued the "Patent of Toleration for the Jews of Lower Austria," establishing thereby the civic equality of his Jewish subjects. Prussia conferred citizenship upon the Prussian Jews in 1812, though this by no means included full equality with other citizens. The German federal edicts of 1815 merely held out the prospect of full equality; but it was not realized at that time, and even the promises that had been given were modified. In Austria many laws restricting the trade and traffic of Jewish subjects remained in force down to the middle of the last century, in spite of the patent of toleration. Some of the crown lands, as Styria and Upper Austria, forbade any Jews to settle within their territory; in Bohemia, Moravia, and Silesia many cities were closed to them. They were, in addition, burdened with heavy taxes and imposts.

In Prussia, also, the government modified materially the promises made in the disastrous year 1813. The promised uniform regulation of Jewish affairs was time and again postponed. In the period between 1815 and 1847 there were no less than twenty-one territorial Jews' laws in the eight provinces of the Prussian state, of which each one had to be observed by a part of the Jews. There was at that time no official authorized to speak in the name of all German Jews. Nevertheless a few courageous men came forward to maintain their cause, foremost among them being Gabriel Riesser, a Jewish lawyer of Hamburg (d. 1863), who demanded full civic equality for his race from the German princes and peoples. He aroused public opinion to such an extent that this equality was granted in Prussia April 6, 1848; in Hanover and Nassau respectively Sept. 5 and Dec. 12 of the same year. In Württemberg equality was conceded Dec. 3, 1861; in Baden Oct. 4, 1862; in Holstein July 14, 1863; in Saxony Dec. 3, 1868. After the establishment of the North-German Confederation by the law of July 3, 1869, all existing restrictions imposed upon the followers of different religions were abolished; this decree was extended to all the provinces of the German empire after the events of 1870.

The intellectual development of the Jews kept pace with their civic enfranchisement. Recognizing that pursuit of modern culture would not at once assure them the civic status they desired, their leaders set themselves to reawaken Jewish self-consciousness by applying the methods of modern scholarship to the study of Jewish sources, and to stimulate the rising generation by familiarizing them with the intellectual treasures of their forefathers which had been accumulating for thousands of years; and at the same time they sought to rehabilitate Judaism in the eyes of the world. The leader of this new movement and the founder of modern Jewish science was Leopold Zunz (1794–1886), who united broad general scholarship with a thorough knowledge of the entire Jewish literature, and who, with his contemporary Solomon Judah Löb Rapoport of Galicia (1790–1867), especially aroused their coreligionists in Germany, Austria, and Italy. The German scholars who cooperated in the work of these two men may be noted here. H. Arnheim wrote a scholarly manual of the Hebrew language; Julius Fürst and David Cassel compiled Hebrew dictionaries; Fürst and Bernhard Bär compiled concordances to the entire Bible; Adolf Heidenheimer and S. Bär edited correct Masoretic texts of the Bible, and S. Frensdorff subjected the history of the Masorah to a thoroughly scientific investigation; the Bible was translated into German under the direction of Zunz and Salomon; Ludwig Philippson, Solomon Hirscheimer, and Julius Fürst wrote complete Biblical commentaries; H. Grätz and S. R. Hirsch dealt with some of the Biblical books; Zacharias Frankel and Abraham Geiger investigated the Aramaic and Greek translations. Nor was the traditional law neglected. Jacob Levy compiled lexicographical works to the Talmud and Midrashim. Michael Sachs and Joseph Perles investigated the foreign elements found in the language of the Talmud. Numerous and, on the whole, excellent editions of the halakic and haggadic midrashim were issued—for instance, Zuckermandel's edition of the Tosefta and Theodor's edition of Midrash Rabbah to Genesis. Zacharias Frankel wrote an introduction to the Mishnah and to the Jerusalem Talmud, and David Hoffmann and Israel Lewy investigated the origin and development of the Halakah.

Jewish Science.

Religio-philosophical literature was also assiduously cultivated, and the original Arabic texts of Jewish religious philosophers were made accessible. H. Landauer issued Saadia's works, and H. Hirschfeld the works of Judah ha-Levi. M. Joel and I. Guttmann investigated the works of the Jewish thinkers and their influence on the general development of philosophy, while S. Hirsch attempted to develop the philosophy of religion along the lines laid down by Hegel, and Solomon Steinheim propounded a new theory of revelation in accordance with the system of the Synagogue.

The extensive field of Jewish history was cultivated still more enthusiastically—by I. M. Jost, David Cassel, L. Landshuth, L. Herzfeld, A. Berliner, and, foremost among them all, H. Grätz. His large work in twelve volumes, covering the 3,000 years of Jewish history down to recent times, is considered the most brilliant product of modern Jewish scholarship. Moritz Steinschneider has written a history of Jewish literature, and has issued catalogues of the most famous collections of Hebrew manuscripts and books, while single epochs of Jewish history and literature have been treated by numerous scholars.

The enfranchisement of the Jews and the reflorescence of Jewish science led to a reorganization of their institutions with a view to transmitting the ancient traditions intact to the new generations. Opinions differed widely as to the best methods of accomplishing this object. While Geiger and Holdheim were ready to meet the modern spirit of liberalism, Samson Raphael Hirsch defended the customs handed down by the fathers. And as neither of these two tendencies was followed by the mass of the faithful, Zacharias Frankel initiated a moderate Reform movement on a historical basis, in agreement with which the larger German communities reorganized their public worship by reducing the medieval payyeṭanic additions to the prayers,

Reorganization.

introducing congregational singing and regular sermons, and requiring scientifically trained rabbis.

It was easier to agree upon the means of training children for the Reformed worship and of awakening the interest of adults in Jewish affairs in general. The religious schools were an outcome of the desire to add religious instruction to the secular education of the Jewish children prescribed by the state. As the Talmudic schools, still existing in Germany in the first third of the nineteenth century, were gradually deserted, rabbinical seminaries were founded, in which Talmudic instruction followed the methods introduced by Zacharias Frankel in the Jewish Theological Seminary opened at Breslau in 1854. Since then special attention has been devoted to religious literature. Text-books on religion and on Biblical and Jewish history, as well as aids to the translation and explanation of the Bible and the prayer-books, were compiled to meet the demands of modern pedagogics. Pulpit oratory began to flourish as never before, foremost among the great German preachers being M. Sachs and M. Joël. Nor was synagogal music neglected, Levandowsky especially contributing to its development.

Religious Education.

The public institutions of the Jewish communities serve to supplement the work of teachers and leaders, and to promote Jewish solidarity. This is the primary object of the Jewish press, created by Ludwig Philippson. In 1837 he founded the "Allgemeine Zeitung des Judenthums," which has been followed by a number of similar periodicals. They have succeeded in preserving a certain unity of religious opinion and conviction among the Jews, with the gratifying result of unity of action for the common good. Societies for the cultivation of Jewish literature were founded, as well as associations of teachers, rabbis, and leaders of congregations.

E. C. M. Br.

GERNSHEIM, FRIEDRICH: German pianist and composer; born at Worms July 17, 1839. He was a pupil of L. Liebe, Pauer, Rosenhain (piano), I. C. Hauff (theory), and H. Wolff (violin).

At the age of eleven Gernsheim made his first public appearance at a concert in the Frankfort Theater, on which occasion one of his compositions, an overture, was performed. He later (1852) made a tour through the Palatinate and Alsace as far as Strasburg. Proceeding to Cologne, and thence to Leipsic, he continued his studies for three years with Moscheles, Hauptmann, Rietz, and Richter. After a supplementary course at Paris (1855–61), he gave there a series of concerts, and was recognized as one of the best interpreters of Chopin and Schumann.

Gernsheim became musical director at Saarbrück as successor to Herman Levi in 1861, and in 1865 was called to the Conservatorium of Cologne, where he was shortly afterward appointed musical director of the Musikalische Gesellschaft, the Städtischer Gesangverein, and the Sängerbund. The leadership of the opera orchestra at the Stadttheater was also entrusted to him (1873). He went to Rotterdam in 1874 as director of the Conservatorium and conductor of the "winter concerts"; and since 1890 has been teacher at the Stern Conservatorium at Berlin and conductor of the Choral Society connected with that institution. In 1897 he became a member of the senate of the royal academy of fine arts at Berlin, and in 1901 was appointed president of the Akademische Meisterschule für Musikalische Komposition.

It is as a composer that Gernsheim is most favorably known. His works are chiefly instrumental, and include the following: four symphonies, many compositions for male or mixed chorus and orchestra, a pianoforte concerto, a violin concerto, a pianoforte quintet, three pianoforte quartets, two pianoforte trios, one string quintet, two string quartets, two violin sonatas with pianoforte, a sonata for pianoforte and violoncello, songs, etc.

GERÖ, KARL: Hungarian dramatist; born at Hévizgyörk Oct. 18, 1856; studied law at Kaschau and Budapest. While still a student he devoted much time to literature and esthetics, attending lectures on those subjects, and frequently visiting the theater. His first play, written at this time, "Turi Borcsa," was produced at the People's Theater of Budapest (1883), when he accepted the position of playwright at that theater. In 1886 he was appointed secretary of the Hungarian People's Theater, but retained this position for a short time only. His most important plays, dealing chiefly with Hungarian popular life, are as follows: "Vadgalamb," "Az Eladó Leány" (crowned by the Hungarian Academy of Sciences), "Az Uzsai Gyöngy," "Angyal és Ordög," "Probaházasság," "A Vadonban" (crowned).

GERON. See Ghiron.

GERONA (ירונדא, גירונא, גירונה, ירונה; formerly **Gerunda**): Fortified city in northern Spain. As early as 1002 Pope Sylvester acknowledged to Bishop Odo of Gerona the receipt of the tax ("census") of the Jewish community there ("Marca Hispanica," Appendix, No. 150, p. 959). The Jews were in possession of houses and lands, which they could hold without restriction; but the councils of Gerona (1068, 1078) decided that a tenth of any landed property which a Jew acquired from a Christian should accrue to the state. The Jews lived in a separate quarter situated at the outermost end of the fortifications on the right bank of the River Onyar, which intersected the city. The quarter included a rather long lane called Carre de S. Lorenzo, or Calle de la Forsa, north of which was the real Calle Judaica; then came the Carre de la Ruca, a continuation of which was the Carre de la Claveria. From this opened a narrow street which led to the synagogue and extended to the Carre de S. Lorenzo. The Calle Judaica with the market-place formed the center of the Juderia. At the end of the Calle de la Forsa stood the Jewish assembly-hall or communal house, now the Church of the MM. Escolapias, near which was the house of the wealthy Bonastruc

Situation of Jewry.

family; and not far off was the house of the rich Jew Abraham Isaac. The Jewish cemetery, as in Barcelona, was on the Monjuich, a hill near the city, called "Monte Judaico" in the old records. A hundred years ago Hebrew inscriptions were still found in this cemetery, the "Fossar dels Juheus."

The Jews of Gerona lived undisturbed under the Saracens and during the long reign of King Jaime the Conqueror. The latter showed himself just and even benevolent toward them. In 1229 he fixed their rate of interest at 20 per cent; at the instance of the Bishop of Gerona, he forbade Christian women to live in the same house with Jews; and he directed the officials to act justly toward the Jews as debtors. In 1257 he appointed Bonastruc de Porta as "bayle" of Gerona, and Astruc Ravaya (whom he released from all taxes for life) and his son Yucef as tax-farmers. To Bonastruc de Porta, "maestro de los Judios de Gerona," who is identified by Graetz and others with Rabbi Moses ben Naḥman, he gave a mill located in the market-place. This learned Jew was invited by the king himself to take part in a public debate on Judaism and Christianity with the Dominican Pablo Christiani at Barcelona in 1263. The evil effects of this discussion were soon felt in Gerona, a city which was the seat of a fanatical bishop, and in which a strong clerical spirit was predominant. On a certain Good Friday the antagonism against the Jews manifested itself in an outbreak of such vehemence that the king was obliged to interfere with an armed force.

The subsequent history of the Jews in Gerona is a long series of molestations and persecutions. After the accession of Pedro III., at a time of general insurrection against the king, the clergy, with a mob incited by them, attacked the Jews and their houses, laid waste their vineyards and olive-orchards, and devastated their cemetery. When the town-crier gave warning in the name of the king against a repetition of such excesses, the clergy made such a tumult that his voice could not be heard. Pedro, who in 1276 had given the taxes from the Gerona Jewry to his wife, Constança, regarded these disturbances as a personal insult as well as an injury to the treasury, and in a document dated April, 1278, remonstrated earnestly with Bishop Pedro de Castellnou, who had showed himself ill disposed toward the Jews, and also with the "bayle" of the city. When in 1285 Gerona was preparing to defend itself against the advancing French army, the Spanish mercenaries forced their way, murdering and plundering, into the Jewry. Pedro had some of the guilty persons hanged.

Persecutions.

The persecution of the Pastoureaux also affected the Jews of Gerona. During the Black Death (1348) the loss of life in Gerona was appalling, two-thirds of the population being swept away. At the end of May, 1348, the people, incited by certain of the knights and clergy, removed Jewish corpses from their graves and burned them together with the bodies of the Jews whom they had killed.

The Jewish community of Gerona, at the head of which was a directorial board consisting of twenty persons, was distinguished for its size, prosperity, and piety. Toward the end of the fourteenth century it was so wealthy that it was required by the authorities to defray half the expenses incurred in erecting the city fortifications. Its burden of taxation was both excessive and oppressive. In addition to the usual taxes, which amounted annually to 13,000 sueldos, the Jews had to pay 500 sueldos at each coronation and were further required to make extra contributions on many occasions. In 1314, in order to enable Jaime II. to purchase the county of Urgel, the Jewries of Gerona, Valencia, Lerida, Barcelona, and Tortosa placed 11,500 libras at his disposal. As a sign of his appreciation he released them from paying taxes for four years. When Pedro IV. in 1343 was in need of money for the purpose of conquering the county of Roussillon, he summoned the Jewish communities of Gerona, Barcelona, and other towns to come to his aid immediately ("Coll. de Documentos Ineditos," xxxi. 291). The kings regarded the Jews as a reliable source of income, and were not averse to seeing the communities increase in size; thus in 1306 the Jewry of Gerona was permitted to receive ten of the Jewish families driven out of France.

Contributions to the Treasury.

After 1391, however, the splendor of the Jewry in Gerona disappeared, and the community fell into an impoverished condition. All sorts of crimes were laid at the door of the Jews as pretexts for tormenting and oppressing them. The persecutions of the year 1391 began on Aug. 10, St. Lorenzo's Day. Armed peasants in large numbers ran furiously into the Jewry, attacked the unarmed Jews without mercy, butchered them in the most cruel manner, and burned their houses and goods. According to a report presented by the councilors to the King and Queen of Aragon on Aug. 13, 1391 (which report agrees with that of Ḥasdai Crescas), many Jews were killed, while only a few embraced Christianity in order to save themselves. The remainder sought protection in the fortified tower of Geronella, but even there they were attacked by the peasants (Aug. 18), and, as the councilors reported to John I. on Sept. 11, were daily insulted and derided. On Sept. 18 the councilors again complained to the king that the peasants of the vicinity had united with the knights and clergy, and were planning a new attack upon the Jews, and that they themselves were not in a position to protect them. Not until a year had passed did Queen Violante, wife of John I., commend the Jews to the protection of the city and advise clemency with regard to the taxes, which they were unable to pay (Sept. 25, 1392). After still another attack had been made on the Jews and many of them had been forced to accept baptism, John I., who cared more for the dance and the chase than for affairs of state, commanded the "jurados" of Gerona to punish the ringleaders with great severity (Feb. 1, 1393). The sentence was repealed the same day, however, and the punishment changed into a money fine which would fall to the king. Martin I., brother and successor of John, was more energetic in his measures against those who attacked the Jews in the tower of Geronella in 1391.

On Dec. 8, 1412, Pope Benedict XIII. sent through Bishop Ramon de Castellar a command to the com-

munity in Gerona to send delegates to the disputation at Tortosa. The representatives of Gerona at that time were Bonastruc Desmaëstre, Azay Toros (Todros), Nissim Ferrer, Jaffuda (Judah) Alfaquin ("the physician"), and Bonastruc Joseph. Of these Azay Todros (ben Yaḥya) and the learned Bonastruc Desmaëstre were chosen to go to Tortosa. Scarcely had the disputation commenced when a popular uprising against the Jews broke out in Gerona itself, probably on account of the speeches made by the delegates from that city. The king punished by a fine of 20 sueldos, or twenty days' imprisonment, any insult to a Jew or damage to his property.

Share in the Tortosa Disputation.

The Jews were held responsible for every accident and misfortune that befell the city. When the old tower of Geronella fell in 1404, the clergy announced that this was God's punishment upon the city for tolerating the Jews within its walls; and even the terrible earthquake which visited Gerona and its vicinity in 1427 was laid at their door. The lives of the Jews were in danger on every Christian feast-day and during every procession. On the occasion of one procession (April 16, 1418), which purposely went through the Jewry, the young clergy together with a large crowd forced their way into the synagogue, shattered doors and windows, and tore up all the books they could find. To put an end to such frequently recurring excesses, the Jewry was shut off on the side of Calle de S. Lorenzo, and Jews were forbidden to live in that street. They were forced to attend church in order to hear sermons for their conversion; and in 1486 they were compelled to wear special clothing in order to distinguish them from Christians.

The Jews left Gerona on Aug. 2, 1492, only a few accepting baptism; and the houses in the Jewry were sold at auction. The old synagogue, which had been destroyed in 1285 with the rest of the Jewry—the Jews apparently having been driven out (Solomon ibn Adret, Responsa, No. 634)—and rebuilt some years later, passed in 1494 into the possession of the presbytery of the cathedral, and, unaltered in its main features, now belongs to D. José Bover de Besalu. An inscription pertaining to it, found about fifteen years ago, is now in the Archeological Museum at Gerona.

Expulsion in 1492.

Gerona, a strictly religious community, in which much attention was paid to the study of the Talmud, was the birthplace of several men bearing the cognomen "Gerondi," who have made the city famous. Among the scholars who lived in Gerona were: Isaac ha-Levi and his son, Zerahiah ha-Levi; Jonah ben Abraham Gerondi, Nissim ben Reuben Gerondi (RaN), Abraham Ḥazzan Gerondi, Isaac b. Judah Gerondi, Solomon ben Isaac Gerondi (a pupil of Moses b. Naḥman), Moses de Scola Gerondi, Samuel b. Abraham Saporta (a tombstone of Enoch ben Shealtiel Saporta, who died in 1312, was found in Gerona in 1873), the eminent Moses ben Naḥman (RaMBaN), called "Rab d'España"; and his son, Naḥman ben Moses. Gerona was also the birthplace of the cabalists Azriel and Ezra and of Jacob ben Sheshet Gerondi. The tombstone of a Joshua ben Sheshet and his wife was found on the Monjuich near Gerona in 1883.

G. M. K.

GERONDI, ISAAC B. ZERAHIAH HA-LEVI (called also **Ha-Yiẓhari**, היצהרי): Talmudist; lived in Gerona in the twelfth century. He was the father of Zerahiah ha-Levi, author of "Sefer ha-Ma'or," and of Berachiah ha-Levi, author of some piyyuṭim; among the latter are to be found compositions for Sabbath Parah which perhaps formed a supplement to Gerondi's poems for the four special Sabbaths (ארבע פרשיות). Gerondi is the author of "Megillat ha-Neḥamah," a work on civil law, which is no longer extant. Of his religious poems about fifty have been preserved; they include piyyuṭim for Sabbaths Sheḳalim, Zakor, and Rosh ha-Ḥodesh, for the Feast of Weeks, and for the Day of Atonement (among them a so-called "Short 'Abodah" for Shaḥarit, beginning ייקר הגות חין, and quoted by Isaac Ḳimḥi); a piyyuṭ on the death of Moses, one for Simḥat Torah, and some seliḥot. In his poetry he makes use of meter, for which he expresses a preference.

Gerondi's poems are highly praised by Menahem di Lonsano, and have been introduced into the rituals of Avignon, Carpentras, Montpellier, Oran, and Tlemçen; some are also found in "Ayyelet ha-Shaḥar," as well as in the French, Polish, and Roman rituals. He wrote an Aramaic poem to Zerahiah's "Sefer ha-Ma'or," in which he clearly demonstrates his familiarity with the Aramaic idiom.

Bibliography: Conforte, *Ḳore ha-Dorot* (ed. Cassel), p. 13b; Reifmann, *Toledot Rabbi Zeraḥyah ha-Levi*, pp. 3, 37; Landshuth, *'Ammude ha-'Abodah*, p. 116; Zunz, *Literaturgesch.* pp. 410, 463; Luzzatto, *Naḥalat*, p. 43; Gross, *Gallia Judaica*, p. 255.

GERONDI, JONAH B. ABRAHAM (HE-ḤASID), THE ELDER: Spanish rabbi and moralist of the thirteenth century; died in Toledo, Spain, Nov., 1263; a cousin of Naḥmanides. He came from Gerona, in Catalonia. Gerondi was the most prominent pupil of Solomon of Montpellier, the leader of the opponents of Maimonides' philosophical works, and was one of the signers of the ban proclaimed in 1233 against the "Moreh Nebukim" and the "Sefer ha-Madda'." According to his pupil, Hillel of Verona, Gerondi was the instigator of the public burning of Maimonides' writings by order of the authorities at Paris in 1233, and the indignation which this aroused among all classes of Jews was mainly directed against him. Subsequently (not forty days afterward, as a tradition has it, but in 1242; see note 5 to Grätz, "Geschichte," vol. vii.), when twenty-four wagon-loads of Talmuds were burned at the same place where the philosophical writings of Maimonides had been destroyed, Gerondi saw the folly and danger of appealing to Christian ecclesiastical authorities on questions of Jewish doctrine, and publicly admitted

in the synagogue of Montpellier that he had been wrong in all his acts against the works and fame of Maimonides. In his repentance he vowed to travel to Palestine and prostrate himself on the grave of the great teacher and implore his pardon in the presence of ten men for seven consecutive days. He left France with that intention, but was detained, first in Barcelona and later in Toledo. He remained in Toledo, and became one of the great Talmudical teachers of his time. In all his lectures he made a point of quoting from Maimonides, always mentioning his name with great reverence. Gerondi's sudden death from a rare disease was considered by many as a penalty for not having carried out the plan of his journey to the grave of Maimonides.

Gerondi left many works, of which only a few have been preserved. The "Ḥiddushim" to Alfasi on Berakot which are ascribed to "Rabbenu Jonah" were in reality written in Gerondi's name by one, if not several, of his pupils. The "Ḥiddushim" originally covered the entire work of Alfasi, but only the portion mentioned has been preserved. Gerondi wrote novellæ on the Talmud, which are often mentioned in the responsa and decisions of his pupil Solomon Adret and of other great rabbis, and some of which are incorporated in the "Shiṭṭah Mekubbeẓet" of R. Bezalel Ashkenazi. Azulai had in his possession Gerondi's novellæ on the tractates Baba Batra and Sanhedrin, in manuscript ("Shem ha-Gedolim," p. 75, Wilna, 1852). His novellæ on the last-named tractate form part of the collection of commentaries on the Talmud by ancient authors published by Abraham b. Eliezer ha-Levi under the title "Sam Ḥayyim" (Leghorn, 1806; see Benjacob, "Oẓar ha-Sefarim," p. 422). His commentary on Pirḳe Abot was first published by Simḥah Dolitzki of Bielostok (Berlin and Altona, 1848). The work "Issur we-Heter" is wrongly attributed to Gerondi. A commentary by him on Proverbs, which is very highly praised (see Baḥya b. Asher's preface to his commentary on the Pentateuch), exists in manuscript. Among other minor unpublished works known to be his are "Megillat Sefarim," "Hilkot Ḥanukkah," and "Hilkot Yom Kippur."

But the fame of Gerondi chiefly rests on his moral and ascetic works, which, it is surmised, he wrote to atone for his earlier attacks on Maimonides and to emphasize his repentance. His "Iggeret ha-Teshubah," "Sha'are Teshubah," and "Sefer ha-Yir'ah" belong to the standard Jewish ethical works of the Middle Ages, and are still popular among Orthodox preachers. The "Sefer ha-Yir'ah" was published as early as 1490, as an appendix to Joshua b. Joseph's "Halikot 'Olam" (see Zedner, "Cat. Hebr. Books Brit. Mus." p. 783). The "Sha'are Teshubah" first appeared in Fano (1505) with the "Sefer ha-Yir'ah," while the "Iggeret ha-Teshubah" was first published in Cracow (1586). All have been reprinted many times, separately and together, as well as numerous extracts from them; and they have been translated into Judæo-German. A part of the "Iggeret ha-Teshubah" (sermon 3) first appeared, under the name "Dat ha-Nashim," in Solomon Alami's "Iggeret Musar" (see Benjacob, *l.c.* p. 123). For an estimate of Gerondi's ethical works and his partial indebtedness to the "Sefer Ḥasidim" see "Zur Geschichte der Jüdisch-Ethischen Literatur des Mittelalters" (in Brüll's "Jahrb." v.–vi. 83 *et seq.*). He is also supposed to be mentioned, under the name of "R. Jonah," five times in the Tosafot (Shab. 39b; M. Ḳ. 19a, 23b; Ned. 82b, 84a; see Zunz, "Z. G." p. 52, Berlin, 1845).

GERONDI, MOSES B. SOLOMON D'ESCOLA (דושקולא, דאשקולא, דישקולא; also ששקולה = "Escola"): Hebrew poet; relative of Moses Naḥmanides; lived at Gerona, Catalonia, in the second half of the thirteenth century. In the letter Naḥmanides wrote to his son from Jerusalem he sends his greetings to Gerondi, whom he calls "beni wetalmidi," and asks his son to tell the poet that he has read his (Gerondi's) verses with bitter tears on the Mount of Olives, opposite the Temple. This refers probably to a dirge on the destruction of Jerusalem which Landshuth takes to be identical with the elegy ירושלים עיר הקדש צאי included in Naḥmanides' commentary to the Pentateuch (toward the end). Of Gerondi's religious poems only a Ḳaddish for Sabbath Zakor, מחדשי שיר בעת חדש שירו חדש, and a pizmon for Purim, שיר אהבה חדש שירו לאל, are known; perhaps he also wrote the piyyuṭ המן נלכד ומרדכי נושע. Rapoport-Hartstein in his "Toledot ha-Ramban," p. 13, Cracow, 1898, identifies him curiously enough with the German Moses b. Solomon ha-Kohen.

Bibliography: Zunz, *Literaturgesch.* p. 482; Landshuth, *'Ammude ha-'Abodah*, pp. 235, 259; Gross, *Gallia Judaica*, p. 147.

GERSHOM (גרשם): First-born son of Moses and Zipporah (Ex. ii. 22, xviii. 3). The circumcision of a child of Moses described in Ex. iv. 25 is evidently that of Gershom, but the Midrash refers it to Eliezer. As to the Gershom mentioned in Judges xviii. 30 see Jonathan (son of Gershom). Gershom is mentioned in I Chron. xxiii. 15–16, xxvi. 24 as the founder of a Levitic family.

E. G. H. M. Sel.

GERSHOM BEN JUDAH (called also **Gershom ha-Zaḳen** = "Gershom the Elder," and **Me'or ha-Golah** = "Light of the Exile"): French rabbi; born at Metz in 960; died at Mayence in 1040. He was the founder of Talmudic studies in France and Germany. As he himself says in a responsum reported by R. Meïr of Rothenburg, he owed most of his knowledge to his teacher, Judah ben Meïr ha-Kohen (Sir Léontin), who was one of the greatest authorities of his time. Having lost his first wife, Gershom married a widow named "Bonna" and settled
